Credits

Special thanks to all who provided valuable input and guidance in the development of the *Along the Way* series. Contributors are too numerous to mention, but include representatives from Nebraska state agencies, advocacy organizations, family members, self-advocates, and service providers. We couldn't have done it without the assistance of these dedicated people. Most importantly, we wish to thank the Nebraska Council on Developmental Disabilities for providing the opportunity to develop this series.

Introduction

Welcome to *Along the Way*, a series of resource guides for persons with intellectual and developmental disabilities (I/DD) and their families. This series is based upon a core belief that all people should be given the opportunity to live, love, work, play, and pursue their chosen life. We know this is often difficult for people with I/DD. They may require the support of family members and others as they move through the stages of life. While there are many resources to assist, it can be an overwhelming and difficult process to navigate the services and systems and to find needed answers.

To help with the navigation, we have created a set of guides to provide information and resources for individuals with developmental disabilities, their parents, and other family members. Originally developed in 2018, the guides were updated in 2021 to reflect information current at that time. The series contains three guides addressing the following life stages, along with a fourth publication that provides relevant resources and contact information:

- Infants, Toddlers, and Children with Disabilities
- Adolescents and Young Adults with Intellectual and Developmental Disabilities
- Adults with Intellectual and Developmental Disabilities

Note:

Throughout this guide, you will see the terms “developmental disabilities” (DD) and “intellectual/developmental disabilities” (I/DD). For our purposes, these terms are interchangeable.

Relevant topics are discussed for each age group, along with resources and other tools that may be helpful. While it’s impossible to cover everything, it is our hope that this information can help people with I/DD and those who support them in living the life they choose.

Guide Format

Each chapter covers a variety of topics and ends with a box titled *FYI* (For Your Information) that lists supporting documents and websites. The Appendix includes a list of frequently used acronyms and the Index lists topics, terms, and agencies discussed in this guide. *Tips Along the Way* sections offer helpful suggestions.

We won't elaborate on the entire process of verifying eligibility for special education services, but we will mention a few things to give you an overview.

Nebraska Child Find: Each Nebraska school district is responsible for implementing a Child Find system to locate, identify, and evaluate students suspected of having a disability who need special education services. School districts also accept referrals for evaluation directly from parents, other agencies, or school districts.

Student Assistance Team: Upon receiving a referral, the school district holds a Student Assistance Team (SAT) meeting to assist the teacher in providing general education for the student. If the Assistance Team is unable to develop a plan to properly educate the student, a multidisciplinary evaluation team (MDT) is utilized to determine if the student needs special education. Some school districts use a Multi-tiered System of Supports (MTSS) or Response to Intervention (RtI) process for the same purpose. A parent may request a multidisciplinary evaluation at any time during this process.

Multidisciplinary Team (MDT) Evaluation: A multidisciplinary team conducts evaluations or assessments, in the student's primary language, in all areas of suspected disability. This may include assessment of:

- Health
- Vision
- Hearing
- Social and Emotional Status
- General Intelligence
- Academic Performance
- Communicative Status
- Motor Abilities

Parents are entitled to a copy of the Multidisciplinary Team report at no cost. If the parent disagrees with the findings or recommendations, the parent may request an independent education evaluation, which must be provided at no cost and considered by the student's Individualized Education Program (IEP) team. Further information about the IEP is provided in Chapter 2. A re-evaluation of the student may not occur more than once a year, but must take place at least once every three years. These timelines may be altered if the parent and school agree otherwise.

1.2 Laws, Regulations, and Rights

There are many laws, regulations, and rights that impact adolescents and young adults with disabilities. We will highlight a few of those.

Laws

Individuals with Disabilities Education Act (IDEA): The cornerstone for special education services lies within IDEA. This important federal law addresses the many educational requirements for students with disabilities. IDEA is a law ensuring services to children with disabilities throughout the nation. IDEA governs how states and public agencies provide early intervention, special education, and related services to eligible infants, toddlers, children and youth with disabilities.

Section 504 of the Rehabilitation Act of 1973 (Section 504): Section 504 is a federal law that applies to those students who do not qualify for special education services under IDEA, but have needs related to a disability. This law is designed to protect the rights of individuals with disabilities in all programs and activities that receive federal financial assistance. This includes public school districts, institutions of higher education, and other state and local education agencies.

Special Education Act: The Special Education Act (Nebraska Revised State Statute 79-1127) defines special education in Nebraska and requires that: "The board of education of every school district shall provide or contract for special education programs and transportation for all resident children with disabilities who would benefit from such programs."

Regulations

Nebraska Department of Education's Rule 51, Regulations and Standards for Special Education Programs (Rule 51): On a state level, Rule 51 addresses requirements specific to Nebraska educational services. This includes defining the process for determining a student's eligibility for special education, as well as spelling out requirements for meeting the educational needs of students with disabilities.

Rights

Parents' Rights in Special Education Services: Parents' rights regarding Special Education services are protected under Procedural Safeguards, as spelled out in Section 009 of Nebraska's Rule 51. This includes requirements that parents must:

- Be notified in writing before any plans to change the identification, evaluation, or educational placement of the student, or changes to plans for providing a free appropriate public education (FAPE).

- Provide consent for initial evaluation, services, or reevaluations of the student (including documentation of reasonable efforts to obtain consent).
- Have the right to obtain an independent educational evaluation of the student if you disagree with the school district's evaluation.
- Be ensured that information regarding the student is kept confidential.
- Have the right to inspect and review any educational records related to the student that are collected, maintained, or used by the school district.
- Have the right to complaints, hearings, mediation, and appeals.

Schools are required to establish:

- Procedures for disciplining students with disabilities, including change of educational placement because of disciplinary removals; and
- Requirements for unilateral placement of students by parents in private schools at public expense.

As a parent, you may file a written, signed, complaint directly with the Nebraska Department of Education, Special Education Office if you believe a school district has done one or more of the following:

- Failed to develop and implement a valid IEP for your student;
- Failed to follow special education law; or
- Discriminated against a student or a group of students.

The complaint should:

- State the relevant problems.
- Include relevant facts.
- Include the student's name, residency, and school district.

You must also provide a copy of the complaint to the school district serving your student at the time the complaint is filed. Within sixty days of receiving the complaint, the Department of Education, Special Education Office will review all the relevant information and provide a written notification of all findings of facts and conclusions to all persons involved.

Other IEP Requirements:

- The school is responsible for holding an IEP meeting at least once every 12 months and for revising the IEP as necessary. Additional meetings may be scheduled, as needed, by any member of the IEP team. This means that parents may request an IEP meeting prior to the annual IEP if they feel there is an issue.
- The parent(s) and the school must agree on where and when to have the IEP meeting. Often, meetings are held at school during regular staff time. However, meetings can happen before, during, or after the regular school day. Parents have the right to ask that the meeting be scheduled at a time convenient for them.
- The school must notify the parent/guardian in writing regarding:
 - The purpose of the meeting;
 - The time and place for the meeting;
 - Who will be there; and
 - The right to invite other people to the meeting who have knowledge or expertise about the student. Examples include a relative, friend, advocate, childcare provider, medical professional, or anyone else knowledgeable about the student.
- The IEP must be developed within 30 days of determining that the student needs special education services. It must be implemented as soon as possible after the IEP meeting and be in effect at the start of each school year.

