Application for a §1915(c) Home and Community-Based Services Waiver

PURPOSE OF THE HCBS WAIVER PROGRAM

The Medicaid Home and Community-Based Services (HCBS) waiver program is authorized in §1915(c) of the Social Security Act. The program permits a state to furnish an array of home and community-based services that assist Medicaid beneficiaries to live in the community and avoid institutionalization. The State has broad discretion to design its waiver program to address the needs of the waivers target population. Waiver services complement and/or supplement the services that are available to participants through the Medicaid State plan and other federal, state and local public programs as well as the supports that families and communities provide.

The Centers for Medicare & Medicaid Services (CMS) recognizes that the design and operational features of a waiver program will vary depending on the specific needs of the target population, the resources available to the state, service delivery system structure, state goals and objectives, and other factors. A State has the latitude to design a waiver program that is cost-effective and employs a variety of service delivery approaches, including participant direction of services.

Request for an Amendment to a §1915(c) Home and Community-Based Services Waiver

1. Request Information

   A. The State of Nebraska requests approval for an amendment to the following Medicaid home and community-based services waiver approved under authority of §1915(c) of the Social Security Act.

   B. Program Title:

      Developmental Disabilities Day Services Waiver for Adults

   C. Waiver Number: NE.0394

      Original Base Waiver Number: NE.0394.

   D. Amendment Number: NE.0394.R03.02

   E. Proposed Effective Date: 10/01/19

      Approved Effective Date: 10/01/19

      Approved Effective Date of Waiver being Amended: 03/01/17

2. Purpose(s) of Amendment

   Purpose(s) of the Amendment. Describe the purpose(s) of the amendment:

   The purpose of this amendment is to revise insufficient or inconsistent language, update rate structure and methodology, modify, add, or delete service definitions; and perform a compliance review to determine uniformity with State Plan, Nebraska Administrative Code (NAC) regulations, Federal law, and waiver sub-assurances. See 3-A for specific revisions.

3. Nature of the Amendment

   A. Component(s) of the Approved Waiver Affected by the Amendment. This amendment affects the following component(s) of the approved waiver. Revisions to the affected subsection(s) of these component(s) are being submitted concurrently (check each that applies):

      | Component of the Approved Waiver | Subsection(s) |
      |----------------------------------|---------------|
      | ✓ Waiver Application             | Main          |
      | ✓ Appendix A Waiver             | QI            |

**B. Nature of the Amendment.** Indicate the nature of the changes to the waiver that are proposed in the amendment *(check each that applies)*:

- [ ] Modify target group(s)
- [ ] Modify Medicaid eligibility
- [x] Add/delete services
- [x] Revise service specifications
- [x] Revise provider qualifications
- [ ] Increase/decrease number of participants
- [x] Revise cost neutrality demonstration
- [ ] Add participant-direction of services
- [x] Other
  Specify:
In Appendix B, D, E, F, and G of this amendment, the terms “guardian”, “family representative”, “representative”, and “legally responsible” were removed to align with Nebraska’s regulatory language. In this waiver, “participant” means the individual receiving waiver services and any person authorized to act on behalf of the participant.

Intro-Main:
- Revised transition plan for the waiver.
- Updated Attachment #2: Home and Community-Based Settings Waiver Transition Plan

Appendix A:
- Revised State performance measures.

Appendix B:
- Revised wording of Reserved Capacity category "Transitioning youth from Special Education services”.
- Revised language in Selection of Entrants to the Waiver.
- Added "Other" specified groups in Medicaid Eligibility Groups Served in the Waiver.
- Changed minimum frequency for provision of waiver services from sixty to ninety days and added clarifying language.
- Revised LOC evaluation and reevaluation language.
- Revised State performance measures.

Appendix C:
- Removed services for years 4 and 5 that sunsetting September 30, 2017: Day Habilitation, Behavioral Risk services, Community Living and Day Supports, Integrated Community Employment, Medical Risk services, Retirement services, Team Behavioral Consultation services, Vocational Planning Habilitation service, and Workstation Habilitation services.
- Removed Adult Companion and Crisis Intervention Support.
- Added Independent Living and Supported Family Living.
- Removed Prevocational from list of services that can be self-directed.
- Removed annual budget cap for Transportation.
- Modified the following provider qualification standards to state: “All providers of waiver services must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.”, and to state: “All providers of waiver services must adhere to standards as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.”
- Modified the following provider qualification standards to state: “Not be an employee of DHHS, unless approved by DHHS as compliant with DHHS policy and applicable law and regulation”, and to state: “Not be a legally responsible individual or guardian to the participant.”
- Modified frequency of verification of provider, clarifying that revalidation is completed annually and re-enrollment is completed every 5 years.
- Revised State performance measures.

Appendix D:
- Revised State performance measures.

Appendix E:
- Updated E-1-g, Participant-directed Services.

Appendix G:
- Revised insufficient or inconsistent language in G-1, G-2, and G-3.
- Revised State performance measures.

Appendix H:
- Revised insufficient or inconsistent language in H-a and H-b.

Appendix I:
- Revised State performance measures.
- Revised I-2-a, Rate Determination Methods.

Appendix J:
- Updated Cost Neutrality Demonstration for Year 2, 3, 4, and 5.
1. Request Information (1 of 3)

A. The State of Nebraska requests approval for a Medicaid home and community-based services (HCBS) waiver under the authority of §1915(c) of the Social Security Act (the Act).

B. Program Title (optional - this title will be used to locate this waiver in the finder):

Developmental Disabilities Day Services Waiver for Adults

C. Type of Request: amendment

Request an Approval Period: (For new waivers requesting five-year approval periods, the waiver must serve individuals who are dually eligible for Medicaid and Medicare.)

- 3 years
- 5 years

Original Base Waiver Number: NE.0394
Waiver Number: NE.0394.R03.02
Draft ID: NE.016.03.01

D. Type of Waiver (select only one):

- Regular Waiver

E. Proposed Effective Date of Waiver being Amended: 03/01/17
Approved Effective Date of Waiver being Amended: 03/01/17

1. Request Information (2 of 3)

F. Level(s) of Care: This waiver is requested in order to provide home and community-based waiver services to individuals who, but for the provision of such services, would require the following level(s) of care, the costs of which would be reimbursed under the approved Medicaid state plan (check each that applies):

- Hospital
  Select applicable level of care
  - Hospital as defined in 42 CFR §440.10
    If applicable, specify whether the state additionally limits the waiver to subcategories of the hospital level of care:

- Inpatient psychiatric facility for individuals age 21 and under as provided in 42 CFR §440.160

- Nursing Facility
  Select applicable level of care
  - Nursing Facility as defined in 42 CFR §§440.40 and 42 CFR §§440.155
    If applicable, specify whether the state additionally limits the waiver to subcategories of the nursing facility level of care:

- Institution for Mental Disease for persons with mental illnesses aged 65 and older as provided in 42 CFR §440.140

- Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) (as defined in 42 CFR §440.150)
  If applicable, specify whether the state additionally limits the waiver to subcategories of the ICF/IID level of care:

1. Request Information (3 of 3)

09/20/2019
G. Concurrent Operation with Other Programs. This waiver operates concurrently with another program (or programs) approved under the following authorities

Select one:

- ☐ Not applicable
- ☐ Applicable

Check the applicable authority or authorities:

☐ Services furnished under the provisions of §1915(a)(1)(a) of the Act and described in Appendix I

☐ Waiver(s) authorized under §1915(b) of the Act.

Specify the §1915(b) waiver program and indicate whether a §1915(b) waiver application has been submitted or previously approved:

Specify the §1915(b) authorities under which this program operates (check each that applies):

☐ §1915(b)(1) (mandated enrollment to managed care)

☐ §1915(b)(2) (central broker)

☐ §1915(b)(3) (employ cost savings to furnish additional services)

☐ §1915(b)(4) (selective contracting/limit number of providers)

☐ A program operated under §1932(a) of the Act.

Specify the nature of the state plan benefit and indicate whether the state plan amendment has been submitted or previously approved:

☐ A program authorized under §1915(i) of the Act.

☐ A program authorized under §1915(j) of the Act.

☐ A program authorized under §1115 of the Act.

Specify the program:

H. Dual Eligibility for Medicaid and Medicare.

Check if applicable:

☒ This waiver provides services for individuals who are eligible for both Medicare and Medicaid.

2. Brief Waiver Description

Brief Waiver Description. In one page or less, briefly describe the purpose of the waiver, including its goals, objectives, organizational structure (e.g., the roles of state, local and other entities), and service delivery methods.
Purpose:
The Nebraska Department of Health and Human Services (DHHS) Division of Developmental Disabilities (DHHS-DD) offers a menu of services and supports intended to allow individuals with intellectual or developmental disabilities (DD) to maximize their independence as they live, work, socialize, and participate to the fullest extent possible in their communities. Employment, integration and inclusion services have been incentivized, described in Appendix I-2-a, to encourage and promote the full vision of the HCBS Settings Waiver Transition Plan requirements that take full effect by March 2022. We continue to encourage services that are self-directed as well as offered by either an independent or agency provider to ensure the maximum flexibility for the participants served under this waiver.

Participant-directed services, delivered by independent providers, are services directed by the participant, their legal representative, or family/advocate. Participant-directed services are intended to give the participant more control over the type of services received, as well as control or choice of the direct providers of those services.

Agency-based services are habilitative services that provide day habilitative training and are delivered by certified DD agency providers with the exception of Adult Day and Respite, which are non-habilitative by design. Independent services are self-directed by the participant and/or their representative as needed; they are habilitative in nature, except Respite.

Goals and Objectives:
To offer participants an array of services available which focus on choice, independence, employment, community inclusion and integration to meet the needs and wants of the participant by:

- Encouraging the use of community based services rather than institutionalized care in an Immediate Care Facility for Individuals with Developmental Disabilities (ICF-DD) or nursing facility for participants whose needs can be met by community-based developmental disability providers.
- Promoting a high quality of service delivery in community-based services that supports inclusion, integration, employment and choice.
- Expanding participant direction of services.
- Providing an opportunity for participants to transition from school-based programs to adult services, thus ensuring the continuation of skill development.

Organizational Structure and Service Delivery:
DHHS-DD, a Division within the Single State Medicaid agency, administers the Home and Community Based Services (HCBS) Developmental Disabilities Day Services Waiver for Adults which serves adults 21 years or older, with no maximum age limit.

Designated DHHS staff and a vendor enroll all agency and independent providers as Medicaid providers. Specialized DHHS staff, DD Surveyors, certify DD provider agencies. DHHS-DD supports the free choice of participants and their legal representatives to select from the available pool of agency-based and independent providers to deliver services and supports, with assistance as needed provided by DHHS-DD service coordination staff. DHHS-DD service coordination is funded as a Medicaid State Plan targeted case management service. Designated DHHS-DD staff, Disability Services Specialists, complete the initial level of care (LOC) evaluations, and service coordination staff complete LOC reevaluations. Services are prior authorized by DHHS-DD staff, and individualized funding is based on an objective assessment process.

3. Components of the Waiver Request

The waiver application consists of the following components. Note: Item 3-E must be completed.

A. Waiver Administration and Operation. Appendix A specifies the administrative and operational structure of this waiver.

B. Participant Access and Eligibility. Appendix B specifies the target group(s) of individuals who are served in this waiver, the number of participants that the state expects to serve during each year that the waiver is in effect, applicable Medicaid eligibility and post-eligibility (if applicable) requirements, and procedures for the evaluation and reevaluation of level of care.

C. Participant Services. Appendix C specifies the home and community-based waiver services that are furnished through the waiver, including applicable limitations on such services.

D. Participant-Centered Service Planning and Delivery. Appendix D specifies the procedures and methods that the state uses to develop, implement and moni tor the participant-centered service plan (of care).
E. Participant-Direction of Services. When the state provides for participant direction of services, **Appendix E** specifies the participant direction opportunities that are offered in the waiver and the supports that are available to participants who direct their services. *(Select one):*

- ☐ Yes. This waiver provides participant direction opportunities. **Appendix E** is required.
- ○ No. This waiver does not provide participant direction opportunities. **Appendix E** is not required.

F. Participant Rights. **Appendix F** specifies how the state informs participants of their Medicaid Fair Hearing rights and other procedures to address participant grievances and complaints.

G. Participant Safeguards. **Appendix G** describes the safeguards that the state has established to assure the health and welfare of waiver participants in specified areas.

H. Quality Improvement Strategy. **Appendix H** contains the Quality Improvement Strategy for this waiver.

I. Financial Accountability. **Appendix I** describes the methods by which the state makes payments for waiver services, ensures the integrity of these payments, and complies with applicable federal requirements concerning payments and federal financial participation.

J. Cost-Neutrality Demonstration. **Appendix J** contains the state's demonstration that the waiver is cost-neutral.

4. Waiver(s) Requested

A. Comparability. The state requests a waiver of the requirements contained in §1902(a)(10)(B) of the Act in order to provide the services specified in **Appendix C** that are not otherwise available under the approved Medicaid state plan to individuals who: (a) require the level(s) of care specified in Item 1.F and (b) meet the target group criteria specified in **Appendix B**.

B. Income and Resources for the Medically Needy. Indicate whether the state requests a waiver of §1902(a)(10)(C)(i)(III) of the Act in order to use institutional income and resource rules for the medically needy *(select one):*

- ○ Not Applicable
- ○ No
- ☐ Yes

C. Statewideness. Indicate whether the state requests a waiver of the statewideness requirements in §1902(a)(1) of the Act *(select one):*

- ○ No
- ☐ Yes

If yes, specify the waiver of statewideness that is requested *(check each that applies):*

- ☐ Geographic Limitation. A waiver of statewideness is requested in order to furnish services under this waiver only to individuals who reside in the following geographic areas or political subdivisions of the state. *Specify the areas to which this waiver applies and, as applicable, the phase-in schedule of the waiver by geographic area:*

- □ Limited Implementation of Participant-Direction. A waiver of statewideness is requested in order to make *participant-direction of services* as specified in **Appendix E** available only to individuals who reside in the following geographic areas or political subdivisions of the state. Participants who reside in these areas may elect to direct their services as provided by the state or receive comparable services through the service delivery methods that are in effect elsewhere in the state. *Specify the areas of the state affected by this waiver and, as applicable, the phase-in schedule of the waiver by geographic area:*

09/20/2019
5. Assurances

In accordance with 42 CFR §441.302, the state provides the following assurances to CMS:

A. Health & Welfare: The state assures that necessary safeguards have been taken to protect the health and welfare of persons receiving services under this waiver. These safeguards include:

1. As specified in Appendix C, adequate standards for all types of providers that provide services under this waiver;

2. Assurance that the standards of any state licensure or certification requirements specified in Appendix C are met for services or for individuals furnishing services that are provided under the waiver. The state assures that these requirements are met on the date that the services are furnished; and,

3. Assurance that all facilities subject to §1616(e) of the Act where home and community-based waiver services are provided comply with the applicable state standards for board and care facilities as specified in Appendix C.

B. Financial Accountability. The state assures financial accountability for funds expended for home and community-based services and maintains and makes available to the Department of Health and Human Services (including the Office of the Inspector General), the Comptroller General, or other designees, appropriate financial records documenting the cost of services provided under the waiver. Methods of financial accountability are specified in Appendix I.

C. Evaluation of Need: The state assures that it provides for an initial evaluation (and periodic reevaluations, at least annually) of the need for a level of care specified for this waiver, when there is a reasonable indication that an individual might need such services in the near future (one month or less) but for the receipt of home and community-based services under this waiver. The procedures for evaluation and reevaluation of level of care are specified in Appendix B.

D. Choice of Alternatives: The state assures that when an individual is determined to be likely to require the level of care specified for this waiver and is in a target group specified in Appendix B, the individual (or, legal representative, if applicable) is:

1. Informed of any feasible alternatives under the waiver; and,

2. Given the choice of either institutional or home and community-based waiver services. Appendix B specifies the procedures that the state employs to ensure that individuals are informed of feasible alternatives under the waiver and given the choice of institutional or home and community-based waiver services.

E. Average Per Capita Expenditures: The state assures that, for any year that the waiver is in effect, the average per capita expenditures under the waiver will not exceed 100 percent of the average per capita expenditures that would have been made under the Medicaid state plan for the level(s) of care specified for this waiver had the waiver not been granted. Cost-neutrality is demonstrated in Appendix J.

F. Actual Total Expenditures: The state assures that the actual total expenditures for home and community-based waiver and other Medicaid services and its claim for FFP in expenditures for the services provided to individuals under the waiver will not, in any year of the waiver period, exceed 100 percent of the amount that would be incurred in the absence of the waiver by the state's Medicaid program for these individuals in the institutional setting(s) specified for this waiver.

G. Institutionalization Absent Waiver: The state assures that, absent the waiver, individuals served in the waiver would receive the appropriate type of Medicaid-funded institutional care for the level of care specified for this waiver.

H. Reporting: The state assures that annually it will provide CMS with information concerning the impact of the waiver on the type, amount and cost of services provided under the Medicaid state plan and on the health and welfare of waiver participants. This information will be consistent with a data collection plan designed by CMS.

I. Habilitation Services. The state assures that prevocational, educational, or supported employment services, or a combination of these services, if provided as habilitation services under the waiver are: (1) not otherwise available to the individual through a local educational agency under the Individuals with Disabilities Education Act (IDEA) or the Rehabilitation Act of 1973; and, (2) furnished as part of expanded habilitation services.

J. Services for Individuals with Chronic Mental Illness. The state assures that federal financial participation (FFP) will not be claimed in expenditures for waiver services including, but not limited to, day treatment or partial hospitalization, psychosocial rehabilitation services, and clinic services provided as home and community-based services to individuals.
with chronic mental illnesses if these individuals, in the absence of a waiver, would be placed in an IMD and are: (1) age 22 to 64; (2) age 65 and older and the state has not included the optional Medicaid benefit cited in 42 CFR §440.140; or (3) age 21 and under and the state has not included the optional Medicaid benefit cited in 42 CFR § 440.160.

6. Additional Requirements

Note: Item 6-I must be completed.

A. Service Plan. In accordance with 42 CFR §441.301(b)(1)(i), a participant-centered service plan (of care) is developed for each participant employing the procedures specified in Appendix D. All waiver services are furnished pursuant to the service plan. The service plan describes: (a) the waiver services that are furnished to the participant, their projected frequency and the type of provider that furnishes each service and (b) the other services (regardless of funding source, including state plan services) and informal supports that complement waiver services in meeting the needs of the participant. The service plan is subject to the approval of the Medicaid agency. Federal financial participation (FFP) is not claimed for waiver services furnished prior to the development of the service plan or for services that are not included in the service plan.

B. Inpatients. In accordance with 42 CFR §441.301(b)(1)(ii), waiver services are not furnished to individuals who are in-patients of a hospital, nursing facility or ICF/IID.

C. Room and Board. In accordance with 42 CFR §441.310(a)(2), FFP is not claimed for the cost of room and board except when: (a) provided as part of respite services in a facility approved by the state that is not a private residence or (b) claimed as a portion of the rent and food that may be reasonably attributed to an unrelated caregiver who resides in the same household as the participant, as provided in Appendix I.

D. Access to Services. The state does not limit or restrict participant access to waiver services except as provided in Appendix C.

E. Free Choice of Provider. In accordance with 42 CFR §431.151, a participant may select any willing and qualified provider to furnish waiver services included in the service plan unless the state has received approval to limit the number of providers under the provisions of §1915(b) or another provision of the Act.

F. FFP Limitation. In accordance with 42 CFR §433 Subpart D, FFP is not claimed for services when another third-party (e.g., another third party health insurer or other federal or state program) is legally liable and responsible for the provision and payment of the service. FFP also may not be claimed for services that are available without charge, or as free care to the community. Services will not be considered to be without charge, or free care, when (1) the provider establishes a fee schedule for each service available and (2) collects insurance information from all those served (Medicaid, and non-Medicaid), and bills other legally liable third party insurers. Alternatively, if a provider certifies that a particular legally liable third party insurer does not pay for the service(s), the provider may not generate further bills for that insurer for that annual period.

G. Fair Hearing: The state provides the opportunity to request a Fair Hearing under 42 CFR §431 Subpart E, to individuals: (a) who are not given the choice of home and community-based waiver services as an alternative to institutional level of care specified for this waiver; (b) who are denied the service(s) of their choice or the provider(s) of their choice; or (c) whose services are denied, suspended, reduced or terminated. Appendix F specifies the state's procedures to provide individuals the opportunity to request a Fair Hearing, including providing notice of action as required in 42 CFR §431.210.

H. Quality Improvement. The state operates a formal, comprehensive system to ensure that the waiver meets the assurances and other requirements contained in this application. Through an ongoing process of discovery, remediation and improvement, the state assures the health and welfare of participants by monitoring: (a) level of care determinations; (b) individual plans and services delivery; (c) provider qualifications; (d) participant health and welfare; (e) financial oversight and (f) administrative oversight of the waiver. The state further assures that all problems identified through its discovery processes are addressed in an appropriate and timely manner, consistent with the severity and nature of the problem. During the period that the waiver is in effect, the state will implement the Quality Improvement Strategy specified in Appendix H.

I. Public Input. Describe how the state secures public input into the development of the waiver:
The public input process for this waiver amendment is done in accordance with 42 CFR §441.304(f). The following strategies were used to secure public input for the 0394 amendment:

Specific to Tribal Notice, the public comment period allows at least 30 days for comment before the anticipated submission date and includes written 60 day notification to all federally-recognized Tribal Governments that maintain a primary office and/or majority population within the State in accordance with section 5006(e) of the American Recovery and Reinvestment Act of 2009 (Pub. L. 111-5), Indian health programs, and Urban Indian Organizations. Tribal Notice for the 0394 amendment was distributed on July 30, 2018. The Tribal Notices are available through DHHS Division of Medicaid and Long Term Care (DHHS-MLTC) and DHHS-DD.

To reach all stakeholders, public notice is both electronic and non-electronic to ensure individuals without computer access have the opportunity to provide input. A public notice seeking public comment indicates that the waiver application in its entirety and by Appendix is posted on the public website and is also available upon request in hard copy via mail, email, or by phone. The public can go to or call a local DHHS office or the DHHS central office to request a hard copy. Public comments can be provided via the internet, e-mail, fax, U.S. mail, or phone calls. Phone numbers, FAX numbers, e-mail addresses and staff names are provided on the DHHS-DD website and in the written notice.

DHHS-DD Director Miller conducted a Let’s Talk! statewide tour in September 2018 as one component of the public comment period. During the public comment period from December 10, 2018 to January 9, 2019, DHHS-DD also solicited input through: direct conversations with tribal representatives; individuals that are eligible for DD services; waiver participants; families; guardians; advocates; the DHHS public website, electronic notification to DD agency and independent providers and Stakeholder Listserve; the Nebraska DD provider association and advocacy groups; and non-electronic public notice in the Omaha World Herald, a newspaper with statewide circulation.

The state provided statements of public notice and public input procedures. The Division’s website contained public notice; the draft waiver renewal application by Appendix and the full waiver application; a PowerPoint summary of proposed changes to the waivers; a link to e-mail questions or comments; and a contact and address to mail comments.

A variety of individuals and organizations, including family members, parents, and guardians of participants, advocates, providers, professional associations, and other public stakeholders provided comments. Comments were recorded on a spreadsheet and are summarized in a document posted on the DHHS-DD public website at the time of waiver submission. The summary indicates whether each individual comment led to a change in the waiver application or not, and if not, the reason for not incorporating a change.

Approximately 95 individuals or organizations submitted comments for this waiver amendment and the 4154 amendment during the official public comment period that ran from December 10, 2018 to January 9, 2019. The state received the same comments or very similar comments from many family members, agency providers, advocacy organizations, and provider and direct support professional organizations. DHHS-DD responded to each commenter who provided an email address or postal address and revised the amendments as noted. A summary of the comments is in Main-Attachment B Optional, at the end of this Main-Introduction section.

J. Notice to Tribal Governments. The state assures that it has notified in writing all federally-recognized Tribal Governments that maintain a primary office and/or majority population within the State of the State's intent to submit a Medicaid waiver request or renewal request to CMS at least 60 days before the anticipated submission date is provided by Presidential Executive Order 13175 of November 6, 2000. Evidence of the applicable notice is available through the Medicaid Agency.

7. Contact Person(s)

A. The Medicaid agency representative with whom CMS should communicate regarding the waiver is:
B. If applicable, the state operating agency representative with whom CMS should communicate regarding the waiver is:

8. Authorizing Signature

This document, together with the attached revisions to the affected components of the waiver, constitutes the state's request to amend its approved waiver under §1915(c) of the Social Security Act. The state affirms that it will abide by all provisions of the waiver, including the provisions of this amendment when approved by CMS. The state further attests that it will continuously operate the waiver in accordance with the assurances specified in Section V and the additional requirements specified in Section VI of the approved waiver. The state certifies that additional proposed revisions to the waiver request will be submitted by the Medicaid agency in the form of additional waiver amendments.

Attachment #1: Transition Plan
Check the box next to any of the following changes from the current approved waiver. Check all boxes that apply.

☐ Replacing an approved waiver with this waiver.
☐ Combining waivers.
☐ Splitting one waiver into two waivers.
☒ Eliminating a service.
☐ Adding or decreasing an individual cost limit pertaining to eligibility.
☒ Adding or decreasing limits to a service or a set of services, as specified in Appendix C.
☐ Reducing the unduplicated count of participants (Factor C).
☐ Adding new, or decreasing, a limitation on the number of participants served at any point in time.
☐ Making any changes that could result in some participants losing eligibility or being transferred to another waiver under 1915(c) or another Medicaid authority.
☐ Making any changes that could result in reduced services to participants.

Specify the transition plan for the waiver:
This is an application to amend the 0394 waiver. Transition to the approved new services will occur within 90 days following implementation of the approved amended waiver. This waiver amendment will allow participants to transition to the following new services approved under the 0394 waiver amendment: Independent Living and Supported Family Living. The following services will not be offered beyond ninety days following implementation of the approved amendment: Adult Companion and Crisis Intervention Support.

Adult Companion and Crisis Intervention Support offered in this amended waiver will only be available for ninety days following the approval of this amendment, and at such time these services will end and cannot be offered. Adult Companion and Crisis Intervention Support are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver amendment. New waiver participants cannot choose Adult Companion or Crisis Intervention Support, and current waiver participants cannot choose Adult Companion or Crisis Intervention Support at their next annual, semi-annual or special ISP meeting.

Under this approved waiver amendment, Prevocational will no longer be offered as a self-directed service option, and can only be delivered by an agency provider. As of the submission of this amendment, approximately 2 participants will need to choose an agency provider for the delivery of Prevocational.

All participants served in the approved waiver are also eligible to participate in the approved waiver amendment. Participants or their representative will be able to contact their Service Coordinator at any time during the ninety day transition period to request an update to their service plan, and do not have to wait until their next scheduled annual or semi-annual service plan meeting. DHHS will complete weekly monitoring on the progress on transitioning from old services to new services as well as provider selection and availability to ensure that there is no gap in services to the participant, provider availability, and payments.

Service Changes

The state is phasing out Adult Companion and Crisis Intervention Support over a ninety day period following the approval of this amendment. Adult Companion and Crisis Intervention Support will sunset ninety days following the approval of this amendment, upon transition of all participants to the new services.

Following approval of this waiver amendment, Adult Companion will be phased out over a ninety day period and will be replaced by Independent Living and Supported Family Living to unbundle Adult Companion into identifiable residential settings. Similarities with Adult Companion, Independent Living, and Supported Family Living include, but are not limited to:

- Adult Companion, Independent Living, and Supported Family Living cannot be provided in a provider owned, leased, or operated setting.
- Adult Companion, Independent Living, and Supported Family Living can be provided in the participant’s private home and the community.
- Adult Companion, Independent Living, and Supported Family Living are habilitative services that provide drop-in intermittent supports to a participant who requires less than 24 hours of support a day.
- Adult Companion, Independent Living, and Supported Family Living include adaptive skill development of daily living activities and social and leisure skill development.
- Adult Companion, Independent Living, and Supported Family Living may be self-directed.
- Adult Companion, Independent Living, and Supported Family Living may be provided by a relative but not a legally responsible individual or guardian of the participant.

The following differences in each of the services include, but are not limited to:

- Adult Companion cannot exceed a weekly amount of 25 hours.
- Independent Living and Supported Family Living cannot exceed a weekly amount of 70 hours.
- For Adult Companion, transportation is not included in the reimbursement rate.
- Transportation required in the provision of Independent Living and Supported Family Living is included in the rate.

Following approval of this waiver amendment, Crisis Intervention Support will be phased out over a ninety day period and will combined into Consultative Assessment. Consultative Assessment will have components of Crisis Intervention Support, as well as revisions, including, but not limited to:

- A Board-Certified Behavioral Analyst (BCBA) will now be allowed to provide this service under the supervision of a licensed psychologist, advanced practice registered nurse (APRN), or Licensed Independent Mental Health Practitioner (LIMHP).
- Crisis Intervention Support and Consultative Assessment are completed in collaboration with the service planning team and includes a functional behavior assessment including risk levels, the development of a behavior support plan, development of other habilitative plans, training and technical assistance to carry out the plan and treatment integrity support to the participant and the provider in the ongoing implementation of the plan.
• The service definition now includes requirements of a functional behavioral assessment.

The following service has been revised and renamed and will continue to be offered under this waiver: Supported Employment – Enclave has been renamed to Enclave. The following clarification was added to Enclave:
• A DD provider agency may not benefit from the work completed by the participants receiving Enclave.

Please see Attachment B Option for continuation of transition plan.

Attachment #2: Home and Community-Based Settings Waiver Transition Plan
Specify the state's process to bring this waiver into compliance with federal home and community-based (HCB) settings requirements at 42 CFR 441.301(c)(4)-(5), and associated CMS guidance.
Consult with CMS for instructions before completing this item. This field describes the status of a transition process at the point in time of submission. Relevant information in the planning phase will differ from information required to describe attainment of milestones.
To the extent that the state has submitted a statewide HCB settings transition plan to CMS, the description in this field may reference that statewide plan. The narrative in this field must include enough information to demonstrate that this waiver complies with federal HCB settings requirements, including the compliance and transition requirements at 42 CFR 441.301(c)(6), and that this submission is consistent with the portions of the statewide HCB settings transition plan that are germane to this waiver. Quote or summarize germane portions of the statewide HCB settings transition plan as required.
Note that Appendix C-5 HCB Settings describes settings that do not require transition; the settings listed there meet federal HCB setting requirements as of the date of submission. Do not duplicate that information here.
Update this field and Appendix C-5 when submitting a renewal or amendment to this waiver for other purposes. It is not necessary for the state to amend the waiver solely for the purpose of updating this field and Appendix C-5. At the end of the state's HCB settings transition process for this waiver, when all waiver settings meet federal HCB setting requirements, enter "Completed" in this field, and include in Section C-5 the information on all HCB settings in the waiver.

The state assures that this waiver amendment or renewal will be subject to any provisions or requirements included in the state's most recent and/or approved home and community-based settings Statewide Transition Plan. The state will implement any CMCS required changes by the end of the transition period as outlined in the home and community-based settings Statewide Transition Plan.

Additional Needed Information (Optional)
Provide additional needed information for the waiver (optional):
• Comments from independent providers suggested there is limited access in rural areas to required training and the required training for independent providers is too costly. No changes were made in the waiver, as some training is no-cost, on-line, and available within a reasonable driving distance in rural areas.

• Comments from agency providers, provider staff, and contractors included general concerns about how the rates for agency providers, rates for specific waiver services, and tiered services were determined. The agency providers, provider staff, and contractors believed the rates were too low, needed to be updated again, and some services should have the same rates, e.g., Independent Living and Supported Family Living. No changes were made in the waiver because a provider advisory group was established in late 2017 to provide input and feedback throughout the rebase study and development of final proposed rates.

• Many comments from parents and family members of participants mirrored concerns about the rates expressed by agency providers, provider staff and contractors, advocacy organizations, and provider and direct support professional organizations. Rates should make sure that providers can hire high quality employees and pay fair wages to the professionals that teach important vocational and residential skills. Rates should be required to be updated on a regular basis so that providers offering services can keep up with the cost of doing business and maintain high quality services. Work activities shouldn’t be limited by hour caps or by definitions that limit work activities such as volunteer work or work that provides supplemental income, even if they are not activities that fully met the criteria for competitive, integrated employment. Because of DHHS-DD’s active, continuous, and robust stakeholder engagement, no changes were made in the waiver. Since July 2018, DHHS-DD has actively engaged with a provider workgroup and a family stakeholder group to develop a policy guide which will supplement state regulations and the approved Medicaid HCBS developmental disabilities waiver amendments. The policy guide will be available to participants, families, providers, and the general public and will address many of the waiver public comments.

• A concern from many commenters resulted in revisions to the proposed service definitions for Independent Living and Supported Family Living. Many independent providers and family members wanted the state to allow a participant to live with his/her independent provider in a “housemate” relationship. As a result, the state informed those that had expressed concern that the state will change this limitation upon completion of the public comment period, prior to submitting to CMS for approval, so that family or other household members living with the participant can provide this service. Language was revised in the Supported Family Living and Independent Living service definitions. The Supported Family Living definition was changed from “Supported Family Living cannot be provided by any individual provider or agency staff member that lives in the same private residence as the participant.” to “Supported Family Living is provided in the participant’s family home, not a provider operated or controlled residence.” The same change was made for Independent Living, from “Independent Living cannot be provided by any individual provider or agency staff member that lives in the same private residence as the participant.” to “Independent Living is provided in the participant’s family home, not a provider operated or controlled residence.”

• Many comments were related to the non-medical Transportation service. Concerns included lack of differential rates for rural providers and burdensome administrative oversight for transportation providers. No changes were made in the waiver. The rate for non-medical transportation is based on the Nebraska standard for mileage reimbursement, pursuant to Nebraska Revised Statute § 81-1176.

• Comments were also related to transportation provided within the service. Concerns included rates, availability of transportation to and from Nebraska Vocational Rehabilitation funded services, and wanting more clarification for when transportation is and is not included within the service. Many were pleased with the removal of the annual cap for transportation. As a result of the comments, in Appendix C, language in applicable services related to the inclusion of transportation in the rate was modified.

• Comments included concerns about responsibilities and capacity of Vocational Rehabilitation services. Employment should be a priority. People should not have to wait in line for employment services. No changes were made in the waiver; DHHS-DD central office Administration and staff hold monthly meetings with the Nebraska VR Director and VR staff to discuss ongoing and future collaborative efforts between DD and Nebraska VR.

• 44 comments related to the Aged and Disabled waiver were inadvertently sent to DD and were forwarded immediately to appropriate staff.

Continuation of Transition Plan:
Minimizing the Impact
While the services are being phased out, the intent is that participants will still receive services without a gap in their services. Planning steps have been taken to assure that there will be no gap in services or negative impact to the health and welfare of waiver participants that currently receive waiver services. The planning steps specific to transitioning to the new or modified services were as follows:

• May-July 2019 – DHHS-DD Policy Team presented training on changes to the amendments for this waiver and 4154 waiver to DD service coordinators that explained modified service definitions, changes in appendices, and instruction to staff for transition to new services, using a crosswalk from current services to new services.

• June 2019 – slide deck used for presentations posted on public website.

• June 2019 – DHHS-DD Provider Relations Team will present updates on changes to the amendments for this waiver and
4154 waiver to independent providers during bi-monthly technical assistance calls for independent providers.

- July-September 2019 - DHHS-DD Policy Team will present updates on changes to the amendments for this waiver and 4154 waiver to meetings with DD service coordination employees and DD agency providers.

- Ninety days following the approval of this waiver amendment – DHHS-DD service coordination will complete remaining service plan meetings to transition all participants to amended waiver.

- Ninety-first day following the approval of this waiver amendment - Full transition to new services listed in waiver amendment.

Outreach to transition participants to new services

In order to successfully transition current waiver participants to the new service options that will be offered under the amended waiver, all stakeholders - waiver participants, families/legal representatives, advocacy organizations, and independent and agency-based providers - have been provided information about the continuing, new, and ending services through a variety of methods. The proposed waiver amendment which include service definitions, scope, limits to the amount, frequency, or duration, as well as provider qualifications and service rates have been shared verbally and made available in hardcopy and electronically by e-mail and on the DHHS-DD public website, at http://dhhs.ne.gov/Pages/DD-Public-Comment.aspx.

The materials have been distributed by DD staff through informational meetings around the state, direct e-mails, and public website postings. Informational meetings with stakeholder workgroups, participant and public town hall forums, and DD provider associations were held in-person, via WebEx, and telephonically in 2018 and 2019. Materials presented in hardcopy or as slides at the meetings were e-mailed to the Stakeholder Listserv and posted on the DHHS-DD public website following the meetings.

DD will closely monitor the transition processes outlined in the approved waiver to ensure that one hundred percent of the waiver participants have completed the transition to the new services within ninety days following the approval of this amendment. Monitoring of the transition process may include, but is not limited to, querying data on submitted claims and authorizations, vendor enrollment, and completed annual, semi-annual, or special service plan meetings.

Impact

The above steps are in place to ensure that this change does not result in a loss of services or waiver eligibility. The individual prospective budget amount will remain the same and a reduction in services would only be a result of choice by the waiver participant. The health and welfare of participants whose services are being phased out or modified is of paramount importance. To ensure their health and welfare, DHHS-DD will continue its practice of a prior authorization process based on justification and the identified need of participants to obtain additional units of services not to exceed the amounts specified in Appendix C.

Right to Fair Hearing

Participants will continue to have the opportunity to dispute any of the following circumstances:

- The applicant is determined ineligible for NE Medicaid HCBS DD waiver services;
- The applicant is not given the choice of Medicaid HCBS DD waiver services as an alternative to institutional care;
- The participant’s choice of providers is denied; or
- Services to the participant are denied, suspended, reduced, or terminated.

Participants may also appeal any action, inaction, or failure to act with reasonable promptness because:

- His/her application is denied;
- His/her application is not acted upon with reasonable promptness;
- His/her assistance or services are suspended;
- His/her assistance or services are reduced;
- His/her assistance or services are terminated;
- His/her form of payment or services is changed to be more restrictive; or
- He/she thinks the Department's action was erroneous.

Appendix A: Waiver Administration and Operation

1. State Line of Authority for Waiver Operation. Specify the state line of authority for the operation of the waiver (select one):

   ☑ The waiver is operated by the state Medicaid agency.

Specify the Medicaid agency division/unit that has line authority for the operation of the waiver program (select one):

09/20/2019
○ The Medical Assistance Unit.

Specify the unit name:

(Do not complete item A-2)

○ Another division/unit within the state Medicaid agency that is separate from the Medical Assistance Unit.

Specify the division/unit name. This includes administrations/divisions under the umbrella agency that has been identified as the Single State Medicaid Agency.

Division of Developmental Disabilities

(Complete item A-2-a).

○ The waiver is operated by a separate agency of the state that is not a division/unit of the Medicaid agency.

Specify the division/unit name:

In accordance with 42 CFR §431.10, the Medicaid agency exercises administrative discretion in the administration and supervision of the waiver and issues policies, rules and regulations related to the waiver. The interagency agreement or memorandum of understanding that sets forth the authority and arrangements for this policy is available through the Medicaid agency to CMS upon request. (Complete item A-2-b).

Appendix A: Waiver Administration and Operation

2. Oversight of Performance.

a. Medicaid Director Oversight of Performance When the Waiver is Operated by another Division/Unit within the State Medicaid Agency. When the waiver is operated by another division/administration within the umbrella agency designated as the Single State Medicaid Agency. Specify (a) the functions performed by that division/administration (i.e., the Developmental Disabilities Administration within the Single State Medicaid Agency), (b) the document utilized to outline the roles and responsibilities related to waiver operation, and (c) the methods that are employed by the designated State Medicaid Director (in some instances, the head of umbrella agency) in the oversight of these activities:
a) The functions performed by the Department of Health and Human Services (DHHS) Division of Developmental Disabilities (DHHS-DD):

DHHS-DD performs participant waiver enrollment activities; management of approved limits; monitoring of expenditures; level of care evaluations; review of participant service plans; prior authorization of waiver services; utilization management; establishment of statewide rate methodology; establishment of rules, policies, and procedures governing the waiver program; and quality improvement activities. A provider enrollment broker performs enrollment of qualified providers and executes Medicaid provider agreements under the oversight of the Division of Medicaid and Long Term Care (DHHS-MLTC), which is within the Medicaid agency.

b) The document utilized to outline the roles and responsibilities related to waiver operation:

c) The methods that are employed by the designated State Medicaid Director in the oversight of these activities:

The State Medicaid Director is the Director of DHHS-MLTC. Oversight is a collaborative effort among designated staff within DHHS-MLTC and DHHS-DD. Designated Administrators from DHHS-MLTC and DHHS-DD have regularly scheduled monthly meetings to review discovered and/or anticipated issues; direct remediation and/or proactive activities; and strategically plan for collaborative alignment of Nebraska’s Medicaid HCBS waivers.

