TANF Dashboard Description

04/2021

NEBRASKA
Good Life. Great Mission.

TANF Dashboard presents the work participation and employment statistics of Nebraska TANF (Temporary Assistance for Needy Families) work-eligible recipients served by EQUUS Workforce Solutions.

TANF Dashboard includes the outcomes established by the Federal Government for FFY 2019 (Federal Fiscal Year 10/2018-09/2019) forward. Previous Nebraska TANF work-eligible data is available upon request.

Performance Measures:

Two of the performance measures are derived from a monthly Employment First Statistical Report completed by EQUUS.

- Work Participation Rate
- New Referrals Contacted Timely

The Work Participation Rate is validated by a statistically valid sample of cases that are read and reviewed by Nebraska Department of Health and Human Services staff. New Referrals Contacted Timely is validated by reviewing a statistically valid sample of cases of the Employment First caseload monthly, which may contain this performance measure.

Federal Measures:

The Federal Government requires each state to achieve a 50% minimum overall Work Participation Rate.

Statistical Data:

The following two measures are for statistical purposes only:

- Participants Obtaining Employment
- Average Starting Wage

There are no contracted or federal requirements in regard to obtaining employment or a minimum or maximum starting wage.