Related Services: School districts are required to provide free related services. Related services are considered by the IEP team to minimize impact of the disability. Related services are included in the IEP and may include:

- Transportation
- Developmental services
- Corrective services
- Speech-language pathology and audiology services
- Interpreting services
- Psychological services
- Physical and occupational therapy
- Recreation, including therapeutic recreation
- Early identification and assessment of disabilities in children
- Counseling services, including rehabilitation counseling
- Orientation and mobility services
- Medical services for diagnostic or evaluation purposes

Transition and the IEP: For students with disabilities, the years between ages 14 and 21 are known as the transition years. The term “transition” is commonly used to refer to the bridge between school and adult life for students with disabilities. “Transition planning” refers to the process of preparing students for life after high school. This includes planning for postsecondary education or training, employment, and independent living skills (when identified).

Note:

IDEA states that transition services need to be identified on or before the student turns 16, and earlier if determined in the IEP. However, Nebraska requires that transition planning start no later than age 14.

Nebraska Revised State Statute 83-1225 (effective August 28, 2021) states: “Each school district shall provide transition services for each student with a disability no later than when the student reaches fourteen years of age and until the student graduates from a special education program or no longer meets the definition of a child with a disability pursuant to section 79-1117.”

When the student reaches age 14, additional requirements for the IEP come into play. IEPs in effect at age 14 must:

- Be individualized and include the student and family as decision makers. This includes the requirement that the student be invited to the IEP meeting.
- Be coordinated by the school and developed by the IEP team.
- Include postsecondary goals that identify what the student will do after they earn and receive their diploma.
- Include a statement of the student’s transition needs which focus on their strengths, preferences, and needs.
- Include the course of study, a multi-year planning tool to outline courses the student will take in the current year and plan for the following year. The course of study may change as the student’s strengths, preferences, and needs develop. It must be reviewed at least annually.
- Include a statement of needed transition services for the student.
- Include a statement of connections between various agencies. Agencies who are going to provide services connected to the IEP must be invited and may participate in the IEP meeting, with permission of the parents.
- Be a cooperative effort between the student, family, school, employers, and community agencies.

Postsecondary Goals: Goals are important to prepare the student for life after receiving their diploma. Postsecondary goals are based on age-appropriate transition assessments, considering training, education, employment, and, where appropriate, independent living skills. While postsecondary goals do not promise that the student will get a specific job or be eligible for certain services, they identify services and agencies in the adult system(s) to assist in achieving the goals they’ve set. Postsecondary goals are written in future

tense (e.g., After the student earns their diploma, they will...) and are subject to change over time as the student develops. Goals must be reviewed annually.

2.2 Section 504 Plan

Eligibility: The Rehabilitation Act of 1973 (commonly referred to as Section 504) provides another option for students who have disabilities. To be eligible for Section 504, a student must have a disability that limits a major life function. This includes things such as walking, seeing, hearing, speaking, breathing, learning, working, caring for oneself, performing manual tasks, eating, sleeping, standing, lifting, bending, reading, concentrating, thinking, communicating, and more. Students who do not qualify for special education services may qualify for Section 504.

Section 504 Plan: When a student is eligible under Section 504, the school must develop a plan to eliminate barriers that prevent the student from fully participating in school activities, including the general education curriculum, extracurricular activities, and school functions. This plan is different than an IEP. A 504 plan addresses accommodations or other services that the school will provide to eliminate barriers to the student accessing and progressing in the school environment. Accommodations may include changes to the student's environment or provide equipment, supports, or services to help them learn. Examples include a student with cancer who may exceed the usual number of allowable absences during a school year for health-related reasons or a student with attention deficit hyperactivity disorder (ADHD) who needs a quiet, distraction-free environment to take tests and assessments.

Note:

Accommodations don't change the requirements a student must meet. Rather, they are supports to help them meet those requirements.

Examples of accommodations include:

- Testing in a quiet room
- Extra time on tests
- Preferential seating
- Digital textbooks
- Tailored homework assignments
- Sign language interpreter for participation in activities in and out of the classroom

[DRNE | Legal Resources \(disabilityrightsnebraska.org\)](http://disabilityrightsnebraska.org)

Self-Advocacy: It's important for you and the IEP team to know what your student's dreams are for life both during and after high school. Ongoing discussions are helpful to understand what the student is thinking and to make a plan to achieve those dreams. There are many good resources to assist you in guiding those discussions and some of those are listed in the *FYI* box at the end of this chapter.

A term you may hear as you work with the IEP team is "self-advocacy." This refers to the ability of a person to understand and explain their disability, strengths, and challenges. It is the ability to ask for help when it is needed. The self-advocacy movement was started by and for people with disabilities because they wanted to speak for themselves rather than having others speak for them. Strong self-advocacy skills are important for a person with a disability to be successful in school and in the adult world.

The transition years are a particularly important time for developing and practicing self-advocacy skills. Students should be provided opportunities to speak up for themselves, relying less on others to speak for them. This will become easier as they grow older and become more experienced in self-advocacy.

3.2 Making the Plan

Once the student has identified goals for the future, it's time to make a plan to achieve them. The IEP team must consider the student's interests, preferences, and needs. Formal and informal age-appropriate transition assessments are to be used for this. Information gathered through the transition process, taking into consideration the input and wishes of the student and those who know them best, will result in an individualized plan to prepare the student for their future.

Students should be taught the skills to advocate for themselves and be provided with opportunities to participate in every step of the process. Students who are involved in setting their own goals and monitoring their progress will be more invested in the outcome if they have played an active role in the process.

TIPS ALONG THE WAY

Questions to Consider for Transition Planning

- Where will the student live after high school?
- What will the student do for employment?
- Does the student want postsecondary education or training after high school?
- What are the student's transportation needs?
- How will the student be involved in social, recreational, or volunteer activities in the community?
- How will the student meet their medical needs, including health insurance?
- What benefits and financial support are available for the student?
- What supports should be considered for decision making for the student, such as: supported decision making, power of attorney, representative payee, guardianship, or conservatorship?
- What agency supports or services may be needed and who can help the student apply for and connect with these?

Graduation: Another important consideration during transition planning is graduation. Schools are required to provide a continuum of services that includes a free appropriate public education (FAPE) for all students with verified disabilities from birth through the school year in which the student reaches age 21. The IEP team determines when the student has met their goals and objectives, completed their program as prescribed in the IEP, and is ready to receive their diploma. Students in their senior year whose team has determined they need more time to complete their IEP goals are eligible to participate in graduation ceremonies and NOT receive a diploma. This enables the student and family to have the graduation experience with peers and still complete the student's IEP.