Oversight methods include but are not limited to: reviewing reports of provider non-compliance and coordinating corrective action measures with DHHS-DD service coordination and DD surveyors as necessary and appropriate; preparing or reviewing statistical and financial data for CMS reports in collaboration with DHHS-DD; attending the quarterly DHHS-DD Quality Improvement (QI) Committee meetings as an active participating member; meeting with DHHS-DD staff to review program and client issues as necessary and appropriate; weekly tracking the use of Medicaid funding on the use of Medicaid HCBS waiver funding relative to the budgeted amounts; and monthly monitoring expenditures and budget projections; reviewing the development, renewal, or amendments of HCBS waivers, with final approval and electronic submittal authority; reviewing the cost neutrality formulas developed in collaboration with DHHS-DD; and submitting claims quarterly for federal funds for allowable activities administered or supervised by DHHS-DD.

The frequency of the oversight is related to the oversight activity or collaborative projects and tasks, and ranges from monthly budget activities to annual reporting activities.

b. Medicaid Agency Oversight of Operating Agency Performance. When the waiver is not operated by the Medicaid agency, specify the functions that are expressly delegated through a memorandum of understanding (MOU) or other written document, and indicate the frequency of review and update for that document. Specify the methods that the Medicaid agency uses to ensure that the operating agency performs its assigned waiver operational and administrative functions in accordance with waiver requirements. Also specify the frequency of Medicaid agency assessment of operating agency performance:

As indicated in section 1 of this appendix, the waiver is not operated by a separate agency of the State. Thus this section does not need to be completed.

Appendix A: Waiver Administration and Operation

3. Use of Contracted Entities. Specify whether contracted entities perform waiver operational and administrative functions on behalf of the Medicaid agency and/or the operating agency (if applicable) (select one):

- Yes. Contracted entities perform waiver operational and administrative functions on behalf of the Medicaid agency and/or operating agency (if applicable).

Specify the types of contracted entities and briefly describe the functions that they perform. Complete Items A-5 and A-6.
A provider enrollment broker is the contracted entity that performs 1) Qualified provider enrollment and 2) Execution of the Medicaid Provider Agreement. In conjunction with designated DHHS staff, and within established timeframes, the provider enrollment broker electronically enrolls prospective independent and agency providers, conducts first-time or annual background checks, provides on-line and phone enrollment assistance to prospective providers, provides notice to the provider of approval or denial, and completes 5-year revalidation of provider status. The provider enrollment broker does not complete wage negotiation with the provider.

- No. Contracted entities do not perform waiver operational and administrative functions on behalf of the Medicaid agency and/or the operating agency (if applicable).

Appendix A: Waiver Administration and Operation

4. Role of Local/Regional Non-State Entities. Indicate whether local or regional non-state entities perform waiver operational and administrative functions and, if so, specify the type of entity (Select One):

- Not applicable
- Applicable - Local/regional non-state agencies perform waiver operational and administrative functions.
  
  Check each that applies:
  - Local/Regional non-state public agencies perform waiver operational and administrative functions at the local or regional level. There is an interagency agreement or memorandum of understanding between the State and these agencies that sets forth responsibilities and performance requirements for these agencies that is available through the Medicaid agency.

  Specify the nature of these agencies and complete items A-5 and A-6:

- Local/Regional non-governmental non-state entities conduct waiver operational and administrative functions at the local or regional level. There is a contract between the Medicaid agency and/or the operating agency (when authorized by the Medicaid agency) and each local/regional non-state entity that sets forth the responsibilities and performance requirements of the local/regional entity. The contract(s) under which private entities conduct waiver operational functions are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

  Specify the nature of these entities and complete items A-5 and A-6:

Appendix A: Waiver Administration and Operation

5. Responsibility for Assessment of Performance of Contracted and/or Local/Regional Non-State Entities. Specify the state agency or agencies responsible for assessing the performance of contracted and/or local/regional non-state entities in conducting waiver operational and administrative functions:

- The DHHS-MLTC is responsible for assessing the performance of the contracted provider enrollment broker.

Appendix A: Waiver Administration and Operation

6. Assessment Methods and Frequency. Describe the methods that are used to assess the performance of contracted and/or local/regional non-state entities to ensure that they perform assigned waiver operational and administrative functions in accordance with waiver requirements. Also specify how frequently the performance of contracted and/or local/regional non-state entities is assessed:
The provider enrollment broker submits monthly reports to the DHHS-MLTC Data Analytics Team. The Data Analytics Team in Medicaid reviews the information supplied by the broker monthly to compare data against contract deliverables. The data, such as a monthly average days to enrollment is utilized to address sub-assurances. The data submitted monthly covers both functions performed by the contracted entity.

Appendix A: Waiver Administration and Operation

7. Distribution of Waiver Operational and Administrative Functions. In the following table, specify the entity or entities that have responsibility for conducting each of the waiver operational and administrative functions listed (check each that applies):

In accordance with 42 CFR §431.10, when the Medicaid agency does not directly conduct a function, it supervises the performance of the function and establishes and/or approves policies that affect the function. All functions not performed directly by the Medicaid agency must be delegated in writing and monitored by the Medicaid Agency. Note: More than one box may be checked per item. Ensure that Medicaid is checked when the Single State Medicaid Agency (1) conducts the function directly; (2) supervises the delegated function; and/or (3) establishes and/or approves policies related to the function.

Appendix A: Waiver Administration and Operation

Quality Improvement: Administrative Authority of the Single State Medicaid Agency

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Administrative Authority

The Medicaid Agency retains ultimate administrative authority and responsibility for the operation of the waiver program by exercising oversight of the performance of waiver functions by other state and local/regional non-state agencies (if appropriate) and contracted entities.

i. Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance, complete the following. Performance measures for administrative authority should not duplicate measures found in other appendices of the waiver application. As necessary and applicable, performance measures should focus on:

- Uniformity of development/execution of provider agreements throughout all geographic areas covered by the waiver
- Equitable distribution of waiver openings in all geographic areas covered by the waiver
- Compliance with HCB settings requirements and other new regulatory components (for waiver actions submitted on or after March 17, 2014)

Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:
A.1. Percent of setting assessments completed where the provider was either compliant or progressing toward a plan for compliance with HCBS setting requirements. Numerator = Number of setting assessments completed where the provider was either compliant or progressing toward a plan for compliance with HCBS setting requirements; Denominator = Number of setting assessments completed.

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

Nebraska’s population centers are clustered in the eastern portion of the state and the distribution of waiver openings and execution of provider agreements reflect the disproportionate distribution of the population. Therefore, the State does not measure the uniformity of development/execution of provider agreements throughout all geographic areas covered by the waiver and does not measure equitable distribution of waiver openings in all geographic areas.

Quarterly off-site file reviews are conducted by the DHHS-DD quality team. One hundred percent of the data available to report on these performance measures are analyzed by the DHHS-DD quality team. The DHHS-DD quality team conducts its reviews to ensure activities are being applied correctly, and that reviews and remediation activities are completed as assigned. The DHHS-DD quality team is responsible for reporting all individual problems requiring remediation identified during discovery processes to supervisory staff. This information is summarized and reviewed by the DHHS-DD QIC quarterly.

The continuing efforts are to oversee and refine the formal design and implementation of QI systems that allow for systematic oversight of services across the state by the QIC, while ensuring utility of the information at the local service coordination level. A regular reporting schedule has been developed to ensure regular review of the results of the various QI functions. The QIC minutes show review of results, recommendations for remediation, and follow-up of recommendations or assigned tasks to address issues that have been identified and to proactively decrease the likelihood of similar problems occurring in the future. A continuous evaluation component is built into the system for evaluation of utility, information received, and effectiveness of strategies.

The QIC receives reports and information and provides/shares feedback and support to the service districts. The DHHS-MLTC representative verbally reports activities of the QIC to his/her administrator and/or the Medicaid Director and makes all meeting minutes and reports available for his/her review.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.
The participant’s DHHS-DD Service Coordinator (SC) has primary responsibility for discovery and remediation of individual problems. Discovery processes include: monitoring; conducting supervisory file reviews; reviewing incidents; and following up on complaints.

The SC is responsible for in-person, on-site monitoring of individual health and welfare and monitoring of the implementation of the service plan. SC staff also monitors to ensure that an individual resides and/or receives services in a setting that meets the HCBS regulations and requirements. Please see Appendix D QI-b-i for additional information on monitoring and methods of correction.

By statute, providers have to report any suspected incidents of abuse/neglect to DHHS Protection and Safety Specialists. When providers report alleged abuse and neglect of participants that is not required to be reported by law, the Protection and Safety staff share this information with DHHS-DD service coordination and DHHS-DD Surveyors within 24 hours of receipt. DHHS staff triages/reviews the information and makes a determination whether to do a complaint investigation or handle it in another manner.

The database for incidents is a web-based service system used for incident reporting and case management and the database allows DHHS-DD to review and aggregate data in various formats. Quarterly, providers submit a report to DHHS-DD detailing the incidents in the quarter and actions taken both on a participant and provider wide level to address the issue and to decrease the likelihood of future incidents. A summary of all the incidents and of the provider’s efforts are compiled into a report reviewed quarterly by the QIC. The QIC determines the need for systemic follow-up and additional areas requiring probing and/or DHHS-DD management intervention.

Grievances, complaints, questions, or concerns are responded to by designated DHHS-DD program staff. The DHHS-DD Director or DHHS-DD program staff work with participants, the general public, service coordination, providers, legislators, advocacy groups, or advocacy groups to address the grievance/complaint.

As part of their discovery processes, all SC Supervisors are required to conduct a review of services coordination activities on an on-going basis as outlined in the approved DHHS-DD operational guidelines. These reviews ensure that all service coordination activities are being applied correctly. The review responses are documented in an electronic data system. Indicators that do not meet standards require remediation/supervisory follow-up. Threshold concerns are reviewed with the local DHHS-DD Service District Administrator and brought to the attention of DHHS-DD Central Office Administrator of Field Operations as needed. This information is summarized and reviewed by the DHHS-DD QIC quarterly. The summarized data for the service plan review are also shared with service coordination staff at the local service coordination level.

MLTC is responsible for ensuring effective oversight of the enrollment broker. DDD works in collaboration with MLTC to identify processes and expectations of the enrollment broker that are not met as required. DDD analyzes data from MLTC to report on the performance measures. As problems are discovered with provider enrollment screenings or processing DDD meets with the MLTC representative responsible for the enrollment broker contract to implement corrective actions.

Annual monitoring of agency provider settings is conducted by the DHHS-DD quality team. Providers who are found to be out of compliance or not progressing towards a plan for compliance with HCBS setting requirements are sent a results letter and given a set timeframe in which they are required to submit a remediation plan and supporting documents. Once the provider submits the remediation plan, it has a set timeframe in which to become compliant. Written communication to the provider states that failure to respond timely to requests for plans or documentation will be considered non-compliance and could result in a termination of all services in that setting.

The DHHS-DD quality team is responsible for scheduling the Quality Improvement Committee meetings. If a meeting is cancelled, the DHHS-DD quality team is responsible for rescheduling.

### ii. Remediation Data Aggregation

**Remediation-related Data Aggregation and Analysis (including trend identification)**

**Appendix B: Participant Access and Eligibility**

**B-1: Specification of the Waiver Target Group(s)**

**a. Target Group(s).** Under the waiver of Section 1902(a)(10)(B) of the Act, the state limits waiver services to one or more groups or subgroups of individuals. Please see the instruction manual for specifics regarding age limits. In accordance with 42 CFR §441.301(b)(6), select one or more waiver target groups, check each of the subgroups in the selected target group(s) that may receive services under the waiver, and specify the minimum and maximum (if any) age of individuals served in each subgroup:

<table>
<thead>
<tr>
<th>Target Group Included</th>
<th>Target SubGroup</th>
<th>Minimum Age</th>
<th>Maximum Age</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aged or Disabled, or Both - General</td>

</table>
b. **Additional Criteria.** The state further specifies its target group(s) as follows:

No additional criteria

c. **Transition of Individuals Affected by Maximum Age Limitation.** When there is a maximum age limit that applies to individuals who may be served in the waiver, describe the transition planning procedures that are undertaken on behalf of participants affected by the age limit (select one):

- ☑ Not applicable. There is no maximum age limit
- ☐ The following transition planning procedures are employed for participants who will reach the waiver's maximum age limit.

Specify:

Appendix B: Participant Access and Eligibility

**B-2: Individual Cost Limit (1 of 2)**

**a. Individual Cost Limit.** The following individual cost limit applies when determining whether to deny home and community-based services or entrance to the waiver to an otherwise eligible individual (select one). Please note that a state may have only ONE individual cost limit for the purposes of determining eligibility for the waiver:

- ☑ No Cost Limit. The state does not apply an individual cost limit. *Do not complete Item B-2-b or item B-2-c.*
- ☐ Cost Limit in Excess of Institutional Costs. The state refuses entrance to the waiver to any otherwise eligible individual when the state reasonably expects that the cost of the home and community-based services furnished to that individual would exceed the cost of a level of care specified for the waiver up to an amount specified by the state. *Complete Items B-2-b and B-2-c.*

The limit specified by the state is (select one)

- ☐ A level higher than 100% of the institutional average.

Specify the percentage:  

- ☐ Other
Specify:

- **Institutional Cost Limit.** Pursuant to 42 CFR 441.301(a)(3), the state refuses entrance to the waiver to any otherwise eligible individual when the state reasonably expects that the cost of the home and community-based services furnished to that individual would exceed 100% of the cost of the level of care specified for the waiver. Complete Items B-2-b and B-2-c.

- **Cost Limit Lower Than Institutional Costs.** The state refuses entrance to the waiver to any otherwise qualified individual when the state reasonably expects that the cost of home and community-based services furnished to that individual would exceed the following amount specified by the state that is less than the cost of a level of care specified for the waiver.

Specify the basis of the limit, including evidence that the limit is sufficient to assure the health and welfare of waiver participants. Complete Items B-2-b and B-2-c.

The cost limit specified by the state is (select one):

- The following dollar amount:
  
  Specify dollar amount:

  The dollar amount (select one)

  - Is adjusted each year that the waiver is in effect by applying the following formula:
    
    Specify the formula:

  - May be adjusted during the period the waiver is in effect. The state will submit a waiver amendment to CMS to adjust the dollar amount.

- The following percentage that is less than 100% of the institutional average:

  Specify percent:

- Other:

  Specify:

Appendix B: Participant Access and Eligibility

B-2: Individual Cost Limit (2 of 2)

Answers provided in Appendix B-2-a indicate that you do not need to complete this section.

09/20/2019
b. **Method of Implementation of the Individual Cost Limit.** When an individual cost limit is specified in Item B-2-a, specify the procedures that are followed to determine in advance of waiver entrance that the individual's health and welfare can be assured within the cost limit:

---

**c. Participant Safeguards.** When the state specifies an individual cost limit in Item B-2-a and there is a change in the participant's condition or circumstances post-entrance to the waiver that requires the provision of services in an amount that exceeds the cost limit in order to assure the participant's health and welfare, the state has established the following safeguards to avoid an adverse impact on the participant (check each that applies):

- The participant is referred to another waiver that can accommodate the individual’s needs.
- Additional services in excess of the individual cost limit may be authorized.

Specify the procedures for authorizing additional services, including the amount that may be authorized:

---

☐ Other safeguard(s)

Specify:

---

**Appendix B: Participant Access and Eligibility**

**B-3: Number of Individuals Served (1 of 4)**

a. **Unduplicated Number of Participants.** The following table specifies the maximum number of unduplicated participants who are served in each year that the waiver is in effect. The state will submit a waiver amendment to CMS to modify the number of participants specified for any year(s), including when a modification is necessary due to legislative appropriation or another reason. The number of unduplicated participants specified in this table is basis for the cost-neutrality calculations in Appendix J:

<table>
<thead>
<tr>
<th>Waiver Year</th>
<th>Unduplicated Number of Participants</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td>1055</td>
</tr>
<tr>
<td>Year 2</td>

</tr>
<tr>
<td>Year 3</td>
<td>1055</td>
</tr>
<tr>
<td>Year 4</td>
<td>1055</td>
</tr>
<tr>
<td>Year 5</td>
<td>1055</td>
</tr>
</tbody>
</table>

b. **Limitation on the Number of Participants Served at Any Point in Time.** Consistent with the unduplicated number of participants specified in Item B-3-a, the state may limit to a lesser number the number of participants who will be served at any point in time during a waiver year. Indicate whether the state limits the number of participants in this way: (select one):

- The state does not limit the number of participants that it serves at any point in time during a waiver year.
The state limits the number of participants that it serves at any point in time during a waiver year.

The limit that applies to each year of the waiver period is specified in the following table:

<table>
<thead>
<tr>
<th>Waiver Year</th>
<th>Maximum Number of Participants Served At Any Point During the Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td>900</td>
</tr>

<tr>
<td>Year 3</td>
<td>900</td>
</tr>
<tr>
<td>Year 4</td>
<td>900</td>
</tr>
<tr>
<td>Year 5</td>
<td>900</td>
</tr>
</tbody>
</table>

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (2 of 4)

c. Reserved Waiver Capacity. The state may reserve a portion of the participant capacity of the waiver for specified purposes (e.g., provide for the community transition of institutionalized persons or furnish waiver services to individuals experiencing a crisis) subject to CMS review and approval. The State (select one):

- Reserved Waiver Capacity:
  - Not applicable. The state does not reserve capacity.
  - The state reserves capacity for the following purpose(s).

  Purpose(s) the state reserves capacity for:
  
<table>
<thead>
<tr>
<th>Purposes</th>
</tr>
</thead>

<tr>
<td>Transition of Youth from Special Education services</td>
</tr>
<tr>
<td>Emergency</td>
</tr>
<tr>
<td>Transition of Participants from Other Waivers</td>
</tr>
</tbody>
</table>

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (2 of 4)

Purpose (provide a title or short description to use for lookup):

- Transition of Youth from Special Education services

Purpose (describe):

Capacity is reserved for Nebraska high school graduates and supports participants who, on or after September 6, 1993, graduated from Nebraska public and/or nonpublic high school transition services and have reached the age of 21. This category of reserve capacity ensures a participant is transferred seamlessly from services offered by the public school system to day and vocational services offered by the Nebraska Department of Health and Human Services (DHHS) Division of Developmental Disabilities (DHHS-DD). The purpose is to transition the most vulnerable eligible young adults from the education system into the adult developmental disabilities system to prevent loss of skills and abilities and to support employment and community integration before skills become dormant.
Describe how the amount of reserved capacity was determined:

Reserved capacity is based on historical data and approval of funding by the Nebraska legislature.

The capacity that the State reserves in each waiver year is specified in the following table:

<table>
<thead>
<tr>
<th>Waiver Year</th>
<th>Capacity Reserved</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td>200</td>

<td>200</td>
</tr>
<tr>
<td>Year 5</td>
<td>200</td>
</tr>
</tbody>
</table>

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (2 of 4)

**Purpose** *(provide a title or short description to use for lookup):

<table>
<thead>
<tr>
<th>Purpose</th>
<th>9/20/2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency</td>
<td></td>
</tr>
</tbody>
</table>
Capacity is reserved for emergency purposes to support individuals in immediate crisis due to caregiver death, homelessness or other situations that threaten the life and safety of the individual. Selection of individuals for entrance to the waiver is referred to priority funding and is defined in Nebr. Rev. Stat. §83-1216. The priorities for funding the Medicaid home and community-based services waivers applicable to this waiver are as follows:

1. Responding to an immediate crisis due to caregiver death, homelessness, or a threat to the life and safety of the person;
2. Responding to the needs of persons that have resided in an institutional setting for a period of at least twelve consecutive months and who are requesting community-based services;
3. Responding to the needs of wards of the department or persons placed under the supervision of the Office of Probation Administration by the Nebraska court system who are transitioning upon age nineteen with no other alternatives as determined by the department to support residential services necessary to pursue economic self-sufficiency;
4. Responding to the needs of persons transitioning from the education system upon attaining twenty-one years of age to maintain skills and receive the day services necessary to pursue economic self-sufficiency;
5. Responding to the needs of persons who are dependents of members of the armed forces of the United States who are legal residents of this state due to the service member's military assignment in Nebraska; and
6. Responding to the needs of all other persons by date of application.

If there is a change in a person's needs, they may contact DHHS and request that an assessment of an immediate crisis be completed. Persons assessed to be in an immediate crisis and the crisis cannot be resolved in another way shall be prioritized highest on the waiting list. An immediate crisis due to caregiver death, homelessness or other situations that threaten the life and safety of the individual is defined by the following criteria:

1. Homelessness: the person does not have a place to live or is in imminent danger of losing their home and has no resources/money to secure housing.
2. Abusive or neglectful situation: the person is experiencing or is in imminent risk of physical, sexual or emotional abuse or neglect in the person’s present living situation.
3. Danger to self or others: the person's behavioral challenge is such that the person is seriously injuring/harming self or others in their home, or is in imminent danger of doing so.
4. Loss of primary relative caretaker due to caretaker death or the caretaker is in need of long term services and support themselves.

Describe how the amount of reserved capacity was determined:

Reserved capacity is based on historical data and approval of funding by the Nebraska legislature.

The capacity that the State reserves in each waiver year is specified in the following table:

<table>
<thead>
<tr>
<th>Waiver Year</th>
<th>Capacity Reserved</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td>5</td>
</tr>
<tr>
<td>Year 2</td>

<td>5</td>
</tr>
<tr>
<td>Year 5</td>
<td>5</td>
</tr>
</tbody>
</table>

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (2 of 4)

Purpose (provide a title or short description to use for lookup):
Transition of Participants from Other Waivers

Purpose (describe):

Capacity is reserved to accommodate the transition of participants from other Medicaid HCBS 1915(c) waivers. The purpose is to ensure waiver capacity is available to support eligible participants’ health and safety needs, choice in waiver, and services that support their residential needs, employment, and community integration under the most appropriate HCBS waiver.

Describe how the amount of reserved capacity was determined:

Reserved capacity is based on historical data and approval of funding by the Nebraska legislature.

The capacity that the State reserves in each waiver year is specified in the following table:

<table>
<thead>
<tr>
<th>Waiver Year</th>
<th>Capacity Reserved</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td>10</td>

</tr>
<tr>
<td>Year 5</td>
<td>10</td>
</tr>
</tbody>
</table>

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (3 of 4)

d. Scheduled Phase-In or Phase-Out. Within a waiver year, the state may make the number of participants who are served subject to a phase-in or phase-out schedule (select one):

- The waiver is not subject to a phase-in or a phase-out schedule.
- The waiver is subject to a phase-in or phase-out schedule that is included in Attachment #1 to Appendix B-3. This schedule constitutes an intra-year limitation on the number of participants who are served in the waiver.

e. Allocation of Waiver Capacity.

Select one:

- Waiver capacity is allocated/managed on a statewide basis.
- Waiver capacity is allocated to local/regional non-state entities.

Specify: (a) the entities to which waiver capacity is allocated; (b) the methodology that is used to allocate capacity and how often the methodology is reevaluated; and, (c) policies for the reallocation of unused capacity among local/regional non-state entities:

f. Selection of Entrants to the Waiver. Specify the policies that apply to the selection of individuals for entrance to the waiver:
Persons who meet eligibility criteria as defined in Nebraska Revised Statute §83-1205 will be assessed for Medicaid HCBS Waiver level of care and financial eligibility and placed on a waiting list. The date used to establish a person's placement on the waiting list is the date of application from which eligibility for developmental disabilities in Nebraska was originally established. Persons remain on the waiting list until a waiver slot has been assigned to them for use, the Legislature appropriates special funds to serve a specific class of people, they withdraw from the list, or they become ineligible for the waiver. Waiver dollars are not used for the assessments that are done prior to placing an individual on the waiting list.

Once the maximum number of unduplicated participants is reached in each waiver year, no additional participants will be enrolled.

The priorities for funding the Medicaid home and community-based services waivers applicable to this waiver are as follows:
1. Responding to an immediate crisis due to caregiver death, homelessness, or a threat to the life and safety of the person;
2. Responding to the needs of persons that have resided in an institutional setting for a period of at least twelve consecutive months and who are requesting community-based services;
3. Responding to the needs of wards of the department or persons placed under the supervision of the Office of Probation Administration by the Nebraska court system who are transitioning upon age nineteen with no other alternatives as determined by the department to support residential services necessary to pursue economic self-sufficiency;
4. Responding to the needs of persons transitioning from the education system upon attaining twenty-one years of age to maintain skills and receive the day services necessary to pursue economic self-sufficiency;
5. Responding to the needs of persons who are dependents of members of the armed forces of the United States who are legal residents of this state due to the service member's military assignment in Nebraska; and
6. Responding to the needs of all other persons by date of application.

If there is a change in a person's needs, they may contact DHHS and request that an assessment of an immediate crisis be completed. Persons assessed to be in an immediate crisis and the crisis cannot be resolved in another way shall be prioritized highest on the waiting list. An immediate crisis due to caregiver death, homelessness or other situations that threaten the life and safety of the individual is defined by the following criteria:
1. Homelessness: the person does not have a place to live or is in imminent danger of losing their home and has no resources/money to secure housing.
2. Abusive or neglectful situation: the person is experiencing or is in imminent risk of physical, sexual or emotional abuse or neglect in the person’s present living situation.
3. Danger to self or others: the person's behavioral challenge is such that the person is seriously injuring/harming self or others in their home, or is in imminent danger of doing so.
4. Loss of primary relative caretaker due to caretaker death or the caretaker is in need of long term services and support themselves.

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served - Attachment #1 (4 of 4)

Answers provided in Appendix B-3-d indicate that you do not need to complete this section.

Appendix B: Participant Access and Eligibility

B-4: Eligibility Groups Served in the Waiver

a. 1. State Classification. The state is a (select one):

- §1634 State
- SSI Criteria State
- 209(b) State

2. Miller Trust State.
Indicate whether the state is a Miller Trust State (select one):

- No
b. Medicaid Eligibility Groups Served in the Waiver. Individuals who receive services under this waiver are eligible under the following eligibility groups contained in the state plan. The state applies all applicable federal financial participation limits under the plan. Check all that apply:

Eligibility Groups Served in the Waiver (excluding the special home and community-based waiver group under 42 CFR §435.217)

- [ ] Low income families with children as provided in §1931 of the Act
- [ ] SSI recipients
- [ ] Aged, blind or disabled in 209(b) states who are eligible under 42 CFR §435.121
- [ ] Optional state supplement recipients
- [ ] Optional categorically needy aged and/or disabled individuals who have income at:
  
  Select one:
  
  - ☑️ 100% of the Federal poverty level (FPL)
  - [ ] % of FPL, which is lower than 100% of FPL.

  Specify percentage: _______________________

- [ ] Working individuals with disabilities who buy into Medicaid (BBA working disabled group as provided in §1902(a)(10)(A)(ii)(XIII) of the Act)
- [ ] Working individuals with disabilities who buy into Medicaid (TWWIIA Basic Coverage Group as provided in §1902(a)(10)(A)(ii)(XV) of the Act)
- [ ] Working individuals with disabilities who buy into Medicaid (TWWIIA Medical Improvement Coverage Group as provided in §1902(a)(10)(A)(ii)(XVI) of the Act)
- [ ] Disabled individuals age 18 or younger who would require an institutional level of care (TEFRA 134 eligibility group as provided in §1902(e)(3) of the Act)
- [ ] Medically needy in 209(b) States (42 CFR §435.330)
- [ ] Medically needy in 1634 States and SSI Criteria States (42 CFR §435.320, §435.322 and §435.324)
- [ ] Other specified groups (include only statutory/regulatory reference to reflect the additional groups in the state plan that may receive services under this waiver)

  Specify:
  
  • Pregnant Women (435.116)
  • Parent/Caretaker Relative (435.110)
  • Former Foster Care Children (435.150)
  • TMA (1925)
  • Breast and Cervical Cancer Treatment Program(1902(a)(10)(A)(ii)(XVIII))
  • DAC (1634(c))
  • Pickle (435.135)
  • 1619(b) recipients
  • Disabled Widow(er) (435.138)

Special home and community-based waiver group under 42 CFR §435.217

Note: When the special home and community-based waiver group under 42 CFR §435.217 is included, Appendix B-5 must be completed

- [ ] No. The state does not furnish waiver services to individuals in the special home and community-based waiver group under 42 CFR §435.217. Appendix B-5 is not submitted.

- ☑ Yes. The state furnishes waiver services to individuals in the special home and community-based waiver group under 42 CFR §435.217.
Select one and complete Appendix B-5.

- All individuals in the special home and community-based waiver group under 42 CFR §435.217
- Only the following groups of individuals in the special home and community-based waiver group under 42 CFR §435.217

Check each that applies:

☐ A special income level equal to:

Select one:

- 300% of the SSI Federal Benefit Rate (FBR)
- A percentage of FBR, which is lower than 300% (42 CFR §435.236)

Specify percentage: 

☐ A dollar amount which is lower than 300%.

Specify dollar amount: 

☐ Aged, blind and disabled individuals who meet requirements that are more restrictive than the SSI program (42 CFR §435.121)

☒ Medically needy without spend down in states which also provide Medicaid to recipients of SSI (42 CFR §435.320, §435.322 and §435.324)

☐ Medically needy without spend down in 209(b) States (42 CFR §435.330)

☐ Aged and disabled individuals who have income at:

Select one:

- 100% of FPL
- % of FPL, which is lower than 100%.

Specify percentage amount: 

☒ Other specified groups (include only statutory/regulatory reference to reflect the additional groups in the state plan that may receive services under this waiver)

Specify:

$$\cdot$$ Recipients who are medically needy with spend down: The State will use the actual maximum monthly allowable ICF/ID rate to reduce an individual's income to an amount at or below the medically needy income limit (MNIL) for persons who are medically needy with a Share of Cost.

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (1 of 7)

In accordance with 42 CFR §441.303(e), Appendix B-5 must be completed when the state furnishes waiver services to individuals in the special home and community-based waiver group under 42 CFR §435.217, as indicated in Appendix B-4. Post-eligibility applies only to the 42 CFR §435.217 group.

a. Use of Spousal Impoverishment Rules. Indicate whether spousal impoverishment rules are used to determine eligibility for the special home and community-based waiver group under 42 CFR §435.217:

Note: For the period beginning January 1, 2014 and extending through September 30, 2019 (or other date as required by law), the following instructions are mandatory. The following box should be checked for all waivers that furnish waiver services to the 42 CFR §435.217 group effective at any point during this time period.
Spousal impoverishment rules under §1924 of the Act are used to determine the eligibility of individuals with a community spouse for the special home and community-based waiver group. In the case of a participant with a community spouse, the state uses spousal post-eligibility rules under §1924 of the Act. Complete Items B-5-e (if the selection for B-4-a-i is SSI State or §1634) or B-5-f (if the selection for B-4-a-i is 209b State) and Item B-5-g unless the state indicates that it also uses spousal post-eligibility rules for the time periods before January 1, 2014 or after September 30, 2019 (or other date as required by law).

Note: The following selections apply for the time periods before January 1, 2014 or after September 30, 2019 (or other date as required by law) (select one).

Spousal impoverishment rules under §1924 of the Act are used to determine the eligibility of individuals with a community spouse for the special home and community-based waiver group.

In the case of a participant with a community spouse, the state elects to (select one):

- Use spousal post-eligibility rules under §1924 of the Act. (Complete Item B-5-b (SSI State) and Item B-5-d)
- Use regular post-eligibility rules under 42 CFR §435.726 (SSI State) or under §435.735 (209b State) (Complete Item B-5-b (SSI State). Do not complete Item B-5-d)
- Spousal impoverishment rules under §1924 of the Act are not used to determine eligibility of individuals with a community spouse for the special home and community-based waiver group. The state uses regular post-eligibility rules for individuals with a community spouse. (Complete Item B-5-b (SSI State). Do not complete Item B-5-d)

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (2 of 7)

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

b. Regular Post-Eligibility Treatment of Income: SSI State.

The state uses the post-eligibility rules at 42 CFR 435.726 for individuals who do not have a spouse or have a spouse who is not a community spouse as specified in §1924 of the Act. Payment for home and community-based waiver services is reduced by the amount remaining after deducting the following allowances and expenses from the waiver participant's income:

1. Allowance for the needs of the waiver participant (select one):

- The following standard included under the state plan

  Select one:
  - SSI standard
  - Optional state supplement standard
  - Medically needy income standard
  - The special income level for institutionalized persons

  (select one):
  - 300% of the SSI Federal Benefit Rate (FBR)
  - A percentage of the FBR, which is less than 300%
    - Specify the percentage: 
  - A dollar amount which is less than 300%
    - Specify dollar amount: 
  - A percentage of the Federal poverty level
Specify percentage:

- Other standard included under the state Plan
  
  Specify:

  • Independent living arrangements (Room and Board, Apartment/house, Public Housing – 100% FPL
  • Centers for Persons with Developmental Disabilities and Adult Family Homes – current grant
  Standard of Need

- The following dollar amount
  
  Specify dollar amount: If this amount changes, this item will be revised.

- The following formula is used to determine the needs allowance:
  
  Specify:

- Other
  
  Specify:

ii. Allowance for the spouse only (select one):

- Not Applicable
  
  The state provides an allowance for a spouse who does not meet the definition of a community spouse in §1924 of the Act. Describe the circumstances under which this allowance is provided:

  Specify:

  Specify the amount of the allowance (select one):

  - SSI standard
  - Optional state supplement standard
  - Medically needy income standard
  - The following dollar amount:
    
    Specify dollar amount: If this amount changes, this item will be revised.

  - The amount is determined using the following formula:
    
    Specify:
iii. Allowance for the family (select one):

- Not Applicable (see instructions)
- AFDC need standard
- Medically needy income standard
- The following dollar amount:

  Specify dollar amount: [ ]

  The amount specified cannot exceed the higher of the need standard for a family of the same size used to determine eligibility under the state's approved AFDC plan or the medically needy income standard established under 42 CFR §435.811 for a family of the same size. If this amount changes, this item will be revised.

- The amount is determined using the following formula:

  Specify:

- Other

  Specify:

iv. Amounts for incurred medical or remedial care expenses not subject to payment by a third party, specified in 42 §CFR 435.726:

- a. Health insurance premiums, deductibles and co-insurance charges
- b. Necessary medical or remedial care expenses recognized under state law but not covered under the state's Medicaid plan, subject to reasonable limits that the state may establish on the amounts of these expenses.

Select one:

- Not Applicable (see instructions) Note: If the state protects the maximum amount for the waiver participant, not applicable must be selected.
- The state does not establish reasonable limits.
- The state establishes the following reasonable limits

  Specify:

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (3 of 7)

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

c. Regular Post-Eligibility Treatment of Income: 209(B) State.

Answers provided in Appendix B-4 indicate that you do not need to complete this section and therefore this section is not visible.
Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (4 of 7)

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

**d. Post-Eligibility Treatment of Income Using Spousal Impoverishment Rules**

The state uses the post-eligibility rules of §1924(d) of the Act (spousal impoverishment protection) to determine the contribution of a participant with a community spouse toward the cost of home and community-based care if it determines the individual's eligibility under §1924 of the Act. There is deducted from the participant's monthly income a personal needs allowance (as specified below), a community spouse's allowance and a family allowance as specified in the state Medicaid Plan. The state must also protect amounts for incurred expenses for medical or remedial care (as specified below).

i. Allowance for the personal needs of the waiver participant

*(select one):*
- SSI standard
- Optional state supplement standard
- Medically needy income standard
- The special income level for institutionalized persons
- A percentage of the Federal poverty level

Specify percentage: [ ]

- The following dollar amount:

Specify dollar amount: [ ] If this amount changes, this item will be revised

- The following formula is used to determine the needs allowance:

Specify formula:

- Other

Specify:

- Independent living arrangements (Room and Board, Apartment/house, Public Housing – 100% FPL
- Centers for Persons with Developmental Disabilities and Adult Family Homes – current grant Standard of Need

ii. If the allowance for the personal needs of a waiver participant with a community spouse is different from the amount used for the individual's maintenance allowance under 42 CFR §435.726 or 42 CFR §435.735, explain why this amount is reasonable to meet the individual's maintenance needs in the community.

Select one:

- Allowance is the same
- Allowance is different.

*Explanation of difference:*
iii. Amounts for incurred medical or remedial care expenses not subject to payment by a third party, specified in 42 CFR §435.726:

a. Health insurance premiums, deductibles and co-insurance charges
b. Necessary medical or remedial care expenses recognized under state law but not covered under the state's Medicaid plan, subject to reasonable limits that the state may establish on the amounts of these expenses.

Select one:

- **Not Applicable (see instructions)** Note: If the state protects the maximum amount for the waiver participant, not applicable must be selected.
- **The state does not establish reasonable limits.**
- **The state uses the same reasonable limits as are used for regular (non-spousal) post-eligibility.**

### Appendix B: Participant Access and Eligibility

#### B-5: Post-Eligibility Treatment of Income (5 of 7)

**Note:** The following selections apply for the five-year period beginning January 1, 2014.

*Answers provided in Appendix B-5-a indicate the selections in B-5-b also apply to B-5-e.*

#### B-5: Post-Eligibility Treatment of Income (6 of 7)

**Note:** The following selections apply for the five-year period beginning January 1, 2014.

*Answers provided in Appendix B-4 indicate that you do not need to complete this section and therefore this section is not visible.*

#### B-5: Post-Eligibility Treatment of Income (7 of 7)

**Note:** The following selections apply for the five-year period beginning January 1, 2014.

The state uses the post-eligibility rules of §1924(d) of the Act (spousal impoverishment protection) to determine the contribution of a participant with a community spouse toward the cost of home and community-based care. There is deducted from the participant's monthly income a personal needs allowance (as specified below), a community spouse's allowance and a family allowance as specified in the state Medicaid Plan. The state must also protect amounts for incurred expenses for medical or remedial care (as specified below).

*Answers provided in Appendix B-5-a indicate the selections in B-5-d also apply to B-5-g.*

### Appendix B: Participant Access and Eligibility

#### B-6: Evaluation/Reevaluation of Level of Care

*As specified in 42 CFR §441.302(c), the state provides for an evaluation (and periodic reevaluations) of the need for the level(s) of care specified for this waiver, when there is a reasonable indication that an individual may need such services in the near future (one month or less), but for the availability of home and community-based waiver services.*

09/20/2019
a. Reasonable Indication of Need for Services. In order for an individual to be determined to need waiver services, an individual must require: (a) the provision of at least one waiver service, as documented in the service plan, and (b) the provision of waiver services at least monthly or, if the need for services is less than monthly, the participant requires regular monthly monitoring which must be documented in the service plan. Specify the state's policies concerning the reasonable indication of the need for services:

i. Minimum number of services.

The minimum number of waiver services (one or more) that an individual must require in order to be determined to need waiver services is: 1

ii. Frequency of services. The state requires (select one):

- The provision of waiver services at least monthly
- Monthly monitoring of the individual when services are furnished on a less than monthly basis

If the state also requires a minimum frequency for the provision of waiver services other than monthly (e.g., quarterly), specify the frequency:

The minimum frequency for the provision of the waiver service is ninety days. A participant’s approved waiver slot will remain available to the participant when the participant is hospitalized, receiving rehabilitation services, receiving non-community based crisis services, or is incarcerated and cannot utilize a waiver service for ninety days. A request to keep the slot available beyond ninety days for a participant must be based on critical health or safety concerns and other relevant factors, and is subject to approval by the Department.

b. Responsibility for Performing Evaluations and Reevaluations. Level of care evaluations and reevaluations are performed (select one):

- Directly by the Medicaid agency
- By the operating agency specified in Appendix A
- By a government agency under contract with the Medicaid agency.

