Chart 1

Safety QA - Questions

Central Service Area - Initial Safety Assessments

Identification of Present Danger

Sample Size: 122 Initial Safety Assessments

Note: 20% of all available Initial Safety Assessments in CSA were reviewed during the period under review.

Chart 2

Central Service Area - Initial Safety Assessments

Immediate Protective Action

Sample Size: 122 Initial Safety Assessments

Note: 20% of all available Initial Safety Assessments in CSA were reviewed during the period under review.

Note: Present Danger was identified by the CFS Specialist in 3 of the reviewed assessments. However, reviewers were unable to assess the quality of the Immediate Protective Action Plans because there were no Immediate Protective Action Plans documented on N-FOCUS to address Present Danger in these 3 instances.

Chart 5

Central Service Area - Initial Safety Assessments

Safety Plans

Total Number of Safety Plans assessed by reviewers = 24

This chart does not include the margin of error for each of the Safety Plan questions due to lack of information regarding the total number of Safety Plans completed in Central Service Area during the period under review.

Chart 6

Note: ***** These questions use a reverse scale (LOWER NUMBER IS BETTER)***

Safety QA - Questions

Central Service Area - Initial Safety Assessments

Safety Plans cont.

Total number of Safety Plans assessed by reviewers = 24

This chart does not include the margin of error for each of the Safety Plan questions due to lack of information regarding the total number of Safety Plans completed in Central Service Area during the period under review.

Chart 7

Central Service Area - Initial Safety Assessments

Protective Capacity Assessment (PCA)

Total Number of PCA's assessed by reviewers = 5

This chart does not include the margin of error for each of the Protective Capacity Assessment questions due to lack of information regarding the total number of PCA's completed in Central Service Area during the period under review.

NOTE: The QA tool does not assess whether or not the worker met their time frame in documenting the Protective Capacity Assessment (PCA) on N-FOCUS. The QA team only reviews the quality of the PCA if it is finalized on N-FOCUS at the time of the review.

Safety QA - Questions

Chart 8

Central Service Area - Initial Safety Assessments

Conditions for Return

Total Conditions of Return assessed by reviewers = 9

This chart does not include the margin of error for each of the Condition of Return questions due to lack of information regarding the total number of COR completed in Central Service Area during the period under review.

NOTE: The QA tool does not assess whether or not the worker met their time frame in documenting the Conditions for Return on N-FOCUS. The QA team only reviews the quality of the Conditions for REturn for children in out of home care at the end of the current assessment if it is finalized on N-FOCUS at the time of the review.