Students who have graduated with a signed regular high school diploma are no longer eligible to receive FAPE. Note that the term "regular high school diploma" does not include an alternative degree such as a certificate or general educational developmental (GED) credential. In this case, the student may participate in a high school graduation ceremony with peers and receive a certificate of attendance. They may continue to receive special education services and have the ability to earn a diploma until the age of 21. (Regulations regarding graduation from special education programs are located in Rule 51, Section 004.)

Note:

Most adult services and supports are not available until age 21, so it is important that the student and IEP team carefully consider the best plan for graduation. Discussion about graduation plans should occur at every transition IEP. If the student graduates after four years of high school, there may be a gap in services until age 21.

All school districts are to offer supports and services for students ages 18-21 who demonstrate a continuing need, as identified in the IEP process. Services for those 18-21 are individualized and focus on employment, life skills, and a functional academic curriculum. It is extremely important to determine what services and supports are needed to prepare the student for meeting their postsecondary goals.

Summary of Performance: Students leaving high school special education services with a regular signed diploma or at age 21 must be provided with a Summary of Performance (SOP). The SOP is a summary of the student's academic achievement and functional performance. The SOP must also include recommendations on how to assist the student in accommodating for their disability and connecting with adult services for life after high school. The intent of the SOP is to provide specific, meaningful, and understandable information that can be used as the student enters the adult world. (See Rule 51, 006.06E1.)

Transition Timeline

This timeline provides a checklist of activities for students, parents, and school personnel to consider when planning for the student's transition from school to adult life. Activities and timeframes may vary, according to the needs and situation of each individual student. These are simply guidelines and may be started at any time before or after the suggested age.

Between Ages 14-18

- ✓ Identify student learning styles, interests & needs.
- ✓ Identify career interests and skills.
- ✓ Identify interests and options for future living arrangements.
- ✓ Provide opportunities to communicate wants and needs.
- ✓ Ensure student's understanding of their disability.
- ✓ Make plans for graduation. (Will student continue until age 21?)
- ✓ Provide opportunities to learn and practice independent living skills.
- ✓ Provide opportunities for social and recreational activities.
- ✓ Acquire an identification card.
- ✓ Obtain a Social Security card.
- ✓ Practice responding to emergency situations.
- ✓ Investigate options & acquire assistive technology devices.
- ✓ Learn about & apply for adult services.
- ✓ Encourage student to participate in IEP process and meetings (must invite at 14).
- ✓ Participate in VR Pre-Employment Transition Services.
- ✓ Invite the student's VR Transition Specialist to IEP meetings.
- ✓ Consider transportation options (including a driver's license).

By Age 18

- ✓ Continue to discuss and make plans for graduation.
- ✓ Consider needs for assistance with decision-making and determine the least restrictive form this may take.
- ✓ Register to vote.
- ✓ Register with Civil Service (for males).
- ✓ Provide activities for career exploration.
- ✓ Continue participation in VR Pre-Employment Transition Services.
- ✓ Apply for or re-evaluate Medicaid and Social Security (SSI) benefits. (Note: at age 18, financial eligibility requirements change.)

Prior to Graduation (Age 21 or Before)

- ✓ Implement plans for graduation.
- ✓ Visit colleges or vocational programs.
- ✓ Work with Disability Services Office for college accommodations.
- ✓ If eligible for DD services and approved for funding, work with Service Coordinator to select service(s) and provider(s).
- ✓ Work with VR Pre-Employment Transition Services Coordinator to apply for VR adult services.
- ✓ Ensure health care needs (including insurance) are covered.

Chapter 4.

Partners and Resources

There are many things to consider when making plans for the student's future. For purposes of this chapter, we have grouped information according to the following topics. We'll discuss and provide an overview of the partners and resources that can assist for each topic.

1. Employment
2. Postsecondary Education or Training
3. Community Living
4. Health
5. Benefits & Financial Planning
6. Legal/Advocacy

4.1 Employment

It is important that students be given opportunities to develop awareness about employment options both during and after high school. These opportunities can be provided in a variety of ways by the school, family, and other outside sources. Career exploration activities during high school may include activities such as taking career interest tests and participating in career fairs and business tours.

Nebraska VR: Also known as Vocational Rehabilitation or Voc Rehab, VR works closely with schools to help students plan for the future and prepare for careers that match their skills, abilities, and interests. To meet the employment needs of students with disabilities, Nebraska VR provides pre-employment transition services. The program is voluntary and there is no charge for VR services.

 **Note:** VR works in partnership with schools for transition age (14-21) students who are eligible for and receiving special education or related services or who are covered under Section 504.

These pre-employment transition services give students with disabilities an early start on career exploration and identifying career interests. Students and families can request VR services through their school, at any Nebraska VR office, or online.

After the student and parent or guardian completes a Pre-Employment Transition Consent and Release form, the student can begin to meet with the Pre-Employment Transition Services Coordinator individually and/or in groups. VR transition staff may also attend IEP meetings, if invited by the student or their parent or guardian.

To learn about the world of work, students may participate in activities for:

- Career exploration
- Exploring work accommodations
- Postsecondary planning
- Training for workplace readiness, including social and independent living skills
- Building job search skills
- Developing self-advocacy skills, including peer mentoring
- Participating in work-based learning experiences, such as:
 - Job fairs
 - Informational interviews
 - Job shadows
 - Business tours
 - Work experiences
 - Project SEARCH

Nebraska VR also provides services to adults with disabilities to help them get and keep a job, as well as develop a plan for postsecondary education and training to prepare for a job or career. The VR Pre-Employment Transition Services Coordinator will help guide the student through the process of applying for adult services. If determined eligible and if funding is available, the young adult may continue to receive VR services beyond high school. Further information about VR services for adults is located in the Adult guide of this series.

Nebraska Commission for the Blind and Visually Impaired: The Commission for the Blind and Visually Impaired is Nebraska's vocational rehabilitation agency for people who are blind or visually impaired. Transition services are provided to help students make a smooth transition from high school to adult life. Additional information about the Commission is provided in this guide under Section 4.3 Community Living.

Project SEARCH: Project SEARCH is a partnership between Nebraska VR, businesses, area school systems, Educational Service Units, the Commission for the Blind and Visually Impaired, and the Assistive Technology Partnership. This one-year school-to-work program is business led and takes place entirely in the workplace.

The program includes a combination of classroom instruction, career exploration, and hands-on training through worksite rotations consisting of three 10-week internships. Students who have completed their academic requirements may apply if they are in their last year of high school. Project SEARCH is located in a number of sites across the state. View the website or ask at your school to see if it's available in your area.

http://www.vr.nebraska.gov/partners/project_search.html

4.2 Postsecondary Education or Training

Some students may wish to continue their education or training after high school. There are many options for this. Postsecondary institutions include universities, community colleges, or vocational schools. There are many factors to consider when determining the best option for postsecondary education. The first factor that often comes to mind is cost. Financial aid may be available, depending upon the program and circumstances of the student. A high school guidance counselor or other IEP team member may be able to assist in locating financial aid options.