Specify the entity:

Other

Specify:

c. Qualifications of Individuals Performing Initial Evaluation: Per 42 CFR §441.303(c)(1), specify the educational/professional qualifications of individuals who perform the initial evaluation of level of care for waiver applicants:

DHHS-DD employees perform the initial evaluation of level of care. Disability Services Specialists (DSSs) complete the initial evaluation and are required to have a Bachelor’s degree and professional experience in: education, psychology, social work, sociology, human services, or a related field and experience in services or programs for persons with intellectual or other developmental disabilities.

d. Level of Care Criteria. Fully specify the level of care criteria that are used to evaluate and reevaluate whether an individual needs services through the waiver and that serve as the basis of the state's level of care instrument/tool. Specify the level of care instrument/tool that is employed. State laws, regulations, and policies concerning level of care criteria and the level of care instrument/tool are available to CMS upon request through the Medicaid agency or the operating agency (if applicable), including the instrument/tool utilized.
Individuals who are deemed to require ICF-IDD level of care are enrolled in and maintained on (pursuant to reevaluation) this waiver. All waiver participants must meet the criteria for a developmental disability as defined under Neb. Rev. Stat. §83-1205.

As defined by CMS, the process that is used to assess ICF-IDD level of care and determine whether new waiver entrants meet all waiver eligibility criteria is termed “evaluation.” The evaluation must find that there is a reasonable indication that the individual would need waiver services within the near future (two months or less). The periodic review to verify that the individual continues to meet all waiver eligibility criteria is termed “reevaluation.”

The following waiver eligibility criteria are used to initially determine, or evaluate, whether an individual needs services through the waiver:

a. Eligibility status as defined under Neb. Rev. Stat. §83-1205, which is verified at ages 9 and 18;
b. Medicaid eligibility status;
c. Draft initial service plan (Individual Support Plan - ISP);
d. ICF-IDD level of care assessment tool (Developmental Index); and
e. Signed form for request/consent to community based services, which is the choice between home and community based waiver services and ICF-IDD services and choice of providers.

The same criteria, used for all ages, are used to annually redetermine, or reevaluate, continued eligibility for Medicaid HCBS DD waiver services:

a. Eligibility status as defined under Neb. Rev. Stat. §83-1205, which is verified at ages 9 and 18;
b. Medicaid eligibility status;
c. Annual service plan (Individual Support Plan - ISP); and
d. ICF-IDD level of care assessment tool (Developmental Index).

A signed form for request/consent to community based services is not a criteria for reevaluation.

e. Level of Care Instrument(s). Per 42 CFR §441.303(c)(2), indicate whether the instrument/tool used to evaluate level of care for the waiver differs from the instrument/tool used to evaluate institutional level of care (select one):

- The same instrument is used in determining the level of care for the waiver and for institutional care under the state Plan.
- A different instrument is used to determine the level of care for the waiver than for institutional care under the state plan.

Describe how and why this instrument differs from the form used to evaluate institutional level of care and explain how the outcome of the determination is reliable, valid, and fully comparable.

The ICF-IDD level of care assessment tool for waiver evaluation and reevaluation, known as the Developmental Index, is used for all ages and is comparable to the ICF/DD Utilization Review assessment tool completed for institutional ICF placement. Both tools note skills, abilities, preferences, and needs, including health needs, means of communication, and behavioral concerns. The participant and family or guardian, and his/her Service Coordinator (SC), provider staff, or others who are familiar with the participant complete the applicable tool.

The Developmental Index differs from the ICF/DD Utilization Review, the assessment tool, by assessing skills, abilities, and areas needing improvement for maximizing independence in the community, such as job-readiness, managing personal finances, and accessing community services. The Developmental Index is completed on an annual basis. Although the tools are different, reliability and validity testing completed by previous DHHS-MLTC staff using a sampling methodology indicates that the outcome of the determinations yielded from the Developmental Index was the same as the outcome of determinations yielded from the assessment completed for ICF placement.

If a former waiver participant enters the State ICF for short-term intensive behavioral treatment, the LOC is determined using the ICF/DD Utilization Review assessment tool.

f. Process for Level of Care Evaluation/Reevaluation: Per 42 CFR §441.303(c)(1), describe the process for evaluating waiver applicants for their need for the level of care under the waiver. If the reevaluation process differs from the evaluation process, describe the differences:
DHHS-DD requires that an initial and an annual reevaluation of waiver eligibility are conducted by DHHS-DD staff to access waiver services. The DSSs perform the initial waiver approval, as stated in Section B-6-d. A determination of initial waiver eligibility is made within 14 calendar days of the DSS receiving notification from the SC that a participant is ready for entrance to the waiver. The DSS provides notification of eligibility for initial waiver services to the participant and/or representative.

Assigned DHHS-DD staff complete the annual waiver reevaluation. The same criteria, used for all ages, are used to annually reevaluate, or reevaluate, continued eligibility for Medicaid HCBS DD waiver services:

a. Eligibility status as defined under Neb. Rev. Stat. §83-1205, which is verified at ages 9 and 18;
b. Medicaid eligibility status;
c. Annual service plan (Individual Support Plan - ISP); and
d. ICF-IDD level of care assessment tool (Developmental Index).

A signed form for request/consent to community based services is not a criteria for reevaluation.

The process for the annual waiver reevaluation includes a review of the ICF-IDD level of care assessment tool; the service plan; and Medicaid eligibility status.

The Developmental Index is completed by the participant, their service coordinator, provider staff, and other team members. This process allows all team members to have and provide input. Within ten calendar days, the annual reevaluation is completed and the participant’s annual budget is approved and authorized by service coordination in accordance with policy and state and federal regulations.

As a last step, the DHHS-DD staff provides notification of the annual waiver reevaluation to the participant and their service plan team. If eligible, the participant is maintained on the waiver. If the participant is not eligible because they are not Medicaid eligible or do not meet ICF-IDD level of care for waiver, these participants are removed from the waiver and their waiver case is closed.

Participants who are determined not eligible for waiver services receive written notification of their ineligibility via a Notice of Decision and are then eligible for a Fair Hearing under the state regulations if they believe that the eligibility determination was made in error or the level of care determination is not accurate.

g. Reevaluation Schedule. Per 42 CFR §441.303(c)(4), reevaluations of the level of care required by a participant are conducted no less frequently than annually according to the following schedule (select one):

- Every three months
- Every six months
- Every twelve months
- Other schedule
  Specify the other schedule:

h. Qualifications of Individuals Who Perform Reevaluations. Specify the qualifications of individuals who perform reevaluations (select one):

- The qualifications of individuals who perform reevaluations are the same as individuals who perform initial evaluations.
- The qualifications are different.
  Specify the qualifications:

i. Procedures to Ensure Timely Reevaluations. Per 42 CFR §441.303(c)(4), specify the procedures that the state employs
to ensure timely reevaluations of level of care (specify):

DHHS-DD staff that complete reevaluations utilize the web-based case management system and the processes within it that are components of case management to ensure timely reevaluations of waiver eligibility. DHHS-DD staff run electronic reports to determine if reevaluations are conducted timely and review findings at monthly supervision meetings.

j. Maintenance of Evaluation/Reevaluation Records. Per 42 CFR §441.303(c)(3), the state assures that written and/or electronically retrievable documentation of all evaluations and reevaluations are maintained for a minimum period of 3 years as required in 45 CFR §92.42. Specify the location(s) where records of evaluations and reevaluations of level of care are maintained:

The state assures that written and/or electronically retrievable documentation of all evaluations for initial waiver and reevaluations for annual waiver are maintained for a minimum period of 3 years as required in 45 CFR §92.42. DSSs who are responsible for the level of care evaluations, initial waiver evaluation and approval maintain an electronic record for each waiver participant. DHHS-DD staff who are responsible for performing the annual waiver reevaluation also keep an electronic record for each participant. The electronic records are maintained in a web-based case management system permanently.

Appendix B: Evaluation/Reevaluation of Level of Care

Quality Improvement: Level of Care

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Level of Care Assurance/Sub-assurances

The state demonstrates that it implements the processes and instrument(s) specified in its approved waiver for evaluating/reevaluating an applicant's/waiver participant's level of care consistent with level of care provided in a hospital, NF or ICF/IID.

i. Sub-Assurances:

a. Sub-assurance: An evaluation for LOC is provided to all applicants for whom there is reasonable indication that services may be needed in the future.

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:
A.1. Percent of new waiver applicants for whom Intermediate Care Facility (ICF) Level of Care (LOC) was determined prior to the receipt of services. Numerator = number of new waiver applicants for whom ICF LOC was determined. Denominator = number of new waiver applicants.

Data Source (Select one):
Record reviews, on-site
If 'Other' is selected, specify:
**Responsible Party for data collection/generation (check each that applies):**

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

Annual reevaluation of waiver eligibility is completed for all (100%) waiver participants. The Developmental Index LOC assessment is reviewed during the participant’s annual service plan meeting and documented in the service plan.

Additionally, the DHHS-DD quality team conducts annual off-site file reviews of 100% to verify the dates that work was completed by the assigned DHHS-DD staff.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

The state monitors level of care (LOC) evaluations and reevaluations, and takes action to address individual problems that are discovered, which may include failure to complete LOC evaluations/reevaluations, failure to follow established timelines, inaccurate determinations, and missing or incomplete documentation.

Monthly quality assurance reports are electronically generated for access by DHHS-DD staff and are reviewed at both the field office and central office levels to ensure continued Medicaid and waiver eligibility for participants. DHHS Disability Services Specialists (DSS), service coordinators (SC), and Service Coordination Supervisors (SCS) review reports and take appropriate action as needed on individual cases. These positions are responsible for the initial waiver eligibility determinations and they complete a LOC assessment when a funding offer is available for a new participant. If there are issues identified with LOC evaluations that involve staff performance (whether a DSS, SC or SCS), that person will be retrained. If the staff find issues with participant’s maintaining their eligibility, they are responsible for correcting the issue such as facilitating activities for recertification of Medicaid, correcting a service authorization to change or end DD waiver services, completing a LOC assessment, etc.

ii. Remediation Data Aggregation

**c. Timelines**

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Level of Care that are currently non-operational.

- ☐ No
- ☒ Yes

Please provide a detailed strategy for assuring Level of Care, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

---

### Appendix B: Participant Access and Eligibility

#### B-7: Freedom of Choice

**Freedom of Choice.** As provided in 42 CFR §441.302(d), when an individual is determined to be likely to require a level of care for this waiver, the individual or his or her legal representative is:

1. informed of any feasible alternatives under the waiver; and
2. given the choice of either institutional or home and community-based services.

#### a. Procedures.

Specify the state's procedures for informing eligible individuals (or their legal representatives) of the feasible alternatives available under the waiver and allowing these individuals to choose either institutional or waiver services. Identify the form(s) that are employed to document freedom of choice. The form or forms are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Nebraska waiver participants are afforded choice among waiver services as well as between waiver services and institutional care and this information is provided by the participant’s SC. Information about Nebraska's DD waiver services, feasible alternatives, and freedom of choice is provided verbally and in written materials to assist the participant in understanding DD waiver services, funding of his/her services, and his/her roles and responsibilities. Choice of ICF or waiver services is documented on a waiver consent form that also explains the right and process to appeal.

A signature for consent, documenting that waiver participant's choice is to receive community based waiver services over services in an institutional setting, is obtained upon initial determination of waiver eligibility and is kept in the participant's electronic waiver file. If guardianship or legal status changes, the SC must obtain a new, signed consent.

#### b. Maintenance of Forms.

Per 45 CFR §92.42, written copies or electronically retrievable facsimiles of Freedom of Choice forms are maintained for a minimum of three years. Specify the locations where copies of these forms are maintained.
The waiver consent form is kept in the participant’s electronic file maintained by DHHS-DD staff. The records are maintained permanently in electronic files by DHHS-DD staff.

Appendix B: Participant Access and Eligibility

B-8: Access to Services by Limited English Proficiency Persons

Access to Services by Limited English Proficient Persons. Specify the methods that the state uses to provide meaningful access to the waiver by Limited English Proficient persons in accordance with the Department of Health and Human Services "Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons" (68 FR 47311 - August 8, 2003):

The following methods are utilized to provide meaningful access to services by individuals with limited English proficiency at entrance to waiver services and on an ongoing basis;

- Oral language assistance services such as interpreters;
- Spanish translation of written materials, such as applications, brochures, due process, and the Notice of Decision;
- Spanish language placards, posters, etc.;
- Second language hiring qualifications;
- Availability of translators, including sign language;
- AT&T statewide language line; and
- Spanish language web sites.

Based on a published table of Estimate of at Least Top 15 Languages Spoken by Individuals with Limited English Proficiency (LEP) for the 50 States, the District of Columbia, Puerto Rico and each U.S. Territory from the U.S. Department of Health and Human Services, Office for Civil Rights, August 2016, Spanish is the prevalent non-English language in Nebraska. When the primary language is not English or Spanish, the state provides timely and accurate language assistance services, such as oral interpretation, and written translation when written translation is a reasonable step to provide meaningful access to an individual with LEP.

Appendix C: Participant Services

C-1: Summary of Services Covered (1 of 2)

a. Waiver Services Summary. List the services that are furnished under the waiver in the following table. If case management is not a service under the waiver, complete items C-1-b and C-1-c:

Appendix C: Participant Services

C-1/C-3: Service Specification

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Service Type:
Statutory Service

Service:
Day Habilitation

Alternate Service Title (if any):

HCBS Taxonomy:

Category 1: 04 Day Services
Sub-Category 1: 04020 day habilitation

Category 2:  
Sub-Category 2:  

Category 3:  
Sub-Category 3:  

Service Definition (Scope):
Category 4:  
Sub-Category 4:  

09/20/2019
Day Habilitation services are formalized training and staff supports that take place in a non-residential setting separate from the participant’s private residence or other residential living arrangement. Day Habilitation services are scheduled activities, formalized training, and staff supports for the acquisition, retention, or improvement in self-help, behavioral, and adaptive skills that enhance social development and develop skills in performing activities of daily living, and community living. Day Habilitation services may be provided to participants that do not have a clear plan for employment and are therefore not currently seeking to join the general work force. Training activities and environments are designed to foster the acquisition of skills, building positive social behavior and interpersonal competence, greater independence, and personal choice necessary to participate successfully in community living. Participants receiving day habilitation services are integrated into the community to the greatest extent possible.

Day Habilitation may be delivered in integrated community settings or in provider owned and operated settings for a portion of the typical workday. Generally, this service is provided between the hours of 7:00 am and 5:00 pm, or can be delivered in an alternate schedule, as documented in a participant’s service plan. Staff support is continuous, that is, staff are present at all times the participant is present. Continuous day services are expected to be available for no less than seven hours per day. The provider may operate a location where participants come to check-in prior to participating in integrated activities and/or to participate in a variety of daily activities related to greater community living. Provider owned and controlled settings also allow for participants who are experiencing short-term medical or behavioral crisis to participate in activities that are outside the residence.

Habilitation, or teaching and supporting, may include teaching such concepts as self-direction, attendance, task completion, problem solving, and safety. Services are generally not job-task oriented but instead are directed at improvement of basic skills such as attention span and motor skills, and not explicit employment objectives.

The activities, services, supports, and strategies are documented in the service plan, and the frequency and duration for which the services are delivered will be based on the service plan. Day Habilitation services will focus on enabling the participant to attain or maintain his or her maximum functional level and must be coordinated with but may not supplant any physical, occupational, or speech therapies listed in the service plan. In addition, the services and supports may reinforce skills taught in therapy, counseling sessions, or other settings. This service also includes the provision of personal care, health maintenance activities, and protective oversight when applicable to the participant, as well as supervision. In addition, the intensity of supervision will also be outlined in the service plan.

Health maintenance activities, such as medication administration and treatments that are routine, stable, and predictable may be provided by medication aides and other unlicensed direct support professionals and require nurse or medical practitioner oversight of delegated activities to the extent permitted under applicable State laws. Health maintenance activities, supervision, and assistance with personal needs are provided when identified as a need and documented in the service plan.

Transportation may be provided between the participant’s place of residence and the habilitation (teaching and supporting) service site or between habilitation service sites (in cases where the participant receives habilitation) services in more than one place). The cost of transportation is included in the rate paid to providers of the appropriate type of habilitation (teaching and supporting) services. The cost of transportation between other habilitation sites should be billed under those waiver services and not this service.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:
This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Day Habilitation services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Day Habilitation services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

For participants with degenerative conditions, these services may include training and supports designed to maintain skills and functioning and to prevent or slow regression, rather than acquiring new skills or improving existing skills. Meals provided as part of these services do not constitute a full nutritional regimen and as applicable, physical nutritional management plans must be implemented as documented in the service plan. This service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 or the Individuals with Disabilities Education Act (20 U.S.C. 1401 et seq.).

Participants that choose Day Habilitation services may also receive Community Living and Day Supports (CLDS) but these services may not be billed during the same period of the day. Daily rates are available for Day Habilitation services when the participant receives this service for four or more hours. Hourly rates are also available for times when the participant might be in this service a portion of the day but not a full four hours. An hour of service equates to one clock hour. Services may be billed in half and quarter hours (.25, .50, and .75).

When this service is not delivered continuously/consecutively for four or more hours, it must be billed at an hourly rate. CLDS can only be billed at an hourly rate on days when no daily rate is billed for Day Habilitation. When both services are provided in one workday, both Day Habilitation services and CLDS are billed in hours.

The amount of authorized services is the participant’s approved annual budget and is provided based on the participant’s preferences to the extent possible, and as documented in the service plan.

This service will not overlap with, supplant, or duplicate other services provided through the waiver or Medicaid State plan services. Each waiver service must be prior-authorized to avoid duplicative billing with other waiver services.

Provider Qualifications

License (specify):

No license is required.

Certificate (specify):

Other Standard (specify):

The DD provider agency must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

The DD provider agency must adhere to standards, as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider delivering direct services and supports must:
- Meet and adhere to all applicable employment standards established by the hiring agency;
- Have training in the following areas, and provide evidence of current certificates of completion from an accredited source, when applicable or upon request:
  - Abuse, neglect, exploitation, and state law reporting requirements and prevention;
  - Cardiopulmonary resuscitation; and
  - Basic first aid;
- Be age 19 or older and authorized to work in the United States;
- Not be a legally responsible individual or guardian; and
- Not be an employee of DHHS.

The DD provider agency must have internet access in all settings that are provider operated or controlled for immediate adherence to applicable record-keeping and billing requirements.

Verification of Provider Qualifications

Entity Responsible for Verification:

DHHS agency staff in combination with designated provider enrollment broker.

Frequency of Verification:

Direct support staff background check compliance is verified through the annual or biennial survey process. The provider enrollment broker ensures that revalidation of agency is completed every 5 years.

</tr>
</thead>
</table>

Prevocational is an habilitative service that provides learning and work experiences where the participant can develop general, non-job-task-specific strengths and skills that will contribute to future employability in paid employment in integrated community settings. Services may be furnished in a variety of locations in the community. When provided in locations that are facility owned, leased or operated by a provider of other waiver services, the service must take place in a separate area, away from the provision of other waiver services and be provided by separate and distinct provider staff.

Prevocational is expected to occur over a defined period of time and with specific outcomes to be achieved, as determined by the participant and his/her team. Participants receiving Prevocational must have employment-related goals in their service plan; the general habilitation activities must be designed to support such employment goals. When the opportunity for competitive, integrated employment occurs, prevocational services may be utilized for referring the participant to gain access to an employment network, Ticket to Work services, Work Incentive Planning and Assistance (WIPA) services, or other qualified employment service programs that provide benefits planning.

Prevocational should enable each participant to attain the highest level of work in the most integrated setting and with the job matched to the participant’s interests, strengths, priorities, abilities, and capabilities, while following applicable federal wage guidelines. Services are intended to develop, teach, and refine general skills that lead to competitive and integrated employment including, but not limited to: ability to communicate effectively with supervisors, co-workers and customers; generally accepted community workplace conduct and dress; ability to follow directions; ability to attend to tasks; workplace problem solving skills and strategies; general workplace safety and mobility skills. This service also includes the provision of personal care, health maintenance activities, supervision, and protective oversight.

Individual programs must be specific and measurable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Participation in Prevocational is not a required pre-requisite for Supported Employment- Individual, Supported Employment - Follow-Along, or Enclave services provided under the waiver.

Prevocational may not be self-directed.

**Specify applicable (if any) limits on the amount, frequency, or duration of this service:**
• This service may be authorized in combination with any, or all, of the following services in the same service plan, but not during the same time period: Adult Day, Enclave, Habilitative Community Inclusion, Habilitative Workshop, and/or Supported Employment (Individual and Follow-Along). The total combined hours for these services may not exceed a weekly amount of 35 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.

• Prevocational is time-limited and should not exceed 12 consecutive months. In some cases, when the participant’s employment-related goals have not been fully met, up to 12 additional months may be approved by DHHS-DD with submission of an approved employment plan and upon review of active progress made the prior year on increasing work skills, time on tasks, or other job preparedness objectives.

• Prevocational may be provided to individuals, small groups, and large groups based on the participant’s assessed needs. A small group may consist of 2 to 3 participants and a large group may consist of 4 to 5 participants.

• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.

• Prevocational is reimbursed at an hourly unit.

• Transportation required in the provision of Prevocational is included in the rate. Non-medical transportation to the site at which Prevocational begins is not included in the rate. Non-medical transportation from the site at which Prevocational ends is not included in the rate.

• Documentation must be maintained in the service coordination file for each participant receiving this service that the service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 (Vocational Rehabilitation Services).

• Prevocational may be provided by a relative but not a legally responsible individual or guardian of the participant.

• This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan, HCBS Waiver service, or Vocational Rehabilitation.

**Service Type:**

**Statutory Service**

**Service:**

**Respite**

**Alternate Service Title (if any):**

**Respite**

**HCBS Taxonomy:**

<table>
<thead>
<tr>
<th>Category 1:</th>
<th>Sub-Category 1:</th>
</tr>
</thead>
</table>
09 Caregiver Support

Category 2: 09011 respite, out-of-home

Category 3: 09012 respite, in-home

Service Definition (Scope):

Respite is a non-habilitative service that is provided to participants unable to care for themselves and is furnished on a short-term, temporary basis for relief to the usual unpaid caregiver(s) living in the same private residence as the participant. Respite includes assistance with activities of daily living (ADL), health maintenance, and supervision.

Respite may be provided in the caregiver’s home, the provider’s home or in community settings.

Respite may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Respite provided in an institutional setting requires prior approval by the Department and is not authorized unless no other option is available. Respite in an institutional setting shall be paid at a per diem daily rate.
- Respite, other than in an institutional setting, is reimbursed at an hourly unit or daily rate. Any use of respite over 8 hours within a 24-hour period must be billed as a daily rate; use of respite under 8 hours must be billed in hourly units.
- A participant is limited to not more than 240 hours per annual budget year. Respite provided at the daily rate counts as 8 hours towards the 240 hour annual maximum. Unused Respite cannot be carried over into the next annual budget year. The 240 hours were determined based on historical and actual data and the limitation of hours has historically addressed the health and welfare of waiver participants. If a participant’s needs cannot be met within the established number of hours, the participant’s team will meet to determine what alternatives may be available, such as another type of residential setting. If alternatives are unavailable, additional developmental disabilities funding could be requested through the established exception process.
- Federal financial participation is not to be claimed for the cost of room and board except when provided as a part of Respite furnished in a facility approved by DHHS-DD that is not a private residence.
- Transportation during the provision of Respite is included in the rate. Non-medical transportation to the site at which Respite begins is not included in the rate. Non-medical transportation from the site at which Respite ends is not included in the rate.
- Respite may not be provided simultaneously with other HCBS waiver services.
- Respite must not be provided by any independent provider that lives in the same private residence as the participant, or is a legally responsible individual or guardian of the participant.
- A Respite provider or provider staff shall not provide respite services to adults (18 years and older) and children at the same time and location, unless approved by DHHS-DD.
- This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan or HCBS Waiver service.

Supported Employment-Individual is the 1:1 formalized training and staff supports available to a participant who, because of their disability, needs intensive, sometimes on-going support, to maintain an individual job in competitive or customized employment, or self-employment, in an integrated work setting in the general workforce. A participant is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by an individual without a disability. Support may be utilized for referring the participant to gain access to an employment network, Ticket to Work services, Work Incentive Planning and Assistance (WIPA) services, or other qualified employment service programs that provide benefits planning. The outcome of this service is sustained paid employment that meets personal and career goals in an integrated setting in the general workforce, particularly work sites where persons without disabilities are employed.

Services are provided in a variety of integrated community locations that offer opportunities for the participant to achieve his or her personally identified goals for refining employment-related skills, and for developing and sustaining a network of positive natural supports. Locations must be non-disability specific and meet all federal standards for home and community-based settings. This service cannot take place in licensed facilities, or any type of facility owned, leased or operated by a provider of other Medicaid waiver services. Supported Employment-Individual must be provided in an integrated community employment setting, unless the support is to develop a customized home-based business.

Services include activities needed to sustain paid work by a participant and are designed to maintain or advance employment by a participant, including supervision and training. When Supported Employment - Individual is provided at a work site where persons without disabilities are employed, payment is made only for the adaptations, supervision and training required by participants receiving waiver services as a result of their disabilities, but does not include payment for the supervisory activities rendered as a normal part of the business setting.

Individual programs must be identified in the participant's service plan that supports the need for continued job coaching with a plan to lessen the job coaching. Individual programs must be specific and measureable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Supported Employment-Individual may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:
• This service may be authorized in combination with any, or all, of the following services in the same service plan, but not during the same time period: Adult Day, Enclave, Habilitative Community Inclusion, Habilitative Workshop, Prevocational, and/or Supported Employment Follow-Along. The total combined hours for these services may not exceed a weekly amount of 35 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday. The 35 hours were determined based on historical and actual data and the limitation of hours has historically addressed the health and welfare of waiver participants. If a participant’s needs cannot be met within the established number of hours, the participant’s team will meet to determine what alternatives may be available, such as Vocational Rehabilitation services or services available through public education programs in the participant’s local school district.
• Income from customized home-based businesses is not required to be commensurate with minimum wage requirements with other employment.
• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
• Supported Employment-Individual is reimbursed at an hourly unit.
• Transportation required in the provision of Supported Employment-Individual is included in the rate. Non-medical transportation to the site at which Supported Employment - Individual begins is not included in the rate. Non-medical transportation from the site at which Supported Employment - Individual ends is not included in the rate.
• Documentation must be maintained in the service coordination file for each participant receiving this service that the service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 (Vocational Rehabilitation Services).
• Federal financial participation is not claimed for incentive payments, subsidies, or unrelated vocational training expenses such as the following:
  o Incentive payments made to an employer to encourage or subsidize the employer’s participation in a supported employment program;
  o Payments that are passed through to users of supported employment programs; or
  o Payments for training that is not directly related to a participant's supported employment program.
• Supported Employment-Individual may be provided by a relative but not a legally responsible individual of the participant.
• This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan, HCBS Waiver service, or Vocational Rehabilitation.

Service Definition (Scope):

Adult Companion Service is a drop-in, habilitative service and includes adaptive skill development, non-medical care, supervision, socialization and assisting a waiver participant in maintaining safety in the home and enhancing independence in self-care and home living skills. Adult Companion Service is provided to the participant in their home.

Adult Companion Service assists a participant to live in a private residence (non-provider operated or controlled), when the participant requires a range of community based support to live as independently as possible. Adult Companion Service provides individually tailored supports that assist with the acquisition, retention, or improvement in skills related to living successfully in the community.

Adult Companion Service includes prompting and supervising the participant in completing tasks including but not limited to, activities of daily living (ADL); health maintenance; meal preparation; laundry; teaching the use of police, fire, and emergency assistance; performing routine household activities to maintain a clean and safe home; and managing personal financial affairs. Adult Companion Service staff do not perform these activities for the participant.

Adult Companion Services may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:
• This service is only available under this waiver for ninety days following the approval of this amendment, and at such time this service will end and cannot be offered. Adult Companion services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver amendment. New waiver participants cannot choose Adult Companion services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.
• Adult Companion Service is available for participants who are 21 years and older.
• This service cannot be authorized in conjunction with Residential Habilitation services.
• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
• Adult Companion Services cannot exceed a weekly amount of 25 hours.
• Adult Companion Service is reimbursed at an hourly unit.
• Transportation is not included in the reimbursement rate.
• Adult Companion Service shall not overlap with, supplant, or duplicate other services provided through Medicaid State plan or HCBS Waiver services.
• This service shall exclude any services available through public education programs funded under the Individuals with Disabilities Education Act (IDEA). This includes services not otherwise available through public education programs in the participant’s local school district, including after school supervision and daytime services when school is not in session (i.e., summer breaks and/or scheduled school holidays, in-service days, etc.). Services cannot be provided during the school hours set by the local school district for the participant. Regular school hours and days apply for a child who receives home schooling.
• Adult Companion Services may be provided by a relative but not a legally responsible individual or guardian.

Appendix C: Participant Services

C-1/C-3: Provider Specifications for Service

Service Type: Other Service
Service Name: Adult Companion Service

Provider Category:
[Individual]

Provider Type:
Independent Individual – Habilitative Services

Provider Qualifications
License (specify):
No license is required.
Certificate (specify):
No certification is required.

**Other Standard (specify):**

All providers of waiver services must be a Medicaid provider as specified in the applicable Nebraska Administrative Codes.

A provider of this service must:
- Complete all provider enrollment requirements;
- Have necessary education and experience, and provide evidence upon request:
  - Have a Bachelor’s degree or equivalent coursework/training in: education, psychology, social work, sociology, human services, or a related field; OR
  - Have four or more years of professional experience in the provision of habilitative services for persons with intellectual or other developmental disabilities (IDD), or in habilitative program writing and program data collection/analysis, or four or more years of life experience in teaching and supporting an individual with IDD; OR
  - Have any combination of education and experience identified above equaling four years or more;
- Have training in the following areas, and provide evidence of current certificate of completion from an accredited source, when applicable, or upon request:
  - Abuse, neglect, and exploitation and state law reporting requirements and prevention;
  - Cardiopulmonary resuscitation; and
  - Basic first aid;
- Be age 19 or older and authorized to work in the United States;
- Not be a legally responsible individual or guardian;
- Not be an employee of DHHS; and
- Possess a valid driver’s license and insurance as required by Nebraska law, if transportation is provided.

The provider must have internet access for immediate adherence to applicable record-keeping and billing requirements.

**Verification of Provider Qualifications**

**Entity Responsible for Verification:**

DHHS agency staff in combination with designated provider enrollment broker.

**Frequency of Verification:**

Independent provider background check compliance is completed annually and the provider enrollment broker ensures that revalidation is completed every 5 years.

**Provider Category:**

Agency

**Provider Type:**

DD Agency

**Provider Qualifications**

**License (specify):**

No license is required.

**Certificate (specify):**
Certification by the Division of Public Health in accordance with applicable state laws and regulations.

**Other Standard (specify):**

The DD provider agency must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

The DD provider agency must adhere to standards, as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider delivering direct services and supports must:
• Meet and adhere to all applicable employment standards established by the hiring agency;
• Have training in the following areas, and provide evidence of current certificate of completion from an accredited source, when applicable or upon request:
  o Abuse, neglect, and exploitation and state law reporting requirements and prevention;
  o Cardiopulmonary resuscitation; and
  o Basic first aid;
• Be authorized to work in the United States;
• Not be a legally responsible individual or guardian;
• Not be an employee of DHHS; and
• Possess a valid driver’s license and insurance as required by Nebraska law.

The DD provider agency must have internet access in all settings that are provider operated or controlled for immediate adherence to applicable record-keeping and billing requirements.

**Verification of Provider Qualifications**

**Entity Responsible for Verification:**

DHHS agency staff in combination with designated provider enrollment broker.

**Frequency of Verification:**

Direct support staff background check compliance is verified through the annual or biennial survey process. The provider enrollment broker ensures that revalidation of agency is completed every 5 years.

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

**Service Type:**

Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

**Service Title:**

Adult Day

**HCBS Taxonomy:**
Adult Day is a non-habilitative service consisting of meaningful day activities which take place in the community, in a non-residential setting. Adult Day provides active supports which foster independence, encompassing both health and social services needed to ensure the optimal functioning of the participant. Adult Day includes assistance with activities of daily living (ADL), health maintenance, and supervision. Participants receiving Adult Day Services are integrated into the community to the greatest extent possible.

Adult Day is for participants who need the service and support in a safe, supervised setting. Adult Day does not require training goals and strategies of habilitation services. Adult Day does not offer as many opportunities for getting participants engaged in their community or participating in community events mainly due to compromised health issues and significant limitations of participants. Providers are not allowed to engage participant in work or volunteer activities.

The Adult Day provider must be within immediate proximity of the participant to allow staff to provide support and supervision, safety and security, and provide activities to keep the participant engaged in their environment.

Adult Day may not be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- This service may be authorized in combination with any, or all, of the following services in the same service plan, but not during the same time period: Enclave, Habilitative Community Inclusion, Habilitative Workshop, Prevocational, and/or Supported Employment (Individual and Follow-Along). The total combined hours for these services may not exceed a weekly amount of 35 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Adult Day is reimbursed at an hourly unit.
- Transportation required in the provision of Adult Day is included in the rate. Non-medical transportation to the site at which Adult Day begins is not included in the rate. Non-medical transportation from the site at which Adult Day ends is not included in the rate.
- Adult Day cannot be provided in a residential setting.
- This service shall not overlap with, supplant, or duplicate other comparable services provided through Medicaid State plan or HCBS Waiver services.

Service Delivery Method (check each that applies):

<table>
<thead>
<tr>
<th>Category 2:</th>
<th>Sub-Category 2:</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Category 3:</th>
<th>Sub-Category 3:</th>
</tr>
</thead>
</table>

**Service Definition (Scope):**

<table>
<thead>
<tr>
<th>Category 4:</th>
<th>Sub-Category 4:</th>
</tr>
</thead>
</table>

The program compliance is verified through the annual or biennial survey process. The provider enrollment broker ensures that revalidation of agency is completed annually and re-enrollment is completed every 5 years.
Assistive Technology is equipment or a product system such as devices, controls, or appliances, whether acquired commercially, modified, or customized, that is used to increase, maintain, or improve functional capabilities of participants and be necessary to ensure participants health, welfare and safety. The use of assistive technology enables participants who reside in their own homes to increase their abilities to perform activities of daily living in their home, or to perceive, control, or communicate with the environment they live in, thereby decreasing their need for assistance from others as a result of limitations due to disability.

All devices and adaptations must be provided in accordance with applicable State or local building codes and/or applicable standards of manufacturing, design, and installation.

Assistive Technology includes the equipment or product system as well as:

a. Services consisting of purchasing or leasing assistive technology devices for participants.
b. Services consisting of selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing assistive technology devices.
c. Coordination and use of necessary therapies, interventions, or services with assistive technology devices, such as therapies, interventions, or services associated with other services in the service plan.
d. Training or technical assistance for the participant, or, where appropriate, the family members, guardians, advocates, or authorized representatives of the participant.
e. Training or technical assistance for professionals or other individuals who provide services to, employ, or are otherwise substantially involved in the major life functions of participants.

Assistive Technology may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- Assistive Technology has a participant annual budget cap of $2,500. The limitation was determined based on historical and actual data and the funding limitation has historically addressed the health and welfare of waiver participants. If a participant’s needs cannot be met within the established funding limitation, the participant’s team will meet to determine what alternatives may be available, such as the Vocational Rehabilitation AT4All program which has used and reconditioned equipment for sale, free, for loan, or for rent, or additional funding.
- DHHS-DD may require an on-site assessment of the environmental concern including an evaluation of functional necessity with appropriate Medicaid enrolled professional providers. DHHS-DD may use a third party to assess the proposed modification and need for the modification to ensure cost effectiveness and quality of product. This assessment will be funded by the Environmental Modification Assessment service and will be reimbursed separately. The cost of the Environmental Modification Assessment is not included in the $2,500 cap on Assistive Technology.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Assistive Technology is reimbursed per item directly to the Medicaid enrolled provider or the manufacturer.
- Providers shall not exceed their charges to the general public when billing the waiver. A provider who offers a discount to certain individuals (for example, students, senior citizens, etc.) shall apply the same discount to the participants who would otherwise qualify for the discount.
- For items over $500 insurance or an extended warranty is required, and is included in the $2,500 cap.
- Damaged, stolen or lost items not covered by insurance or warranty may be replaced once every two years.
- The services under this Waiver are limited to additional services not otherwise covered under the state plan, including EPSDT, but consistent with waiver objectives of avoiding institutionalization.

Service Delivery Method (check each that applies):

- [x] Participant-directed as specified in Appendix E

<table>
<thead>
<tr>
<th>Service Definition (Scope):</th>
<th>Sub-Category 4:</th>
</tr>
</thead>
</table>
Behavioral risk services are provided to participants with complex behavioral needs that require continuing care and treatment. Behavioral risk services may be required when behaviors place the participant and/or others at risk of harm and may include actual, attempted, or threatened physical harm to oneself and/or others. This includes implicit threats, which is defined as statements and/or acts that reasonably induce fear of physical harm to others. Additionally, examples of behaviors placing oneself and/or others at risk of harm include self-directed actions intended to cause tissue damage, medication non-compliance, destruction of other people’s belongings, elopement, and contact with the legal system for the previously mentioned behaviors, as well as other law-breaking behaviors (e.g., stealing, vandalism).

The need for behavioral risk services will be determined by designated staff at Division of Developmental Disabilities (DDD) central office. A risk screen is completed by the participant’s service plan team to assist the team in planning, as a guide in giving adequate consideration to risk factors, or at the request of DDD central office. If the risk screen indicates a participant may present a risk of harm to oneself and/or others, the participant may be referred to DD central office for a formal risk assessment.

A risk assessment identifies, evaluates, and prioritizes interventions to implement or attempt to manage/reduce risk. The risk assessment will include the following: description, likelihood, frequency, duration, intensity, imminence, and incapacitation. Additionally, it includes an examination of the function of violence, for example, perceptual distortions, antisocial attitudes, irrational beliefs, labile affect, or interpersonal stressors. A risk assessment will also evaluate “buffering” conditions that reduce the likelihood of risk, for example, residential and day habilitation (teaching and supporting) services, non-DD therapeutic services, a participant’s personal strengths (e.g., motivation), support system (e.g., family and friends), ability to establish pro-social judgment, and history of adverse life events.

If DDD central office staff concludes a participant presents a moderate to high risk of harm to oneself and/or others, the participant will be eligible for behavioral risk services. Should a participant present with a dual diagnosis of DD and mental illness and their risk is a result of issues stemming from Axis I, primary diagnosis of severe persistent mental illness, then the participant will be referred for behavioral health services. Behavioral risk services are not intended to supplant other behavioral health services such as, but not limited to psychiatry, counseling, or individual or group therapy.

Behavioral risk services are provided 24/7 and are considered to be continuous services. This service is an all-inclusive daily rate service that includes residential habilitation (teaching and supporting) services, day habilitation (teaching and supporting) services, transportation, intensive behavioral supports, ongoing safety supervision, and ongoing clinical supports. Because behavioral risk services are all-inclusive, a participant cannot receive these services in combination with another DD waiver service. When behavioral risk service is delivered where the participant lives, where the participant works, where the participant is recreating and socializing, or where the participant participates in day services, the service is billed as Behavioral Risk service, and is not billed as a separate residential habilitation service or a separate day habilitation services.

The provision of behavioral risk services will be under the direction of a supervising mental health practitioner. Behavioral risk services are furnished as specified in the service plan. Staffing ratios are flexible and commensurate to meeting the needs of the participant.

Intensive behavioral intervention strategies and supports require ongoing assessment, professional judgment, and treatment based on ongoing assessment. The provider must have a licensed independent mental health practitioner on staff to oversee the delivery of behavioral risk services by unlicensed direct support professionals.

