VACANT POSITION

OUT-GOING CHAIRPERSON'S LETTER

This will be my last newsletter for the Board of Dentistry. In November 2021 I will have completed my second term on the Board, a total of 10 years. Little did I realize that over those 10 years the board would be so involved in creating a new statute for sedation and the move to expand the duties of both dental hygienists and dental assistants. Looking back, the work on the statutes was fairly straightforward compared to the follow-on work of updating the rules and regulations of our profession.

A bit of background on how the Dental Practice Act has recently evolved. Prior to all of these recent changes, the Dental regulations included language from the Dental Practice Act statutes—laws passed by the unicameral, and the rules and regulations. This left us as providers, with one comprehensive document providing all of the particulars, to practice within the law. Then the decision was made statewide to separate all of the statutes from the rules and regulations. Thus began a nearly 3 year process of rewriting the rules and regulations leaving out the statutory language and incorporating all of the changes on sedation and expanded functions. Finally on the December 23rd, 2020 the regulations received final approval. I would highly recommend that you read through the three regulations detailing the practice of dentists, dental hygienists and licensed dental assistants (172 NAC, 56, 57, and 53). These can all be found as links on the DHHS Dentist home page at <https://dhhs.ne.gov/licensure/Pages/Dentist.aspx>, the Secretary of State website at <https://www.nebraska.gov/rules-and-regs/regsearch/Rules/index.cgi>, or Google: Dental Regulations Nebraska. Please review the section on allowable continuing education courses, with the list of allowable topics expanded from prior continuing education courses.

Within the old regulations there was language regarding professional conduct and how this was policed. Each of the practice acts had somewhat similar language scattered throughout their rules and regulations with variations on such things as advertising. The language has now been removed from the rules and regulations section and can be found in the Uniform Credentialing Act (Nebraska Revised Statutes §§38-101 to 38-1,146 which governs a whole list of professions across the state. A link to this document can be found, on the home page. While not all of it is applicable to the day to day practices of dentistry, it does deal with advertising credentials, telemedicine, and Schedule II drugs as well as how the disciplinary process works. The Board depends on the above listed documents for recommending to the Department appropriate discipline for dental providers, and having them in a final, approved version helps clarify the statutory and regulatory basis of a provider's discipline.

In this newsletter you will also find an article on the use of oral sedation (authored by Dr. David Blaha), and a description of the Licensee Assistance Program (LAP). The LAP program provides an avenue for providers to seek help prior to issues raising to the level of discipline (see pages 8 and 9).

I would also like to thank all of the members of our Board of Dentistry for their commitment to our profession and their attention to detail, helping to make critical decisions about our profession in this state, wading through the stack of reading material prior to each board meeting and keeping me on track. Through the passage of the new statutes the Board was given the added responsibility of approving continuing education courses for a number of areas including sedation, expanded functions (placing restorations) and expanded duties (denture adjustments, final impressions). A list of the approved courses are also linked on the home page listed above. I would also like to thank our State Dental Director, Dr. Fritz Craft and the Board of Directors of the Nebraska Dental Association for including the Board of Dentistry in its discussion of decisions regarding dentistry through the COVID-19 crisis. I can't say enough about the dedication of the leaders in dentistry in our state, acting in our behalf to advocate for dentistry during an exceptionally difficult time.

At many of our scheduled board meetings, questions are submitted to the Board asking for guidance from the Board about the legality of providing specific services. There is usually a very robust discussion before coming to a consensus. More recently a couple of topics were discussed. One asked the board to decide if a treatment, such as the ICON system for removing white spots from anterior teeth (usually done after active orthodontic treatment), could be provided by a dental hygienist. The consensus of the board was this service should be provided by a dentist.

Another topic dealt with the services provided by a dentist within the discipline of sleep medicine. The American Academy of Sleep Medicine and American Medical Association issued statements emphasizing that ordering a home sleep test to screen for sleep apnea was only to be provided by a medical provider. The contrasting opinion issued from the American Academy of Dental Sleep Medicine felt that ordering home sleep tests were within the scope of dentistry, arguing that this test is used to collect data for the patient who is then referred to a sleep medicine provider, allowing for a more expedient diagnosis and follow-on treatment. The Board felt that the ordering of a home sleep test would be similar to ordering any other diagnostic test, such as a finger stick glucose measurement for screening for diabetes, providing our medical colleagues with more information upfront for making a diagnosis. The Board also felt that the formal diagnosis is to be carried out by a sleep medicine provider and if indicated, a referral for fabrication of a sleep appliance by a dentist would be appropriate.