There are many differences between high school and postsecondary programs that impact students with disabilities. Three major differences are:

1. Different laws apply in college than in the public school system.
2. The goals and responsibilities of the public school system are different from those in the college setting.
3. Students must become self-advocates. Others will no longer make sure their needs are addressed.

Students with disabilities have the right to receive educational services until age 21 or graduation from high school, but this same right doesn't apply to postsecondary education.

Note:

A college applicant cannot be denied admission simply because they have a disability. However, all applicants (disabled or not) must meet all essential technical or academic standards for admission.

Academic Adjustments & Accommodations: A student with a disability may receive academic adjustments (also known as accommodations) to meet the essential academic and technical requirements of the program. This is to ensure that the academic requirements don't discriminate on the basis of disability. Examples of academic adjustments include reducing the student's course load, providing extended time for taking tests, or providing auxiliary aids and services. Examples of auxiliary aids and services include: note-takers, readers, recording devices, sign language interpreters, screen-readers, voice recognition devices, or other computer aids. Postsecondary institutions are limited in the aids and services they can provide and are not required to provide personal devices such as eyeglasses or hearing aids or to pay for personal services such as attendants.

Accommodations cannot alter the essential requirements of the course or the core curriculum of a program. Academic adjustments or accommodations do not guarantee passing grades. They provide a fair chance for the student with a disability – not an unfair advantage.

Office of Disability Services: Students are not required to disclose their disability unless they wish to receive accommodations, be placed in accessible housing, or receive other disability-related services. If a student chooses, help is available from the postsecondary institution's Office of Disability Services to help as the student transitions to college life and to provide support throughout the college years. It is the student's responsibility to take the first step and contact this office if they wish to receive assistance. Ideally, this contact should be made before enrolling to have the needed supports in place before beginning the program.

Documentation: To be eligible for accommodations, the student must provide the Office of Disability Services with current documentation of disability. Specific documentation required may vary by institution, but in general, evidence of disability includes:

- A diagnosis of a specific disability
- A statement of how the disability limits a major life activity
- An explanation of how the disability affects the student's academic performance
- Suggestions for educational accommodations appropriate for the college setting

Once it's determined that the student qualifies as a person with a disability, a disability coordinator will work with that student to determine appropriate services, assist in arranging services or testing accommodations, and assist with problems as they arise. The disability coordinator does not provide direct educational services, such as tutoring or counseling, or help students manage their time or schedules. However, the coordinator may assist the student in arranging for services such as tutoring or counseling. The student is expected to be responsible for their education the same as any other college student.

Differences Between High School and College²

High School	College
Legal Differences	
Individuals with Disabilities Education Act (IDEA)	Americans with Disabilities Act (ADA)
Section 504, Rehabilitation Act of 1973	Section 504, Rehabilitation Act of 1973
IDEA is about facilitating SUCCESS	ADA is about facilitating ACCESS
Documentation	
IEP and/or Section 504 Plan	Documentation guidelines vary by postsecondary institution and specify information required for each category of disability; available upon request from the postsecondary institution
Evaluation provided at school's expense	Student is responsible for providing necessary documentation (i.e., testing)
Documentation to determine eligibility for services based on specific categories in IDEA	Documentation must include information on specific functional limitations and demonstrate the need for specific accommodations
Self-Advocacy	
Student – identified by the school; supported by parents and teachers	Student must self-identify (disclose) to the Office of Disability Services if they wish to receive accommodations
School is responsible for arranging accommodations	Student is responsible for self-advocacy; arranging accommodations is student's responsibility
Teachers may approach the student if they feel they need help	Professors typically wait for the student to initiate contact if help is needed
Parental Role	
Parent has access to the student's records	Students must provide written consent for parent to access student records
Attends IEP or Section 504 meetings	Students attend meetings on their own (unless they provide consent for parents to attend)
Parents may advocate for their child	Student must advocate for themselves

² Adapted from: National Technical Assistance Center on Transition (NTACT): *Differences Between Secondary and Postsecondary Education*

Instructional Differences	
Teachers may modify curriculum or assignments	Professors are not required to make modifications to curriculum, nor to assignments (including deadlines)
Content is supported differently (i.e., material for homework may be discussed in class or re-taught)	Many classes require large amounts of reading and writing which may or may not be reviewed in class
Content material is typically less dense and intense and in-depth review may not be as necessary	Content material is often dense and may require greater review and active reading/note-taking; review is essential
Student Responsibilities	
Tutoring and academic support may be a part of a student's IEP or 504 plan	Tutoring and academic support are not a part of the Office of Disability Services; student must use the tutoring/academic support services offered to all students
The student's time is structured by others (i.e., in school approx. 8 hours a day)	The student structures their own time and must complete assignments independently (i.e., no progress checks)
Study time outside of class may be minimal	Average of 2-3 hours per credit hour is usually required in college-level classes (i.e., a 3-credit class requires between 8-10 additional hours)

Western Iowa & Nebraska Association on Higher Education and Disability is made up of representatives from two- and four-year colleges and universities who work directly with students with disabilities to ensure equal access to higher education. WINAHEAD provides resources and information for students, families, and educators, including transition presentations upon request to schools and organizations.

4.3 Community Living

An important part of transition planning is identifying the student's goals for community living after high school. There are many possibilities and questions to be answered! Does the student want to live alone, with a roommate, with support from others, with family or relatives, or in a group home or other agency-operated setting? What supports will the young adult need for life after high school?

What can be done now and in the future to help the student acquire these skills? Some of the life skills needed to live independently include the following:

- Daily living (cooking, laundry, household maintenance, etc.)
- Health/physical care (personal cleanliness, medication management, medical appointments, etc.)
- Leisure activities (connections with friends, access to social and recreational activities, etc.)
- Mobility (transportation skills to access the community)
- Money management (shopping, bill paying, budgeting, etc.)

Natural Supports: A concept you might want to think about is “natural supports.” A natural support is the support and assistance that naturally flows from relationships and associations formed in natural settings, such as within the family or community. Natural supports are not based on being eligible for a program or having money to pay for a service. A natural support is not paid. An example of a natural support is when a student takes a swim class at a local YMCA with others who may or may not have a disability. A trusted friend, family member, or peer may take the class alongside the student and provide assistance (natural support) as needed.

Assistive Technology: An important support for people with disabilities is assistive technology. Assistive technology is any item, piece of equipment, or system used to improve or maintain the skills of a person with a disability. Consider how assistive technology can assist the student – whether at home, in school, in the community, or in their place of employment. Examples of assistive technology devices include:

- Electronic communication aids
- Computer software
- Voice recognition system
- Touch-sensitive computer screens or tablets
- Switches or battery-operated devices

Assistive technology must be addressed within the IEP process for every student. The IEP team must consider whether assistive technology is necessary for the student to:

- Achieve education or social goals
- Gain meaningful benefit from the education
- Make reasonable progress in the least restrictive environment

Note:

Any piece of assistive technology purchased by the school belongs to the school and will not follow the student once they have graduated or left the education system. Discussions on how to obtain assistive technology and needed equipment after graduation are an important part of transition planning and should be considered early in the planning process.