Residential habilitation (teaching and supporting) services under this service can be delivered in a variety of home settings. Residential habilitation (teaching and supporting) services delivered as an inclusive component of this service include formalized training and staff supports for the acquisition, retention, or improvement in skills related to living in the community. A participant cannot be authorized for another residential habilitation service and behavioral risk services at the same time. Formalized training, intensive behavioral supports, and staff supports include adaptive skill development of daily living activities, such as personal grooming and cleanliness, bed making and household chores, eating and the preparation of food, community inclusion, transportation, and the social and leisure skill development necessary to enable the participant to live in the most integrated setting appropriate to his/her needs. The method by which the costs of room and board are excluded from payment for residential habilitation is specified in Appendix I-5.
Day habilitation (teaching and supporting) services delivered as an inclusive component of this service include formalized training and staff supports which focus on the acquisition of work skills and appropriate work behavior. Day habilitation services that are provided as part of this all-inclusive service are provided in non-residential settings in the community. A participant cannot be authorized for another day habilitation service and behavioral risk services at the same time. Behavioral risk day habilitation (teaching and supporting) also includes intensive behavioral supports that focus on the behavioral and adaptive skills necessary to enable the participant to attain or maintain his or her maximum integration, inclusion, and personal accomplishment in the working community. Day habilitation (teaching and supporting) services, such as day habilitation service activities, workstations, vocational planning service, or integrated community employment are provided away from the home, in a non-residential setting, during typical working hours. Discreet habilitation (teaching and supporting) in preparation for leaving the residential setting during typical working hours is allowed.

Intervention strategies for the delivery of habilitation (teaching and supporting), intensive behavioral supports, ongoing safety supervision, and ongoing supports are determined by the service plan team in conjunction with the supervising mental health practitioner and must be documented in the service plan. Interventions will be based on the participant’s assessed needs and, as applicable, will include the following: staff objectives/ safety plans for preventing and/or stopping behaviors that are harmful to the participant or others; habilitation (teaching and supporting) to address acceptable communication of needs and preferences, coping, social, and problem-solving skills; residential and vocational settings, environmental and architectural factors, and location of service delivery; collaboration with behavioral health efforts to meet mental health needs (e.g., counseling, individual/ group psychotherapy, psychotropic medications); and supervision and monitoring strategies, including the type and amount of supervision, law enforcement contacts, provider monitoring responsibilities, and service coordination responsibilities. Restrictive interventions to ensure the safety of the participant and others must be reviewed at every service plan meeting. When applicable, a plan to reduce/eliminate the restriction must be developed, documented in the service plan, and upon request provided to DDD central office.

When determined appropriate by the service plan team and supervising practitioner, a plan to reduce the intensity of Behavioral Risk Services must be developed and upon request, provided to DDD central office.

Meals provided as part of these services shall not constitute a "full nutritional regimen" (3 meals per day). Because Behavioral Risk service is an all-inclusive service, the cost of transportation is included in the rate paid to providers of Behavioral Risk service. The time when a participant is transported by a provider may be billed. The participant must be with the provider staff in order for transportation time to be claimed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Behavioral Risk services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Behavioral Risk services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

The amount of authorized services is the participant’s approved annual budget and is provided based on the participant’s preferences to the extent possible, and as documented in the service plan. Each waiver service must be prior-authorized to avoid duplicative billing with other waiver services.

Service Delivery Method (check each that applies):

**Service Type:**

Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

**Service Title:**

Community Living and Day Supports

**HCBS Taxonomy:**

- **Category 1:** 17 Other Services
- **Sub-Category 1:** 17990 other

- **Category 2:**
- **Sub-Category 2:**

- **Category 3:**
- **Sub-Category 3:**

**Service Definition (Scope):**

- **Category 4:**
- **Sub-Category 4:**
Community Living and Day Supports (CLDS) provides the necessary assistance and supports to meet the daily needs and preferences of the participant. CLDS is provided with the participant present to ensure adequate functioning in the participant’s home, as well as assisting the participant to participate in a wide range of activities outside the home. CLDS may also provide the necessary assistance and supports to meet the employment and/or day service needs of the participant in integrated, community settings.

The Community Living and Day Supports service includes the following components:

- Individual assistance with hygiene, bathing, eating, dressing, grooming, toileting, transferring, or basic first aid.
- Supervision and monitoring for the purpose of ensuring the participant’s health and safety.
- Supports to enable the participant to access the community. This may include someone hired to accompany and support the participant in all types of community settings.
- Supports to assist the participant to develop self-advocacy skills, exercise rights as a citizen, and acquire skills needed to exercise control and responsibility over other support services, including managing generic community resources and informal supports.
- Supports to assist the participant in identifying and sustaining a personal support network of family, friends, and associates.
- Household activities necessary to maintain a home living environment on a day-to-day basis, such as meal preparation, shopping, cleaning, and laundry.
- Home maintenance activities needed to maintain the home in a clean, sanitary, and safe environment.
- Supports to enable the participant to maintain or obtain employment. This may include someone hired to accompany and support the participant in an integrated work setting. Integrated settings are those considered as available to all members of the community. The employment supports are delivered informally. That is, the provider is not required to write formal training programs with long term goals, short term objectives, strategies, and data collection methodology. The supports delivered under CLDS are considered “natural teaching moments”.
- Supports to enable the participant to access services and opportunities available in community settings. This may include accompanying the participant to and facilitating participation in general community activities, community volunteer work, and services provided in community settings such as senior centers and adult day centers. CLDS must not be duplicative or replace other supports available to the participant. The services provided under CLDS are different from those provided under Targeted Case Management (DD service coordination) in that the CLDS provider supports the participant by providing transportation if necessary and remaining with the participant during receipt of the services and community activities. Nebraska service coordinators do not provide direct services and supports.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

| 09/20/2019 |
This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. CLDS offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose CLDS and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

CLDS cannot be provided by the usual caregiver. The term “usual caregiver” means a person(s) who resides with the participant, is not paid to provide services, and is responsible for the care and supervision of the participant on a 24-hour basis.

Payment for CLDS does not include payments made, directly or indirectly to members of the participant’s immediate family, defined as parent (biological, step, or adoptive), spouse, or child (biological, step, or adopted). Payments will not be made for the routine care and supervision which would be expected to be provided by a family or group home provider, or for activities or supervision for which a payment is made by a source other than Medicaid.

Assistance with personal care needs or household activities is available only to those participants who live with an unpaid caregiver.

CLDS is not intended to duplicate or replace other supports available to the participant, including natural supports and state or federally funded services. Each waiver service must be prior-authorized to avoid duplicative billing with other waiver services.

Household activities and home maintenance activities are for the purpose of fulfilling duties the participant would be expected to do to contribute to the operation of the household, if it were not for the participant’s disability.

Homemaker services cannot be authorized when a participant receives Community Living and Day Supports.

Routine health care supports may be furnished to the extent permitted under Nebraska state law.

Individual assistance with money management and personal finances may be provided, but the provider cannot act as the representative payee.

In the case of rental property, the responsibility of the landlord, pursuant to the lease agreement and as required by law, will be examined prior to any authorization of home maintenance services under CLDS.

The participant must supply necessary cleaning products and equipment when a provider cleans or cares for household equipment, appliances, or furnishings in the participant’s home.

Payment for the work performed by the staff is the responsibility of the employer. Covered services do not include those provided in specialized developmental disability provider settings, workstations, or supported employment services.

Supports provided under CLDS must be those that are above and beyond the usual services provided in such a setting and not duplicate services expected to be the responsibility of immediate household members, a senior center, adult day center, or employer. This service will not overlap with, supplant, or duplicate other services provided through the waiver or Medicaid State plan services. CLDS cannot be delivered at the same time as the delivery of Workstation Habilitation services, Day Habilitation services, Vocational Planning Habilitation services, Integrated Community Employment services, or Respite services.

C-1/C-3: Provider Specifications for Service

Service Type: Other Service
Service Name: Community Living and Day Supports

Provider Category:
[Individual]

Provider Type:
Independent Individual – Non-Habilitative Services

Provider Qualifications

License (specify):
No license is required.

Certificate (specify):
No certification is required.

Other Standard (specify):
All providers of waiver services must be a Medicaid provider as specified in the applicable Nebraska Administrative Codes.

A provider of this service must:
• Complete all provider enrollment requirements;
• Have training in the following areas, and provide evidence of current certificate of completion from an accredited source, when applicable, or upon request:
  o Abuse, neglect, and exploitation and state law reporting requirements and prevention;
  o Cardiopulmonary resuscitation; and
  o Basic first aid;
• Be 19 or older and authorized to work in the United States;
• Not be a legally responsible individual or guardian;
• Not be an employee of DHHS; and
• Possess a valid driver’s license and insurance as required by Nebraska law, if transportation is provided.

The provider must have internet access for immediate adherence to applicable record-keeping and billing requirements when the service is delivered in a provider setting.

Verification of Provider Qualifications

Entity Responsible for Verification:
DHHS agency staff in combination with designated provider enrollment broker.

Frequency of Verification:
Independent provider background check compliance is completed annually and the provider enrollment broker ensures that revalidation is completed every 5 years.

</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Category 3:</th>
<th>Sub-Category 3:</th>
</tr>
</thead>
</table>

Service Definition (Scope):

<table>
<thead>
<tr>
<th>Category 4:</th>
<th>Sub-Category 4:</th>
</tr>
</thead>
</table>
Consultative Assessment is provided when a behavior support plan is developed and implemented to assist participants in maintaining their current living environment while ensuring their safety and the safety of others. Consultative Assessment is necessary to improve the participant’s independence and inclusion in their community. Consultative Assessment activities include team consultation, behavioral assessment, behavior support plan development, and implementation.

This service is performed by a Licensed Independent Mental Health Practitioner (LIMHP), Licensed Psychologist, or Advanced Practice Registered Nurse (APRN), or a Board-Certified Behavior Analyst (BCBA or BCBA-D) under the supervision of a LIMHP, licensed psychologist, or APRN.

A behavioral assessment identifies specific target behaviors, the purpose of the behaviors, and what factors maintain the behaviors that are interfering with the participant’s adaptive skills development and participation in integrated community living and employment. The behavioral assessment, including assessment of level of risk, is necessary in order to address problematic behaviors in functioning that are attributed to developmental, cognitive and or communication impairments. Observations where the participant lives, and/or takes part in day services or other activities are conducted at any time of the day or night in person or by Telehealth, depending upon when and where the specific problematic behaviors occur. The current interventions are documented, and efficacy assessed.

The assessment process leads to the development of a positive behavior support plan (BSP) to teach acceptable alternative behaviors. The resulting BSP focuses on teaching a new behavior and social skills and may require modification to environments, activities, and delivery of intervention and teaching strategies. The assessment process is completed in collaboration with the service planning team and includes assessment of risk levels, strengths, needs, and preferences; recommendations for the development of a behavior support plan, safety plan, and other habilitative plans; and recommendations to carry out the developed plans.

Best practices in intervention strategies, medical and psychological conditions, and/or environmental impact to service delivery are provided to the participant’s team. Behavioral interventions are developed, piloted, implemented, evaluated, and revised, as necessary. When the behavior support plan, safety plan, and other habilitative plans are written by provider staff that is not the LIMHP, Licensed Psychologist, APRN, or a BCBA or BCBA-D supervised under an LIMHP, licensed psychologist, or APRN who completed the assessment, all service planning team members, including the provider of the assessment must agree to the intervention strategies.

Individual programs must be specific and measureable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Consultative Assessment may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- The amount of prior authorized services is based on the participant’s need as documented in the service plan and is not limited by the amount approved for the participant’s annual budget.
- Consultative Assessment is reimbursed at an hourly unit for up to 1000 hours per year.
- Provider’s transportation and lodging is included in the reimbursement rate.
- Behavior support plan data with analysis must be documented and accessible in the web-based case management system or submitted to the service coordinator and DHHS-DD at the frequency approved in the service plan.
- Providers of this service must be available for consultation with the team either via telecommunication (phone or Telehealth) or in person for a minimum of two conference meetings per ISP year. More frequent conferences may be necessary based on frequency of high incident reports.
- This service shall not overlap with, supplant, or duplicate other comparable services provided through Medicaid State plan or HCBS Waiver services.

Service Type:

Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

Service Title:

Crisis Intervention Support

HCBS Taxonomy:
Crisis Intervention Support is an immediate, intensive, and short-term habilitative service that may be added to a participant’s plan when a participant’s tier level may not sufficiently address temporary increased or severe occurrences of behaviors. The provision of Crisis Intervention Support will be under the direction of a Licensed Independent Mental Health Practitioner (LIMHP), Licensed Psychologist or Advanced Practice Registered Nurse. This service is completed in collaboration with the service planning team and includes the development of a behavior support plan if Consultative Assessment Service has not occurred previously, development of other habilitative strategies, training and technical assistance to carry out the plan and treatment integrity support to the participant and the provider in the ongoing implementation of the service plan. Crisis Intervention Support is carried out in accordance with functional behavioral assessments and as applicable, in collaboration with the Consultative Assessment Service provider. Direct support staff with Bachelor degree who may not have clinical experience can implement positive behavior supports, behavioral interventions, and habilitative strategies. This service may be delivered in the participant’s home or in the community.

Crisis Intervention Support is not self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

• This service is only available under this waiver for ninety days following the approval of this amendment, and at such time this service will end and cannot be offered. Crisis Intervention Support offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver amendment. New waiver participants cannot choose Crisis Intervention Support and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

• Crisis Intervention Support is available for any adult participant. For a participant under 21, like services will be provided under the State Plan under EPSDT.

• The amount of authorized services is based on the participant’s need as documented in the service plan, and is not limited by the amount approved for the participant’s annual budget.

• Crisis Intervention Support must be implemented within 48 hours of request.

• Crisis Intervention Support is reimbursed at an hourly unit for up to 200 hours in a 60 day period.

• Crisis Intervention Support cannot exceed 5 occurrences, defined as a 60-day period, per twelve months.

• Crisis Intervention Support shall not overlap with, supplant, or duplicate other services provided through Medicaid State plan or HCBS Waiver services. This service may not be provided concurrently with Consultative Assessment.

• Behavior support plan data with analysis must be submitted to the Division of Developmental Disabilities at the frequency approved in the service plan.

• The amount of service will be approved by the Clinical Review Team and shall be based on verified need, evidence of the diagnosis or condition requiring this service. The amount of service is subject to approval by the DDD and is based on available waiver funding.

• Transportation and lodging is included in the reimbursement rate.

Provider Qualifications

License (specify):

Staff or agencies that provide a service for which a license, certification, or registration, or other credential is required, must hold the license, certification, registration, or credential in accordance with applicable state laws and regulations.

Certificate (specify):

Other Standard (specify):

The DD provider agency must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

The DD provider agency must adhere to standards, as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider delivering direct services and supports must:
- Meet and adhere to all applicable employment standards established by the hiring agency;
- Have training in the following areas, and provide evidence of current certificate of completion from an accredited source, when applicable or upon request:
  - Abuse, neglect, and exploitation and state law reporting requirements and prevention;
  - Cardiopulmonary resuscitation; and
  - Basic first aid;
- Be authorized to work in the United States;
- Not be a legally responsible individual or guardian; and
- Not be an employee of DHHS.

The DD provider agency must have internet access in all settings that are provider operated or controlled for immediate adherence to applicable record-keeping and billing requirements.

Verification of Provider Qualifications

Entity Responsible for Verification:
DHHS agency staff in combination with designated provider enrollment broker.

**Frequency of Verification:**

Direct support staff background check compliance is verified through the annual or bi-annual survey process. The provider enrollment broker ensures that revalidation of agency is completed every 5 years.

</thead>
</table>

---
Enclave is habitative services and activities provided in community business or industry settings for single participants or groups of participants. Generally, participants are a member of a team, at a single competitive employment site in a community business or industry, with initial training, supervision, and ongoing support provided by a specially trained on-site supervisor, who is an employee of the DD agency provider.

Enclave does not include services provided in facility based work settings. Services take place at a work site of a competitive employer where a participant with a disability or a group of participants with disabilities are working and supervised by staff from the DD agency provider that holds a contract with the competitive employer. Participants receiving Enclave are not employees of the community business or industry. The participants remain under the provider’s service delivery system.

Examples include mobile crews and other business-based workgroups employing small groups of participants with disabilities receiving services in integrated employment sites in the community. The outcome of this service is to gain payment for work experience leading to further career development and individual integrated community-based employment for which a participant is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities. A DD provider agency may not benefit from the work completed by the participants receiving Enclave.

Enclave may include the acquisition of work skills, appropriate work behavior, and the behavioral and adaptive skills necessary to enable the participant to attain or maintain his or her maximum inclusion, and personal accomplishment in the working community. Enclave may include services not specifically related to job skill training that enable the participant to be successful in integrating into the job setting. Enclave must be provided in a manner that promotes integration into the workplace and interaction between participants and people without disabilities in those workplaces. This service also includes the provision of personal care, health maintenance activities, supervision and protective oversight.

Individual Programs must be specific and measureable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Enclave may not be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- This service may be authorized in combination with any, or all, of the following services in the same service plan, but not during the same time period: Adult Day, Habilitative Community Inclusion, Habilitative Workshop, Prevocational, and/or Supported Employment (Individual and Follow-Along). The total combined hours for these services may not exceed a weekly amount of 35 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Enclave is reimbursed at an hourly unit.
- Transportation required in the provision of Enclave is included in the rate. Non-medical transportation to the site at which Enclave begins is not included in the rate. Non-medical transportation from the site at which Enclave ends is not included in the rate.
- Documentation must be maintained in the service coordination file for each participant receiving this service that the service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 (Vocational Rehabilitation Services).
- Federal financial participation is not claimed for incentive payments, subsidies, or unrelated vocational training expenses such as the following:
  - Incentive payments made to an employer to encourage or subsidize the employer's participation in a supported employment program;
  - Payments that are passed through to users of supported employment programs; or
  - Payments for training that is not directly related to a participant's supported employment program.
- This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan or HCBS Waiver service.

<th>Sub-Category 2:</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Category 3:</th>
<th>Sub-Category 3:</th>
</tr>
</thead>
</table>

**Service Definition (Scope):**

An Environmental Modification Assessment is a functional evaluation with the participant to ensure the health, welfare and safety of the participant or to enable the participant to integrate more fully into the community, and to function in the participant’s private home (not provider operated or controlled), or in the participant’s family’s home, if living with his/her family.

The on-site assessment of the environmental concern includes an evaluation of functional necessity, the determination of the provision of appropriate assistive technology, home, or vehicle modification for the participant, and the need for the modification to ensure cost effectiveness.

Environmental Modification Assessment may be self-directed.

**Specify applicable (if any) limits on the amount, frequency, or duration of this service:**

09/20/2019
• Participant’s annual budget cap for Environmental Modification Assessments is $1,000. A critical health or safety service request that exceeds the annual cap is subject to approval by DHHS-DD based on available waiver funding.
• The amount of prior authorized services is based on the participant’s need as documented in the participant’s service plan, and within the participant’s approved annual budget.
• Environmental Modification Assessment is reimbursed per assessment.
• Providers shall not exceed their charges to the general public when billing the waiver. A provider who offers a discount to certain individuals (for example, students, senior citizens, etc.) shall apply the same discount to the participants who would otherwise qualify for the discount.
• Environmental Modification Assessment may be provided by a relative but not a legally responsible individual or guardian of the participant.
• The services under this Waiver are limited to additional services not otherwise covered under the state plan, including EPSDT, but consistent with waiver objectives of avoiding institutionalization.

**Service Type:** Other Service  
**Service Name:** Environmental Modification Assessment

**Provider Category:**

Agency

**Provider Type:**

Independent Agency – Non-habilitative service

**Provider Qualifications**

- **License (specify):**
  
  No license is required.

- **Certificate (specify):**

  No certification is required.

- **Other Standard (specify):**
All providers of waiver services must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

All providers of waiver services must adhere to standards as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider of this service must:
• Complete all provider enrollment requirements;
• Be authorized to work in the United States;
• Not be a legally responsible individual or guardian to the participant;
• Not be an employee of DHHS, unless approved by DHHS as compliant with DHHS policy and applicable law and regulation;
• Ensure that all items and assistive equipment recommended or provided meet the applicable standards of manufacture, design, and installation; and
• Obtain, at a minimum, three bids/cost proposals to ensure cost effectiveness.

Verification of Provider Qualifications
Entity Responsible for Verification:

DHHS agency staff in combination with designated provider enrollment broker.

Frequency of Verification:
The program compliance is completed annually and the provider enrollment broker ensures that revalidation is completed annually and re-enrollment is completed every 5 years.

C-1/C-3: Service Specification

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Service Type:
Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

Service Title:
Habilitative Community Inclusion

HCBS Taxonomy:

Category 1:  
Sub-Category 1:  

04 Day Services  
04020 day habilitation

Category 2:  
Sub-Category 2:  

Category 3:  
Sub-Category 3:  

09/20/2019
Service Definition (Scope):

Category 4:

Sub-Category 4:

Habilitative Community Inclusion is a habilitative service that offers teaching and staff supports for the acquisition, retention, or improvement in self-help, and behavioral, socialization, and adaptive skills which primarily take place in the community in a non-residential setting, separate from the participant’s private residence or any setting outlined and approved in the participant’s service plan. The majority of habilitation provided in a 35-hour week must occur in community integrated activities away from the participant’s residential setting to work toward an increased presence in one’s community.

Habilitative activities are designed to foster greater independence, community networking, and personal choice. Making connections with community members is a strong component of this service. Participants may not perform paid work activities or unpaid work activities in which others are typically paid, but may perform hobbies in which minimal money is received or volunteer activities.

Habilitative Community Inclusion provides an opportunity for the participant to practice skills taught in therapies, counseling sessions, or other settings and to plan and participate in scheduled community activities.

Habilitative Community Inclusion includes habilitation in the use of the community’s transportation system as well as building and maintaining interpersonal relationships. Habilitative Community Inclusion may include facilitation of inclusion of the participant within a community group or volunteer organization; opportunities for the participant to join formal/informal associations and community groups; opportunities for inclusion in a broad range of community settings including opportunities to pursue social and cultural interests, and choice making. Habilitative Community Inclusion includes assistance with activities of daily living (ADL), health maintenance, supervision, and protective oversight.

Individual programs must be specific and measurable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Habilitative Community Inclusion may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

• This service may be authorized in combination with any, or all, of the following services in the same service plan, but not during the same time period: Adult Day, Enclave, Habilitative Workshop, Prevocational, and/or Supported Employment (Individual and Follow-Along). The total combined hours for these services may not exceed a weekly amount of 35 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.
• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
• Habilitative Community Inclusion is reimbursed at an hourly or daily unit. Any use of Habilitative Community Inclusion at or above 7 hours within a 24 hour period 12:00am - 11:59pm must be billed at a daily rate. Use of Habilitative Community Inclusion under 7 hours must be billed in hourly units.
• The rate tier for Habilitative Community Inclusion is determined based upon needs identified in the Objective Assessment Process.
• Transportation required in the provision of Habilitative Community Inclusion is included in the rate. Non-medical transportation to the site at which Habilitative Community Inclusion begins is not included in the rate. Non-medical transportation from the site at which Habilitative Community Inclusion ends is not included in the rate.
• Habilitative Community Inclusion Services may be provided by a relative but not a legally responsible individual or guardian of the participant.
• This service shall not overlap with, supplant, or duplicate other comparable services provided through Medicaid State plan or HCBS Waiver service.
☑ Participant-directed as specified in Appendix E

</thead>
</table>
Category 3:  

Service Definition (Scope):

Category 4:  

Sub-Category 3:

Sub-Category 4:

Habilitative Workshop is a habilitative service that offers habilitative activities in a provider owned or controlled non-residential setting. Habilitative Workshop provides regularly scheduled activities, formalized training, and staff supports for the acquisition, retention, or improvement in self-help, behavioral skills, and adaptive skills that enhance social development. Habilitative Workshop activities assist in developing skills in performing activities of daily living, and community living. Activities and environments are designed to foster the acquisition of skills, building positive social behavior and interpersonal competence, greater independence and personal choice. This service is provided to participants that do not have a specific employment goal, and are therefore not currently seeking to join the general work force.

Habilitative Workshop focuses on enabling the participant to attain or maintain his or her maximum functional level and must be coordinated with, but may not supplant, any physical, occupational, or speech therapies listed in the service plan. In addition, the services and supports may reinforce but not replace skills taught in therapy, counseling sessions, or other settings. This service also includes the provision of personal care, health maintenance activities, supervision and protective oversight.

Individual programs must be specific and measurable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Habilitative Workshop may not be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- This service may be authorized in combination with any, or all, of the following services in the same service plan, but not during the same time period: Adult Day, Enclave, Habilitative Community Inclusion, Prevocational, and/or Supported Employment (Individual and Follow-Along). The total combined hours for these services may not exceed a weekly amount of 35 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Habilitative Workshop is reimbursed at an hourly unit or daily rate. The Habilitative Workshop provider must be in the workshop or community setting, providing a combination of habilitation, supports, protective oversight, and supervision for a minimum of 7 hours in a 24 hour period 12:00am - 11:59pm for the provider to bill a daily rate. When the provider is in the workshop or community setting, providing a combination of habilitation, supports, protective oversight, and supervision for less than 7 hours in a 24 hour period 12:00am - 11:59pm, the provider must bill in hourly units.
- The rate tier for this service is determined based upon needs identified in the Objective Assessment Process.
- Transportation required in the provision of Habilitative Workshop is included in the rate. Non-medical transportation to the site at which Habilitative Workshop begins is not included in the rate. Non-medical transportation from the site at which Habilitative Workshop ends is not included in the rate.
- Documentation must be maintained in the service coordination file for each participant receiving this service that the service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 (Vocational Rehabilitation Services).
- This service shall not overlap with, supplant, or duplicate other comparable services provided through Medicaid State Plan or HCBS Waiver services, or Vocational Rehabilitation programs.

Service Type:

Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

Service Title:

Home Modifications

HCBS Taxonomy:

Category 1:

Sub-Category 1:

14 Equipment, Technology, and Modifications

14020 home and/or vehicle accessibility adaptations

Category 2:

Sub-Category 2:

Category 3:

Sub-Category 3:

Service Definition (Scope):

Category 4:

Sub-Category 4:
Home Modifications are physical adaptations to the private residence of the participant or the participant’s family necessary to ensure the health, welfare, and safety of the participant, or necessary to enable the participant to function with greater independence in their own participant-directed private home (not provider operated or controlled) or in the family’s home, if living with his/her family.

Home Modifications are provided within the current foundation of the residence. Such modifications include the installation of ramps, widening of doorways, modification of bathroom facilities, or the installation of specialized electric and plumbing systems that are necessary to accommodate the medical equipment and supplies that are necessary for the welfare of the participant. Adaptations that add to the total square footage of the home are excluded except when necessary to complete an adaptation (e.g., in order to improve entrance/egress to a residence or to configure a bathroom to accommodate a wheelchair). Approvable adaptations do not include adaptations or improvements to the home that are of general utility, and are not of direct medical or remedial benefit to the participant. The participant’s home must not present a health and safety risk to the participant other than that corrected by the approved home adaptations. Home Modifications will not be approved to adapt living arrangements for a residence that is operated or controlled by a provider of waiver services.

Home Modifications may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- Home Modifications have a budget cap of $10,000 per five year period. The limitation was determined based on historical and actual data and the funding limitation has historically addressed the health and welfare of waiver participants. If a participant’s needs cannot be met within the established funding limitation, the participant’s team will meet to determine what alternatives may be available, such as the Vocational Rehabilitation Combined Funding program. If alternatives are unavailable, additional developmental disabilities funding could be requested through the established exception process.
- A critical health or safety service request that exceeds the cap subject to available waiver funding and approval by DHHS-DD.
- DHHS-DD may require an on-site assessment of the environmental concern including an evaluation of functional necessity with appropriate Medicaid enrolled professional providers. The Division may use a third party to assess the proposed modification and need for the adaptation to ensure cost effectiveness and quality of product. This assessment will be funded by the Environmental Modification Assessment service, and will be reimbursed separately. The cost of the Environmental Modification Assessment is not included in the $10,000 budget cap for Home Modification.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Proof of renter’s insurance or homeowner’s insurance may be requested.
- Evidence of application to secure government-subsidized housing through U.S. Department of Housing and Urban Development or other Economic Assistance programs may be requested.
- Providers shall not exceed their charges to the general public when billing the waiver. A provider who offers a discount to certain individuals (for example, students, senior citizens, etc.) shall apply the same discount to the participants who would otherwise qualify for the discount.
- Home Modifications may be provided by a relative but not a legally responsible individual or guardian of the participant.
- The services under this Waiver are limited to additional services not otherwise covered under the state plan, including EPSDT, but consistent with waiver objectives of avoiding institutionalization.

<th>Category 4:</th>
</tr>
</thead>
</table>

Independent Living is provided to the participant in their private home, not a provider operated or controlled residence. The participant lives alone or with house mates and is responsible for rent, utilities, and food.

Independent Living is a habilitative service that provides individually-tailored intermittent supports for a waiver participant that assists with the acquisition, retention, or improvement in skills related to living in the community. Independent Living includes adaptive skill development of daily living activities, such as personal grooming and cleanliness, laundry, bed making and household chores, as well as eating and the preparation of food, inclusive community activities, transportation, and the social and leisure skill development necessary to enable the participant to live in the most integrated setting appropriate to his/her needs. Providers of Independent Living generally do not perform these activities for the participant, except when not performing the activities pose a risk to the participant’s health and safety.

Individual programs must be specific and measureable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Independent Living may be self-directed.

**Specify applicable (if any) limits on the amount, frequency, or duration of this service:**
• Independent Living is provided in the participant’s private home, not a provider operated or controlled residence.

• Independent Living may be provided to 1 or 2 participants, based on the participants’ assessed needs. Groups of 3 must be approved by the Department.

• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.

• Independent Living is provided to an awake participant who requires less than 24 hours of support a day.

• Independent Living is reimbursed at an hourly rate. Independent Living cannot exceed a weekly amount of 25 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.

• The rate structure for this service is determined based on the group size. Group sizes of 1, 2, or 3 are based on the participant’s assessed needs.

• Participants receiving Independent Living cannot receive Supported Family Living.

• Participants receiving Independent Living cannot have an active service authorization for Respite.

• Transportation required in the provision of Independent Living is included in the rate. Non-medical transportation to the site at which Independent Living begins is not included in the rate. Non-medical transportation from the site at which Independent Living ends is not included in the rate.

• Independent Living may be provided by a relative but not a legally responsible individual or guardian of the participant.

• This service shall exclude any services available through public education programs funded under the Individuals with Disabilities Education Act (IDEA). This includes services not otherwise available through public education programs in the participant’s local school district, including after school supervision and daytime services when school is not in session (i.e. summer breaks and/or scheduled school holidays, in-service days, etc.). Services cannot be provided during the school hours set by the local school district for the participant. Regular school hours and days apply for a child who receives home schooling.

• This service shall not overlap with, supplant, or duplicate other comparable services provided through Medicaid State Plan or HCBS Waiver services.

Category 3: Sub-Category 3:

Service Definition (Scope):
Category 4: Sub-Category 4:
Integrated Community Employment (ICE) service is intermittent formalized training and staff supports - needed by a participant to acquire and maintain a job/position in the general workforce at or above the state’s minimum wage, but not less than the customary wage and level of benefits paid by the employer of the same or similar work performed by individuals without disabilities. The outcome of this service is sustained paid employment in an integrated setting in the general workforce that meets personal and career goals, as documented in the service plan. ICE services are person-centered and team supported to address the participant’s particular needs for ongoing or intermittent habilitation (teaching and supporting) throughout stabilization services and extended integrated community employment services and supports. Intermittent services imply that staff support is provided when the services and supports are needed. ICE, as an intermittent service, can only be billed in half, quarter hours, or full hour increments. An hour of service equates to one clock hour.

ICE services include habilitation (teaching and supporting) services, with activities and strategies that are outcome based and focused to sustain paid work by participants and are designed to obtain, maintain or advance employment. Intensive direct habilitation (teaching and supporting) will be designed to provide the participant with face to face instruction necessary to learn explicit work-related responsibilities and skills, as well as appropriate work behavior.

ICE services enable participants, for whom competitive employment at or above the minimum wage is unlikely absent the provision of supports, and who, because of their disabilities, need supports, to perform in a regular work setting. Support may involve assisting the participant in accessing an Employment Network, the Nebraska Work Incentive Network (WIN), Ticket to Work services, Work Incentive Planning and Assistance (WIPA) services, or other qualified service programs that provide benefits planning.

ICE services are primarily provided away from the home, in a non-residential setting, during typical working hours. Generally, this service is provided between the hours of 7:00 am and 5:00 pm, or can be delivered in an alternate schedule, as documented in the service plan. Discreet habilitation (teaching and supporting) during typical working hours is allowed in preparation for leaving the place where the participant lives. Intermittent face to face individualized habilitation (teaching and supporting) is provided to assist the participant in maintaining employment. Habilitation (teaching and supporting) goals and strategies must be identified in the service plan and specify in a measurable manner, the services to be provided to meet the preferences and needs of the participant.

ICE services may include a customized home-based business. Habilitation (teaching and supporting) services may be delivered in a customized home based businesses and are allowed in participant directed companion homes. ICE services do not include employment in group settings such as Workstation services, enclaves, classroom settings, or provider-owned and controlled fixed site Day Habilitation settings.

Stabilization is ongoing habilitation (teaching and supporting) services and strategies needed to support and maintain a participant in an integrated competitive employment site or customized home-based employment. Stabilization habilitation (teaching and supporting) services, supports, and strategies are provided when the staff intervention time required at the job site is 20% - 50% of the participant's total work hours. Staff intervention includes regular contacts with the participant or on behalf of the participant to determine needs, as well as to offer encouragement and advice. Staff is intermittently available as needed to the participant during employment hours. Goals and strategies needed for the participant to maintain employment must be identified in the individual plan.

Extended ICE services are provided to participants who need ongoing intermittent support to maintain employment and when the staff intervention time required at the job site is less than 20% of the participant’s total work hours. The provision of extended ICE is limited to the work site, including home-based business sites. Staff supports must include at a minimum, twice monthly monitoring at the work site. Extended ICE services must identify the services and supports needed to meet the needs of the participant in the service plan.

Prior to learning to access transportation independently, transportation between the participant’s place of residence and the employment site is a component of ICE services and the cost of transportation is included in the rate paid to providers.

This service will not overlap with, supplant, or duplicate other services provided through the waiver or Medicaid State plan services. This service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 or the Individuals with Disabilities Education Act (20 U.S.C. 1401 et seq.).

Federal financial participation is not claimed for incentive payments, subsidies, or unrelated vocational training.
expenses such as the following:
Incentive payments made to an employer to encourage or subsidize the employer's participation in a supported employment program;
Payments that are passed through to users of supported employment programs; or
Payments for training that is not directly related to a participant's integrated community employment services.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Integrated Community Employment services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Integrated Community Employment services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

The amount of authorized services is the participant’s approved annual budget and is provided based on the participant’s preferences to the extent possible, and as documented in the service plan. Each waiver service must be prior-authorized to avoid duplicative billing with other waiver services.

ICE stabilization services require at least 40 hours of work per month paid at minimum wage or a wage consistent with that earned by the general working population, whichever is higher. DHHS will continue reimbursement at the ICE rate as long as the minimum total number of hours worked for the last three months (including the current month) is more than 120 hours of work (or an average of 40 or more hours per month for those three months). Multiple jobs that meet the wage requirements may be worked to reach 40 hours of employment per month.

Extended ICE services are time limited. Extended integrated community employment services require at least 80 hours of work per month paid at minimum wage or a wage consistent with that earned by the general working population, whichever is higher. DHHS will continue payment for the extended ICE services as long as the minimum total number of hours worked for the last three months (including the current month) is more than 240 hours of work (or an average of 80 or more hours per month for those three months). Multiple jobs that meet the wage requirements may be worked to reach 80 hours of employment per month. The provider may claim extended integrated community employment services for up to 24 months in order for the participant to meet their personal and career goals.

Income from customized home-based businesses may not be commensurate with minimum wage requirements with other employment. No more than two individuals may participate in a home-based business at the same participant-directed companion home.

<th>Sub-Category 4:</th>
</tr>
</thead>
</table>

09/20/2019
Medical risk services are provided to participants with complex medical needs that require continuing care and treatment but are not assessed to need continuous nursing facility level of care. Complex medical needs may result from the diagnoses of some types of diabetes or seizures or may result from use of g-tubes, g-buttons, j-tubes, tracheotomies, ventilators, or a combination of the above. Treatment or interventions to meet complex medical needs require ongoing clinical assessment, professional judgment, and treatment based on ongoing assessment and cannot be delegated to unlicensed direct support professionals.

Medical risk services are also available to participants who have a degenerative/regressive condition diagnosed by the participant’s medical practitioner and that make further growth or development unlikely. The degenerative/regressive condition requires continuing care and treatment, and significantly impedes independent completion of activities of daily living, and impedes self-directing others to perform activities of daily living. Degenerative or regressive conditions that affect all areas of daily living activities may include cerebral palsy, muscular dystrophy, multiple sclerosis, post-polio syndrome, dementia, Parkinson’s disease, Huntington’s disease, Alzheimer’s, or other neurological impairments.

The need for medical risk services will be determined by designated staff at Division of Developmental Disabilities (DDD) central office. A referral is completed by the participant’s service planning team to assist the team in planning, as a guide in giving adequate consideration to health and medical factors, or at the request of DDD central office. When the team, which may include the participant’s physician, believes that the participant’s needs require medical risk services, the participant may be referred to DD central office for a formal health assessment.

Medical risk services are provided 24/7 and are considered to be continuous services. This service is an all-inclusive service that includes residential and day habilitation (teaching and supporting), health maintenance activities, routine complex medical treatments, ongoing health and safety supervision, and ongoing clinical supports. The provision of medical risk services will be under the direction of a registered nurse. Physical nutritional management plans must be implemented as applicable Meals provided as part of these services shall not constitute a "full nutritional regimen" (3 meals per day).

The residential habilitation (teaching and supporting) under this service can be delivered in a variety of home settings. The residential habilitation component is formalized training and staff supports for the acquisition, retention, or improvement in skills related to living in the community. Medical risk services are all-inclusive, meaning that a participant cannot receive these services in combination with another DD waiver service. Formalized training and staff supports include adaptive skill development of daily living activities, such as personal grooming and cleanliness, bed making and household chores, eating and the preparation of food, community inclusion, transportation, and the social and leisure skill development necessary to enable the participant to live in the most integrated setting appropriate to his/her needs. Residential habilitation (teaching and supporting) also includes personal care and protective oversight when applicable as well as supervision.

The day habilitation (teaching and supporting) service component, is provided away from the home, unless prescribed to be medically necessary by the participant’s physician and approved by DDD central office, and is provided during typical working hours to increase the participant’s independence, integration, inclusion, personal accomplishment, and employment objectives, as applicable. Day habilitation services that are provided as part of this all-inclusive service are provided in non-residential settings in the community. A participant cannot be authorized for another day habilitation service and medical risk services at the same time. The habilitation (teaching and supporting) services are formalized training and supports, which focus on enabling the participant to attain or maintain his or her maximum functional level and must be coordinated with but may not supplant any physical, occupational, or speech therapies in the ISP. The habilitative training and supports may include workplace training, increasing socialization and recreational skills and abilities in the community, and skills to assist in access to and integration in their community. The day habilitation (teaching and supporting) component also includes personal care and protective oversight (when applicable) as well as supervision.

Health maintenance activities, such as medication administration and treatments that are routine, stable, and predictable may be provided by medication aides and other unlicensed direct support professionals and require nurse or medical practitioner oversight of delegated activities to the extent permitted under applicable State laws. Health maintenance activities, supervision, and assistance with personal needs are not an exclusive component of medical risk services and are provided when identified as a need and documented in the service plan.

Assistance with personal needs may include toileting, transfer and ambulation, skin care, bathing, dressing,
grooming, meal preparation, eating, extension of therapies and exercise, and routine care of adaptive equipment primarily involving cleaning as needed.

Treatments or interventions to meet complex medical needs or address degenerative conditions are outlined in a nursing plan and included in the participant’s service plan. Health and safety factors including the type and amount of supervision, environmental conditions, weather conditions, architectural conditions, special diets, and safe evacuation plans are included in the service plan as applicable to the participant.

Medical risk providers must have a sufficient number of Registered Nurses on staff or under contract to develop nursing plans, provide complex medical treatments, train unlicensed direct support professionals, and oversee delegation of health maintenance activities to the extent permitted under applicable state laws.

**Specify applicable (if any) limits on the amount, frequency, or duration of this service:**

This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Medical Risk Services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Medical Risk Services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

Medical risk services are not participant directed. The amount of authorized services for medical risk services may not be determined using the objective assessment process.

Complex medical treatments require ongoing assessment, professional judgment, and treatment based on ongoing assessment and can only be delegated to unlicensed direct support professionals to the extent permitted under Neb. Rev. Statute § 71-1, 132.30.