Continued to page 3

Meeting Highlights from 2018

January 12, 2018—The Board discussed 2018 legislation that included continuing education requirement for those that prescribe opiates, requirements for opiate prescriptions, and requiring identification prior to receipt of dispensed opiates. The approved the placing of silver diamine fluoride on children in public health settings by a dental hygienist under a public health authorization with proper training and upon receiving an “Informed Consent” form prior to applying the silver diamine.

April 13, 2018—The Board discussed Board Criteria for Approval of new dental assistant credentials.

July 13, 2018— Legislation passed requiring any credential holder that prescribes controlled substances will have to obtain 3 hours of continuing education biennially regarding prescribing opiates. Dentists can included these 3 hours within the 30 hours of continuing education required to renew their dental license.. The Board approved the CRDTS examination for the restorative 1 and 2 permits. The Board also discussed draft regulations for chapters 56, 57 and 53.

October 19, 2018— The Board listened to a presentation by Matt Gelvin, Program manager, Anna Harrison, RN, BSN, Compliance Monitor and Juan Ramirez, Research Assistant regarding disciplinary actions of credential holders over the last 5 years . The Board approved clinical examinations for the 2019 testing season. The Board addresses several practice questions ranging from marketing, tooth impressions for identification, and debridement as a part of oral prophylaxis.

Meeting Highlights from 2019

January 11, 2019—The Board addressed concerns brought to their attention regarding dental hygienists applying silver diamine under a public authorization permit. The Board provided clarification on dentists admitting to hospitals and completing history and physicals.

March 13, 2019—The Board discussed drafted regulations on Chapters 54, 55, 58, and 56.

March 13, 2019—The Board discussed drafted regulations on Chapters 53, 57, and 54.

April 19, 2019—The Board discussed how expanded function hygienists can identify themselves. The Board also provided clarification on the allowable duties of a public health dental hygienist.

July 12, 2019— The Board viewed a presentation for the University of Minnesota regarding their expanded function course. The Board also discussed and agreed that a public health hygienist could supervise nursing students wishing to learn how to place fluoride varnish.

August 30, 2019—The Board approved the draft regulations (Chapters 53, 56, and 57) for public hearing.

October 25, 2019— The Board voted to adopt the regulations for chapters 53, 54, 55, 56, 57, and 58. They discussed a practice question regarding removing white spots using ICON and determined that only a licensed dentist can perform the removal of white spots using icon infiltration. The Board approved clinical examinations for the 2020 testing season.

Meeting Highlights from 2020

January 10, 2020—The Board discussed and approval several expanded scope function courses.

April 10, 2020—The Board held their meeting via conference call due to COVID. The Board discussed COVID-19 issues. The Board viewed a presentation by the Commission on Dental Competency Assessment (CDCA).

July 17, 2020— The Board discussed hearing summaries and adopted recent changes to the regulations for chapters 53, 56, and 57. The Board discussed that the Department developed a waiver form for continuing education for the 2021 renewal period. The Board provided clarification on the use of nitrous oxide when performing minimal sedation.

October 9, 2020— The Board addressed a practice question regarding IV therapy and determined that it is not within the scope of practice for a dentist to provide IV vitamin and mineral therapy. The Board continued discussing issues involving COVID-19. The Board also viewed a presentation from the CDCA regarding the American Dental Examination (ADEX) Pathway. The Board also approved clinical examination for the 2021 testing season.

Chair's Letter Continued

As some of you may be aware the federal government, as part the management of the COVID-19 pandemic issued the Public Readiness and Emergency Preparedness Act (PREP Act) declarations dated March 11, 2021, which provides immunity from liability for certain types of claims against individuals who were used to give specific vaccinations. The Department reviewed the declarations and determined it would not challenge the authority for, or the declaration itself. If you are interested in providing vaccinations, I encourage you to review the PREP Act for specifics about requirements and the liability of providing this type of care under the federal umbrella.