Nebraska Assistive Technology Partnership (ATP): ATP is an agency that helps people of all ages with disabilities locate and use assistive technology. This includes people with a disability or those who are recovering from an injury or illness. They also assist with home and vehicle modification projects to make the home or vehicle more accessible for the person with a disability.

A loan pool of devices is available to allow people to try before buying or to help fill a short-term need. The AT4All website has a listing of available devices and equipment.

ATP provides Resource Coordination to assist in obtaining needed assistive technology and home/vehicle accessibility modifications. To apply for services, an application must be completed to see what resources, programs, and funding may be available.

Nebraska Center for the Education of Children who are Blind or Visually Impaired: The Center serves children from infancy to age 21. This program offers the expertise and specialized skills of their staff for students who are blind, visually impaired, and have multiple disabilities in residential, day, and outreach settings. Services are provided for local school districts, students, families, teachers, and other support staff upon request. Supports also include training for a smooth transition to adult life. A student's eligibility for services is determined through the IEP process.

Nebraska Commission for the Blind and Visually Impaired: This Commission is the state vocational rehabilitation agency for the blind. The agency works to help Nebraskans who are blind and visually impaired achieve full and rewarding lives through independent living skills and assists with finding employment.

The coordination of services between the Commission and schools ensures that students who are blind and visually impaired make a smooth transition from high school to adult life. The Commission offers several programs for students who are blind and visually impaired.

Nebraska Commission for the Deaf and Hard of Hearing: This Commission promotes and advocates for Nebraskans who are deaf, deaf-blind, or hard of hearing. The Commission works to achieve equality and opportunity in settings that have an everyday impact on the deaf and hard of hearing community – including social, educational, vocational, and legal. In addition, they seek to enhance and monitor access to effective communication and telecommunication technology.

Services offered include hearing aid banks, media center, assistive devices loan program, training and presentations, and links to resources.

Nebraska Department of Health and Human Services Division of Developmental Disabilities: The Nebraska Department of Health and Human Services (DHHS) Division of Developmental Disabilities (DDD) administers Medicaid home and community-based services (HCBS) waivers to help eligible people live, work, and access their community as independently as possible. The Comprehensive Developmental Disabilities Waiver is available for all ages. The Developmental Adult Day Waiver is available beginning at age 21 and focuses on competitive, integrated employment. The developmental disabilities (DD) waivers may be referred to as DD services. DD services include employment, residential, and other services designed to help the person live independently and access their community. Services can be provided by agency providers or independent providers.

 **Note:** While still in high school, if a student is determined eligible, a DD Service Coordinator (SC) can attend IEP meetings and assist in identifying and applying for services that benefit the student.

The DD services a youth can receive are limited because they cannot replace services available through the school system. Once a student graduates and reaches age 21, day services may be available to help the young adult find a job, volunteer, or increase skills needed to join the workforce. Other DD services depend upon available funding.

DD Service Eligibility: Anyone who is potentially eligible for services through DDD is encouraged to apply early. Age 14 is not too early! For those determined eligible at a young age, redetermination is done at ages 9 and 18. This should not discourage a person from applying at a younger age. Application can be submitted as soon as a disability is diagnosed.

To be eligible, a person must be a US citizen or legal resident, a resident of Nebraska, and meet the definition of developmental disability as defined in Nebraska Revised Statute 83-1205: “Developmental disability shall mean

a severe, chronic disability, including an intellectual disability, other than mental illness which:

- 1) Is attributable to a mental or physical impairment unless the impairment is solely attributable to a severe emotional disturbance or persistent mental illness;
- 2) Is manifested before the age of twenty-two years;
- 3) Is likely to continue indefinitely;
- 4) Results in substantial functional limitations in one of each of the following areas of adaptive functioning:
 - a) Conceptual skills, including language, literacy, money, time, number concepts, and self-direction;
 - b) Social skills, including interpersonal skills, social responsibility, self-esteem, gullibility, wariness, social problem solving, and the ability to follow laws and rules and to avoid being victimized; and
 - c) Practical skills, including activities of daily living, personal care, occupational skills, healthcare, mobility, and the capacity for independent living; and
- 5) Reflects the individual's need for a combination and sequence of special, interdisciplinary, or generic services, individualized supports, or other forms of assistance that are of lifelong or extended duration and are individually planned and coordinated."

DD Services Application: Application for DD services may be made online at ACCESSNebraska. The online application includes consent to release information so that DDD can gather supporting documents. The DDD website has a document that walks through the online application with screenshots of every step. Or, you may request a paper application in person at any DHHS office or by calling toll-free.

Once DDD receives an application, an employee will call to begin the process of gathering appropriate documents. Required documentation may include, but is not limited to:

- Current developmental disability diagnoses, with onset prior to age 22, completed by a licensed psychologist or medical doctor operating in the scope of his/her practice;
- Assessments for intellectual or adaptive behavioral functioning which affected the applicant's ability to carry out activities of daily living skills; and
- School reports:
 - All Multidisciplinary Team (MDT) reports
 - Most recent Individualized Education Program (IEP).

DDD has 90 days to decide on eligibility, but this decision is usually made within 14 days of receiving the application and all necessary supporting documents. A Notice of Decision will be sent to the applicant, stating whether they are eligible for DD services.

In addition to applying for DD services, a person must also apply for and accept all benefits for which they may be eligible. One of these benefits is Medicaid. Medicaid provides a federal match to state funding, which allows DDD to fund more eligible people. Application for Medicaid can be made at any age, but parental income may disqualify some people. At age 19, parental income is no longer counted, and the Medicaid applicant is a “household of one” even if they live with their parents. For more information about Medicaid, see Section 4.4 of this guide.

Determination of Ineligibility for DD Services: Persons found to be ineligible for DD can appeal the decision. Instructions on how to appeal are sent with the written notice of decision.

DD Registry: Being determined eligible does not mean the person will immediately receive services. DD services are not an entitlement and there is limited funding available, as allocated by the Nebraska State Legislature. Funding for DD services is based upon funding priorities, as defined in Nebraska Rev. State Statute 83-1216. If funding is not available, the person is placed on the DD Registry. The Registry is organized by date of application.

DD Funding for Graduates: A 21-year-old graduate is offered funding under the fourth funding priority when transitioning out of the educational system. This priority is to maintain skills and receive day services to pursue economic self-sufficiency. Funding is for day services through the Medicaid HCBS Developmental Disabilities Adult Day (DDAD) Waiver. A 21-year-old-graduate may not automatically receive funding when there is someone with a higher priority need. However, based on historical data, the state has reserved funding for enough waiver slots to serve all graduates under the fourth funding priority.

Objective Assessment Process (OAP): Once a person is determined eligible and has been offered funding, DDD staff complete an objective assessment. This assessment determines the person’s needs and is used to determine the funding amount the person will receive on an annual basis. This funding is used to pay for DD services.

