

## Instructions for NDC Conversion

### Converting 10-digit format to PDMP 11-digit acceptable format

Many prescription medication packages have the NDC code displayed on the package in a 10-digit format. In order to submit successfully to the Nebraska PDMP this 10-digit NDC format will need to be converted to an 11-digit format without the dashes.

The following table shows common formats on packaging and the appropriate way to convert to the 11-digit format needed for reporting. The correctly formatted, additional “0” is bold font and underlined in the following example. Hyphens are provided to demonstrate the various formatting examples for the NDC.

**Do not use hyphens when entering the actual data in the Nebraska PDMP. If there are any “-“ or less/more than 11-digits in the field, the file will come back with an error for that record.**