And in closing I would be lacking in my duties as Chairperson if I failed to thank the DHHS staff members and the Assistant Attorney General attorney for their expert advice in our day to day decision making. Without them guiding the Board through our statutory duties, we would be totally lost. Little did I realize when I was appointed to the Board, how important these individuals were to keeping our decisions on track and legal, which has become even more evident when I assumed the duties of the Chairperson. While all of these individuals have commitments across multiple boards with their respective needs, it always feels like we have our own personal staff members who answer our questions promptly with the utmost courtesy. Again, a hearty thank you to our support staff, you are a true credit to your departments.

Sincerely,

Meeting Highlights from 2021

January 8, 2021—The Board discussed dental hygienist taking dental radiographs in a public health settings under a public health authorization as long as a dentist has authorized taking the dental radiographs and a dentist is reading the radiographs and providing follow-up as needed. The board approved performing 5 year moderate and general sedation inspection on offices remotely.

April 9, 2021—The Board discussed COVID-19 issues specifically dentist giving the vaccine. The Board also discussed dentistry's role in sleep medicine.

July 9, 2021— The Board listened to an explanation of the use of new simodont for testing provided by the Central Regional Dental Testing Service (CRDTS). The Board discussed the placing of tooth gems and determined that based on the information provided that it is clearly not the practice of dentistry. The Board also discussed whether a dental assistant could place sealants and it was determined that this would need to be a statutory change. The Board created an ad hoc committee to discussed Board composition.

October 8, 2021— The Board again listened to an explanation of the use of new simodont for testing provided by the Central Regional Dental Testing Service (CRDTS). The Board discussed acceptable clinical examinations for 2022 dental and dental hygiene graduates. Draft regulations were reviewed for reciprocity language from LB 390.

Minimal Sedation in the Dental Office

Written by David Blaha, DDS

Anxiety reducing techniques utilizing primarily oral medications have been around in many forms for quite some time. It has only been in recent years that efforts have been aimed at regulating the use of what we now customarily define as Minimal Sedation. The ultimate goal of regulation is to provide the highest margin of safety for our patients. Minimal Sedation techniques will likely be a big part of many practices in the foreseeable future. Since the Minimal Sedation permit is relatively new to the State of Nebraska, it seems prudent to highlight some of the more important aspects of its use and answer some common questions received by your Board of Dentistry.

Minimal Sedation is defined as a minimally depressed level of consciousness provided by a pharmacological method, that retains the patient's ability to independently and continuously maintain an airway and respond normally to tactile stimulation and verbal commands.

Although cognitive function and coordination may be moderately impaired, ventilatory and circulatory functions are unaffected.

A very common scenario includes a Benzodiazepene drug with or without nitrous oxide. Current guidelines and recommendations are that only one oral medication be utilized. By definition, if more than one oral medication is used, the technique has entered the realm of Moderate Sedation and must follow regulations appropriate for that level of anesthesia.

Historically, the move to regulate the practice of Minimal Sedation was due to morbidity and even mortality from excessive doses of oral medications. Hence the concept of MRD (Maximum Recommended Dose) has become an important part of current discussion and guidelines. Limiting the dose of an oral medication to the MRD of the drug for unmonitored home use is intended to avoid an unexpected loss of consciousness and/or placing the patient in a much deeper level of anesthesia than intended. Most sources seem to agree that a single drug, in either single or divided doses, not to exceed the MRD of the drug, will achieve effective sedation and provide a generous margin of safety.

Minimal Sedation in the Dental Office

(continued)

Nebraska Revised Statute 38-1141 is your resource for requirements to apply for a Permit to administer Minimal Sedation. Title 172, Chapter 56 of Rules and Regulations specifically addresses facility requirements in more detail. These documents are easily accessible on the DHHS dental licensing site.

Common FAQ's include:

Q: May a night before sedative dose be given? A: Yes

Q: May nitrous oxide be given with a single oral drug? A: Yes

Q: Is it okay for the patient to take the initial oral dose on the way to the office? A: Yes

Q: Does the patient require an escort to and from the appointment? A: Yes - remind patients not to drive themselves

Q: Should the informed consent be completed prior to the patient taking the medications? A: Yes

And as always, the capable of friendly staff in DHHS licensing are happy to answer any questions regarding Nebraska anesthesia permits. They may be reached at 402-471-2118

NEED FOR CONSUMER MEMBERS ON SEVERAL PROFESSIONAL BOARDS

We are still seeking public members for the boards of Dentistry; Funeral Directors and Embalmers; Hearing Instrument Specialists; and Medical Nutrition Therapy. <https://dhhs.ne.gov/licensure/Pages/Board-Requirements-and-Vacancies.aspx>. These boards meet from 1-4 times per year. Please share this opportunity with unlicensed friends, neighbors, etc. For any questions, please contact Monica Gissler at monica.gissler@nebraska.gov or 402/471-2118.