The objective assessment is completed with input from people who know the person best. This may include family members, teachers, and/ or provider staff. Other documentation is reviewed such as program data, medical records, legal documents, and other assessments.

Planning Meetings: Planning meetings are held to determine the person's goals, as well as the services and supports needed to achieve the goals. These meetings are designed to utilize a concept called person-centered planning. Person-centered planning builds on the person's strengths and focuses on their choices and preferences. The person determines what services are desired, who will provide the services, and how the services will be provided.

TIPS ALONG THE WAY

More About Graduates and Funding

- Since the educational system is responsible until a person graduates, the person cannot use DD funding to purchase day services until after graduation.
- A person who drops out on their 21st birthday would not be considered a graduate until the school year concludes.
- Certain services, such as Respite, Personal Emergency Response System (PERS) or Home Modifications, may be available before graduation.
- Service Coordination is given names of eligible persons before graduation. At that time:
 - A DDD worker contacts the person/guardian;
 - DDD completes an objective assessment to determine the person's annual budget amount; and
 - Service planning can start after the budget is determined.

DD Service Coordination: A Service Coordinator (SC) is available for all persons on the DD registry. When a person has Medicaid, it will pay for DD Service Coordination. If the person does not have Medicaid, they will be assessed an Ability to Pay for this service. When a person is actively receiving DD services, they are required to have an SC.

The Service Coordinator is expected to make contact monthly with or on behalf of the person. The SC may help the person access other benefits and services even before DD services begin. The SC may attend IEP meetings if the parent or guardian grants permission to invite them. This assists the SC in forming relationships and to start learning about the student's interests and goals. The SC will work with the school system and Nebraska VR to help with a smooth transition to adult services.

DD Services and Providers: DD services help the person live the most independent life possible. Through the planning meeting process, goals are identified and services are arranged to teach the person the skills to be employed, live where they want, and access the community. Once funding is available, the young adult will need to choose DD services and providers.

- Respite can be provided when the person lives with a non-paid caregiver, such as family.
- Day services include an array of options, ranging from prevocational services, supported employment, habilitative workshop, and habilitative community inclusion. In order to receive day services, a person must also apply for VR (Vocational Rehabilitation) services. VR will determine if the person is ready for employment and help them find a job.
- Residential services include a variety of options and can be provided wherever the person lives, whether with family, on their own, with friends, or in a provider-operated setting. Services may include assistance to increase the person's independence with activities of daily living, health maintenance, social and leisure skills, and community access.

Services may be delivered by independent providers or agency providers.

- Independent providers are people who do not work for an agency and may be someone the person already knows. An independent provider must meet requirements set by the state and cannot be parents of the person (if a minor child), spouse, or legal guardian. The person or their guardian is responsible for hiring, firing, scheduling, and training the independent provider.
- Agency providers are certified by the state and are responsible for hiring, firing, scheduling, and training staff who work with the person. There are many agency providers across the state. A directory is available on the DDD website.

For more information about DD services and providers, see the Adult Guide in this Along the Way series.

Process for Graduates: DD Funding for Day Services

DDD Service Coordinator explains DD waiver service options at IEP meetings during the person's last year in the educational program.

60 to 90 days before an eligible person graduates, DDD staff contacts them and offers funding for DD services, including day services, after graduation.

The person must accept a DD Adult Day waiver slot to receive funding for DD services under the fourth priority.

DDD completes an objective assessment to determine the funding amount the person will receive to meet their needs.

The eligible person chooses DD services and provider(s).

Service Coordinator completes referral for agency providers and/or helps independent providers with enrollment.

Service Coordinator holds intake Individual Support Plan (ISP) meeting to identify DD waiver services and supports and assign responsibility.

Service Coordinator completes service authorization(s) assigning funding to provider(s).

Nebraska Lifespan Respite: Respite care - planned or emergency - is short-term, temporary relief to unpaid family members caring for those with special needs. Even though many families take great joy in providing care for their loved ones so they can remain at home, the physical, emotional, and financial consequences for the family caregiver can be overwhelming.

People of any age with a special need may be eligible for the Nebraska Lifespan Respite program. The person must live with an unpaid caregiver in a non-institutional setting and meet financial eligibility requirements. Special needs include, but are not limited to:

- Developmental disabilities
- Physical disabilities
- Chronic illness
- Physical, mental, or emotional conditions
- Special health care needs
- Cognitive impairments that require on-going supervision
- Situations in which there is a high risk of abuse or neglect for the person with special needs
- Exceptional circumstances, including Crisis Respite

This program pays (within established program dollar limits) for respite services to give the primary caregiver a temporary break from the care of the eligible person. Application for respite may be made at the Nebraska Department of Health and Human Services (DHHS). A person may only receive respite from one source; for example, one cannot have both Lifespan Respite and respite through DDD.

4.4 Health

Like everyone else, people with disabilities deserve a happy, healthy life. Whether attending school, enjoying community events, living with their families, or worshiping with friends and neighbors, everyone deserves the opportunity to become healthy, productive adults. In addition to the need for routine healthcare, people with disabilities may also have challenging health conditions – physical, mental, or emotional – that require more planning and attention. Assistance may be needed to navigate the complex healthcare system. Following is a brief description of health-related programs and services available in Nebraska.

Aged & Disabled Medicaid Waiver (AD Waiver): The AD Waiver is a Medicaid home and community-based services (HCBS) waiver which offers an array of services to support people in their homes. Individuals of all ages are eligible who meet the following criteria:

- Eligible for Medicaid or under age 19 and only denied due to parental income;
- Needs are at nursing facility level of care;
- Desire to live at home rather than a nursing facility; and
- Can be served safely at home.

Eligibility for the AD Waiver is based on the level of care needed to live in a nursing facility. The Level of Care assessment tool depends on the age of the participant. Persons who apply for the AD waiver are assessed to see if their needs are the same of those who live in a nursing facility.

- Nursing Facility level of care for adults (age 18+) looks at activities of daily living, risk factors, medical treatment, cognition factors. The assessment categories are: social support, health status, medications and medical equipment, nutrition, instrumental activities of daily living, and housing.
- Nursing Facility level of care for children has criteria which may vary depending on the age of the child.

Some of the services provided under the AD waiver include: in-home help; relief time for family caregivers (respite); and childcare so the caregiver can maintain employment (extra child care for children with disabilities).

The AD Waiver is one of several home and community-based services (HCBS) waivers in Nebraska. A person may only be on one Medicaid Waiver at a time. This means that a person cannot have both the AD Waiver and a waiver through DDD. However, since the AD Waiver does not typically have a wait list, a person may be on the AD Waiver while waiting for DD services on the DD Registry.

AD Waiver Application: Application for the AD waiver may be made to DDD with a paper application at any DHHS office or by calling toll-free. The paper application allows you to apply for any or all of the HCBS waivers. Contact information is provided on the DDD website.