Payments for medical risk services are not made for room and board, the cost of setting maintenance, upkeep, and improvement.

Payment for medical risk services does not include DDD payments made, directly or indirectly, to members of the participant’s immediate family. Immediate family is defined as a parent (biological, step, or adoptive), spouse, or child (biological, step, or adopted) of the waiver participant. Payments will not be made for the routine care and supervision which would be expected to be provided by a family or group home provider, or for activities or supervision for which a payment is made by a source other than Medicaid.

The provision of medical risk services cannot overlap with or supplant other state or federally funded services such as, but not limited to respite services, Vocational Rehabilitation services, or Medicaid State Plan services. Medical risk services will not duplicate other services provided through this waiver. Medical risk services are all-inclusive, meaning that a participant cannot receive these services in combination with another DD waiver service. Each waiver service must be prior-authorized to avoid duplicative billing with other waiver services.

PERS is an electronic device which enables participants to secure help in an emergency. The participant may also wear a portable PERS button to allow for mobility. The system is connected to the participant’s telephone and programmed to signal a response center once a PERS button is activated.

The provision of PERS includes:

1. Instruction to the participant about how to use the PERS device;
2. Obtaining the participant’s or authorized representative’s signature verifying receipt of the PERS unit;
3. Ensuring that response to device signals (where appropriate to the device) will be provided 24 hours per day, 7 days per week;
4. Furnishing a replacement PERS unit when needed to the participant within 24 hours of notification of malfunction of the original unit while it is being repaired;
5. Updating a list of responder and contact names at a minimum semi-annually to ensure accurate and correct information;
6. Ensuring monthly testing of the PERS unit; and
7. Furnishing ongoing assistance when needed to evaluate and adjust the PERS device or to instruct the participant in the use of PERS devices, as well as to provide for system performance checks.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:
• Personal Emergency Response System (PERS) cannot be authorized for a participant who resides in a residence that is provider-owned, provider-operated or provider-controlled, unless a transition plan for the participant is submitted, and outlines how PERS will assist the participant to move to a less restrictive setting within 6 months.
• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
• PERS is reimbursed as a monthly rental fee or as a one-time installation fee.
• This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan or HCBS Waiver service.

09/20/2019
Retirement services are available to participants who are of the typical retirement age. Participants of this service have chosen to end employment or participation in day habilitation services or are no longer able to be employed or participate in day habilitation services due to physical disabilities or stamina. Retirement services are structured services consisting of day activities and residential support. Retirement services are provided in a home setting or community day activity setting and may be provided as a day service or a residential service. Retirement services may be self-directed or provider controlled. The outcome of retirement services is to treat each participant with dignity and respect, and to the maximum extent possible maintain skills and abilities, and to keep the participant engaged in their environment and community through optimal care and support to facilitate aging within the participant’s home and community.

Retirement services and supports are designed to actively stimulate, encourage and enable active participation; develop, maintain, and increase awareness of time, place, weather, persons, and things in the environment; introduce new leisure pursuits, establish new relationships; improve or maintain flexibility, mobility, and strength; develop and maintain the senses; and to maintain and build on previously learned skills.

Active supports must be furnished in a way which fosters the independence of each participant. Strategies for the delivery of active supports must be person centered and person directed to the maximum extent possible and must be identified in the service plan.

Retirement services and supports may include personal care, protective oversight, and supervision as applicable to the participant when provider staff is present. Health maintenance activities, such as medication administration and treatments that are routine, stable, and predictable may be provided by medication aides and other unlicensed direct support professionals and require nurse or medical practitioner oversight of delegated activities to the extent permitted under applicable State laws. Health maintenance activities, supervision, and assistance with personal needs are provided when identified as a need and documented in the service plan. Meals provided as part of retirement services and supports do not constitute a "full nutritional regimen" (3 meals per day).

Retirement services may be provided as a continuous or intermittent service. Continuous day service activities are provided for seven or more hours per day and delivered in a non-institutional, community setting that may include people without disabilities. Retirement day settings cannot be set up or operated by a DD provider in communities where an existing community senior center or facilities geared for people who are elderly, such as an adult day care center are available. DD provider-operated retirement day settings must be made available to people without disabilities.

Continuous retirement residential supports are provided for seven or more hours per day and may be provided in supported living companion homes or provider operated residences. A supported living companion home has no more than two other individuals with developmental disabilities and is under the control and direction of the individual(s). The home or residence must be in an integrated community setting.

When retirement services are delivered in a provider operated residence, there must be staff on-site or within proximity to allow immediate on-site availability at all times to the participant, including during the participant’s sleep time. Staff must be available to meet scheduled or unpredictable needs in a way that promotes maximum dignity and independence, to provide supervision, safety, and security, and to provide activities to keep the participant engaged in their environment.

The personal living space and belongings of others must not be utilized by others receiving retirement services. When retirement services are delivered in residences, only shared living spaces such as the living room, kitchen, bathroom, and recreational areas may be utilized, and when retirement services are delivered to two or more participants, different residences must be utilized on a rotating basis.

Transportation into the community to shop, attend recreational and civic events, go to the senior center, adult day care center, or other community activities is a component of retirement services and is included in the rate to providers. It shall not replace transportation that is already reimbursable under the Medicaid non-emergency medical transportation program. The service planning team must also assure the most cost effective means of transportation, which would include public transport where available. Transportation by the provider is not intended to replace generic transportation or to be used merely for convenience.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:
This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Retirement Services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Retirement Services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

Payments for retirement services are not made for room and board, the cost of facility maintenance, upkeep, and improvement.

Payment for retirement services does not include payments made, directly or indirectly, to members of the participant's immediate family. Immediate family is defined as a parent (biological, step, or adoptive), spouse, or child (biological, step, or adopted) of the waiver participant.

The amount of authorized services is the participant’s approved annual budget and is provided based on the participant’s preferences to the extent possible, and as documented in the service plan.

Payments will not be made for the routine care and supervision which would be expected to be provided by a family or group home provider, or for activities or supervision for which a payment is made by a source other than Medicaid.

Retirement day supports cannot duplicate or replace existing natural supports, senior centers, adult day care centers, or other community activity centers in the communities in which the participant resides.

This service will not overlap with, supplant, or duplicate other services provided through the waiver or Medicaid State plan services.

**Service Definition (Scope):**

Supported Employment-Follow Along are services and supports that enable a participant who is paid at or above the federal minimum wage to maintain employment in an integrated community employment setting. This service is provided through intermittent and occasional job support, communicating with the participant’s supervisor or manager, whether in the presence of the participant or not. Supported Employment-Follow Along may include support through phone calls between provider staff and the participant’s employer staff. There is regular contact and follow-up with the employer and participant to reinforce and stabilize job placement. Services must be furnished consistent with the participant’s service plan.

Supported Employment-Follow Along may include observation and supervision of the participant, teaching job tasks and monitoring at the work site a minimum of twice a month, to ascertain the success of the job placement and when needed, the provision of habilitative short-term job skill training at the work site to help maintain employment. Supported Employment-Follow Along staff provide facilitation of natural supports at the work site and advocate for the participant, but only with persons at the employment site (e.g., employers, co-workers, customers) and only for purposes directly related to employment.

A participant may receive Supported Employment-Follow Along for working in an integrated community work environment where more than half of other employees who work around the participant do not have disabilities.

Individual programs must be specific and measureable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Supported Employment-Follow Along Services may be self-directed.

**Specify applicable (if any) limits on the amount, frequency, or duration of this service:**

09/20/2019
• This service may be authorized in combination with any, or all, of the following services in the same service plan, but not during the same time period: Adult Day, Enclave, Habilitative Community Inclusion, Habilitative Workshop, Prevocational, and/or Supported Employment Individual. The total combined hours for these services may not exceed a weekly amount of 35 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.

• Supported Employment-Follow Along does not include activities taking place in a group, e.g., work crews or enclaves; public relations; community education; in-service meetings; individual staff development; department meetings; or any other activities that are non-participant specific, such as a job coach working the job instead of the participant.

• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.

• Supported Employment-Follow Along is reimbursed at an hourly rate for up to 25 hours annually.

• Transportation required in the provision of Supported Employment-Follow Along is included in the rate. Non-medical transportation to the site at which Supported Employment-Follow Along begins is not included in the rate. Non-medical transportation from the site at which Supported Employment-Follow Along ends is not included in the rate.

• Documentation must be maintained in the service coordination file for each participant receiving this service that the service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 (Vocational Rehabilitation Services).

• Supported Employment-Follow Along may be provided by a relative but not a legally responsible individual or guardian of the participant.

• This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan, HCBS Waiver service, or Vocational Rehabilitation.

C-1/C-3: Provider Specifications for Service

Service Type: Other Service

Service Name: Supported Employment - Follow Along

Provider Category:

[Individual]

Provider Type:

Independent Individual - Habilitative Services

Provider Qualifications

License (specify):

No license is required.

Certificate (specify):
No certification is required.

**Other Standard (specify):**

All providers of waiver services must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

All providers of waiver services must adhere to standards as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider of this service must:
- Complete all provider enrollment requirements;
- Have necessary education and experience, and provide evidence upon request:
  - Have a Bachelor’s degree or equivalent coursework/training in: education, psychology, social work, sociology, human services, or a related field; OR
  - Have four or more years of professional experience in the provision of habilitative services for persons with intellectual or other developmental disabilities (IDD), or in habilitative program writing and program data collection/analysis, or four or more years of life experience in teaching and supporting an individual with IDD; OR
  - Have any combination of education and experience identified above equaling four years or more;
- Have training in the following areas, and provide evidence of current certificate of completion from an accredited source, when applicable, or upon request:
  - Abuse, neglect, and exploitation and state law reporting requirements and prevention;
  - Cardiopulmonary resuscitation; and
  - Basic first aid;
- Be age 19 or older and authorized to work in the United States;
- Not be a legally responsible individual or guardian to the participant; and
- Not be an employee of DHHS, unless approved by DHHS as compliant with DHHS policy and applicable law and regulation.

**Verification of Provider Qualifications**

**Entity Responsible for Verification:**

DHHS agency staff in combination with designated provider enrollment broker.

**Frequency of Verification:**

The program compliance is verified through the annual or biennial survey process. The provider enrollment broker ensures that revalidation of agency is completed annually and re-enrollment is completed every 5 years.

**Appendix C: Participant Services**

**C-1/C-3: Service Specification**

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

**Service Type:**

Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

**Service Title:**

Supported Family Living

**HCBS Taxonomy:**
Supported Family Living is provided to the participant in the participant’s family home, not a provider owned, leased, or operated residence. The participant lives with relatives in their private family home.

Supported Family Living is a habilitative service that provides individually-tailored intermittent supports for a waiver participant that assists with the acquisition, retention, or improvement in skills related to living in the community. Supported Family Living includes adaptive skill development of daily living activities, such as personal grooming and cleanliness, laundry, bed making and household chores, as well as eating and the preparation of food, inclusive community activities, transportation, and the social and leisure skill development necessary to enable the participant to live in the most integrated setting appropriate to his/her needs. Providers of Supported Family Living generally do not perform these activities for the participant, except when not performing the activities pose a risk to the participant’s health and safety.

Individual programs must be specific and measureable and updated when not yielding progress, and data must be tracked and analyzed for trends. Monthly summary reports on progress or lack of progress must be made available upon request.

Supported Family Living may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:
• Supported Family Living is provided in the participant’s private family home, not a provider operated or controlled residence.
• Supported Family Living may be provided to 1 or 2 participants, based on the participants’ assessed needs. Groups of 3 must be approved by the Department.
• The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
• Supported Family Living is provided to an awake participant who requires less than 24 hours of support a day.
• Supported Family Living is reimbursed at an hourly rate, Supported Family Living cannot exceed a weekly amount of 25 hours. A week is defined as 12:00 AM Monday through 11:59 PM Sunday.
• The rate structure for this service is determined based on the group size. Group sizes of 1, 2, or 3 are based on the participant’s assessed needs.
• Participants receiving Supported Family Living cannot receive Independent Living.
• Transportation required in the provision of Supported Family Living is included in the rate. Non-medical transportation to the site at which Supported Family Living begins is not included in the rate. Non-medical transportation from the site at which Supported Family Living ends is not included in the rate.
• Supported Family Living may be provided by a relative but not a legally responsible individual or guardian of the participant.
• This service shall exclude any services available through public education programs funded under the Individuals with Disabilities Education Act (IDEA). This includes services not otherwise available through public education programs in the participant’s local school district, including after school supervision and daytime services when school is not in session (i.e. summer breaks and/or scheduled school holidays, in-service days, etc.). Services cannot be provided during the school hours set by the local school district for the participant. Regular school hours and days apply for a child who receives home schooling.
• This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan or HCBS Waiver services.

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Team behavioral consultation is on-site consultation by highly specialized teams with behavioral and psychological expertise when participants with DD experience psychological, behavioral, or emotional instability which has been resistant to other standard habilitative interventions and strategies that have been attempted by the participant’s ISP team. Sometimes in rural areas of the state, community resources, such as psychologists or psychiatrists are not readily available to consult with or participate in meetings, or have very little experience with treating individuals with DD. Team behavioral consultation service may be requested by the ISP team or directed by DDD central office and the need for the service is reflected in the ISP.

Team behavioral consultation (TBC) service includes reviewing referral information, an entrance conference, on-site observations, interviews, and assessments, training to direct support staff, identification of the need for referral(s) to other services if applicable, an exit conference, report of findings and recommendations, and follow-up.

The service begins with submission of a referral to DDD central office to log and forward to the assigned TBC team. The TBC team contacts the participant’s service coordinator (SC) to schedule a consultation visit and the SC submits informational packet to the TBC team for review prior to the scheduled visit. The on-site consultation begins with an initial meeting of the service plan team, the participant, legal representative and/or parent, service coordinator, staff from habilitation service components delivered to the participant (day services, residential services, or both day and residential services), other professionals serving the participant in the community, as well as TBC service staff.

The TBC service is provided under the direction of a Licensed Clinical Psychologist, and may include the following members, depending upon the participant’s needs: a Certified Master of Social Work, a Registered nurse, a licensed mental health practitioner, or other qualified professionals. This meeting is designed to further explore the negative behavior and plan the schedule for the on-site consultation.

Observations where the participant lives, and/or takes part in day services or other activities are conducted at any time of the day or night, depending upon when and where the specific negative behaviors are exhibited. ISP team members are interviewed, and assessments are completed. The current interventions are noted, and efficacy assessed. Behavioral interventions are developed, piloted, and evaluated, and revised, as necessary. Training is delivered to the ISP team as applicable and requested, such as best practices in intervention strategies, medical and psychological conditions, or environmental impact to service delivery.

Findings and recommendations are written and discussed with the team at the exit conference and a copy is provided to DDD central office. The participant is present for the consultation.

If at any time the TBC team identifies a need for a referral as a result of the review of the participant’s case file, observations, interviews, and/or completion of assessments, the TBC will notify the participant’s DDD service coordinator to recommend/direct that a referral be made for needs such as, but not limited to a medication review, dental work, medical evaluation, or nutritional evaluation. Such referral recommendations are documented in the TBC report.

Follow-up begins after the TBC staff has left the community site. It includes all revisions to the recommendations package, and phone, e-mail, and on-site contact with the participant’s ISP team in the community. Weekly contact with the ISP team is conducted by telephone or e-mail to provide support and additional recommendations, as needed. Behavioral data and Treatment Integrity checklists are reviewed on an on-going basis, with on-site follow-up conducted if problem behaviors continue to be resistant in spite of consistently applied efforts. Continued follow-up is provided after each successive on-site visit. The TBC file is closed when there is agreement to do so by TBC staff and the participant’s ISP team.

The recommendations from the TBC service provider for addressing behaviors and intervention strategies must be addressed by the participant’s service plan team and changes resulting from the recommendations are documented in the service plan.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:
This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Team Behavioral Consultation offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Team Behavioral Consultation and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

Team behavioral consultation is only available to participants receiving services from a certified DD agency provider. TBC will not be available to participants that receive behavioral risk services or retirement services.

TBC services will not be furnished to a participant while s/he is an inpatient of a hospital, nursing facility, or ICF. Room and board is not included as a cost that is reimbursed under this service.

To avoid overlap or duplication of service, team behavioral consultation services are limited to those services not already covered under the Medicaid State Plan or which can be procured from other formal or informal resources such as Rehab act of 1973. Furthermore, TBC services will not duplicate other services provided through this waiver.

A unit of team behavioral consultation is defined as a day.

The authorized amount of team behavioral consultation is not determined using the objective assessment process. The funding amount and duration of the service is set by DDD and is not based on the objective assessment process described in I-2-a.

<table>
<thead>
<tr>
<th>Category 3:</th>
<th>Sub-Category 3:</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Service Definition (Scope):</th>
</tr>
</thead>
</table>

Transitional Services are services and household set-up expenses not otherwise provided through this waiver or through the Medicaid State Plan that enables a participant to have opportunities for full membership in home and community based services.

Transitional Services are non-recurring basic household set-up expenses needed for participants transitioning from a Nebraska institution to a private residence that remove the identified barriers or risks for the success of the transition. Facilities considered institutions for Transitional Services are: Intermediate Care Facilities for individuals with Developmental Disabilities (ICF/DD), Nursing Homes, and Institutions for Mental Disease. Transitional Services may include essential furniture, furnishings, household supplies, security deposits, basic utility (i.e., water, gas, and electricity) fees or deposits, or moving expenses. Funds may not be used to pay a rental deposit or rent. Transitional Services may be approved when the participant does not have the funds to purchase the item or service or the item or service is not available through another source, including relatives, friends, or any other source. Transitional Services will not be approved for a residence that is owned or leased by a provider of waiver services. Transitional Services may be self-directed.

**Specify applicable (if any) limits on the amount, frequency, or duration of this service:**

- Transitional Services have a participant budget cap of $1,500. A critical health or safety service request that exceeds the limit is subject to available waiver funding and approval by DHHS-DD.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Transitional Services are authorized for direct reimbursement to the vendor.
- Medicaid funds may not be used to pay rent.
- An application must be submitted to DHHS-CFS Economic Support Unit for assistance prior to utilization of this service.
- Transitional Services cannot be used for personal care items (toiletries or things used for daily hygiene), food, or clothing, or items and services which are not essential to supporting the move or ensuring a successful transition.
- Providers shall not exceed their charges to the general public when billing the waiver. A provider who offers a discount to certain individuals (for example, students, senior citizens, etc.) shall apply the same discount to the participants who would otherwise qualify for the discount.
- This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan, HCBS Waiver service, or Money Follows the Person.

**Service Delivery Method (check each that applies):**

Service Definition (Scope):  

- Transportation is a service designed to foster greater independence and personal choice. Transportation enables participants to gain access to waiver services, community activities, and resources, as specified by the participant’s service plan. Transportation services are not intended to replace formal or informal transportation options, like the use of natural supports.
- Transportation may be self-directed.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- This service does not include transportation to medical appointments that is available under the Medicaid State plan or other federal and state transportation programs.
- Transportation is provided for a waiver participant to get to and from a location only using the most direct route.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Transportation is reimbursed per mile or cost of a bus pass.
- Transportation may be provided by a relative but not a legally responsible individual or guardian of the participant.
- Agency provider mileage rate shall not exceed the rate of reimbursement pursuant to Neb. Rev. Stat. §81-1176 multiplied by three.
- Individual provider mileage rate shall be paid at the mileage rate of reimbursement pursuant to Neb. Rev. Stat. §81-1176.
- The public transportation rate shall not exceed purchase price by the general public.
- This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan or HCBS Waiver service.

Service Delivery Method (check each that applies):

C-1/C-3: Provider Specifications for Service

Service Type: Other Service
Service Name: Transportation

Provider Category: Agency
Provider Type: Agency - Public Service Commission Exempt Transportation Provider

Provider Qualifications

License (specify):

Provider must have a valid driver's license. Neb. Rev. Stat. §60-484.

Certificate (specify):

Other Standard (specify):

All providers of waiver services must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

All providers of waiver services must adhere to standards as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider of this service must:
- Complete all provider enrollment requirements;
- Ensure drivers possess a current and valid driver's license;
- Maintain the minimum vehicle insurance coverage as required by state law;
- Ensure drivers have not had his/her driver/chauffeur's license revoked within the past three years;
- Meet and adhere to all applicable employment standards established by the hiring agency; and
- Be age 19 or older and authorized to work in the United States.

The provider must have internet access for adherence to applicable record-keeping and billing requirements.

Verification of Provider Qualifications

Entity Responsible for Verification:

DHHS agency staff in combination with designated provider enrollment broker.

Frequency of Verification:

Independent provider background check compliance is completed annually and the provider enrollment broker ensures that revalidation is completed annually and re-enrollment is completed every 5 years.

Appendix C: Participant Services

C-1/C-3: Service Specification

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Service Type: Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

Service Title:

Vehicle Modifications
Vehicle Modifications are adaptations or alterations to an automobile or van that is the participant’s primary means of transportation in order to accommodate the special needs of the participant. Vehicle Modifications are specified by the service plan as necessary to enable the participant to integrate more fully into the community and to ensure the health, welfare and safety of the participant.

The following are specifically excluded:
1. Adaptations or improvements to the vehicle that are of general utility, and are not of direct medical or remedial benefit to the participant.
2. Purchase or lease of a vehicle.
3. Purchase of existing adaptations or adaptations in process.
4. Regularly scheduled upkeep and maintenance of a vehicle except upkeep and maintenance of the modifications.
5. Adaptations to automobiles or vans that are owned or leased by providers of waiver services.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

- Vehicle Modifications have a budget cap of $10,000 per five year period. The limitation was determined based on historical and actual data and the funding limitation has historically addressed the health and welfare of waiver participants. If a participant’s needs cannot be met within the established funding limitation, the participant’s team will meet to determine what alternatives may be available, such as the Vocational Rehabilitation Combined Funding program. If alternatives are unavailable, additional developmental disabilities funding could be requested through the established exception process.
- A critical health or safety service request that exceeds the cap is subject to available waiver funding and approval by DHHS-DD.
- DHHS-DD may require an on-site assessment of the environmental concern including an evaluation of functional necessity with appropriate Medicaid enrolled professional providers. DHHS-DD may use a third party to assess the proposed modification and need for the modification to ensure cost effectiveness and quality of product. This assessment will be funded by the Environmental Modification Assessment service, and will be reimbursed separately. The cost of the Environmental Modification Assessment is not included in the $10,000 budget cap for Vehicle Modifications.
- The amount of prior authorized services is based on the participant’s need as documented in the service plan, and within the participant’s approved annual budget.
- Proof of vehicle insurance may be requested.
- Providers shall not exceed their charges to the general public when billing the waiver. A provider who offers a discount to certain individuals (for example, students, senior citizens, etc.) shall apply the same discount to the participants who would otherwise qualify for the discount.
- If the vehicle is leased, the modification is transferrable to the next vehicle.
- This service shall not overlap with, supplant, or duplicate other comparable services provided through the Medicaid State Plan or HCBS Waiver service.

Agency

Provider Type:

Independent Agency/Business; Department of Education; Vocational Rehabilitation Assistive Technology Partnership; Companies for Specialized Equipment; Businesses for Vehicle Adaptations.

Provider Qualifications

License (specify):

All vendors must meet all applicable federal, state, and local laws and regulations, including maintaining appropriate license.

Certificate (specify):

All vendors must meet all applicable federal, state, and local laws and regulations, including maintaining appropriate certifications.

Other Standard (specify):
All providers of waiver services must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

All providers of waiver services must adhere to standards as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider of this service must ensure that all items and assistive equipment provided meet the applicable standards of manufacture, design, and installation. Appropriately licensed/certified persons shall make or oversee all modifications.

A provider of this service must:
- Complete all provider enrollment requirements;
- Be authorized to work in the United States;
- Not be a legally responsible individual or guardian to the participant; and
- Not be an employee of DHHS, unless approved by DHHS as compliant with DHHS policy and applicable law and regulation.

Service Definition (Scope):

Category 4:                     Sub-Category 4:

Planning habilitation (teaching and supporting) service is a prevocational service with focus on enabling the participant to attain work experience through career planning, job searching, and paid and unpaid work experience with the goal or outcome of Vocational Planning being integrated community employment. Services are furnished as specified in the service plan and are delivered intermittently. Intermittent services imply that staff support is provided when the services and supports are needed. Vocational Planning services can only be billed in half, quarter, or full hour increments. An hour of service equates to one clock hour.

Vocational Planning habilitation (teaching and supporting) services are formalized training and staff supports which take place during typical working hours, in a non-residential setting, separate from the participant’s private residence or other residential living arrangement, such as within a business or a community setting not owned or controlled by a DD provider, where individuals without disabilities work or meet together. Discreet habilitation (teaching and supporting) during typical working hours is allowed in preparation for leaving the place where the participant lives. Direct training or teaching and supports will be designed to provide the participant with face to face instruction necessary to learn work-related responsibilities, work skills, and appropriate work behavior.

Vocational Planning habilitation (teaching and supporting) services focus on the acquisition of work skills, appropriate work behavior, and the behavioral and adaptive skills necessary to enable the participant to attain or maintain his or her maximum inclusion and personal accomplishment in the working community. Habilitation (teaching and supporting) may include teaching such concepts as compliance, attendance, task completion, problem solving, and safety as well as accessing transportation independently and explicit employment objectives.

Vocational Planning habilitation (teaching and supporting) services also includes the provision of personal care and protective oversight and supervision when applicable to the participant. The teaching, activities, services, supports, and strategies are documented in the service plan and delivered based on the service plan.

This service is not available under a program funded under section 110 of the Rehabilitation Act of 1973 or the Individuals with Disabilities Education Act (20 U.S.C. 1401 et seq.).

Vocational Planning habilitation (teaching and supporting) services may include career planning that is person-centered and team supported to address the participant’s particular needs to prepare for, obtain, maintain or advance employment. Habilitation (teaching and supporting) services with focus on career planning includes development of self-awareness and assessment of skills, abilities, and needs for self-identifying career goals and direction, including resume or business plan development for customized home businesses. Assessment of skills, abilities, and needs is a person-centered team responsibility that engages all team members to support an participant in identifying a career direction and developing a plan for achieving integrated community employment at or above the state’s minimum wage, but not less than the customary wage and level of benefits paid by the employer of the same or similar work performed by individuals without disabilities. The documented outcome is the stated career goals and career direction and strategies for the acquisition of skills and abilities needed for work experience in preparation for integrated community employment. Establishment of career goals may not take place at the same time as other Vocational Planning activities.

Habilitation (teaching and supporting) services with focus on career planning and strategies for implementing career goals may involve assisting the participant in accessing an Employment Network, the Nebraska Work Incentive Network (WIN), Ticket to Work services, Work Incentive Planning and Assistance (WIPA) services, or other qualified service programs that provide benefits planning.

Vocational Planning habilitation (teaching and supporting) services may include job searching designed to assist the participant, or on behalf of the participant, to locate a job or development of a work experience on behalf of the participant. Job searching may take place in the participant’s residence, in integrated community settings, or in provider staff office areas. Job searching may not take place in a fixed-site facility in the areas where other participants are receiving continuous day habilitation (teaching and supporting) services. Job searching with the participant will be provided on a one to one basis to achieve the outcome of this service.

Vocational Planning habilitation (teaching and supporting) services may include work experiences that are paid or unpaid, such as volunteering, apprenticing, interning, job shadowing, etc. A work experience takes place during typical working hours, in a non-residential setting, separate from the participant’s private residence or other residential living arrangement, with the focus on attaining the outcome of integrated community employment. Habilitation (teaching and supporting) provided during a work experience may include teaching such concepts as self-direction, attendance, task completion, problem solving, and safety as well as accessing transportation.
independently and explicit employment objectives.

Prior to learning to access transportation independently, transportation may be provided between the participant’s place of residence and the vocational planning habilitation (teaching and supporting) services or between habilitation (teaching and supporting) service sites (in cases where the participant receives habilitation services in more than one place). The cost of transportation is included in the rate paid to providers of the appropriate type of habilitation (teaching and supporting) services. The cost of transportation between vocational planning habilitation and day habilitation, workstation habilitation and integrated community employment should be billed under those waiver services and not this service.

Vocational Planning habilitation (teaching and supporting) services may take place in conjunction with Integrated Community Employment services, Workstation habilitation (teaching and supporting) services, Day Habilitation service, or other day activities but may not be billed at the same time during a given day.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Vocational Planning Habilitation services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Vocational Planning Habilitation services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

The amount of authorized services is the participant’s approved annual budget and is provided based on the participant’s preferences to the extent possible, and as documented in the service plan.

This service will not overlap with, supplant, or duplicate other services provided through the waiver or Medicaid State plan services.

Each waiver service must be prior-authorized to avoid duplicative billing with other waiver services.

Some components of Vocational Planning habilitation (teaching and supporting) services are time-limited. Establishment of career goals through career planning may not exceed three months. If the outcome of career planning is not reached within three months, a team meeting must be held to change the service plan. Unpaid work experiences must lead to paid employment and are therefore time-limited. Work experiences for which the general population is paid to perform may not last beyond six months. Volunteering to provide services and supports in an integrated community setting for which the general population does not get paid to perform are not considered to be a work experience and are not time-limited. No more than three participants may participate in the same paid or unpaid work experience at the same time.

## C-1/C-3: Provider Specifications for Service

### Service Type: Other Service
### Service Name: Vocational Planning Habilitation Services

#### Provider Category:
- Agency

#### Provider Type:
- DD Agency

#### Provider Qualifications

**License (specify):**

- No license is required.

**Certificate (specify):**

**Other Standard (specify):**

The DD provider agency must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

The DD provider agency must adhere to standards, as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider delivering direct services and supports must:
- Meet and adhere to all applicable employment standards established by the hiring agency;
- Have training in the following areas, and provide evidence of current certificate of completion from an accredited source, when applicable or upon request:
  - Abuse, neglect, and exploitation and state law reporting requirements and prevention;
  - Cardiopulmonary resuscitation; and
  - Basic first aid;
- Be age 19 or older and authorized to work in the United States;
- Not be a legally responsible individual or guardian; and
- Not be an employee of DHHS.

The DD provider agency must have internet access in all settings that are provider operated or controlled for immediate adherence to applicable record-keeping and billing requirements.

#### Verification of Provider Qualifications

**Entity Responsible for Verification:**

- DHHS agency staff in combination with designated provider enrollment broker.

**Frequency of Verification:**

Direct support staff background check compliance is verified through the annual or biennial survey process. The provider enrollment broker ensures that revalidation of agency is completed every 5 years.
State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

**Service Type:**

Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

**Service Title:**

Workstation Habilitation Services

**HCBS Taxonomy:**

- **Category 1:** 04 Day Services
  - **Sub-Category 1:** 04020 day habilitation

- **Category 2:**
  - **Sub-Category 2:**

- **Category 3:**
  - **Sub-Category 3:**

- **Service Definition (Scope):**
  - **Category 4:**
    - **Sub-Category 4:**
Workstation habilitation (teaching and supporting) services are formalized training and staff supports for the acquisition, retention, or improvement in self-help, behavioral, and adaptive skills that enhance social development and develop skills in performing activities of daily living, community living, and employment. Workstation habilitation (teaching and supporting) services take place during typical working hours, in a non-residential setting, separate from the participant’s private residence or other residential living arrangement, such as within a business or a community setting where individuals without disabilities work or meet together. Discreet training activities and supports during typical working hours is allowed in preparation for leaving the place where the participant lives.

Workstation habilitation (teaching and supporting) services focus on the acquisition of work skills, appropriate work behavior, and the behavioral and adaptive skills necessary to enable the participant to attain or maintain his or her maximum inclusion, inclusion, and personal accomplishment in the working community. Training activities may include teaching such concepts as compliance, attendance, task completion, problem solving, and safety as well as accessing transportation independently and explicit employment objectives.

This service also includes the provision of personal care, health maintenance activities, and protective oversight when applicable to the participant, as well as supervision at the workstation setting. In addition, the intensity of supervision will also be outlined in the service plan. Health maintenance activities, such as medication administration and treatments that are routine, stable, and predictable may be provided by medication aides and other unlicensed direct support professionals and require nurse or medical practitioner oversight of delegated activities to the extent permitted under applicable State laws. Health maintenance activities, supervision, and assistance with personal needs are provided when identified as a need and documented in the service plan. The habilitative services, supports, and strategies are documented in the service plan and delivered based on the service plan.

Workstation habilitation (teaching and supporting) services are delivered continuously and provide paid work experiences in preparation for competitive employment. Generally, this service is provided between the hours of 7:00 am and 5:00 pm, or can be delivered in an alternate schedule, as documented in a participant’s service plan. Staff support is continuous, that is, staff are present at all times the participant is present. Daily rates are available for workstation habilitation services when the participant receives this service for four or more consecutive hours. Hourly rates are also available for times when the participant might be in this service a portion of the day but not a full four hours. An hour of service equates to one clock hour. Services may be billed in half and quarter hours (.25, .50, and .75). When this service is not delivered continuously/consecutively for four or more hours, it must be billed at an hourly rate.

This service is not available under a program funded under section 110 of the Rehabilitation Act of 1973.

Transportation may be provided between the participant’s place of residence and the workstation habilitation (teaching and supporting) services or between habilitation (teaching and supporting) service sites (in cases where the participant receives habilitation services in more than one place). The cost of transportation is included in the rate paid to providers of the appropriate type of habilitation (teaching and supporting) services. The cost of transportation between workstation habilitation and other habilitation service sites should be billed under those waiver services and not this service.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

This service is only available under this waiver until September 30, 2017 and at such time this service will end and cannot be offered. Workstation Habilitation services offered in this waiver are available to current waiver participants only, until the waiver participant transitions to new services offered under this waiver. New waiver participants cannot choose Workstation Habilitation services and current waiver participants cannot choose this service at their next annual, semi-annual or special ISP meeting.

The amount of authorized services is the participant’s approved annual budget and is provided based on the participant’s preferences to the extent possible, and as documented in the service plan.

This service will not overlap with, supplant, or duplicate other services provided through the waiver or Medicaid State plan services.

Appendix C: Participant Services

C-1/C-3: Provider Specifications for Service

Service Type: Other Service
Service Name: Workstation Habilitation Services

Provider Category: Agency
Provider Type: DD Agency

Provider Qualifications

License (specify):

No license is required.

Certificate (specify):

Other Standard (specify):

The DD provider agency must be a Medicaid provider, and must comply with all applicable licensure standards, Titles of the Nebraska Administrative Code, and Nebraska State Statutes.

The DD provider agency must adhere to standards, as described in the Division of Medicaid and Long-Term Care Service Provider Agreement.

A provider delivering direct services and supports must:
- Meet and adhere to all applicable employment standards established by the hiring agency;
- Have training in the following areas, and provide evidence of current certificate of completion from an accredited source, when applicable or upon request:
  - Abuse, neglect, and exploitation and state law reporting requirements and prevention;
  - Cardiopulmonary resuscitation; and
  - Basic first aid;
- Be age 19 or older and authorized to work in the United States;
- Not be a legally responsible individual or guardian; and
- Not be an employee of DHHS.

The DD provider agency must have internet access in all settings that are provider operated or controlled for immediate adherence to applicable record-keeping and billing requirements.

Verification of Provider Qualifications

Entity Responsible for Verification:
DHHS agency staff in combination with designated provider enrollment broker.

Frequency of Verification:

Direct support staff background check compliance is verified through the annual or biennial survey process. The provider enrollment broker ensures that revalidation of agency is completed every 5 years.

Appendix C: Participant Services

C-1: Summary of Services Covered (2 of 2)

b. Provision of Case Management Services to Waiver Participants. Indicate how case management is furnished to waiver participants (select one):

☐ Not applicable - Case management is not furnished as a distinct activity to waiver participants.

☒ Applicable - Case management is furnished as a distinct activity to waiver participants.

Check each that applies:

☐ As a waiver service defined in Appendix C-3. Do not complete item C-1-c.

☐ As a Medicaid state plan service under §1915(i) of the Act (HCBS as a State Plan Option). Complete item C-1-c.

☒ As a Medicaid state plan service under §1915(g)(1) of the Act (Targeted Case Management). Complete item C-1-c.

☐ As an administrative activity. Complete item C-1-c.

☐ As a primary care case management system service under a concurrent managed care authority. Complete item C-1-c.

c. Delivery of Case Management Services. Specify the entity or entities that conduct case management functions on behalf of waiver participants:

Service Coordination to waiver participants is provided by the Nebraska Department of Health and Human Services Division of Developmental Disabilities.

Appendix C: Participant Services

C-2: General Service Specifications (1 of 3)

a. Criminal History and/or Background Investigations. Specify the state's policies concerning the conduct of criminal history and/or background investigations of individuals who provide waiver services (select one):

☐ No. Criminal history and/or background investigations are not required.

☒ Yes. Criminal history and/or background investigations are required.

Specify: (a) the types of positions (e.g., personal assistants, attendants) for which such investigations must be conducted; (b) the scope of such investigations (e.g., state, national); and, (c) the process for ensuring that mandatory investigations have been conducted. State laws, regulations and policies referenced in this description are available to CMS upon request through the Medicaid or the operating agency (if applicable):
The requirement of obtaining background and/or criminal history is outlined in Neb. Rev. Statute 83-1217(9) and below.

In this waiver, DHHS-DD uses the term “background checks” to refer to criminal history investigations, background investigations, and abuse and other registry screenings.

a) The types of positions for which such investigations must be conducted: The background checks are conducted by DHHS staff or a vendor under contract with DHHS, upon a request initiated by an independent provider or certified DD agency. All waiver providers who will provide direct contact services and supports, and any household member of an independent provider or agency-associated individual contracted provider, if services will be provided in the provider’s home, undergo the background checks. Certified DD agency providers must complete annual background checks on each employee or contractor associated with the DD agency that has direct contact with participants served by the agency. Initial background checks must be initiated by certified DD agency providers within ten calendar days of their employment and annually thereafter to verify a staff person or associated individual contracted provider is not on the background check and registry lists. Employees who provide direct support services may not work alone with participants until the results of the background checks are reviewed by the provider.

b) The scope of such investigations: The state and federal background checks consist of a review of the following:

- NDEN - Nebraska Data Exchange Network for state and federal law enforcement history
- OIG LEIE - Office of Inspector General List of Excluded Individuals and Entities
- SAM - System for Award Management, formerly the Excluded Parties List System (EPLS)
- SSDMF - Social Security Death Master File
- NPPES - National Plan and Provider Enumeration System
- MCSIS - Medicaid and CHIP Information Sharing System
- PECOS - Provider Enrollment, Chain, and Ownership System
- SAVE - Systematic Alien Verification for Entitlements Program
- NMEP - Nebraska list of excluded parties

The process for ensuring that mandatory investigations have been conducted:

- On-site certification review activities, conducted annually or biennially by DHHS staff ensure that required background checks have been conducted by the DD agency provider. Provider management personnel are interviewed and a sample of records is reviewed to confirm that background checks were completed on all employee and associated individual contracted providers. In addition, DHHS staff review documentation of provider hiring decisions to verify adherence to applicable state regulations. Annual or biennial on-site certification review activities are the same activities and the frequency is based on the provider’s certification status, which is either a one-year certification or a two-year certification. In addition, DHHS staff review records to ensure that certified providers are in compliance with state laws that apply to using non-licensed persons providing medications and providing non-complex nursing interventions as delegated through the Nurse Practice Act to ensure their competency.

Background checks are completed initially for each individual independent provider that has direct contact with participants as a part of the Medicaid enrollment process and are completed prior to an approval and authorization to deliver waiver services. Background checks are completed annually for each individual independent provider that has direct contact with participants. Independent provider background check compliance is completed annually and the provider enrollment broker ensures that revalidation is completed annually and re-enrollment is completed every 5 years.

Once the background checks are completed on potential independent providers, the contracted vendor notifies DHHS staff by e-mail and electronically transfers the enrollment data. The vendor will notify DHHS if a potential provider fails a screening or background check and designated DHHS staff will issue a denial letter to the potential provider. The electronic enrollment data contains the verification and dates that the abuse registry checks were completed and is stored in perpetuity.

b. Abuse Registry Screening. Specify whether the state requires the screening of individuals who provide waiver services through a state-maintained abuse registry (select one):

- ☐ No. The state does not conduct abuse registry screening.
Yes. The state maintains an abuse registry and requires the screening of individuals through this registry.