Dental Profession Continuing Education Update

Here are the updates to continuing education for anyone holding a license as a dental provider in Nebraska. The major changes in the requirements are listed below. For more details see each respective provider regulation for credit hour calculations. Thirty hours are still required for each licensee per renewal period. A minimum of 2 hours of infection control/protection must be completed and the annual OSHA CE lecture, does not by itself, qualify for this requirement. A maximum of 4 hours may be obtained in practice management or CPR recertification. A maximum of 10 hours in each period may be obtained through home study (see requirements for home study in the regulations) or initial CPR certification. A maximum of 5 hours may be obtained in each of the following respective categories: dental public health, well being or substance abuse, ethics/professionalism, faculty supervising instructional dental clinics, or for volunteering in such activities as Mission of Mercy events or equivalent. A licensee who is a presenter may receive a maximum of 2 hours total credit per renewal period for the initial presentation of a program, but no additional credit will be given for subsequent presentations of the same lecture. For licensed dental assistants and dental hygienists with expanded function permits, a minimum of 2 hours is required in each respective expanded (restorative) function for which a permit has been issued. Attendance at a live presentation (webinar) that is online and allows for attendee participation, such as asking questions, is not considered a home study course.

Dentists who prescribe controlled substances must complete 3 hours of continuing education on opioids of which one half hour must cover Nebraska's prescription drug monitoring program (PDMP). Any dentist holding a sedation permit must complete 6 hours of education on administration and management of general anesthesia/deep sedation or minimal/moderate sedation as determined by each respective sedation permit, with hands on requirements for general anesthesia/deep sedation and moderate sedation permits. Keep in mind that Executive Orders issued by the Governor may affect your Continuing Education requirements. The Governor's Executive Orders can be found at the Governor's website: <https://govdocs.nebraska.gov/docs/pilot/pubs/eoindex.html>.

Dental Assistant Credentialed Procedures

Requirements are found in the Dental Practice Act Nebraska Revised Statutes §§38-1101 to 38-1152 and Regulation 172 NAC 53

Dental Radiology Credential: Gained as part of a dental assisting program or approved dental radiology course (does not require 1500 hours of practice time), a record of completion is maintained by the dental assistant and is required for radiology office inspections by the state.

Coronal Polish Credential: Gained as part of dental assisting program or approved coronal polishing course with 1500 hours of clinical work experience. A record of completion is maintained by the dental assistant.

Additional Procedures which can be added to a license for \$10 per application, after completion of board approved continuing education.

Fixed Prosthetics: Final impressions and dental records.

Removable Prosthetics: Final impressions, dental records and minor denture adjustments.

Primary tooth restorations: Fitting and cementing a prefab fixed restoration on a primary tooth.

Monitoring and Administration of Nitrous Oxide Analgesia

Licensed Dental Assistant with 1500 hours of practice time can achieve:

Expanded Function Permits (initial and renewal fees of \$25 each)

Simple Restorative Permit: Completion of approved continuing education and passing of a CRDTS restorative exam or equivalent as approved by the board. Allows for placing restorative material in Class I, V and VI preparations. Requires 2 hours of simple restorative continuing education every 2 years to maintain the credential.

Complex Restorative Permit: Completion of approved continuing education and passing of a CRDTS restorative exam or equivalent as approved by the board. Allows for placing restorative material in Class II, III and IV preparations. Requires 2 hours of complex restorative continuing education every 2 years to maintain the credential.

Dental Hygienist Credentialed Procedures

Requirements are found in the Dental Practice Act Nebraska Revised Statutes §§38-1101 to 38-1152 and Regulation 172 NAC 57

Local Anesthetic Permit: Gained as part of a program accredited by a regional or professional accrediting organization recognized by the US Dept. of Education or approved course on local anesthetic.