In addition to applying for the AD Waiver, a person must also apply for and accept all benefits for which they may be eligible. One of these benefits is Medicaid. Medicaid provides a federal match to state funding, which allows the program to fund more eligible people. Application for Medicaid can be made at any age, but parental income may disqualify some people.

AD Service Coordination: A Service Coordinator (SC) is required for all persons on the AD Waiver. The SC is expected to make contact monthly with or on behalf of the person and may help them access other benefits and services. When you have the AD Waiver, your Service Coordination provider is determined by your age:

- Birth to age three: Early Development Network
- Ages three through 17: DHHS Local Offices
- Ages 18 and older: Area Agencies on Aging or League of Human Dignity

Children's Health Insurance Program (CHIP): CHIP is part of Nebraska Medicaid and provides medical assistance to children age 18 and younger who are without other health insurance and who do not qualify for Medicaid. CHIP provides the same services covered under Medicaid.

To be eligible for this benefit program, persons must be a resident of Nebraska and meet all of the following:

- Either 18 years of age and under or a primary care giver with a child(ren) 18 years of age and under, and
- A U.S. Citizen, National, or a Non-Citizen legally admitted into the U.S., and
- Uninsured (and ineligible for Medicaid), and
- Have an annual household income within established limits.

Disabled Children's Program (DCP): This program serves children with disabilities by assisting with payments of non-medical services and supports. Services are determined based on an assessment of needs and shown in a jointly developed plan with the family. Eligibility includes children who meet the following criteria:

- Birth through 15 years of age;

- Receiving monthly Social Security Income (SSI) payments;
- Nebraska resident; and
- Living at home with family.

The services available include:

- Respite care (“short break” for primary caregivers)
- Mileage reimbursement for long distance or frequent medical trips
- Accessibility modifications

The Disabled Children’s Program cannot duplicate services provided by other resources. In addition, supportive services for routine health care are not covered.

Katie Beckett: The Katie Beckett program provides home health nursing and other medical services to children who otherwise would be hospitalized because of their high level of health care needs. Youth on the Katie Beckett program are eligible for Medicaid. Eligibility includes families with a child or children under 19 years old who have one or more of the following:

- A ventilator to breathe
- A tracheostomy
- A need for intravenous therapy involving central lines for daily fluids or nutrition
- A need for frequent and complex medical care that requires use of equipment to prevent life-threatening situations

Services available through the Katie Beckett program include all Medicaid services based on medical need, including, but not limited to:

- Nursing care in the home
- Hospital stays
- Medicine, medical supplies, and equipment
- Physician fees

Only the child’s income is considered for the Medicaid eligibility process for children served by the Katie Beckett program. Parents/guardians should contact their local DHHS office to begin the Medicaid application process, noting that they wish the child to be assessed to determine if they qualify for Katie Beckett. A child may be eligible even if the family has private health insurance through a job or another group. The private insurance must be used first and Medicaid pays after the other health insurance has paid.

Medicaid: Medicaid is a public health insurance program for certain low-income persons including those who are aged, blind, disabled, children, and others who meet eligibility requirements. The following are the age and disability requirements for Medicaid:

- 65 years of age or older;
- Low income adult aged 19-64;
- Under 65 years of age with a disability, or visually impaired according to Social Security guidelines;
- 18 years of age or younger;
- Pregnant woman;
- Parent or caretaker; or
- Former foster care youth.

Individuals with disabilities who apply for Medicaid may also have to apply for disability benefits.

Medically Handicapped Children's Program: The Medically Handicapped Children's Program provides specialized medical services for children and youth with special health care needs. Services may include service coordination/case management, specialty medical team evaluations, access to specialty physicians, and payment of authorized medical services. The program does NOT provide or cover general medical care. Eligibility criteria includes:

- Birth through 20 years of age;
- Nebraska resident;
- Diagnosed with an eligible chronic medical condition and an active individual medical treatment plan; and
- Must meet financial eligibility based on current regulations.

Funded services **may** include:

- **Diagnostic and Consultative Services:** These services may include assistance with locating offices of participating specialists, hospitals, or specialty clinics.
- **Treatment Services:** Funds are used to pay for costs of prior authorized specialized medical treatment related to the eligible diagnosis(es). Treatment must be in accordance with the individual treatment plan.

Munroe-Meyer Institute (MMI): MMI provides interdisciplinary, family-centered services for persons with disabilities and complex health care needs across the lifespan at more than 40 provider locations across Nebraska. MMI also provides leadership training for persons with disabilities, family members, and other stakeholders, as well as working in the areas of policy and advocacy related to disability-focused concerns.

The type of services provided include:

- Academic and educational interventions
- Applied Behavior Analysis (ABA)
- Augmentative and alternative communication (AAC)
- Autism Care for Toddlers Clinic
- Behavioral health services
- Autism spectrum disorders (ASD) treatment
- Community education
- Developmental medicine
- Early intervention
- Family and individual resources, including family navigation
- Feeding and swallowing services
- Genetics evaluation/counseling/testing
- Motion analysis
- Neonatal intensive care follow-up
- Therapies (including Occupational, Physical, and Recreational)
- Rehabilitation services
- Severe behavior services
- Social skills services
- Speech language pathology

Parent Training and Information (PTI) Nebraska and Family Voices: PTI Nebraska employs staff who are parent/professionals and are available to talk to parents and professionals about special education and disability specific information. PTI focuses on providing training, information, and referrals through a variety of services, including one-on-one support and assistance, small and large group workshops, publications, and websites. The goal of

PTI is to help parents, families, and students with disabilities understand their civil rights regarding early intervention services and special education supports so that they can be strong self-advocates in the most effective ways.

The Family Voices program assists with issues related to the health care of a child or youth with a special need or disability. Staff provide information to families with children with special health care needs about health care, health care options, and health care costs. They provide assistance for families and professionals in developing Individual Healthcare Plans for children with medical care needs at school. They also work with youth who are developing self-advocacy skills so they can explain their health care conditions and understand their own health care needs. This support to families, youth, and professionals is provided by personal visits, phone, and email. Additionally, workshops are held across the state.

- 12) Transition Health Plan for Youth with Disabilities and Their Families:
[Health Transition Planning and the IEP - National Parent Center on Transition and Employment \(pacer.org\)](#)

Work Incentives Planning and Assistance (WIPA): Beginning at age 14, WIPA projects provide information and benefits counseling to help people understand how work and earnings can affect their benefits. The WIPA Project covering the state of Nebraska is operated by Easterseals Nebraska. Contact the Ticket to Work Help Line to begin the intake process.

Nebraska's Aging and Disability Resource Center (ADRC) assists people of all ages in understanding and/or applying for public benefits. See Chapter 6 for more information about the ADRC.