Specify: (a) the entity (entities) responsible for maintaining the abuse registry; (b) the types of positions for which abuse registry screenings must be conducted; and, (c) the process for ensuring that mandatory screenings have been conducted. State laws, regulations and policies referenced in this description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable):
In this waiver, DHHS-DD uses the term “background checks” to refer to criminal history investigations, background investigations, and abuse and other registry screenings.

a) The entity (entities) responsible for maintaining the abuse registry: The DHHS Adult Protective Services (APS) and Child Protective Services (CPS) Central Registries are maintained by employees of DHHS.

b) The types of positions for which abuse registry screenings must be conducted.
State service coordination employees and all waiver providers who will provide direct contact services and supports, and any household member of an independent provider or agency-associated individual contracted provider if services will be provided in the provider’s home undergo the background checks listed in C-2-a above and the following registry checks:
• SOR - Nebraska State Patrol Sex Offender Registry
• DHHS APS and CPS Central Registries for any substantiated reports of adult or child exploitation, neglect, and abuse (physical, verbal, psychological or sexual), and if applicable, verification from other states they have lived in of their criminal history including any APS/CPS registry information from the other states

The background checks, are conducted by DHHS staff or a vendor under contract with DHHS, upon a request initiated by an independent provider or certified DD agency. Initial background checks must be initiated by certified DD agency providers within ten calendar days of their employment and annually thereafter to verify a staff person or associated individual contracted provider is not on the background check and registry lists. Employees who provide direct support services may not work alone with participants until the results of the background checks are reviewed by the provider. Background checks on state service coordination employees are completed prior to the first day of employment.

c) The process for ensuring that mandatory screenings have been conducted.
On-site surveys, or certification review activities, conducted annually or biennially by DHHS staff ensure that required background checks have been conducted by the DD agency provider. Provider management personnel are interviewed and a sample of records is reviewed to confirm that background checks were completed on all employee and associated individual contracted providers. In addition, DHHS staff review documentation of provider hiring decisions to verify adherence to applicable state regulations. Annual or biennial on-site certification review activities are the same activities and the frequency is based on the provider’s certification status, which is either a one-year certification or a two-year certification. In addition, DHHS staff review records to ensure that certified providers are in compliance with state laws that apply to using non-licensed persons providing medications and providing non-complex nursing interventions as delegated through the Nurse Practice Act to ensure their competency.

Background checks are completed initially for each individual independent provider that has direct contact with participants as a part of the Medicaid enrollment process and are completed prior to an approval and authorization to deliver waiver services. Background checks are completed annually for each individual independent provider that has direct contact with participants. Independent provider background check compliance is completed annually and the provider enrollment broker ensures that revalidation is completed annually and re-enrollment is completed every 5 years.

Once the background checks are completed on potential providers, the contracted vendor notifies DHHS staff by e-mail and electronically transfers the enrollment data. The vendor will notify DHHS if a potential provider fails a criminal history investigation, background investigation, or abuse and other registry screenings, and designated DHHS staff will issue a denial letter to the potential provider. The electronic enrollment data contains the verification and dates that the background checks were completed and is stored in perpetuity.

A provider agreement is not issued prior to completion of the criminal history investigations, background investigations, and abuse and other registry screenings.

Appendix C: Participant Services

C-2: General Service Specifications (2 of 3)

c. Services in Facilities Subject to §1616(e) of the Social Security Act. Select one:
No. Home and community-based services under this waiver are not provided in facilities subject to §1616(e) of the Act.

Yes. Home and community-based services are provided in facilities subject to §1616(e) of the Act. The standards that apply to each type of facility where waiver services are provided are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Appendix C: Participant Services

C-2: General Service Specifications (3 of 3)

d. Provision of Personal Care or Similar Services by Legally Responsible Individuals. A legally responsible individual is any person who has a duty under state law to care for another person and typically includes: (a) the parent (biological or adoptive) of a minor child or the guardian of a minor child who must provide care to the child or (b) a spouse of a waiver participant. Except at the option of the State and under extraordinary circumstances specified by the state, payment may not be made to a legally responsible individual for the provision of personal care or similar services that the legally responsible individual would ordinarily perform or be responsible to perform on behalf of a waiver participant. Select one:

- No. The state does not make payment to legally responsible individuals for furnishing personal care or similar services.
- Yes. The state makes payment to legally responsible individuals for furnishing personal care or similar services when they are qualified to provide the services.

Specify: (a) the legally responsible individuals who may be paid to furnish such services and the services they may provide; (b) state policies that specify the circumstances when payment may be authorized for the provision of extraordinary care by a legally responsible individual and how the state ensures that the provision of services by a legally responsible individual is in the best interest of the participant; and, (c) the controls that are employed to ensure that payments are made only for services rendered. Also, specify in Appendix C-1/C-3 the personal care or similar services for which payment may be made to legally responsible individuals under the state policies specified here.

☐ Self-directed
☐ Agency-operated

e. Other State Policies Concerning Payment for Waiver Services Furnished by Relatives/Legal Guardians. Specify state policies concerning making payment to relatives/legal guardians for the provision of waiver services over and above the policies addressed in Item C-2-d. Select one:

- The state does not make payment to relatives/legal guardians for furnishing waiver services.
- The state makes payment to relatives/legal guardians under specific circumstances and only when the relative/guardian is qualified to furnish services.

Specify the specific circumstances under which payment is made, the types of relatives/legal guardians to whom payment may be made, and the services for which payment may be made. Specify the controls that are employed to ensure that payments are made only for services rendered. Also, specify in Appendix C-1/C-3 each waiver service for which payment may be made to relatives/legal guardians.

- Relatives/legal guardians may be paid for providing waiver services whenever the relative/legal guardian is qualified to provide services as specified in Appendix C-1/C-3.
Specify the controls that are employed to ensure that payments are made only for services rendered.
A legally appointed guardian and a legally responsible relative of a waiver participant cannot provide services to a waiver participant. A legally responsible relative is the parent of a minor child or the spouse of the waiver participant.

Non-legally responsible participant relatives may provide services as specified in the service definitions, scope and limitations in accordance with provider standards outlined in Appendix C-1/C-3. The services for which non-legally responsible participant relative providers may provide include: Assistive Technology, Consultative Assessment, Environmental Modification Assessment, Habilitative Community Inclusion, Home Modifications, Independent Living, Respite, Supported Employment - Follow Along, Supported Employment – Individual, Supported Family Living, Transitional, and Transportation.

Provider agencies may hire participant relatives to provide waiver services when the relative is qualified and trained to provide the service in accordance with provider standards outlined in Appendix C-1/C-3. Provider agencies must provide supervision and oversight of employees and ensure that claims are submitted only for services rendered and for the services, activities and supports specified in the service plan.

The State makes payment to non-legally responsible participant relatives when it is determined the provider meets and maintains all standards and requirements outlined in applicable state regulations.

Payment to any non-legally responsible participant relative provider shall only be made when the service provided is not a function that the relative would normally provide for the participant without charge as a matter of course in the usual relationship among family members; and, the service would otherwise need to be provided by a qualified provider. The provision of services by the non-legally responsible participant relative is determined through documented team discussion during the planning process, on a case by case situation by the participant’s service plan team. The provision of services is monitored by the participant’s state DHHS-DD service coordination staff. Service coordination staff monitors at a minimum, on a quarterly basis that services are furnished and paid for as specified on the service plan.

To ensure the provision of services is in the best interest of the participant, the service plan shall be developed and monitored by a service coordinator without a conflict of interest to the relative provider, and the plan shall document that services do not duplicate similar services, natural supports, or services otherwise available to the participant.

Designated DHHS-DD staff ensures payments are made only for services rendered by prior authorizing all services based on the participant’s needs and by reviewing submitted billing documentation.

Determination that the above circumstances apply is determined by the participant and his/her team and verified during enrollment of the potential independent provider.

The State does not make payments to members of the participant’s immediate household for home modifications and respite; to a legally responsible relative or guardian; or for activities or supervision for which a payment is made by a source other than Medicaid.

There are no additional limitations on the amount of services just because the provider is a relative.

The following controls are in the state mandated web-based case management system to ensure payments are made only for services rendered:

• The need for the service is documented in the individual service plan;
• The provider is a Medicaid provider and enrolled prior to the delivery of waiver services;
• DHHS staff have prior authorized each waiver service to be delivered;
• At the time that services are delivered, documentation is completed by the provider to support the delivery of the service, such as, but not limited to electronic recording of time in and time out;
• A claim and when applicable, supporting documentation, is electronically submitted to DHHS for approval and processing;
• An Explanation of Payment is issued electronically; and
• Edits are in place in the electronic systems.

Other policy.
f. **Open Enrollment of Providers.** Specify the processes that are employed to assure that all willing and qualified providers have the opportunity to enroll as waiver service providers as provided in 42 CFR §431.51:

All willing and qualified providers have the opportunity to enroll as waiver service providers. DD waiver services are provided by agencies that successfully completed an enrollment process through DHHS and through the contracted enrollment provider broker.

The enrollment and certification requirements and procedures, and established timeframes are readily available to prospective DD agency providers on the DHHS public website.

Information for becoming an independent provider can be obtained from the waiver participant or DHHS staff as well as on the DHHS website.

The participant interviews the potential provider to determine whether the provider will meet their needs. The potential provider is referred to DHHS staff for enrollment. All willing and qualified independent providers can enroll.

DHHS staff and a vendor under contract with DHHS, are responsible for enrolling independent providers as waiver providers. Within two business days of receipt of a referral, DHHS staff enter the referral into the provider data management system for the enrollment process. An application number needed for access to the vendor web portal for enrollment is generated and a referral packet is sent to the potential provider. The referral packet includes billing information, the MC-19 Service Provider Agreement, an application number, and instructions on how to use the contracted vendor’s web portal to enroll. The referral cover letter advises the potential provider of the need to provide verification from other states they have lived in of their criminal history including any APS/CPS registry information from the other states. When other states charge a fee, this cost is the potential provider’s responsibility. Verifications of education/experience, CPR/First Aid, proof of age, and a driver’s license (as applicable) are also required. The completed MC-19 and all verifications, including out of state background checks must be uploaded into the vendor’s web portal before the provider can enroll. Central Registry results from other states must be provided on that State’s letterhead, and DHHS does not accept Central Registry results from another state unless provided on that State’s letterhead. DHHS assures both the Adult and Child Protective Services registries were screened and confirmed to have no finding. The potential provider completes the enrollment process with the contracted vendor on line or, if requested, on paper. The vendor notifies the referring DHHS staff by e-mail and electronically transfers the enrollment data to DHHS. Within ten business days, DHHS staff notify the prospective independent service provider and complete the approval process.

**Appendix C: Participant Services**

**Quality Improvement: Qualified Providers**

*As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.*

**a. Methods for Discovery: Qualified Providers**

*The state demonstrates that it has designed and implemented an adequate system for assuring that all waiver services are provided by qualified providers.*

**i. Sub-Assurances:**

**a. Sub-Assurance: The State verifies that providers initially and continually meet required licensure and/or certification standards and adhere to other standards prior to their furnishing waiver services.**
Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance, complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:
A.1 Percent of new enrolled certified providers reviewed that met provider standards, as specified in the waiver, prior to providing waiver services. Numerator = # of new enrolled certified providers reviewed that met provider standards, as specified in the waiver, prior to providing waiver services. Denominator = # of new enrolled certified providers reviewed that are providing waiver services.

Data Source (Select one):
Record reviews, off-site
If 'Other' is selected, specify:

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.
The state demonstrates that it has designed and implemented an adequate system for assuring that all waiver services are provided by qualified providers.

Activities for the determination of compliance with the above sub-assurances and performance measures are completed by DHHS staff and a vendor under contract with DHHS. The sample size for this review is determined by the calculation tool provided by Raosoft, Inc. (http://www.raosoft.com/samplesize.html) assuming a 95% confidence level, a 5% margin of error, and a response distribution of 50%.

Monitoring of the delivery of services is conducted by the Service Coordinator, with input from the participant and/or representative, when applicable.

Enrollment of qualified providers is completed by DHHS staff and the contracted vendor. DHHS has the ultimate responsibility for enrolling qualified providers and the execution of Medicaid provider agreements. Each DD agency provider is certified prior to delivering waiver services in accordance with state regulations and re-certified annually or biennially, based on the provider’s certification status.

All providers of waiver services must be Medicaid providers, as described in the Title 471 regulations, and adhere to the same general conditions and standards. The provider enrollment broker ensures that revalidation is completed annually and re-enrollment is completed every 5 years.

Failure to meet the regulatory requirements may result in termination or suspension of the provider agreement. Signing the provider agreement does not constitute employment.

Once DHHS approves the provider (Medicaid provider agreement and authorizations in place), web-based training for the provider is available, based on the provider type (independent or agency) and service type. Once enrolled, each independent provider of participant directed services is trained and directed by the waiver participant and/or their families.

The CBS QI committee meets quarterly and reviews the CBS Quarterly QI Report. Recommendations are made for action by appropriate parties, including DHHS-DD management, members of the committee, and other DHHS staff. The QI activities of DHHS-DD and results of reports are communicated by DHHS to provider organizations, the DHHS-DD Advisory Committee, the Nebraska DD Planning Council, and to participants, families, and other interested parties. See Appendix H for additional information on the State’s quality improvement strategies.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.
A number of activities and processes at both the local and state levels have been developed to discover whether the Qualified Providers waiver assurance is being met, to remediate identified problems, and to carry out quality improvement. These processes and activities generate information that are aggregated and analyzed to measure the overall system performance.

The quality management strategies for addressing individual problems related to qualified providers are completed at the local level.

When an issue with performance of an independent provider is identified, a plan to address the issue may be discussed by the SC with the participant, depending on the issues that need to be addressed, and documented by the SC. The participant may address the provider or may ask their SC to assist in addressing the concerns or issues with the provider. The SC will follow through with the participant or on behalf of the participant until the issue is resolved. The issue, discussion, and resolution are documented and retained in the state-mandated web-based case management system.

The SC is responsible for facilitation and development of the service plan and then monitoring the implementation of each service plan in its entirety quarterly in addition to the ongoing monitoring of the service plan which may involve specific areas of the service plan within each monitoring session. The monitoring data is documented and retained in the state mandated web-based case management system.

Monitoring mechanisms include:
1. A review of all components of the service plan to ensure delivery of services as specified by the service plan;
2. Initiation of any action necessary to ensure the delivery of services and progress toward achieving outcomes. Necessary action includes reconvening the team if a change in the service plan is necessary; and
3. A semi-annual review of the service plan by the SC and the service plan team. The team reviews progress, implementation of the service plan, and the need for any revisions to the service plan.

Waiver participants may ask for assistance from their Service Coordinator Supervisor in communicating to their independent providers their expectations, compliments, areas that need improvement, concerns, unacceptable practices, etc. The Service Coordinator may increase monitoring activities, participate in discussions with the participant and provider, provide talking points, facilitate revisions to the service plan, or, upon direction from the participant, terminate the authorizations for that provider.

When a pattern of inappropriate or inaccurate claims is detected, a referral is made to the DHHS Program Integrity Unit.

The quality management strategies for reviewing qualified providers are completed at the state level. The CBS QI Committee meets on a quarterly basis and reviews aggregate data for local, district, or statewide monitoring and certification to identify trends related to specific individual and agency providers and recommends resolution and/or changes that will support service improvement.

### ii. Remediation Data Aggregation

**Remediation-related Data Aggregation and Analysis (including trend identification)**

c. Timelines
When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Qualified Providers that are currently non-operational.

☐ No
☐ Yes

Please provide a detailed strategy for assuring Qualified Providers, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix C: Participant Services
C-3: Waiver Services Specifications

Section C-3 'Service Specifications' is incorporated into Section C-1 'Waiver Services.'

Appendix C: Participant Services
C-4: Additional Limits on Amount of Waiver Services

a. Additional Limits on Amount of Waiver Services. Indicate whether the waiver employs any of the following additional limits on the amount of waiver services (select one).

☐ Not applicable - The state does not impose a limit on the amount of waiver services except as provided in Appendix C-3.

☒ Applicable - The state imposes additional limits on the amount of waiver services.

When a limit is employed, specify: (a) the waiver services to which the limit applies; (b) the basis of the limit, including its basis in historical expenditure/utilization patterns and, as applicable, the processes and methodologies that are used to determine the amount of the limit to which a participant's services are subject; (c) how the limit will be adjusted over the course of the waiver period; (d) provisions for adjusting or making exceptions to the limit based on participant health and welfare needs or other factors specified by the state; (e) the safeguards that are in effect when the amount of the limit is insufficient to meet a participant's needs; (f) how participants are notified of the amount of the limit. (check each that applies)

☐ Limit(s) on Set(s) of Services. There is a limit on the maximum dollar amount of waiver services that is authorized for one or more sets of services offered under the waiver.

Furnish the information specified above.

☒ Prospective Individual Budget Amount. There is a limit on the maximum dollar amount of waiver services authorized for each specific participant.
Furnish the information specified above.
The state has established the following safeguards to avoid an adverse impact on the participant:

e) The safeguards that are in effect when the amount of the limit is insufficient to meet a participant's needs.

b) The basis of the limit, including its basis in historical expenditure/utilization patterns and, as applicable, the processes and methodologies that are used to determine the amount of the limit to which a participant's services are subject:

The determination of prospective individual budgets for participants is determined using the ‘Objective Assessment Process’ or OAP as stated in statute and regulations. Funding is assigned based on an objective assessment of each participant’s abilities, to provide for equitable distribution of funding based on each participant’s assessed needs. Geographic factors do not affect the budget amount and the participant location is not factored into the objective assessment process.

The assessment to ascertain each participant’s skills, abilities, and needs is the Inventory for Client and Agency Planning (ICAP). DHHS-DD staff complete the ICAP assessment with input from the participant’s teachers, para-educators, family members, and provider staff, as appropriate, as well as a review of substantiating documentation to support tabulated responses. Substantiating documentation includes but is not limited to medical reports, psychological evaluations, critical incident data, and programmatic data. The completed ICAP assessment is submitted to the DHHS-DD Central Office where it is electronically entered to determine the overall score. The objective assessment process is completed for persons new to services and every two years thereafter.

The participant’s service coordinator is informed of the prospective IBA and shares this amount with the participant at the time of initiation of DD waiver services and in the development of the service plan via the service budget authorizations.

c) How the limit will be adjusted over the course of the waiver period.

The prospective individual budget amount is adjusted during the period the waiver is in effect. The limit will be adjusted to take into account cost increases, and the methodology will be periodically re-evaluated in light of changes in utilization patterns or other factors.

The participant’s IBA will be adjusted when the two-year ICAP assessment score results in a change in the level of service need or sooner if a new ICAP was required by changes in the participant’s health and welfare needs.

d) Provisions for adjusting or making exceptions to the maximum annual budget based on participant health and welfare needs or other factors specified by the state.

An ICAP is completed every two years, or sooner to address concerns in changes in a participant’s health and welfare needs, and as approved by the DHHS-DD. The IBA is adjusted based on the result of the ICAP score. An ICAP may be requested to be completed sooner when a participant’s needs have changed and cannot be safely met with funding solely based on the current prospective IBA. Based on input from the participant, provider, and guardian, if applicable, the team may submit a clinical rationale and supporting documentation to request a new ICAP.

Alternative compliance to the funding tier, may be requested when a waiver participant’s needs cannot be safely met with funding solely based on the ICAP score. Service coordination staff complete risk screens related to Health, Physical Nutritional Management or Enteral Feeding (as applicable), Spine and Gait, and Behavioral needs. Based on input from the participant, provider, and guardian, if applicable, the team may submit a rationale for consideration to alternative compliance to the participant’s ICAP score and identified tier level. A clinical review will be completed based on the alternative compliance request.

e) The safeguards that are in effect when the amount of the limit is insufficient to meet a participant's needs.

The State has established the following safeguards to avoid an adverse impact on the participant:

• Additional requests for services would be evaluated by the DHHS-DD to determine if there is a critical
health or safety need and if so, would be approved based on available waiver funding. If no additional waiver funding is available, that is the expenditures have exceeded cost neutrality for the waiver, the following safeguards would be applied.

- The participant is assisted in locating and obtaining other non-waiver services to assist in meeting his/her needs; or
- The participant may be referred to apply for another waiver that can accommodate the participant’s needs and where more resources may be available.

f) How participants are notified of the amount of the limit.
Participants are notified in writing by DHHS-DD staff their individual budget amount as well as the dollar limits of waiver services at the time of initiation of DD waiver services and in the development of the service plan via the service budget authorizations. The written notice is mailed and includes hearing rights information.

☐ Budget Limits by Level of Support. Based on an assessment process and/or other factors, participants are assigned to funding levels that are limits on the maximum dollar amount of waiver services. 

Furnish the information specified above.

☐ Other Type of Limit. The state employs another type of limit.

Describe the limit and furnish the information specified above.

Appendix C: Participant Services

C-5: Home and Community-Based Settings

Explain how residential and non-residential settings in this waiver comply with federal HCB Settings requirements at 42 CFR 441.301(c)(4)-(5) and associated CMS guidance. Include:

1. Description of the settings and how they meet federal HCB Settings requirements, at the time of submission and in the future.

2. Description of the means by which the state Medicaid agency ascertains that all waiver settings meet federal HCB Setting requirements, at the time of this submission and ongoing.

Note instructions at Module 1, Attachment #2, HCB Settings Waiver Transition Plan for description of settings that do not meet requirements at the time of submission. Do not duplicate that information here.

See Attachment #2 of this waiver renewal for additional information.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (1 of 8)

State Participant-Centered Service Plan Title:
Individual Support Plan, hereafter referred to as service plan.

a. Responsibility for Service Plan Development. Per 42 CFR §441.301(b)(2), specify who is responsible for the development of the service plan and the qualifications of these individuals (select each that applies):

☐ Registered nurse, licensed to practice in the state
☐ Licensed practical or vocational nurse, acting within the scope of practice under state law

09/20/2019
Licensed physician (M.D. or D.O)

Case Manager (qualifications specified in Appendix C-1/C-3)

Case Manager (qualifications not specified in Appendix C-1/C-3).

Specify qualifications:

In this waiver, “participant” means the individual receiving waiver services and any person authorized to act on behalf of the participant.

Developmental Disabilities (DD) Service Coordination is responsible to coordinate and oversee the delivery of effective services for participants through assessment, service plan development, referral, and monitoring activities. A Service Coordinator (SC) makes referrals and coordinates related activities to help a participant obtain needed habilitation services, medical, social, educational providers, or other programs and services. The SC may make referrals to providers for needed services and schedule appointments for the participant. The SC completes monitoring and follow-up activities with the participant, family members, providers, or other entities to ensure that the service plan is effectively implemented and adequately addresses the needs of the participant, and whether there are changes in the needs or status of the participant that warrant making necessary adjustments in the service plan and service arrangements with providers. The SC serves as a liaison for the participant and family with service providers and the community. DD Service Coordination is provided as Targeted Case Management under the Medicaid State Plan.

The qualifications of a SC are:

1. Bachelor’s Degree in: education, psychology, social work, sociology, or human services, or a related field.
2. Experience in services or programs for persons with intellectual or other developmental disabilities.
3. Ability to: mobilize resources to meet individual needs; communicate effectively to exchange information; develop working relationships with individuals with intellectual or developmental disabilities, their families, interdisciplinary team members, agency representatives, and individuals or advocacy groups; analyze behavioral and habilitative data; monitor services and supports provided; apply Department of Health and Human Services (DHHS) program rules, policies, and procedures; and organize, evaluate and address program/operational data.
4. Knowledge of: current practices in the field of community-based services for persons with intellectual disabilities and other developmental disabilities; person-centered planning; Americans with Disability Act (ADA) standards; self-direction; community integration; the principles of social role valorization; provision of habilitation services; positive behavioral supports; and, statutes and regulations pertaining to delivery of services for individuals with developmental disabilities.
5. Knowledge of: program resources/services available in Nebraska for persons with intellectual and other developmental disabilities; the objectives, philosophies, and functions of the Division of Developmental Disabilities (DHHS-DD); regulations governing the authorization, delivery of, and payment of community-based developmental disabilities services; Department of Education regulations; State statutes regarding persons with disabilities; and DHHS programs, such as Protection and Safety and public assistance programs.

Social Worker

Specify qualifications:

Other

Specify the individuals and their qualifications:
b. Service Plan Development Safeguards. Select one:

- Entities and/or individuals that have responsibility for service plan development may not provide other direct waiver services to the participant.
- Entities and/or individuals that have responsibility for service plan development may provide other direct waiver services to the participant.

The state has established the following safeguards to ensure that service plan development is conducted in the best interests of the participant. Specify:

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (3 of 8)

c. Supporting the Participant in Service Plan Development. Specify: (a) the supports and information that are made available to the participant (and/or family or legal representative, as appropriate) to direct and be actively engaged in the service plan development process and (b) the participant's authority to determine who is included in the process.
The participant's service coordinator provides support to the participant to actively lead in the development of their service plan. The participant also has the option to direct their SC to facilitate the service plan development meeting so that the participant may actively participate as a team member.

a) The supports and written information that are made available to the participant to direct and be actively engaged in the service plan development process.

Prior to the service plan meeting(s), the SC works with the participant to coordinate invitations for their service plan meetings, dates, times and locations. The process of coordinating invitations includes the participant’s input as to who to invite to the meeting(s) and at times and locations of convenience to the participant.

Service planning teams are comprised of people who care about and know the participant. The development process is a collaborative process between the participant and SC that includes people chosen by the participant, provides necessary information and support to ensure that the participant directs the process to the maximum extent possible, and is enabled to make informed choices and decisions, and reflect cultural considerations and communication needs of the participant. The participant is present, is encouraged and assisted to participate in every aspect of their service planning as fully as they are able and choose to do so.

The participant, SC, service provider, and other individuals chosen by the participant (e.g. advocates, family members, and friends) participate in the service plan process or parts of the service plan process. Written information available for review prior to the development meeting includes the Services Handbook developed by DHHS-DD, assessments to identify needs, personal goals, service preferences, and identification of health and safety risks. Team members support the participant to have the life they want by discussing and reviewing supporting documents; communicating objections to the service plan; approving the service plan by signing the service plan; and approving changes or modifications to the service plan or support documents throughout the year, if needed.

b) The participant's authority to determine who is included in the process.

Individuals involved in the planning process will be determined by the participant but must at least include the participant, representatives of their prospective DD provider(s), and the SC. The participant may raise an objection to a particular provider representative and the service plan team must attempt to accommodate the objection while allowing participation by provider representatives.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (4 of 8)

d. Service Plan Development Process. In four pages or less, describe the process that is used to develop the participant-centered service plan, including: (a) who develops the plan, who participates in the process, and the timing of the plan; (b) the types of assessments that are conducted to support the service plan development process, including securing information about participant needs, preferences and goals, and health status; (c) how the participant is informed of the services that are available under the waiver; (d) how the plan development process ensures that the service plan addresses participant goals, needs (including health care needs), and preferences; (e) how waiver and other services are coordinated; (f) how the plan development process provides for the assignment of responsibilities to implement and monitor the plan; and, (g) how and when the plan is updated, including when the participant's needs change. State laws, regulations, and policies cited that affect the service plan development process are available to CMS upon request through the Medicaid agency or the operating agency (if applicable):
a) Who develops the plan, who participates in the process, and the timing of the plan.

Persons eligible for waiver services have a service plan developed prior to the authorization of the initial service package and annually thereafter. Service planning begins immediately following approval of the waiver slot with an Individual Family Meeting (IFM) with the participant. The purpose of this pre-service planning meeting is to gather information about what is important to and for the participant and what supports they need to be safe and healthy while leading the life of their choosing. This meeting is also the opportunity for the SC to explain the participant's individual budget and the available service array, including provider options. Within 30 - 45 days of the IFM, the team meets to develop the service plan. This person-centered plan is individually tailored to address the unique preferences and needs of the participant. The purpose of the annual service plan meeting is to determine waiver and non-waiver services, interventions, strategies, and supports to be provided to assist the participant to achieve their future plan, or personal goals.

Members in the planning process are determined by the participant but must at least include the participant, the SC, and DD agency provider representatives when agency-directed services are provided or independent providers when self-directed services are provided. The SC is responsible for scheduling, coordinating, and documenting all service plan meetings, and facilitating the participation of all team members by request of the participant. The SC elicits and records facts and information from other team members, advocates for the participant, encourages team members to explore differences and discover areas of agreement so that consensus can be reached, documents the service plan and the specific responsibilities of each team member with regard to implementation of services, supports, and/or strategies, and adheres to the electronic processes for service plan development and authorization. Meetings are scheduled at a time and place that accommodates the needs of the participant. Dates for regularly scheduled service plan meetings are scheduled well in advance to assure attendance by all team members. The participant or any other team member of the interdisciplinary team may request a team meeting at any time.

Each participant also directs, with support as needed, their semi-annual service plan. The purpose of semi-annual service plan meeting is to review the implementation of the annual service plan, to document the participant's future plans and personal goals, to explore how the team can assist the participant to achieve those goals, to determine what information is needed to develop appropriate supports to assist the participant to achieve future plans, to assign responsibility for gathering information if needed, and to review any other issues which have impact on the participant's life.

b) The types of assessments that are conducted to support the service plan development process, including securing information about participant needs, preferences, goals and health status.

The service plan must identify the needs, goals and preferences of the participant and specify how those needs, goals and preferences will be addressed. In order to accomplish that, assessments to evaluate the participant's strengths, capacities and areas needing growth to support the service plan development are determined by the team. These may include, but are not limited to, the Inventory for Client and Agency Planning (ICAP), psychiatric reports, psychological reports and assessments conducted by the provider to further their knowledge of the participant’s skills and abilities (e.g., vocational, medication administration, home living skills, communicative intent of behavior, etc.).

Health and welfare is addressed through a variety of assessments that may be completed by the provider, service coordinator, the Education System, and/or Medical Professionals. Assessments include, but are not limited to, the Developmental Index (ICF-IDD level of care assessment), multidisciplinary reports, Individual Education Plan reports, medical evaluations, health screens, health assessments, and incident reports.

c) How the participant is informed of the services that are available under the waiver.

The participant is informed of the services that are available under the waiver prior to the initial plan development and annually thereafter at the IFM meeting.

Additionally, materials, such as the Services Directory and a Participant Guide for Self-Direction, is provided by the SC to the participant about services offered under the waiver program; the participant rights and obligations; due process rights; providers' roles and responsibilities; for applicable participant-directed service options - how to hire, fire and direct providers; and claims review and verification processes. The written materials are provided to each participant and includes an introduction to DHHS-DD; an introduction to services; the roles and responsibilities of the participant, service coordination, and provider; and service definitions. The information also includes information about rights,
responsibilities, and risks; developing a service plan; finding providers, resources of approved and available providers; hiring providers; training providers; working with providers; personal safety; and monitoring the service plan; the standards and qualifications that providers are expected to meet; an introduction for providers, standards for specific services; and information on authorization and billing.

General information regarding service planning and service options are also available on the DHHS public website, within the Division of Developmental Disabilities tab, and by contacting DD Central Office. However, the primary source of information for participants and families is received directly from service coordination, both verbally and in the written form described above prior to entry into the waiver services.

d) How the plan development process ensures that the service plan addresses participant goals, needs (including health care needs), and preferences.

Prior to waiver entrance, an interdisciplinary team develops a detailed annual service plan through assessment, discussion, consensus, and assignment of responsibilities. This must include identification of services and supports to be provided under the waiver program, as well as services and supports to be provided by other non-Medicaid resources. The annual plan includes, as appropriate:

- Employment goals and strategies when the youth is at least 16 years of age;
- Medical information;
- Nutritional considerations;
- As applicable, physical nutritional management plans;
- As applicable, adaptive devices, including support and protective devices;
- Physical and nutritional supports;
- Medical conditions and known allergies;
- Medications;
- Rights and rights restrictions;
- Legal needs;
- Finances;
- Identification of basic and other needs, which include:
  - Physical survival
  - Physical comfort
  - Emotional well-being/happiness and personal satisfaction
  - Personal independence and self-care;
- Requested service(s);
- Identification of current providers and a plan to locate needed provider(s), if applicable;
- Description and schedule of strategies, services, and supports to be provided, taking into consideration the participant’s personal and career goals and identified needs;
- Identification of the prospective budget amount and the projected monthly cost/utilization of the services and supports to be provided, as well as services and supports to be provided by other non-DD funded resources; and
- Back-up plan, for each participant-directed service, in the event participant-directed services can’t be provided or aren’t provided as scheduled. Back-up staff must be chosen by the participant, documented in the participant’s service plan, and must meet all provider qualifications.

The service plan must identify the needs and personal preferences of the participant and specify how those needs and personal preferences will be addressed. This must include identification of services and supports to be provided under the waiver program, as well as services and supports to be provided by other non-Medicaid resources. The service plan indicates how the team believes that this plan will meet the health and safety needs of the participant. These needs may be met by a combination of DD agency services/supports, self-directed supports, natural supports, services/supports from other DHHS programs and other services/supports from other non-Medicaid sources. If it is determined that the needs cannot be met under the current plan without posing a threat to the health and safety of the participant, the team will re-consider the appropriateness of the participant’s service array and funding source. This may require referral to other services or programs and the development of an alternate plan.

e) How waiver and other services are coordinated.

Coordination of waiver services includes documentation, referral, and follow-up. The SC is responsible for coordination
and oversight of the delivery of effective services for participants through assessment, service plan development, referral, and monitoring activities. The participant determines the level of coordination desired. The SC provides information about referrals and resources to the participant. The SC may make direct referrals and coordinate related activities to help a participant obtain needed habilitation services, medical, social, educational providers, or other programs and services. The SC makes referrals to prospective providers selected by the participant for needed services and may schedule appointments for the participant.

The SC completes monitoring and follow-up activities with the participant, providers, or other entities to ensure that the service plan is effectively implemented and adequately addresses the needs of the participant, and whether there are changes in the needs or status of the participant that warrant making necessary adjustments in the service plan and service arrangements with providers. When requested, the SC may serve as a liaison for the participant with the service provider and the community.

f) How the plan development process provides for the assignment of responsibilities to implement and monitor the plan.

The service plan document identifies the services and supports, schedule of delivery of services and supports, and responsibilities to implement the plan. The SC Supervisor reviews the service plan to ensure it addresses the participant’s goals, needs (including health care needs), and preferences by reviewing and approving a stratified sample of annual service plans and annual budgets.

DD agency provider representatives must participate in development of the service plan and take the necessary steps to ensure that the service plan documents the team review, discussions, and decisions. The participant may invite their independent providers to the service plan meeting, or take on the responsibility to communicate their applicable services and supports, schedule of delivery of services and supports, and providers’ responsibilities to implement the plan to the independent providers following each service plan meeting. The SC is responsible for monitoring the implementation of the plan by observing and documenting observations on the service plan monitoring form. Monitoring is completed quarterly within the calendar year and is scheduled at the discretion of the SC. The SC may complete ongoing monitoring in the environment that waiver services are provided when there are reports of abuse or neglect, health and safety concerns, at the request of the participant or other team member, when a participant is moving into a different provider owned or operated residential setting prior to them moving in, or any other time when the SC determines it is necessary to monitor the service delivery.

g) How and when the plan is updated, including when the participant's needs change.

At a minimum, the team comes together annually to develop the service plan, and semi-annually to review the service plan. The service plan is updated during the semi-annual service plan meeting, and when circumstances occur and/or needs change the service plan may be updated following discussion and agreement via an in-person, electronic, or written communication. DHHS-DD does not employ temporary or interim service plans; any changes to the service plan are done formally and with full team participation.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (5 of 8)

e. Risk Assessment and Mitigation. Specify how potential risks to the participant are assessed during the service plan development process and how strategies to mitigate risk are incorporated into the service plan, subject to participant needs and preferences. In addition, describe how the service plan development process addresses backup plans and the arrangements that are used for backup.
Assessment is required at least annually in conjunction with development of the service plan to identify the preferences, skills, and needs of the participant.

Strategies are developed by the team to address areas of risk that are identified through the assessment process.

The service coordinator is responsible for including the following in every service plan:
- A description and schedule of waiver services and supports to be provided, taking into consideration the participant’s goals, preferences and identified needs;
- The identified provider(s);
- A back-up plan, in the event services can’t be provided or aren’t provided as scheduled. Back-up staff must be chosen by the participant, documented in the participant’s service plan, and must meet all provider qualifications. Back-up plans may include a temporary increase in natural supports, hiring additional on-call providers, etc.;
- Documentation of how the team believes the plan will meet the health and safety needs of the participant. These needs may be met by a combination of agency and participant-directed services, supports, and strategies; natural supports; or services and supports from non-Medicaid programs.

Further assessment may be required based on the outcome of initial assessment. If the team identifies an elevated risk to the participant’s health and welfare due to a medical condition, additional steps must be taken to address behavioral or medical risk.

When the team has attempted to manage a behavior unsuccessfully or feel they don’t have the information necessary to develop an appropriate behavior support plan, it may be appropriate to utilize Consultative Assessment, defined in Appendix C1/C3 of this waiver. The DHHS-DD Crisis Stabilization Team (CST) may also be requested to provide consultation and recommendations if the service plan team’s attempts to support the behavior have been unsuccessful or if there are concerns with unresolved medical issues.

The primary intent of Consultative Assessment and support from the CST is to help the CST team understand the variables which could increase risk so that the service plan team can incorporate these into a habilitative behavior support plan and safety plan to reduce risk.

Should a participant be identified as having high-risk health care needs, either at entry to the DHHS-DD program or at any time during services, the need for increased support to safeguard the participant’s well-being will be determined by designated clinical staff at DHHS-DD Central Office. A referral is completed by the participant’s service plan team, which may include the participant’s physician, to assist the team in planning, as a guide in giving adequate consideration to health and medical factors, or at the request of DHHS-DD Central Office. If additional services are requested to support health and welfare, DHHS-DD Central Office may choose to assign a DHHS-DD Program Specialist RN to conduct a formal health assessment. Medical history, current medical evaluations, and a formal health assessment are considered and recommendations or direction are provided to the team regarding optimal elements to consider when selecting or preparing service environments and treatment options that will best mitigate risks identified and support the participant.

If it is determined that the needs cannot be met under the current service plan without posing a threat to the health and safety of the participant and/or others, the team may need to re-consider the appropriateness of the participant’s current waiver services. Current services and the provision of services may be adjusted or additional waiver and/or non-waiver services and supports will be accessed as necessary to protect the participant’s health and welfare. When health and welfare needs cannot be met within the limits, adjustments, or exceptions, or a referral to another HCBS waiver, non-waiver services and supports will be determined on a case by case basis.

Additional funding may be requested when a participant’s needs cannot be safely met with funding solely based on the ICAP score. In the event of a temporary increased service need of the participant, the amount of exception funding is determined administratively based on clinical information provided by the team. The cost of provider supports to mitigate any risks identified in clinical assessments is added to the base funding determined by ICAP.

Back up arrangements for the delivery of residential or day habilitation services by the DD agency provider are described in the provider’s policies and procedures. Each agency has on-call or substitute staff available when a staff person fails to appear for work. Agency staff and/or parents have contact information for the DHHS-DD agency provider’s management staff who is responsible for scheduling and assigning on-call staff. Information about back-up plans for the
delivery of residential or day habilitation services is provided by the DHHS-DD agency provider to the participant when
the DHHS-DD agency provider is selected and documented in the service plan. A back-up plan is required in each
participant’s service plan. The need for and type of back up is discussed at the service plan meeting and documented
in the service plan. Consideration is given to the natural supports that may be available to fill in and the availability of other
enrolled providers in the community who could deliver services. Multiple independent providers may be enrolled as back
up or substitute providers. Back-up staff must be chosen by the participant, documented in the participant’s service plan,
and must meet all provider qualifications.

DHHS-DD providers are also expected to have disaster plans developed and documented so provider staff are aware of
expectations during such a time. Such plans should include where services should be provided if a disaster occurs, what
necessary materials or equipment is needed for specific health or behavioral needs, and who needs to be contacted in
cases of emergency.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (6 of 8)

<table>
<thead>
<tr>
<th>f. Informed Choice of Providers.</th>
<th>Describe how participants are assisted in obtaining information about and selecting from among qualified providers of the waiver services in the service plan.</th>
</tr>
</thead>
</table>

Nebraska's services for participants with intellectual or developmental disabilities are voluntary, both for the participant and the provider. Choice of providers and services is based on mutual consent. Nebraska has regulations and processes in place to ensure participants are provided information about DHHS-DD services and providers to facilitate informed decisions. DHHS offices are located throughout the state to provide a statewide system of service coordination. The DHSS public website includes information about DHHS-DD’s responsibilities, service coordination, services funded by DHHS programs, certified DD agency providers, and non-certified independent providers as well as links to other resources for individuals and families.