Public Health Authorization: One permit for conducting public health-related services in a public health setting or in a health care or related facility:

- Requirements:**
1. Provide evidence of a current Nebraska dental hygiene license.
 2. Carry professional liability coverage.
 3. Complete and submit to DHHS a completed application form.
 4. Advise the patient or recipient that the services provided are preventive in nature and do not constitute a comprehensive dental diagnosis and care.
 5. Provide an annual report of services provided to the department on a form that the department sends out on an annual basis.

Duties allowable:

Full dental hygiene scope of practice except for periodontal scaling, root planning and the administration of local anesthesia and nitrous oxide. **Sec. 38-1130 (3) (a) of statute. If they want a full list to the RDH scope of practice, this is in Sec. 38-1131.**

Additional Procedures which can be added for \$10 per application, after completion of board approved continuing education.

- **Interim Therapeutic Restorative Technique:** Perform interim therapeutic restorative procedures.
- **Writing Prescriptions for Mouth Rinses and Fluoride Products:** Ability to write prescriptions for these products.
- **Administration and Titrating of Nitrous Oxide Analgesia**
- **Minor Denture Adjustments**

(For current graduates these functions may already be included. It is for those wanting to go back to add these scope additions to their license)

Licensed Dental Hygienist with **1500 hours** of practice time can achieve:

Expanded Function Permits (initial and renewal fees of \$25 each)

- **Simple Restorative Permit:** Completion of approved continuing education and passing of a CRDTS restorative exam or equivalent as approved by the board. Allows for placing restorative material in Class I, V and VI preparations. Requires 2 hours of simple restorative continuing education every 2 years to maintain the credential.
- **Complex Restorative Permits:** Completion of approved continuing education and passing of a CRDTS restorative exam or equivalent as approved by the board. Allows for placing restorative material in Class II, III and IV preparations. Requires 2 hours of complex restorative continuing education every 2 years to maintain the credential.

NOTE: When the statute was passed allowing additional credentials for dental assistants and hygienists, the Board of Dentistry provisionally approved continuing education courses to allow dental auxiliaries to take advantage of their expanded functions. Now that the regulations have been finalized and signed by the governor's office the subcommittee on continuing education is in the process of reviewing courses for Simple and Complex Restorative permits to insure that the education received in these courses adequately meets the needs of these providers. Therefore, modifications to the approved courses will be forth coming.

Nebraska Licensee Assistance Program

A benefit for Nebraska licensees, certificate holders, and registrants who provide health and health-related services and environmental services.

These credential holders are at an increased risk for alcohol and other substance use disorders. Professional demands, compounded by the unique aspects of practice-related factors, can increase these risks.

What Is the Nebraska Licensee Assistance Program (NE LAP)?

The NE LAP offers a variety of professional alcohol and substance use disorder assistance services, tailored for licensees, certificate holders, and registrants (credential holders).

BEST CARE
EMPLOYEE ASSISTANCE PROGRAM

Available NE LAP Services

The NE LAP offers an opportunity to discuss alcohol and substance use issues openly and confidentially with professionally trained staff.

Available services include:

- Professional alcohol and substance use assessments
- Treatment recommendations
- Referral assistance
- Case monitoring and management
- Two educational sessions
 - NE LAP Services
 - Alcohol/Substance Use Disorders and the Health Services Professional

With the assistance of the NE LAP and treatment providers, alcohol and substance use problems can be alleviated and credential holders can restore healthy personal, professional, and community lives.

Cost and Referrals

All NE LAP services are free to credential holders, including alcohol and substance use assessments and both educational sessions.

In some situations, alcohol and substance use counseling, treatment, or other assistance from community resources may be needed. The NE LAP will refer credential holders to an appropriate treatment provider.

Expenses related to any additional services are the responsibility of the credential holder.

Eligibility

All health, health-related and environmental service professionals holding a license, certification, or registration from the State of Nebraska are eligible for NE LAP services.

Contact Information

For more information, or to schedule a consultation, an alcohol or substance use assessment, or an educational session, contact the NE LAP Monday through Friday from 8 a.m. to 4:30 p.m.

Phone: (402) 354-8055
Toll free: (800) 851-2336
Fax: (402) 354-8046

Crisis and emergency services are available 24/7. You may also visit the NE LAP website at www.lapne.org.

This activity is supported, in whole or part, under contract with the Nebraska Department of Health and Human Services (DHHS), from licensee, certificate holder, and registrant fees paid to Nebraska DHHS, Division of Public Health, Licensure Unit.