5.2 Nebraska Department of Health and Human Services (DHHS) Economic Assistance Programs

Assistance may be available through DHHS Economic Assistance programs. Application may be made through ACCESSNebraska. DHHS financial programs include:

- Aid to the Aged, Blind, or Disabled (AABD)
- Supplemental Nutritional Assistance Program (SNAP)
- Energy Assistance

5.3 Social Security Administration (SSA)

The SSA offers options for assisting persons with disabilities. Supplemental Security Income (SSI) and the Social Security Disability Insurance (SSDI) benefit known as the Childhood Disability Benefit (CBD) are important resources for children with disabilities.

Eligibility: A child is defined as someone who is neither married nor head of a household and:

- Is under age 18; or
- Is under age 22 and is a student regularly attending school.

The SSA defines disability and eligibility for Social Security benefits based upon the following for children under age 18:

- A medically determinable physical or mental impairment or impairment(s) which result in marked and severe functional limitations; and
- The impairment(s) has lasted or can be expected to last for a continuous period of at least 12 months or be expected to result in death; or
- If the child is blind, they meet the same definition of "blind" as applies for adults.

The SSA considers the income and resources of family members living in the child's household. If family income and resources are more than the amount allowed, SSA will deny the child's application for SSI payments.

Eligibility at 18: Once a person turns 18, they must re-establish eligibility for Social Security benefits under the definition of disability for adults. Persons ages 18 or older may be considered disabled if they have a medically determinable physical or mental impairment (including an emotional or learning problem) which:

- Results in the inability to do any substantial gainful activity (explained below); and
- Can be expected to result in death; or
- Has lasted or can be expected to last for a continuous period of not less than 12 months.

Substantial Gainful Activity (SGA): A person earning more than a certain monthly amount is considered to be engaging in substantial gainful activity. The amount considered for SGA depends on the nature of the disability and typically changes every year. This amount is higher for persons who are blind. As a point of reference, the SGA amount for individuals who are blind is \$2,260 for 2022, while the amount for persons who are not blind is \$1,350.

Note:

It's important to be aware of such things as who can get benefits on their Social Security record and how to obtain and use Social Security information in planning family financial security. Changes in the parent's status such as retirement, disability, or death may result in a change in the child's Social Security benefits. Because every situation is different, it is important to contact the Social Security Administration to determine the impact.

5.4 ABLE Savings Plan (Enable)

In addition to understanding and applying for benefits programs, it is important for people with disabilities and their families to participate in financial planning. In 2014, Congress passed the Achieving a Better Life Experience Act (ABLE) as a financial tool for people with disabilities. As a result, in 2015, Nebraska passed the Enable Savings Plan.

Enable allows Nebraskans with certain disabilities to create tax-advantaged ABLE savings accounts to pay for qualified disability-related expenses. Qualified disability-related expenses include basic living expenses and expenses that enhance a person's quality of life. This allows people to keep their public benefits and provides income tax and estate tax benefits for those who contribute to the account.

A person is eligible for Enable if they are blind or disabled before age 26

and are entitled to Supplemental Security Income (SSI) or Supplemental Security Disability Income (SSDI). Or, they must have a physician certification indicating that they have a marked or severe functional limitation diagnosed before age 26, which is expected to result in death or has lasted/may last for a continuous period of at least 12 months.

Because guardianship is a serious step and a restriction of the person's freedom, it is important to consider other, less restrictive alternatives before pursuing this. Guardianships and conservatorships don't have to be permanent and should be limited to only those areas necessary for decision making. As the person builds capacities for decision making, these restrictions could be limited or terminated entirely.

There are varying legal judgments (also referred to as substituted judgment) that can be made. It is important to consider the least restrictive alternative when considering options. Options, listed in order from least restrictive to most restrictive, include:

- Supported decision making
- Health care power of attorney
- Representative payee
- Power of attorney
- Conservatorship
- Guardianship (full or limited)

TIPS ALONG THE WAY

Questions to Consider in Legal Status Decisions

- Can the person take responsibility for their own personal safety?
- Can the person take responsibility for providing the necessities of food, clothing, and shelter on their own?
- Can the person manage their money independently?
- Is the person's decision-making ability and judgment impaired so that being completely independent would be a threat to his or her welfare?³

Office of Public Guardian: The Office of Public Guardian is designed to serve as the guardian or conservator for an individual when no other alternative is available. In addition to providing the means of last resort as guardians or conservators for those situations where no family member or suitable individual is available, the Office of Public Guardian provides education, training, and support for volunteer and family guardians and conservators, and recruits individuals to serve as guardians and conservators for Nebraska's vulnerable individuals.

6.2 Advocacy

You're not alone! There are many organizations and people available to help people with disabilities and their family members to advocate for their rights and get the services and supports they need. Other parents of children with disabilities are often your best source of information and support. Those who have "walked in your shoes" understand what you're experiencing. There are several state and local organizations that serve as valuable resources and support. Some of those are highlighted here.

Aging & Disability Resource Center (ADRC) Nebraska provides information, referral, and assistance for accessing community services and long-term care options for persons with disabilities of all ages, their family members, caregivers, and advocates. While the ADRC does not provide direct services, this can be an important link to accessing services and supports.

Answers4Families is a support and information connection for families and professionals seeking assistance. Answers4Families provides information, opportunities for dialogue, education, and support to Nebraskans with disabilities, their families, and professionals by developing and providing web-based resources.

Arc of Nebraska offers a wide range of programs and services to meet the needs of those with intellectual and developmental disabilities. They help families by providing programs, information, and resources. The Arc focuses on issues such as: voting, employment, special education, Medicaid, and wait lists. Local Arc chapters are located throughout the state and provide a variety of programs and services specific to their area.

Autism Family Network promotes a positive, respectful image of individuals on the autism spectrum and their families by offering social opportunities, recreational experiences, and community inclusion.

Autism Society of Nebraska provides information, referral, support, awareness, and special events related to individuals on the autism spectrum and their families in a number of Nebraska communities.

Disability Rights Nebraska uses a combination of legal advocacy, public policy advocacy, citizen advocacy, self-advocacy, and advocacy education to protect vulnerable people with disabilities, especially those who learn, live, or work in isolated, segregated, or congregated settings.

Nebraska Youth Leadership Council is a group of young leaders from across the state who want to make a difference in the lives of other students with disabilities. Co-sponsored by Nebraska VR and the Nebraska Department of Special Education, Council members are leaders and advocates with a disability. They promote disability awareness and educate peers on transitioning to college or work.

To be a member of the Nebraska Youth Leadership Council, a student must:

- Be between the ages of 14 and 24 years old
- Have a disability
- Have leadership skills OR want to learn these skills
- Represent youth with disabilities and speak on their behalf
- Be able to attend 4-5 Council meetings per year in their area

Parent Training and Information (PTI) Nebraska is a statewide resource for families of children with disabilities and special health care needs. PTI staff are parent/professionals and are available to talk to parents and professionals about special education and disability specific information. PTI focuses on providing training, information, and referrals through a variety of services, including one-on-one support and assistance, small and large group workshops, publications, and websites.

Note:

You may also find it necessary to connect with state and local officials for issues on a broader scale. And, of course, all citizens have a right to contact their Senator, Governor, or Congressional representative.