The SC provides the participant with information about or web addresses or links to local community services and supports, service coordination, services funded by DHHS and DHHS-DD, currently certified DD agency providers, and non-certified independent providers.

Information about local community services and supports, and how to access available services is provided to participants who are determined to be eligible for DHHS-DD services at the time of eligibility determination and ongoing thereafter at service plan meetings and more frequently as needed.

Service Coordination staff may assist the participant to arrange interviews with potential providers. The SC may assist the participant, family, and/or guardian to arrange tours of potential DD agency providers. Families often draw from their personal networks of family members not living in the household, friends, neighbors, teachers, paraprofessional/teacher's aides, church members, and local college students in order to select independent providers for participant-directed services.

When the participant is considering assistive technology (AT), home modifications, and/or vehicle modifications, the SC authorizes an approved provider to complete an Environmental Modification Assessment, defined in Appendix C1/C3 to ensure that the request is functionally necessary, appropriate, based on the service definition of the applicable service, and is cost effective.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (7 of 8)

<thead>
<tr>
<th>g. Process for Making Service Plan Subject to the Approval of the Medicaid Agency.</th>
<th>Describe the process by which the service plan is made subject to the approval of the Medicaid agency in accordance with 42 CFR §441.301(b)(1)(i):</th>
</tr>
</thead>
</table>

09/20/2019
The Department of Health and Human Services (DHHS) is the State Medicaid Agency for Nebraska, and DHHS-DD is a division within the Medicaid agency. All functions related to service plan approval are completed by DHHS-DD staff. At a minimum, the team, led by the DHHS-DD Service Coordinator, comes together annually to develop the service plan, and semi-annually to review the service plan. The service plan is updated during the semi-annual service plan meeting, and when circumstances occur and/or needs change the service plan may be updated following discussion and agreement via an in-person, electronic, or written communication.

All annual service plans are read and reviewed by the DHHS-DD Service Coordinator’s Supervisor within 14 calendar days from the date the service plan is submitted to the supervisor.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (8 of 8)

h. Service Plan Review and Update. The service plan is subject to at least annual periodic review and update to assess the appropriateness and adequacy of the services as participant needs change. Specify the minimum schedule for the review and update of the service plan:

- Every three months or more frequently when necessary
- Every six months or more frequently when necessary
- Every twelve months or more frequently when necessary
- Other schedule

Specify the other schedule:

i. Maintenance of Service Plan Forms. Written copies or electronic facsimiles of service plans are maintained for a minimum period of 3 years as required by 45 CFR §92.42. Service plans are maintained by the following (check each that applies):

- Medicaid agency
- Operating agency
- Case manager
- Other

Specify:

Appendix D: Participant-Centered Planning and Service Delivery

D-2: Service Plan Implementation and Monitoring

a. Service Plan Implementation and Monitoring. Specify: (a) the entity (entities) responsible for monitoring the implementation of the service plan and participant health and welfare; (b) the monitoring and follow-up method(s) that are used; and, (c) the frequency with which monitoring is performed.
(a) The entity (entities) responsible for monitoring the implementation of the service plan and participant health and welfare.

The SC is responsible for in-person, on-site monitoring of the participant’s health and welfare as well as monitoring of the implementation of the service plan. The SC also monitors to ensure that the participant resides and/or receives services in a setting that meets the HCBS regulations and requirements.

(b) The monitoring and follow-up method(s) that are used.

The SCs conduct monitoring ongoing and continuously via phone calls and onsite visits with participants, both at their homes and at service provision sites. Onsite monitoring is completed quarterly within the calendar year, and is scheduled at the discretion of the SC.

Monitoring takes the form of a combination of face-to-face meetings, secure emails, and telephone calls with the participant or contacts on behalf of the participant, and review of paperwork, such as financial records or medication records. A review of services may include a review of habilitative programmatic data, observation of habilitative programs being implemented, observation of interactions between staff and the person whose service plan is being reviewed and/or review of any other documentation or communication available to verify that the service plan has been implemented as written. A standardized DHHS-DD monitoring template is used by SCs whenever they are conducting face-to-face monitoring.

At least quarterly within the calendar year, a review of all components of the service plan is conducted to ensure:

- a. Delivery of services, supports, and strategies in accordance with the service plan;
- b. Access to waiver and non-waiver services identified in the service plan;
- c. Free choice of provider(s);
- d. Determination that services meet participant needs;
- e. Effectiveness of back-up plans, if applicable and utilized;
- f. Health and welfare; and
- g. Other as applicable, i.e., physical nutritional management plans, adaptive devices, etc.

Follow-up and remediation process for issues discovered during monitoring:

Observations made during a review or "in passing" are documented. Concerns will be discussed with the agency provider support staff who is working with the participant. If at any time it is noted that supports or services are not being provided as noted in the service plan, the SC will speak directly to the provider staff on duty to reach a resolution. Anytime a concern is noted on the monitoring form, follow up is required. Follow up should occur with the agency provider on how to provide resolution or address the concern noted on the monitoring form. The follow up could occur by phone, written in a letter/secured email, or in person. The SC will document the follow up completed on the monitoring form and in that participant’s case notes. The provider will have up to 10 calendar days to respond to the SC.

If determined necessary, any of the following steps may be taken:

- a. Initiation of any action necessary to ensure the delivery of services and progress toward achieving outcomes. Necessary action includes reconvening the team if a change in the service plan is necessary.
- b. Addressing concerns with the provision of services, including but not limited to delays in implementing any aspect of the service plan or failure to adequately implement the service plan as written.
- c. When a pattern is detected of inappropriate or inaccurate claims by a provider, a referral is made to the DHHS Program Integrity Unit.

Service coordination observations during the delivery of participant-directed services are discussed with the participant, and with the provider, as appropriate, and followed through to resolution. If resolved at this level, resolution will be documented on the monitoring tool or in the SC case notes. A team meeting may be called to respond to monitoring issues and to adjust the service plan if necessary.

Should immediate safety concerns be evident, the concern will be expressed verbally to appropriate personnel to prevent the participant or others from being harmed. If it is necessary for the SC to intervene to ensure the health and/or safety of the participant, such incidents will be immediately discussed with the SC’s Supervisor. Suspected abuse or neglect will be reported to DHHS Adult Protective Services and Child Protective Services as appropriate. The SC will document health and safety concerns in the case notes and complete an incident report as necessary. Please refer to Appendix G for a detailed description of DHHS-DD’s critical incident management system.
Concerns that do not involve immediate threats to health and safety discovered by the SC during on-site service reviews or any other contacts will be discussed with provider staff on duty to reach a resolution. If resolved at this level, the resolution is documented in the SC case note. If the issue is not resolved, the SC will complete a Service Review and send it to the agency provider staff supervisor and the SC’s supervisor. A response is requested within ten days from receipt of the review.

When a written response is received, the SC will review it to ensure that the action taken will correct the problem. If the response is not adequate or no response is received, the SC will contact the person to whom the Service Review was sent to find out the status of the response. If the response was inadequate, the SC may add comments made by the staff person to the response. If the response is still inadequate, the SC will copy the written documentation of noted concerns and send it to his/her immediate supervisor. If no response was received and the staff person indicates when a response will be sent, the SC will review the issue with their supervisor to determine the necessity of contacting the Manager of the agency provider staff responsible for making changes or corrections to alleviate the concerns. The SC Supervisor will notify the SC with the results of the contact and the SC will document in the case notes. A response within ten days will be requested if the issue has not been resolved. When a response is received, the SC Supervisor and SC will review the response to ensure that it meets the expectations in correcting the problem. If no response or an inadequate response is received, the SC Supervisor will copy the written documentation of noted concerns and send it to the Service District Administrator (SDA) or their designee.

The SDA or designee will contact administration of the agency provider to develop a mutually agreed-upon plan of action. If no resolution is achieved, or if trends show that the problems are recurring (such as "no ongoing habilitation provided," "programs not run as written," "programs not run at all," etc.) the SDA or designee will inform the DHHS-DD Central Office of the problems. Central Office staff will review the concerns to determine what steps to take and will notify the SDA or designee. Central office staff may provide consultation/technical assistance to the DD agency provider, refer to designated DHHS to perform a focused certification review specific to the delivery of services to a participant or provider setting, or initiate the complaint process described in Appendix F as necessary.

During certification reviews conducted by DHHS DD Surveyors, the service plan is reviewed using the Core Sample Record Audit and, if behavior support is a part of the service plan, the Core Sample Review Checklist will be used. Certification reviews are conducted annually, biennially, or more frequently as determined by DHHS-DD management staff.

In addition, the service plan is reviewed semi-annually and updated annually to determine if the plan developed and implemented by the team continues to meet the participant's needs. Areas reviewed include but are not limited to health, safety, habilitation, community involvement, and personal goals. The service plan identifies services, supports, interventions and strategies to be provided by the DD agency providers as well as services provided by independent providers of DD services.

When non-compliance issues are identified with the agency provider that cannot be resolved DHHS-DD management may make, a referral to DHHS DD surveyor staff. The types of action that may be taken range from citing a deficiency to termination of the agency provider by the Director of DHHS-DD. The general action taken is a citation of a deficiency and the provider must provide an acceptable plan of improvement that addresses the issues cited for those participants identified in the sample as well as address the issue cited on a system level within the agency provider.

The information derived from monitoring the implementation of the service plan and review of the service plan is entered into a database. Designated DHHS staff members have access to the database and may query the data to identify problems and trends.

(c) The frequency with which monitoring is performed.

Service coordination staff will verify, through ongoing monitoring efforts, that the services and supports provided continues to be effective. The service coordinator monitors the implementation of each service plan. This oversight has long been a part of the regulations, policies, and expectations regarding the role of service coordination in monitoring. In-person and on-site full reviews are conducted quarterly for each participant in services. Monitoring is completed quarterly within the calendar year, and is scheduled at the discretion of the SC. Ongoing in-person and on-site monitoring is conducted between the full monitoring when there are reported health and safety concerns, reports of abuse.
or neglect and/or when requested by a team member, or any other time when the SC determines it is necessary to monitor the delivery of services. During each of these monitoring sessions, the SC may choose to scrutinize only those items that surfaced as concerns during the semi-annual monitoring activities to check that the concerns have been remediated. However, the SC has the ultimate and ongoing responsibility to ensure that service plan implementation, health and safety, environmental factors, personal well-being and issues related to community integration are adequate to meet the needs of the participant.

Concerns are reviewed with the local Service District Administrator and brought to the attention of DHHS-DD Central Office administration as needed.

b. Monitoring Safeguards. Select one:

- Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may not provide other direct waiver services to the participant.

- Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may provide other direct waiver services to the participant.

The state has established the following safeguards to ensure that monitoring is conducted in the best interests of the participant. Specify:

Appendix D: Participant-Centered Planning and Service Delivery

Quality Improvement: Service Plan

As a distinct component of the State's quality improvement strategy, provide information in the following fields to detail the State's methods for discovery and remediation.

a. Methods for Discovery: Service Plan Assurance/Sub-assurances

The state demonstrates it has designed and implemented an effective system for reviewing the adequacy of service plans for waiver participants.

i. Sub-Assurances:

a. Sub-assurance: Service plans address all participants assessed needs (including health and safety risk factors) and personal goals, either by the provision of waiver services or through other means.

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:
A.1. Percent of service plans reviewed which reflect the participant’s goal(s).
Numerator = number of service plans reviewed which reflect the participant’s goal(s); Denominator = number of service plans reviewed.

**ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.**

The SC Supervisor reviews the on-line initial service plan for each waiver participant to ensure it meets the waiver and regulatory standards. The process was developed to also ensure the service plan is completed in accordance with timelines and to aggregate the results to identify issues at various levels of DHHS-DD.

The SC reviews assessment information, the participant’s personal goals, and the service plan to determine if the services defined flow from the assessments and personal goals.

To allow for increased state oversight of the service plan review process, the responses are entered into a database in the web-based case management system. The database allows for SC Supervisors and DHHD-DD staff responsible for quality reviews to have access to the information in aggregate form to look at the performance of individual service coordinators. DHHS-DD Central Office Quality staff annually conducts off-site file reviews of at least a 3% proportionate random sample to check service plan documentation. DHHS-DD Central Office Quality staff annually conducts off-site file reviews of a representative sample at a confidence interval of 95% with a +/- 5% margin of error to check service plan documentation. The sample size for this review is determined by the calculation tool provided by Raosoft, Inc. (http://www.raosoft.com/samplesize.html) assuming a 95% confidence level, a 5% margin of error, and a response distribution of 50%.

In addition, the SC monitors the implementation of each service plan in its entirety quarterly in addition to the ongoing monitoring of the service plan which may involve specific areas of the service plan within each monitoring session.

Monitoring mechanisms include:
1. A review of all components of the service plan to ensure delivery of services as specified by the service plan;
2. Initiation of any action necessary to ensure the delivery of services and progress toward achieving outcomes. Necessary action includes reconvening the team if a change in the service plan is necessary; and
3. A semi-annual review of the service plan by the service coordinator and the service plan team. The team reviews progress, implementation of the service plan, and the need for any revisions to the service plan.

**b. Methods for Remediation/Fixing Individual Problems**

i. Describe the States method for addressing individual problems as they are discovered. Include information
Regarding responsible parties and general methods for problem correction. In addition, provide information on the methods used by the state to document these items.

Monitoring is completed quarterly and additionally, the SC conducts ongoing monitoring in the environment that waiver services are provided when there are reports of abuse or neglect, health and safety concerns, at the request of the participant or any other team member, or any time when the SC determines it is necessary to monitor the service delivery.

To allow for state oversight of the monitoring process, responses on the service plan monitoring forms are entered into a web-based database. This allows individual SCs to track issues that are yet unresolved and provide aggregate information for SC Supervisors, Quality staff, and the DHHS-DD Central Office management. The information is useful for looking at the performance of individual SCs and providers, as well for identifying any area-wide issues. This information is reviewed and acted on, as appropriate, at the local level.

When issues or problems are discovered during a monitoring, the participant's SC documents on the monitoring form a plan to address the issues identified. The plan to address issues may include a team meeting, the facilitation of sharing information between the participant, manager of services, and/or providers, etc. A timeline to address the issues and/or a service plan team meeting date is noted on the monitoring form as well as whether the issues were resolved within the timeline.

When a pattern is detected of inappropriate or inaccurate claims, a referral is made to the DHHS Program Integrity Unit.

ii. Remediation Data Aggregation

Remediation-related Data Aggregation and Analysis (including trend identification)

C. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Service Plans that are currently non-operational.

- ☒ No
- ☐ Yes

Please provide a detailed strategy for assuring Service Plans, the specific timeline for implementing identified strategies, and the parties responsible for its operation.
Appendix E: Participant Direction of Services

Applicability (from Application Section 3, Components of the Waiver Request):

- Yes. This waiver provides participant direction opportunities. Complete the remainder of the Appendix.
- No. This waiver does not provide participant direction opportunities. Do not complete the remainder of the Appendix.

CMS urges states to afford all waiver participants the opportunity to direct their services. Participant direction of services includes the participant exercising decision-making authority over workers who provide services, a participant-managed budget or both. CMS will confer the Independence Plus designation when the waiver evidences a strong commitment to participant direction.

Indicate whether Independence Plus designation is requested (select one):

- Yes. The state requests that this waiver be considered for Independence Plus designation.
- No. Independence Plus designation is not requested.

Appendix E: Participant Direction of Services

E-1: Overview (1 of 13)

a. Description of Participant Direction. In no more than two pages, provide an overview of the opportunities for participant direction in the waiver, including: (a) the nature of the opportunities afforded to participants; (b) how participants may take advantage of these opportunities; (c) the entities that support individuals who direct their services and the supports that they provide; and, (d) other relevant information about the waiver's approach to participant direction.
In this waiver, “participant” means the individual receiving Medicaid HCBS DD waiver services and any person authorized to act on behalf of the participant.

(a) The nature of participant-directed opportunities, known as self-directed opportunities in Nebraska, afforded to participants:

The Division of Developmental Disabilities (DHHS-DD) embraces a self-directed philosophy, designed to provide choice when determining the services and supports that are needed to maximize independence. The Service Coordinator (SC) is involved in supporting self-direction. The SC supports self-direction by meeting with the participant to facilitate discussion of the participant’s budget, the self-directed services available, and the rights and responsibilities associated with choosing self-directed services. The SC may assist in locating independent providers, facilitate interviewing the prospective providers, and assist in setting up referral meetings with certified agency providers. The SC facilitates and documents service plan meetings.

Opportunities for self-direction are available to participants that select DD waiver services listed in E-1-g. These services are directed by the participant. Self-directed services are intended to give the participant more control over the type of services received as well as control of the providers of those services. The underlying philosophy of offering self-directed services is to build upon participant and family strengths and to strengthen and support informal and formal services already in place. Self-directed services must be individually tailored to address the unique preferences and needs of the participant.

(b) How participants may take advantage of these opportunities

Persons eligible for waiver services participate in the development of their service plan prior to the initiation of services and annually, or more frequently as needed, thereafter. The purpose of the annual service plan meeting is to determine waiver and non-waiver services, interventions, strategies, and supports to be provided to assist the participant to achieve his/her future plan, or personal goals, and to meet the participant’s needs and preferences. The purpose of the semi-annual service plan meeting is to review the implementation of the annual service plan, to document any changes to the participant's needs, goals, and preferences, to explore what supports are needed from the team, to determine if additional information or assessment is needed, to assign responsibility for gathering information or completing assessments, and to review any other issues that affect the participant's life. The participant or any other team member may request a team meeting at any time to update the service plan when circumstances or needs change. All team members are invited to all service plan meetings.

The participant has the right and responsibility to participate to the greatest extent possible in the development and implementation of his/her service plan. This person-centered service plan is individually tailored to address the unique preferences and needs of the participant. Membership in the planning process is determined by the participant, but must at least include the participant, the SC, and any DD waiver service providers. The participant may take responsibility or direct the SC to be responsible for scheduling, coordinating, and chairing all service plan meetings. The SC assists the participant or directly facilitates the participation of all team members. The service plan must identify the needs and preferences of the participant and specify how those needs will be addressed. This must include identifying services and supports to be provided as well as other non-DHHS-DD funded resources.

Participants have the right and responsibility to select DD waiver service providers. The participant identifies potential providers and screens the providers to determine competence for provision of services, based on the participant’s needs and preferences, and experience, knowledge, and training the providers may have. The participant describes to the provider the services and supports to be delivered.

(c) The entities that support individuals who direct their services and the supports that they provide.

At any time, the participant can request assistance to facilitate completion of the above steps from his/her SC.

During the enrollment process, DHHS assists the participant in verifying citizenship status of individual independent providers. Once the provider is enrolled and prior authorized for delivery of services, the participant directs the provider by setting the schedule and determining how the services will be delivered, and, based on the service plan, the type and amount of service.
The participant also has the authority to terminate the provider, by directing DHHS-DD staff to end the authorization for the delivery of services. DHHS-DD has the option to retain the service agreement to allow other participants to utilize the enrolled provider.

The Internal Revenue Service (IRS) has approved DHHS to be appointed the Fiscal/Employer agent as a means to ensure all requisite IRS rules are being followed. DHHS provides the following services in this capacity:

(a) Manage and direct the disbursement of funds contained in the participant’s budget;
(b) Facilitate the employment of staff by the participant by performing, as the participant’s agent, such employer responsibilities as processing payroll, withholding Federal, state, and local tax and making tax payments to appropriate tax authorities; and,
(c) Performing fiscal accounting and making expenditure reports to the participant and state authorities.

As a state entity, DHHS is not required to file individual forms 2678 with the IRS. Instead, DHHS devised a substitute form 2678 (referred to as DHHS form FA-65) which DHHS entitled “Appointment of DHHS as Agent for State and Federal Employment Taxes and Other Withholding Taxes for In-Home Service.” This is broader than the IRS form because it also allows DHHS to handle state employment taxes. This form is maintained by the SC and kept in the participant’s electronic records maintained by DHHS-DD. Information regarding IRS related responsibilities is explained verbally and in writing to the participant and provider. Under federal law, DHHS and the participant/Common Law Employer are jointly liable for employer taxes; however, neither entity is required to withhold income taxes.

Appendix E: Participant Direction of Services

E-1: Overview (2 of 13)

b. Participant Direction Opportunities. Specify the participant direction opportunities that are available in the waiver. Select one:

- **Participant: Employer Authority.** As specified in Appendix E-2, Item a, the participant (or the participant's representative) has decision-making authority over workers who provide waiver services. The participant may function as the common law employer or the co-employer of workers. Supports and protections are available for participants who exercise this authority.

- **Participant: Budget Authority.** As specified in Appendix E-2, Item b, the participant (or the participant's representative) has decision-making authority over a budget for waiver services. Supports and protections are available for participants who have authority over a budget.

- **Both Authorities.** The waiver provides for both participant direction opportunities as specified in Appendix E-2. Supports and protections are available for participants who exercise these authorities.

c. Availability of Participant Direction by Type of Living Arrangement. Check each that applies:

- Participant direction opportunities are available to participants who live in their own private residence or the home of a family member.
- Participant direction opportunities are available to individuals who reside in other living arrangements where services (regardless of funding source) are furnished to fewer than four persons unrelated to the proprietor.

- The participant direction opportunities are available to persons in the following other living arrangements Specify these living arrangements:

Appendix E: Participant Direction of Services

E-1: Overview (3 of 13)

d. Election of Participant Direction. Election of participant direction is subject to the following policy (select one):
- Waiver is designed to support only individuals who want to direct their services.
- The waiver is designed to afford every participant (or the participant’s representative) the opportunity to elect to direct waiver services. Alternate service delivery methods are available for participants who decide not to direct their services.
- The waiver is designed to offer participants (or their representatives) the opportunity to direct some or all of their services, subject to the following criteria specified by the state. Alternate service delivery methods are available for participants who decide not to direct their services or do not meet the criteria.

Specify the criteria

Appendix E: Participant Direction of Services
E-1: Overview (4 of 13)

e. Information Furnished to Participant. Specify: (a) the information about participant direction opportunities (e.g., the benefits of participant direction, participant responsibilities, and potential liabilities) that is provided to the participant (or the participant’s representative) to inform decision-making concerning the election of participant direction; (b) the entity or entities responsible for furnishing this information; and, (c) how and when this information is provided on a timely basis.
(a) The information about self-direction opportunities (e.g., the benefits of participant direction, participant responsibilities, and potential liabilities) that is provided to the participant (or the participant's representative) to inform decision-making concerning the election of participant direction.

Information about self-direction opportunities is available to participants who are currently receiving DD waiver services as well as to anyone entering DD waiver services. Information is provided verbally and through written materials provided by the SC, and is provided to the participant prior to entrance to DD waiver services and prior to the annual service plan meeting to allow sufficient time for the participant to weigh the pros and cons of self-direction and obtain additional information as necessary. Information about self-direction opportunities is available in reference materials developed by DHHS-DD, the DHHS website, and other public communications, such as information from Nebraska Department of Education about post-high school opportunities and information developed through the Nebraska Developmental Disabilities Council.

Reference materials developed by DHHS-DD include descriptions of available DD waiver services, guidance for deciding if self-direction is right for a participant, guidance for finding, enrolling, and managing independent providers for participants who self-direct services, and guidance for providers on authorizations and submitting claims.

The DHHS-DD public website also includes information about DHHS-DD responsibilities, service coordination, services funded by DHHS and DHHS-DD, certified DD agency providers, and non-certified independent providers as well as links to other resources for participants, families, and any interested persons.

Reference materials developed by DHHS-DD are utilized as training tools and post-training reference guides for participants and their support systems.

(b) The entity or entities responsible for furnishing this information

The SC provides the participant information or web addresses for local community services and supports, service coordination, services funded by DHHS and DHHS-DD, currently certified DD agency providers, and non-certified independent providers.

(c) How and when this information is provided on a timely basis.

The provision of written information about self-directed services and supports is an integral component of the development of the service plan. The participant's SC provides verbal and written information about self-directed services and supports to participants at entry into waiver services, annually thereafter, and as requested. The written information includes all information posted on the DHHS-DD website related to self-direction, for those who prefer written materials or do not have access to the internet.

Appendix E: Participant Direction of Services

E-1: Overview (5 of 13)

f. Participant Direction by a Representative. Specify the state's policy concerning the direction of waiver services by a representative (select one):

- The state does not provide for the direction of waiver services by a representative.
- The state provides for the direction of waiver services by representatives.

Specify the representatives who may direct waiver services: (check each that applies):

- Waiver services may be directed by a legal representative of the participant.
- Waiver services may be directed by a non-legal representative freely chosen by an adult participant.

Specify the policies that apply regarding the direction of waiver services by participant-appointed representatives, including safeguards to ensure that the representative functions in the best interest of the participant.
Selection of an advocate is voluntary, and an advocate may be chosen by the participant in the event that the participant does not have a guardian. The responsibilities and extent of involvement in decision making by the advocate is determined by the participant and documented in the service plan. The advocate must be 19 years of age or older and can be an involved family member or trusted friend of the participant. The advocate works with the participant to make sure the advocate is fulfilling the participant’s wishes and needs as desired. The advocate is authorized to make decisions on behalf of the participant, but cannot assume legal responsibilities. A person interested in becoming an advocate is screened by the participant, with assistance from his/her SC if desired, to ensure that the advocate demonstrates a strong commitment to the participant’s wellbeing and is interested in and able to carry out responsibilities as agreed upon with the participant.

The SC provides monitoring to ensure that the advocate functions as agreed upon with the participant and in the best interest of the participant as part of monitoring the service plan. If the advocate serves his/her own interests rather than those of the participant, the SC may advise the participant and his/her service plan team to consider a change of advocate or, if no other advocate can be identified, advise a transfer to agency provider services. In egregious cases, DHHS-DD may report the concerns identified through SC monitoring as suspected abuse, neglect or exploitation of a vulnerable adult.

Appendix E: Participant Direction of Services

E-1: Overview (6 of 13)

g. Participant-Directed Services. Specify the participant direction opportunity (or opportunities) available for each waiver service that is specified as participant-directed in Appendix C-1/C-3.

Appendix E: Participant Direction of Services

E-1: Overview (7 of 13)

h. Financial Management Services. Except in certain circumstances, financial management services are mandatory and integral to participant direction. A governmental entity and/or another third-party entity must perform necessary financial transactions on behalf of the waiver participant. Select one:
Yes. Financial Management Services are furnished through a third party entity. (Complete item E-1-i).

Specify whether governmental and/or private entities furnish these services. Check each that applies:

☒ Governmental entities
☐ Private entities

☐ No. Financial Management Services are not furnished. Standard Medicaid payment mechanisms are used. Do not complete Item E-1-i.

Appendix E: Participant Direction of Services

E-1: Overview (8 of 13)

i. Provision of Financial Management Services. Financial management services (FMS) may be furnished as a waiver service or as an administrative activity. Select one:

☐ FMS are covered as the waiver service specified in Appendix C-1/C-3

The waiver service entitled:

☐ FMS are provided as an administrative activity.

Provide the following information

i. Types of Entities: Specify the types of entities that furnish FMS and the method of procuring these services:

The state provides Government Fiscal/Employer Agent financial management services directly as an administrative activity.

ii. Payment for FMS. Specify how FMS entities are compensated for the administrative activities that they perform:

The state has an approved cost allocation plan that includes administrative claiming for activities performed as the FMS. Medicaid and Long-Term Care, a Division within the Medicaid Agency, is the Government Fiscal Employer Agent and claims FFP for the administrative activities performed as the FMS.

iii. Scope of FMS. Specify the scope of the supports that FMS entities provide (check each that applies):

Supports furnished when the participant is the employer of direct support workers:

☒ Assist participant in verifying support worker citizenship status
☒ Collect and process timesheets of support workers
☒ Process payroll, withholding, filing and payment of applicable federal, state and local employment-related taxes and insurance
☐ Other

Specify:

Supports furnished when the participant exercises budget authority:

☒ Maintain a separate account for each participant's participant-directed budget

09/20/2019
Track and report participant funds, disbursements and the balance of participant funds

Process and pay invoices for goods and services approved in the service plan

Provide participant with periodic reports of expenditures and the status of the participant-directed budget

Other services and supports

Specify:

Additional functions/activities:

- Execute and hold Medicaid provider agreements as authorized under a written agreement with the Medicaid agency
- Receive and disburse funds for the payment of participant-directed services under an agreement with the Medicaid agency or operating agency
- Provide other entities specified by the state with periodic reports of expenditures and the status of the participant-directed budget

Other

Specify:

iv. Oversight of FMS Entities. Specify the methods that are employed to: (a) monitor and assess the performance of FMS entities, including ensuring the integrity of the financial transactions that they perform; (b) the entity (or entities) responsible for this monitoring; and, (c) how frequently performance is assessed.

Administrative Services (AS) State Accounting is responsible for systematically reviewing on a regular basis activities of state agencies and departments to determine that adequate internal controls exist within all agencies, including DHHS, to assure that proper accounting methods are employed, per Nebraska Revised Statute §81-111(4). AS State Accounting approves a required internal control plan for financial reporting that is implemented, tested and monitored by DHHS, which includes pre-audit functions. DHHS has an Internal Audit Division to perform internal audits along with assisting DHHS staff in the event of a State or Federal audit.

Appendix E: Participant Direction of Services

E-1: Overview (9 of 13)

j. Information and Assistance in Support of Participant Direction. In addition to financial management services, participant direction is facilitated when information and assistance are available to support participants in managing their services. These supports may be furnished by one or more entities, provided that there is no duplication. Specify the payment authority (or authorities) under which these supports are furnished and, where required, provide the additional information requested (check each that applies):

- Case Management Activity. Information and assistance in support of participant direction are furnished as an element of Medicaid case management services.

Specify in detail the information and assistance that are furnished through case management for each participant direction opportunity under the waiver:
Case management in Nebraska is performed by DHHS-DD Service Coordinators (SCs) and all DHHS-DD SCs are qualified to provide self-direction guidance. In addition to basic service coordinator training, SCs receive training on the self-directed services that are available, such as the types/definitions of services, limits on services, authorization codes and rates, billing guidelines, budget projecting, and the referral process for enrollment of independent providers. SCs also receive the all reference materials developed by DHHS-DD as training tools.

SCs provide information to those who self-direct DD waiver services listed in E-1-g. The SC provides reference materials developed by DHHS-DD with the participant to assist the participant in understanding his/her responsibilities in self-direction, including hiring, training, and dismissing a provider, as well as assisting the participant to recognize potential abuse and neglect situations.

The SC informs the participant of the amount of funding available and develops the monthly budget with the participant. When determining the rate for an independent provider, the participant is informed of his/her annual funding allocation and the maximum rates to be considered for each service, based on the potential independent provider’s experience and training, the participant’s needs, and the tasks that the potential provider will perform.

If the participant has not chosen his/her provider(s), DHHS-DD staff may provide a list of currently enrolled independent providers for the participant to consider, and help the participant interview a potential provider when the participant requests assistance. The SC is informed by DHHS-DD staff responsible for provider enrollment when the provider is enrolled and authorized to provide services to the participant.

If requested, the SC will assist the participant in communicating his/her expectations to the independent provider, including when and how the services will be delivered and addressing any performance issues that may arise.

☐ Waiver Service Coverage.

Information and assistance in support of participant direction are provided through the following waiver service coverage(s) specified in Appendix C-1/C-3 (check each that applies):

**E-1: Overview (10 of 13)**

**k. Independent Advocacy (select one).**

- ☒ No. Arrangements have not been made for independent advocacy.
- ☐ Yes. Independent advocacy is available to participants who direct their services.

Describe the nature of this independent advocacy and how participants may access this advocacy:

---

09/20/2019
Appendix E: Participant Direction of Services

E-1: Overview (11 of 13)

l. Voluntary Termination of Participant Direction. Describe how the state accommodates a participant who voluntarily terminates participant direction in order to receive services through an alternate service delivery method, including how the state assures continuity of services and participant health and welfare during the transition from participant direction:

DD waiver services are voluntary services for the participant and the provider(s). Each participant’s funding amount is based on an objective assessment process, and the funding follows the participant. Each participant can choose services and the providers to meet his/her needs and preferences. The authorization of funding for services to a particular provider or providers is mutually agreed upon, and either entity can end participation. All DD service providers are DD waiver service providers.

Nebraska offers provider-managed services under this waiver and another HCBS waiver for adults with developmental disabilities. The participant may choose provider-managed services that may better meet the participant’s health and safety needs. The provider-managed waiver services are delivered by certified DD agency providers and the team process is utilized in assisting the participant in choosing DD waiver services and providers that best meet the participant’s needs. Participants can change waiver services without a gap in the provision of services.

Appendix E: Participant Direction of Services

E-1: Overview (12 of 13)

m. Involuntary Termination of Participant Direction. Specify the circumstances when the state will involuntarily terminate the use of participant direction and require the participant to receive provider-managed services instead, including how continuity of services and participant health and welfare is assured during the transition.

DD state regulation allows DHHS-DD to deny or end funding of specific services when:

1. A participant’s needs are not being met through waiver services or intensity of services and supports does not reflect the need for ICF-DD level of care;
2. The participant has failed to cooperate with, or refused the services funded by DHHS-DD; or,
3. The participant’s service plan has not been implemented.

The decision to end funding may be based on the SC monitoring, review of the service plan, critical incident reports, assessment of risk to the participant and community, or complaint investigations conducted by DHHS staff.

Nebraska offers provider-managed services under this waiver and another HCBS waiver for adults with developmental disabilities. The participant may choose provider-managed services that may better meet the participant’s health and safety needs. The provider-managed waiver services are delivered by certified DD agency providers and the team process is utilized in assisting the participant in choosing DD waiver services and providers that best meet the participant’s needs. Participants can change waiver services without a gap in the provision of services.

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant Direction (1 of 6)

a. Participant - Employer Authority Complete when the waiver offers the employer authority opportunity as indicated in Item E-1-b:

i. Participant Employer Status. Specify the participant's employer status under the waiver. Select one or both:

- Participant/Co-Employer. The participant (or the participant's representative) functions as the co-employer (managing employer) of workers who provide waiver services. An agency is the common law employer of participant-selected/recruited staff and performs necessary payroll and human resources functions. Supports are available to assist the participant in conducting employer-related functions.

- Participant/Common Law Employer. The participant (or the participant's representative) is the common law employer of workers who provide waiver services. An IRS-approved Fiscal/Employer Agent functions as the participant's agent in performing payroll and other employer responsibilities that are required by federal and state law. Supports are available to assist the participant in conducting employer-related functions.

Specify the types of agencies (a.k.a., agencies with choice) that serve as co-employers of participant-selected staff:

- Participant/Co-Employer
- Participant/Common Law Employer

ii. Participant Decision Making Authority. The participant (or the participant's representative) has decision making authority over workers who provide waiver services. Select one or more decision making authorities that participants exercise:

- Recruit staff
- Refer staff to agency for hiring (co-employer)
- Select staff from worker registry
- Hire staff common law employer
- Verify staff qualifications
- Obtain criminal history and/or background investigation of staff

Specify how the costs of such investigations are compensated:
Specify additional staff qualifications based on participant needs and preferences so long as such qualifications are consistent with the qualifications specified in Appendix C-1/C-3.

Specify the state's method to conduct background checks if it varies from Appendix C-2-a:

- The state’s method to conduct background checks does not vary from what is described in Appendix C-2-a.

Determine staff duties consistent with the service specifications in Appendix C-1/C-3.

Determine staff wages and benefits subject to state limits

Schedule staff

Orient and instruct staff in duties

Supervise staff

Evaluate staff performance

- Verify time worked by staff and approve time sheets

- Discharge staff (common law employer)

- Discharge staff from providing services (co-employer)

- Other

 Specify:

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (2 of 6)

b. Participant - Budget Authority Complete when the waiver offers the budget authority opportunity as indicated in Item E-1-b:

i. Participant Decision Making Authority. When the participant has budget authority, indicate the decision-making authority that the participant may exercise over the budget. Select one or more:

- Reallocate funds among services included in the budget

- Determine the amount paid for services within the state's established limits

- Substitute service providers

- Schedule the provision of services

- Specify additional service provider qualifications consistent with the qualifications specified in Appendix C-1/C-3

- Specify how services are provided, consistent with the service specifications contained in Appendix C-1/C-3

- Identify service providers and refer for provider enrollment

- Authorize payment for waiver goods and services

- Review and approve provider invoices for services rendered

- Other

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (3 of 6)

b. Participant - Budget Authority

ii. Participant-Directed Budget Describe in detail the method(s) that are used to establish the amount of the participant-directed budget for waiver goods and services over which the participant has authority, including how the method makes use of reliable cost estimating information and is applied consistently to each participant. Information about these method(s) must be made publicly available.
The methodology for establishing the amount of the self-directed budget is the same as for provider-managed services, as fully described in Appendix C-4-a of this waiver. DHHS-DD has developed and implemented a methodology that determines a specific budget amount that is uniquely assigned to each waiver participant. The assigned individual budget amount (IBA) constitutes a limit on the overall amount of services that may be authorized in the service plan. The limit on the maximum dollar amount of waiver services for each specific participant is individually objectively assessed and is a realistic estimate of the expected amount of services that waiver participants are likely to require. The IBA is the total annual funding amount available to the participant per his/her waiver year and is determined by DHHS-DD staff. The amount assigned is determined in advance of the development of the participant’s service plan. The process for the determination of the IBA will be described in a Policy Guide and posted on the DHHS-DD public web page when it is fully vetted.

The determination of prospective individual budgets for participants is determined using an objective assessment process as required in statute and regulations. Funding is assigned based on an objective assessment of each participant’s abilities, to provide for equitable distribution of funding based on each participant’s assessed needs. Geographic factors do not affect the budget amount and the participant location is not factored into the objective assessment process.

The original objective assessment process (OAP) methodology was developed in 1996 and public meetings were held at that time to explain the process. The process was updated in 2008 and a document describing the methodology and its improvements was prepared and made available to the public at that time. Since then, the public has been informed of the process through public meetings and documents posted on the DHHS-DD website associated with rate setting improvements in 2011, 2015, 2016, 2017, and 2018.

The Nebraska OAP Redesign initiative started in August 2018 and is planned to be completed in December 2020.

The assessment used to ascertain each participant’s skills, abilities, and needs is the Inventory for Client and Agency Planning (ICAP). DHHS-DD staff complete the ICAP assessment with input from the participant’s teachers, para-educators, family members, and providers, as appropriate, as well as a review of substantiating documentation to support tabulated responses. Substantiating documentation includes, but is not limited to, medical reports, psychological evaluations, critical incident data, and programmatic data. The completed ICAP assessment is submitted to the DHHS-DD Central Office where it is electronically entered to determine the overall score. The objective assessment process is completed for persons new to services and every two years thereafter.

The prospective IBA is adjusted during the period the waiver is in effect. The limit will be adjusted to take into account cost increases, and the methodology will be periodically re-evaluated in light of changes in utilization patterns or other factors.

An ICAP is completed every two years to assess changes in a participant’s needs and abilities. The IBA is adjusted based on the result of the ICAP score. An ICAP may be requested to be completed whenever a participant’s needs have changed and cannot be safely met with funding solely from the current IBA. Based on input from the participant, provider, and other team members, the service plan team may submit a clinical rationale and supporting documentation to DHHS-DD Central Office to request a new ICAP.

Alternative compliance to the funding tier may be requested when a waiver participant’s needs cannot be safely met with funding solely based on the ICAP score. SCs complete risk screens related to health, physical nutritional management or enteral feeding (as applicable), spine and gait, and behavioral needs. Based on input from the participant, provider, and other team members, the service plan team may submit a rationale for consideration of alternative compliance to the participant’s ICAP score and identified funding tier. A clinical review will be completed based on the alternative compliance request.

Additional requests for services for participants are evaluated by DHHS-DD to determine if requests are related to a critical health or safety need, and if so, the request would be approved based on available waiver funding. If no additional waiver funding is available, (i.e. the expenditures have exceeded cost neutrality for the waiver), the following safeguards would be applied:

1. The participant is assisted in locating and obtaining other non-waiver services to assist in meeting his/her needs; or
2. The participant will be evaluated to determine if his/her needs and eligibility more closely align with other
Nebraska HCBS waiver programs and will be assisted in the application process as deemed necessary.

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (4 of 6)

b. Participant - Budget Authority

iii. Informing Participant of Budget Amount. Describe how the state informs each participant of the amount of the participant-directed budget and the procedures by which the participant may request an adjustment in the budget amount.

The participant is notified in writing by DHHS-DD staff of his/her IBA as well as the dollar limits of waiver services at the time of initiation of DD waiver services and prior to the development of the service plan. The participant is also notified of his/her service authorizations, prior to services being delivered. The written notice is mailed and includes fair hearing rights information. Questions about the right to a fair hearing are directed to the SC or his/her Service Coordination Supervisor (SCS). Additionally, DHHS-DD Central Office staff are available to respond to participant questions regarding fair hearing rights and any other aspect of waiver implementation.

The participant may propose budget changes at any time, by contacting the SC. By utilizing the budget functions of the state mandated web-based case management system, the overall impact of the proposed change is calculated and the participant is able to compare the proposed change to the current budget. The SC is responsible for documenting the change in circumstances that impact the participant’s annual budget amount.

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (5 of 6)

b. Participant - Budget Authority

iv. Participant Exercise of Budget Flexibility. Select one:

- Modifications to the participant directed budget must be preceded by a change in the service plan.
- The participant has the authority to modify the services included in the participant directed budget without prior approval.

Specify how changes in the participant-directed budget are documented, including updating the service plan. When prior review of changes is required in certain circumstances, describe the circumstances and specify the entity that reviews the proposed change:

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (6 of 6)

b. Participant - Budget Authority

v. Expenditure Safeguards. Describe the safeguards that have been established for the timely prevention of the premature depletion of the participant-directed budget or to address potential service delivery problems that may be associated with budget underutilization and the entity (or entities) responsible for implementing these safeguards:
Safeguards have been established to prevent the premature depletion of the participant’s budget or address potential service delivery problems that may be associated with budget over-utilization. DHHS-DD is responsible for ensuring the implementation of safeguards developed for the participants who are self-directing. The state mandated web-based case management system tracks budget utilization and provides monthly reports for service coordination, management, and administrative staff.

DHHS-DD and the vendor of the state mandated web-based case management system have developed rules within the system that will highlight possible over-utilization. When potential over-utilization is identified the participant and SC discuss and manage adjustments to the monthly authorized amounts and the annual budget amount if necessary.

Likewise, providers contact participants and SCs if services are under-utilized. The SC may follow-up with monitoring, a meeting with appropriate parties, referrals to another qualified DD waiver service provider, participant education, provider re-education, and/or risk screenings to assess the participant’s health and safety.

Appendix F: Participant Rights

Appendix F-1: Opportunity to Request a Fair Hearing

The state provides an opportunity to request a Fair Hearing under 42 CFR Part 431, Subpart E to individuals: (a) who are not given the choice of home and community-based services as an alternative to the institutional care specified in Item 1-F of the request; (b) are denied the service(s) of their choice or the provider(s) of their choice; or, (c) whose services are denied, suspended, reduced or terminated. The state provides notice of action as required in 42 CFR §431.210.

Procedures for Offering Opportunity to Request a Fair Hearing. Describe how the individual (or his/her legal representative) is informed of the opportunity to request a fair hearing under 42 CFR Part 431, Subpart E. Specify the notice(s) that are used to offer individuals the opportunity to request a Fair Hearing. State laws, regulations, policies and notices referenced in the description are available to CMS upon request through the operating or Medicaid agency.
In this waiver, “participant” means the individual receiving waiver services and any person authorized to act on behalf of the participant.

Participants are advised of their appeal rights at the time of initial eligibility by the DHHS-DD Disability Services Specialist and thereafter by their Service Coordinator (SC) at the time of the Individual and Family Meeting and annual service plan meeting. At the annual Individual and Family or annual service plan meeting, the participant is given a Notice of Rights and Obligations and signs the document. Hearing rights are also printed on the Notice of Decision.

Participants will receive and have the opportunity to dispute a Notice of Decision in any of the following circumstances:

1. The applicant is determined ineligible for NE Medicaid HCBS DD waiver services;
2. The applicant is not given the choice of Medicaid HCBS DD waiver services as an alternative to institutional care;
3. The participant’s choice of providers is denied; or
4. Services to the participant are denied, suspended, reduced, or terminated.

Participants may also appeal any action, inaction, or failure to act with reasonable promptness because:
1. His/her application is denied;
2. His/her application is not acted upon with reasonable promptness;
3. His/her assistance or services are suspended;
4. His/her assistance or services are reduced;
5. His/her assistance or services are terminated;
6. His/her form of payment or services is changed to be more restrictive; or
7. S/he thinks the Department's action was erroneous.

When issued, the Notice of Decision includes information about the Request for a Fair Hearing, and advises participants of their right to a hearing, the method by which to obtain a hearing, and that they may represent themselves or use an attorney, friend or other spokesperson when they begin receiving services and annually thereafter. This information is also posted on the public website at www.dhhs.ne.gov/developmental_disabilities.

Designated Department of Health and Human Services Division of Developmental Disabilities (DHHS-DD) staff complete and retain the Notice of Decision in Nebraska’s electronic local web-based system for claims processing. The Notice of Decision is mailed to the participant at least ten days prior to the action being taken, in accordance with 42 CFR 431.211.

The Notice of Decision includes an advisement that services will continue (or be reinstated) until the final outcome of the fair hearing if the participant requests a hearing within ten days of the mailing of the Notice of Decision.

Request for Fair Hearing must be submitted in written hardcopy or electronic form, and submission may be done via mail, email, fax, phone, or in person at any local DHHS office. All Notices of Decision and Requests for Fair Hearing are maintained in electronic form, in accordance with the Records Retention Schedule applicable to DHHS-DD. Fair hearing rights are provided in English and Spanish according to the language spoken at home on file and may be translated into other languages upon request.

In order to exercise the right to a hearing, the participant must file a petition with DHHS-DD. The petition may be made on a form provided by DHHS-DD for such purpose, or in another writing that contains at least the following information:
1. The name and contact information of the petitioner (the participant’s or guardian’s name, address, and phone number, and signature);
2. The specific decision contested;
3. The date of the decision contested; and
4. Any other information that the participant wants to be included at the hearing.

Appendix F: Participant-Rights

Appendix F-2: Additional Dispute Resolution Process

a. Availability of Additional Dispute Resolution Process. Indicate whether the state operates another dispute resolution process that offers participants the opportunity to appeal decisions that adversely affect their services while preserving their right to a Fair Hearing. Select one:
No. This Appendix does not apply

Yes. The state operates an additional dispute resolution process

b. Description of Additional Dispute Resolution Process. Describe the additional dispute resolution process, including: (a) the state agency that operates the process; (b) the nature of the process (i.e., procedures and timeframes), including the types of disputes addressed through the process; and, (c) how the right to a Medicaid Fair Hearing is preserved when a participant elects to make use of the process: State laws, regulations, and policies referenced in the description are available to CMS upon request through the operating or Medicaid agency.

Appendix F: Participant-Rights

Appendix F-3: State Grievance/Complaint System

a. Operation of Grievance/Complaint System. Select one:

No. This Appendix does not apply

Yes. The state operates a grievance/complaint system that affords participants the opportunity to register grievances or complaints concerning the provision of services under this waiver

b. Operational Responsibility. Specify the state agency that is responsible for the operation of the grievance/complaint system:

Participants receiving supports through the waiver may register a grievance or complaint with DHHS and are informed that filing a grievance or making a complaint is not a pre-requisite or substitute for a fair hearing.

c. Description of System. Describe the grievance/complaint system, including: (a) the types of grievances/complaints that participants may register; (b) the process and timelines for addressing grievances/complaints; and, (c) the mechanisms that are used to resolve grievances/complaints. State laws, regulations, and policies referenced in the description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).
a) The types of grievances/complaints that participants may register.

Participants are advised in the annual Notice of Rights and Obligations (received at the annual Individual and Family meeting or annual service plan meeting) that filing a grievance or complaint is not a prerequisite for filing for a Fair Hearing.

Participants receiving supports through the waiver may register the following types of grievances/complaints:
1. Safety, endangerment, or welfare issues;
2. Suspicion of Medicaid fraud;
3. Violations by providers of Medicaid regulations, DHHS-DD regulations or policy by DHHS-DD Medicaid providers;
4. Issues related to participant’s SC;
5. Difficulty with DD services and/or agency or independent providers.

b) The process and timelines for addressing grievances/complaints.

The grievance/complaint may be submitted via mail, email, fax, phone, or in person at any local DHHS office. DHHS-DD also has a central phone number that participants can call to file a complaint or to ask questions. Participants can also write a letter and mail or fax it in to DHHS-DD. Complaints, questions, or concerns are responded to by designated DHHS-DD program staff. Once the grievance/complaint has been resolved, designated DHHS staff provide a written notification, when applicable, of the outcome to the complainant. Resolution of the grievance/complaint may involve working with DHHS Division partners, multiple providers, and/or the participant’s service plan team, thus, there is no specified timeframe for the state making resolution and notifying the complainant. Designated DHHS-DD staff are expected to take immediate steps to make resolution and notification. All grievances/complaints and outcomes are maintained in electronic form, in accordance with the Records Retention Schedule applicable to DHHS-DD.

c) The mechanisms that are used to resolve grievances/complaints.

The mechanisms for resolving the complaint and preparing the response include, but are not limited to, follow-up by phone, letter, independent provider visit, agency provider visit, and/or referral to another DHHS program (e.g., Child Welfare Services, Adult Protective Services, and Medicaid Fraud Control Unit).

Appendix G: Participant Safeguards

Appendix G-1: Response to Critical Events or Incidents

a. Critical Event or Incident Reporting and Management Process. Indicate whether the state operates Critical Event or Incident Reporting and Management Process that enables the state to collect information on sentinel events occurring in the waiver program. Select one:

- Yes. The state operates a Critical Event or Incident Reporting and Management Process (complete Items b through e)
- No. This Appendix does not apply (do not complete Items b through e)

If the state does not operate a Critical Event or Incident Reporting and Management Process, describe the process that the state uses to elicit information on the health and welfare of individuals served through the program.

b. State Critical Event or Incident Reporting Requirements. Specify the types of critical events or incidents (including alleged abuse, neglect and exploitation) that the state requires to be reported for review and follow-up action by an appropriate authority, the individuals and/or entities that are required to report such events and incidents and the timelines for reporting. State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).
In this waiver, “participant” means the individual receiving Medicaid HCBS DD waiver services and any person authorized to act on behalf of the participant. In this waiver Appendix G, “provider” means both agency and independent providers, unless otherwise specified.

The Department of Health and Human Services Division of Developmental Disabilities (DHHS-DD) defines incidents requiring an incident report to DHHS-DD as situations which may adversely affect the physical or emotional well-being of the participant; alleged or suspected cases of abuse, neglect, exploitation, or mistreatment; and emergency safety situations requiring the use of emergency safety interventions.

For vulnerable adults age 18 and older, abuse, neglect, and exploitation are defined in the Adult Protective Services Act, Nebraska Revised Statute §§28-348 - 28-387. Neb. Rev. Stat. §28-372 specifies persons required to make a report to DHHS or the appropriate law enforcement agency if abuse, neglect, or exploitation of a vulnerable adult is suspected or alleged.

DHHS maintains a toll free hotline available at all times for reporting suspected or alleged abuse, neglect, and exploitation of vulnerable adults. This number is posted on the DHHS website. DHHS also accepts reports of abuse, neglect, and exploitation by mail, email, fax, or in-person at any DHHS office.

For all participants in DD waiver services, DHHS-DD state regulation defines and prohibits provider use of physical restraint except as specified, chemical restraint, mechanical restraint, aversive stimuli, corporal punishment, seclusion, physical, emotional, and verbal abuse, denial of basic needs, discipline, implementation of an intervention on a participant by another participant, or other means of intervention that result in or are likely to result in physical injury to the participant.

Providers must report the following types of incidents to DHHS-DD:

- All allegation or suspicion of abuse, neglect, or exploitation of a child or a vulnerable adult.
- Injuries which require medical attention by a physician.
- Acute, episodic illness or change in medical condition requiring medical attention by a physician.
- Injuries to participants resulting from a fall.
- Injuries to participants resulting from any use of restraint.
- Injuries of unknown origin which raise suspicion of abuse or neglect.
- Injuries or displacement of participant as a result of fire, flood, or other similar emergency or natural disaster.
- Medication error resulting in injury, serious illness, or hospitalization.
- Use of emergency safety intervention or PRN psychotropic medication.
- Use of prohibited practices for any reason.
- Behavioral episodes resulting in use of emergency safety intervention or PRN psychotropic medication use, injury or potential for injury of the participant or others, or damage to property of total value of $150 or greater.
- A participant leaving provider supervision where the safety of the participant or others is potentially threatened, or a participant being identified as a missing person.
  - Use of an emergency room or an urgent care facility for treatment.
  - Possible criminal activity or law enforcement contact by a participant or by a staff person suspected of criminal activity towards a participant.
  - Seizure that lasts over five minutes or over the timeframe set by the participant’s physician, or which requires treatment at an urgent care center, emergency room, or hospital.
  - Incidents of choking or airway obstruction.
  - Death of a participant.
  - Hospitalization of a participant.

A verbal report must be made by the provider to DHHS-DD upon becoming aware of these incidents. Written incident reports must be submitted using the state mandated web-based case management system within 24 hours of the verbal report to DHHS-DD. A verbal report must also be made to the participant within 24 hours of becoming aware of the incident.

Agency providers must submit an aggregate report of incidents to DHHS-DD on a quarterly basis. The report must be received by DHHS-DD no later than 30 calendar days after the last day of each quarter. The report must include a compilation, analysis, and interpretation of data, and evidentiary examples to evaluate performance that results in reduction in the number of incidents over time.
c. Participant Training and Education. Describe how training and/or information is provided to participants (and/or families or legal representatives, as appropriate) concerning protections from abuse, neglect, and exploitation, including how participants (and/or families or legal representatives, as appropriate) can notify appropriate authorities or entities when the participant may have experienced abuse, neglect or exploitation.

Information concerning protections from and reporting of abuse, neglect, and exploitation is provided to each participant when entering DD waiver services and annually thereafter by his/her Service Coordinator (SC). This information is also available on the DHHS-DD website. Training is available to the general public, including participants, family members and providers on the DHHS-DD website.

The participant’s assigned SC must provide information on participant rights to the participant when entering DD waiver services and annually thereafter. As applicable, these materials are translated and provided in Spanish. In addition, DHHS-DD complies with the LEP Language Assistance Implementation Guidance per Presidential Executive Order 13166.

d. Responsibility for Review of and Response to Critical Events or Incidents. Specify the entity (or entities) that receives reports of critical events or incidents specified in item G-1-a, the methods that are employed to evaluate such reports, and the processes and time-frames for responding to critical events or incidents, including conducting investigations.
Upon receipt of an incident report, the assigned Service Coordination Supervisor (SCS) reviews the report to determine the appropriate response, which depends upon the type of incident and the history of the participant. All reports involving health and safety concerns or law enforcement contact require follow-up action from the SC. The requirements for type of follow-up or timelines for follow-up are decided in consultation between the SC and SCS.

Agency providers must complete an investigation of each reported incident. A written summary of the agency provider’s investigation and action taken must be submitted via the state mandated web-based case management system to DHHS-DD within 14 calendar days of the initial report of the incident. Timeframes for conducting and completing the investigation, and for informing the participant of the results of an internal investigation completed by the agency provider must be specified in the provider agency policies and procedures, and cannot exceed 14 calendar days. Any incidents reported by an agency provider involving suspected or alleged abuse, neglect, or exploitation, use of emergency safety intervention, or any other situation where violation of the participant’s rights may have occurred must also be reviewed by the agency provider’s rights review committee.

The DHHS Division of Children and Family Services (DHHS-CFS) Protection and Safety Unit maintains the toll-free hotline available at all times for reporting of alleged or suspected abuse, neglect, and exploitation of vulnerable adults. All reports of suspected or alleged abuse, neglect, or exploitation are screened immediately and shared with law enforcement within 24 hours of receipt.

Reports of alleged or suspected abuse, neglect, or exploitation of vulnerable adults are reviewed by DHHS-CFS staff with specialized training in intake and screening. Information from the report and any relevant historical information available in DHHS electronic records is reviewed using a structured assessment tool. The structured assessment tool is a research-based instrument that outlines specific criteria used to determine whether the report meets the criteria for DHHS-CFS involvement and if so, the appropriate response priority. Separate assessment tools are used to screen reports involving vulnerable adults. Screening criteria includes definitions of abuse, neglect, and exploitation of a vulnerable adult outlined in the Adult Protective Services Act, Neb. Rev. Stat. §§28-348 - 28-387. Reports of suspected or alleged abuse, neglect, or exploitation which do not meet statutory definitions will not be accepted for investigation by DHHS-CFS.

When DHHS-CFS staff have screened a report of suspected or alleged abuse, neglect, or exploitation, the determination to accept or not accept a report for investigation and the prioritization of accepted reports is reviewed by a DHHS-CFS supervisor to ensure screening criteria are applied accurately.

Accepted reports are prioritized and assigned for investigation. Reporting parties are notified by the DHHS-CFS staff taking the report whether the report will be accepted and assigned to DHHS-CFS for investigation or if the report will not be accepted for investigation.

Provider reports of alleged or suspected abuse, neglect, or exploitation to the DHHS-CFS Protection and Safety Unit that are not accepted for investigation are electronically submitted within 24 hours of receipt to DHHS-DD and DHHS Division of Public Health (DHHS-PH). DHHS-PH reviews and triages each report upon receipt to determine what action should be taken. Actions taken may include completion of a complaint investigation by DHHS-PH, depending on the nature and circumstances of the incident. These reports are also reviewed by the assigned SC and SCS to assess the participant’s safety and whether any revision to the participant’s service plan is needed to address the reported incident.

Investigations for Abuse/Neglect/Exploitation of a Vulnerable Adult

Investigations of alleged or suspected abuse, neglect, or exploitation of vulnerable adults are performed by DHHS-CFS staff specializing in adult protective services. Accepted reports are categorized in three priorities. Investigations for all priority levels must be completed within 60 days of the report being accepted for investigation, unless there is alleged or suspected financial exploitation, which requires the investigation be completed within 90 days.

- Priority 1 – includes reports indicating a vulnerable adult is in immediate danger of death or life-threatening or critical harm. Face-to-face contact must be made with the victim within 8 hours from the time the report was accepted for investigation. If DHHS-CFS staff is unable to respond within the specified timeframe, he/she must notify law enforcement of the emergent nature of the reported abuse, neglect, or exploitation and request immediate response, and DHHS-CFS staff must make face-to-face contact with the alleged victim within 24 hours of law enforcement contact. DHHS-CFS staff may work simultaneously with law enforcement if requested.

- Priority 2 – includes reports indicating a vulnerable adult is in danger of serious, but not life-threatening or critical harm. Face-to-face contact by a DHHS-CFS staff must be made with the victim within 5 calendar days of the date of the report was accepted for investigation.
e. Responsibility for Oversight of Critical Incidents and Events. Identify the state agency (or agencies) responsible for overseeing the reporting of and response to critical incidents or events that affect waiver participants, how this oversight is conducted, and how frequently.

The DHHS-DD is responsible for overseeing the reporting of and response to critical incidents and events. All critical events are entered into the state mandated web-based case management system and are subject to DHHS-DD review and analysis at any time. DHHS-DD reserves the right to request additional review of any incident reported to DHHS-DD. There may be immediate follow-up of individual events.

DHHS-CFS staff are also responsible for the oversight of critical incident management. At least annually, DHHS-CFS provides to DHHS-DD information about reports of abuse, neglect, or exploitation involving DD waiver services participants made to DHHS-CFS. Data is obtained and analyzed on waiver participants involved in reports of alleged or suspected abuse, neglect, or exploitation. The data includes demographic information, types of abuse/neglect reported, and the findings of investigations.

DHHS-CFS and DHHS-DD collaborate to identify strategies to reduce the number of critical incidents and to coordinate on both a system wide and individual participant basis. Examples of these strategies include training of DHHS-CFS staff about the Medicaid HCBS DD waivers, and training of DHHS-DD staff about abuse, neglect, and exploitation and the functions of DHHS-CFS.

Appendix G: Participant Safeguards

Appendix G-2: Safeguards Concerning Restraints and Restrictive Interventions (1 of 3)

a. Use of Restraints. (Select one): (For waiver actions submitted before March 2014, responses in Appendix G-2-a will display information for both restraints and seclusion. For most waiver actions submitted after March 2014, responses regarding seclusion appear in Appendix G-2-c.)

☐ The state does not permit or prohibits the use of restraints

Specify the state agency (or agencies) responsible for detecting the unauthorized use of restraints and how this oversight is conducted and its frequency:

☐ The use of restraints is permitted during the course of the delivery of waiver services. Complete Items G-2-a-i and G-2-a-ii.

i. Safeguards Concerning the Use of Restraints. Specify the safeguards that the state has established concerning the use of each type of restraint (i.e., personal restraints, drugs used as restraints, mechanical restraints). State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).
Restraint is defined as any physical hold, device, or chemical substance that restricts, or is meant to restrict, the movement or normal function of a portion of the participant’s body, or to control the behavior of a participant. Devices used to provide support for the achievement of functional body position or proper balance, and devices used for specific medical and surgical (as distinguished from behavioral) treatment are not to be considered as restraint.

Physical restraint is defined as any manual physical holding of or contact with a participant that restricts the participant’s freedom of movement. Physical restraint is prohibited except when used as an emergency safety intervention.

Emergency safety intervention is defined as the use of physical restraint or separation as an immediate response to an emergency situation. Emergency safety intervention can be used in a situation in which the participant or others are in danger or immediate jeopardy or harm. These situations are typically unpredictable, unusual, and not reoccurring. Emergency safety intervention should be used as a last resort and only when less restrictive interventions have not been successful. Separation used in emergency safety intervention may include physical restraint to separate a participant from an item, an area, or a person, or separation of the participant to a specific room or area, as long as the separation is not seclusion as defined in DHHS-DD state regulation.

Mechanical restraint is defined as any device, material, object, or equipment that is attached or adjacent to the participant’s body that restricts freedom of movement or normal access to the body. Mechanical restraint does not include use of acceptable child safety products, use of car safety systems, or safeguarding equipment ordered by a physician or healthcare provider and approved by the support plan team. Use of mechanical restraint is prohibited by DHHS-DD state regulation.

Chemical restraint is defined as a drug or medication used for discipline or convenience and not required to treat medical symptoms. Use of chemical restraint is prohibited by DHHS-DD state regulation. Routine use of psychotropic medication as prescribed by a physician is not chemical restraint. Use of PRN psychotropic medications prescribed by a physician is not a chemical restraint when used as prescribed, and not used as discipline or for the convenience of the provider.

All providers of DD waiver services are required to document any allowed use of emergency safety intervention, any prohibited use of physical, mechanical or chemical restraint, and any injury to a participant caused by use of restraint in an incident report submitted to DHHS-DD in the state mandated web-based case management system. All use of emergency safety intervention must be reviewed by the participant’s ISP team.

Following submission of an incident report to DHHS-DD, agency providers must complete an investigation and submit a summary of the investigation and any follow-up action taken to DHHS-DD through the state mandated web-based case management system. The investigation must review whether restraint was used in compliance with state regulations pertaining to use of restraint and the policies and safeguards outlined in this waiver. All use of emergency safety intervention must also be reviewed by the agency provider’s rights review committee to ensure emergency safety intervention was used appropriately and was not a prohibited use of physical or mechanical restraint.

Agency providers must develop policies and procedures for use of restraints which are consistent with DHHS-DD state regulation. DHHS-DD state regulation states that any intervention which is likely to result in injury to a participant is prohibited. Provider policies and procedures must also include a quality improvement system to, monitor for use of restraint in compliance with provider policies and procedures and DHHS-DD state regulation.

Agency providers are responsible for providing training and assessing competency of employees providing direct support to participants in approved emergency safety intervention techniques as identified in the agency provider’s policies and procedures and in positive support techniques to avoid use of restraint. Training and verification of competency must be conducted by persons who are qualified by education, training, or expertise in the topic being trained. The agency provider must maintain documentation in each employee’s personnel record that training and demonstration of competency were successfully completed.

09/20/2019
Independent providers work at the direction of the participant, and must complete any training in the areas of positive behavior support and use of restraint/emergency safety intervention required by the participant. The independent provider must follow any expectations of the participant responsible for self-direction as to what type of emergency safety intervention the provider is permitted to use, if any.

Independent providers must follow all applicable regulations in use of restraints, but are not required to have written policies and procedures or a quality improvement system.

Monitoring for unauthorized or inappropriate use of emergency safety intervention, or physical, chemical, or mechanical restraint, and monitoring to ensure compliance with all applicable laws and regulations includes the following:
  • On-site certification review;
  • Review of critical incident reports;
  • DHHS-DD service coordination monitoring;
  • Complaint investigations; and
  • Quality Improvement review

Any allowed use of restraint is a rights restriction. All safeguards outlined in section G-2-b pertaining to rights restrictions apply to allowed use of restraint.

### ii. State Oversight Responsibility

Specify the state agency (or agencies) responsible for overseeing the use of restraints and ensuring that state safeguards concerning their use are followed and how such oversight is conducted and its frequency:
DHHS-DD and DHHS-PH are responsible for overseeing the use of restraints and ensuring that all safeguards and applicable statutes and regulations are followed.

On-Site Certification Review

Initial and ongoing certification of agency providers is the responsibility of DHHS-PH, and includes on-site scheduled and unscheduled certification review.

During initial provider enrollment, the provider’s policies, procedures, and actual practices are reviewed to ensure compliance with all applicable state regulations. The provider’s capacity to support participants with behavioral challenges is assessed and DHHS-PH staff also monitor for any unauthorized use of restraint. The provider must also have an internal quality review system and a rights review committee, with written policies and procedures for these processes in compliance with applicable regulation. When DHHS-PH staff finds policies and procedures that do not comply with regulatory requirements, due to prohibited intervention techniques, an insufficient quality review system, an inadequate review committee, etc., the provider is contacted for additional information or correction of policies and procedures. The provider must make revisions and resubmit to DHHS-PH prior to providing DD waiver services to participants.

Detection of unauthorized or inappropriate use of restraints may also occur through ongoing on-site certification review. During certification review, a random sample of participants served by the provider is chosen based on the total number of participants in the provider’s services, and delivery of service and agency systems are reviewed.

The frequency of on-site certification reviews is based on each provider’s current certification standing. Annual or biennial on-site certification reviews are scheduled in advance, but a focused review to address issues found through other oversight activities can occur at any time and may be unannounced. Walk-through activities are unannounced.

Review of Critical Incidents

All providers of DD waiver services are required to report any allowed use of emergency safety intervention, any prohibited use of physical, mechanical or chemical restraint, and any injury to a participant caused by use of restraint to DHHS-DD through the state mandated web-based case management system. Following submission of an incident report, agency providers must complete an investigation and submit a report on the investigation and any follow-up action taken to DHHS-DD through the state mandated web-based case management system. The provider’s internal investigation may reveal unauthorized use, overuse, inappropriate use, or ineffective use of restraint.

All incident reports are reviewed by DHHS-DD SCs within one business day to determine if follow-up is needed. Follow-up may include review of the incident by the participant’s service plan team, SC and/or SCS consultation with the provider to discuss concerns or gather additional information, or referral to DHHS-DD administration for additional review. Incidents and concerns forwarded to DHHS-DD administration from service coordination are reviewed to determine what follow-up may be appropriate. Follow-up may include DHHS-DD complaint investigation, consultation with the provider, referral to DHHS-PH for complaint investigation or certification review, or referral to DHHS-CFS if abuse, neglect, or exploitation are suspected.

If it is determined through investigation that restraint has been used in a manner that is prohibited or inappropriate, actions taken by DHHS-DD or DHHS-PH could include disciplinary action outlined in DHHS-DD state regulation. Refer to G-1 for additional information on management of critical incidents.

Service Coordination Monitoring

DHHS-DD SCs complete service monitoring for all participants at least quarterly which may detect unauthorized use of restraints. Service monitoring is intended to review the implementation of each participant’s service plan through direct observation of participants during service provision and review of records kept by providers. Observations are documented on a checklist and entered into an electronic database. In addition, the SC makes monthly contacts with participants which may include unannounced
visits to the participant’s residential or day service locations. If any concerns related to prohibited or inappropriate use of restraint are identified during service monitoring or other contacts, the SC will consult with provider staff and review participant files to determine what action should be taken to resolve the issue.

Complaint Investigations
DHHS-PH completes investigations of complaints submitted, which could include complaints related to prohibited or inappropriate use of restraint. Complaint investigations and any on-site review required may be unannounced and take place whenever investigation is necessary and appropriate.

Quality Improvement Review
DHHS-DD completes quality improvement review of service provision through off-site records review and on-site observation. These reviews may detect prohibited or inappropriate use of restraint.

Off-site records review includes review of service plans, provider program documentation, incident reports, and other records on a monthly basis for a randomly selected sample. When potential concerns are identified through off-site records review, concerns may be communicated to DHHS-DD administration, the assigned SC, or DHHS-PH for further action or investigation, or reported to DHHS-CFS if abuse, neglect, or exploitation is suspected.

On-site reviews are intended to review the implementation of a participant’s service plan through direct observation of participants during service provision and review of records kept by providers. If any concerns related to prohibited or inappropriate use of restraint are identified during service monitoring or other contacts, the reviewing staff will consult with provider staff and review participant documentation to determine what action should be taken to resolve the issue.

Quality improvement review also includes mortality review for all deaths of DD waiver service participants. These reviews would detect whether death occurred due to prohibited or inappropriate use of restraint. If concerns related to prohibited or inappropriate use of restraint are discovered during mortality review, this information would be referred to DHHS-DD administration for follow-up or referral to DHHS-PH or DHHS-CFS if appropriate.

Data analysis
The frequency of the oversight activities varies by activity and is specified for each activity outlined in this section. Data from all oversight activities is gathered and analyzed to identify state-wide trends and patterns, and to develop and support quality improvement strategies.

A summary of certification activities is reviewed semi-annually by the Quality Improvement Committee. The certification summary is an aggregate report that includes the number of certifications conducted and the frequency of compliance issues cited by type. Comparison to previous certification reviews of each provider can be made to identify any trends or patterns specific to each provider.

A summary of complaint investigations completed by DHHS-PH is submitted to DHHS-DD, and is reviewed semi-annually by the Quality Improvement Committee. The complaint investigation summary is an aggregate report that includes complaints received, investigations completed, and investigation outcomes.

On a quarterly basis, the DHHS-DD Quality Improvement Committee reviews an aggregated report compiled from the statewide database of critical incidents and events, including restraint utilization.

On a quarterly basis, the DHHS-DD Quality Improvement Committee reviews an aggregated report compiled from service monitoring completed by service coordination. This report includes information on concerns identified during service monitoring and how the concerns were addressed.

On a quarterly basis, the DHHS-DD Quality Improvement Committee reviews aggregated reports compiled from various quality improvement reviews including off-site records review, on-site observations, and mortality review. These reports include concerns identified during quality improvement reviews.
b. Use of Restrictive Interventions. (Select one):

- The state does not permit or prohibits the use of restrictive interventions

   Specify the state agency (or agencies) responsible for detecting the unauthorized use of restrictive interventions and how this oversight is conducted and its frequency:

- The use of restrictive interventions is permitted during the course of the delivery of waiver services Complete Items G-2-b-i and G-2-b-ii.

   i. Safeguards Concerning the Use of Restrictive Interventions. Specify the safeguards that the state has in effect concerning the use of interventions that restrict participant movement, participant access to other individuals, locations or activities, restrict participant rights or employ aversive methods (not including restraints or seclusion) to modify behavior. State laws, regulations, and policies referenced in the specification are available to CMS upon request through the Medicaid agency or the operating agency.
Participants in DD waiver services are entitled to the same human and legal rights guaranteed to all citizens as outlined in federal and state laws and constitutions. These rights include, but are not limited to, right to be treated with dignity and respect, right to privacy, right to autonomy, freedom of choice, freedom of access to other people, places, and activities, and freedom of movement.

Any intervention, support, or practice that limits a participant’s rights is a rights restriction. Any allowed use of restraint is considered to be a rights restriction. Rights restrictions may be implemented by DD waiver service providers at the direction of the participant’s service plan team, under the following conditions:

- Restrictions must only be used to address genuine and immediate risk to the health or safety of the participant or others, or risk that the participant may commit a violation of any federal, state, or local laws or ordinances.
- Rights must not be treated as privileges.
- Rights must not be limited without due process. For restrictions implemented by DD waiver service providers at the direction of the service plan team, due process includes team approval, informed consent of the participant, and agency provider rights review committee approval, if the restriction will be implemented by an agency provider.

To the fullest extent possible, a participant’s rights must not be limited or restricted. In the event that a restrictive intervention is considered:

- Restrictive interventions used for one participant must not affect other participants receiving services in the same setting if possible.
- Restrictive interventions must not be used as punishment, for the convenience of staff, due to shortage of staff, as a substitute for habilitation or as an element of a positive behavior support plan (BSP).
- Restrictive interventions must be the least restrictive and intrusive intervention needed to mitigate the identified risk.
- There must be a goal of reducing or eliminating the restriction.
- There must be habilitation or supports to reduce the need for the restriction.
- Prior to proposing a restrictive measure, there must be documented evidence that other, less restrictive methods have been regularly applied and were not successful in addressing the identified risk.
- The restrictive intervention must be safe for the participant.
- All restrictions implemented by a DD waiver service provider at the direction of the service plan team must be documented in the service plan.

Use of psychotropic medication may be a rights restriction. When psychotropic medication is prescribed by a physician acting within his/her scope of practice to treat a clinically recognized diagnosis of a mental disorder or medical condition when other interventions have been determined to be unsuccessful by the prescribing physician, use of psychotropic medication is not a rights restriction. Other use of psychotropic medication, including use to modify a participant’s behavior when there is no diagnosed medical condition or mental disorder, is a rights restriction. This criteria also applies to use of PRN psychotropic medication. Use of PRN psychotropic medication is permitted, but must not be used for the purpose of discipline or convenience of the provider. Additional safeguards for use and administration of PRN psychotropic medication (for both restrictive and non-restrictive use) can be found in section G-3-c-ii.

The service plan must document service plan team approval for the use of the restriction, with the following information:

- Description of the restriction, including how the restriction is to be implemented and under what circumstances;
- Rationale for use of the restriction, including the risk the restriction is intended to mitigate;
- Interventions previously attempted and determined to be ineffective;
- Summary of the risks posed by the restriction itself, including the limitation to the participant’s rights, and risk the restriction is intended to mitigate, and a comparison of all risks to ensure that the risk being mitigated outweighs the risk of the restriction itself;
- Positive habilitation to support reduction of the restriction;
- Plan and criteria for reduction or elimination of the restriction;
- Frequency that the participant’s service plan team will review the effectiveness of the plan, not less than every six months; and
- Date of last review by the agency provider’s rights review committee (not required if a restriction will
only be used by independent providers).

For restrictions involving psychotropic medication, the service plan must also include:
- Name(s) of medication
- Dosage(s) of medication
- Date of last review by prescribing physician and timeframe of recommended follow-up
- Summary of service plan team review of the medication to ensure that the medication used is the lowest therapeutic dose to meet the participant’s needs and that the medication does not interfere with the participant’s ability to participate in habilitation and activities of daily living.

For all restrictions used to mitigate an identified risk for the participant, there must be a safety plan or protocol developed by the service plan team which describes:
- The safety risk(s) being addressed by the restriction(s) and the safety plan/protocol;
- Circumstances under which the restriction(s) should be used;
- Instruction for how staff should implement the restriction(s);
- Any other non-restrictive supports or interventions which should be used to address identified risks.

For all restrictions used to mitigate an identified risk for the participant, there must be habilitation or supports to reduce the need for the restriction and support the participant to gain skills or abilities needed to mitigate the identified risk. Habilitation or supports can be provided in various ways, depending upon needs of the participant related to the risk being addressed. The following should be considered in development of habilitation and supports:
- If a restriction is being used to address risk related to identified behaviors of concern, a positive behavior support plan (BSP) to address the use of alternative strategies must be implemented to support the participant to gain skills to reduce the behaviors causing the identified risk requiring a restriction.
- If a restriction is being used to address a risk related to a lack of adaptive skills, a formal habilitation program must be implemented to support the participant to build the adaptive skills needed to mitigate the identified risk.
- If a restriction is being used to address a risk related to a participant’s medical needs or physical disabilities, supports to reduce the need for the restriction may include the physician treating the participant, any medical/nursing care available from the provider agency, any medications prescribed, or any therapies provided to improve the participant’s medical condition or physical abilities.

If a behavior support plan is required to address behavioral needs requiring use of restrictive interventions, the BSP must meet the following criteria:
- The BSP must be developed based on a functional behavioral assessment (FBA) which identifies the function of the behavior for the participant and recommends interventions and supports to address the behaviors of concern.
- The BSP describes the identified behaviors of concern and any identified antecedents and precursor behaviors to the behaviors of concern.
- The BSP includes instruction for staff in addressing behavior of concern when it occurs and teaching positive replacement behavior for the identified behavior of concern.
- The BSP must include data collection to measure frequency of behavior of concern and progress in teaching the positive replacement behavior.
- The BSP must not include use of restraint or restrictive interventions. Alternative strategies to avoid the use of restraints are documented in the safety plan.

Agency providers must obtain written informed consent from the participant for authorization to use a restriction. Emergency verbal consent may be requested if there is an urgent need to implement the restriction prior to requesting written consent. The written informed consent or emergency verbal consent must be obtained prior to implementation of the restriction. Independent providers are not required to obtain written informed consent for use of restrictions, as they work at the direction of the participant who employs them, and a participant would not direct an independent provider to use an intervention that the participant does not consent or agree to.

All providers of DD waiver services are required to document any allowed use of emergency safety intervention, which may include alternative strategies to avoid the use of restraints, in an incident report.
submitted to DHHS-DD in the state mandated web-based case management system. All use of emergency safety intervention must be reviewed by the participant’s ISP team.

Agency providers must have written policies and procedures for the use of interventions, supports, or practices that limit or restrict a participant’s rights and for the formation of a rights review committee which are consistent with DHHS-DD state regulation. Provider policies and procedures must also include a quality improvement system as specified in DHHS-DD state regulation, which would monitor to ensure use of rights restrictions in compliance with provider policies and procedures and state regulation.

Agency providers must ensure that employees responsible for using interventions, supports, or practices that limit or restrict a participant’s rights are educated and trained as required in DHHS-DD state regulation. This training includes participant rights, confidentiality, positive behavior support, approved methods of restraint, habilitation, and participant safety protocols (as applicable). The agency provider must ensure staff receive training and demonstrate competencies under the guidance of an already trained and proficient staff member prior to working alone with participants. The provider must document in each employee’s personnel record that required orientation and training was completed and competency was demonstrated.

Monitoring for unauthorized or inappropriate use of restrictions, and monitoring to ensure compliance with all applicable laws and regulations includes the following:

- On-site certification review;
- DHHS-DD Service Coordination monitoring;
- Complaint investigations; and
- Quality Improvement review

**ii. State Oversight Responsibility.** Specify the state agency (or agencies) responsible for monitoring and overseeing the use of restrictive interventions and how this oversight is conducted and its frequency:
DHHS is responsible for overseeing the use of rights restrictions and ensuring that all safeguards are followed.

On-Site Certification Review

Initial and ongoing certification of agency providers is the responsibility of DHHS, and includes on-site scheduled and unscheduled certification review.

During initial provider enrollment, the agency provider’s policies, procedures, and actual practices are reviewed to ensure compliance with all applicable state regulations. The provider’s capacity to support participants with behavioral challenges is assessed and DHHS staff also monitor for any unauthorized or inappropriate use of restrictions. The provider must also have an internal quality review system and a rights review committee, with written policies and procedures for these processes in compliance with applicable regulation. When DHHS staff find policies and procedures that do not comply with regulatory requirements, due to prohibited intervention techniques, an insufficient quality review system, an inadequate Review Committee, etc., the provider is contacted for additional information or correction of policies and procedures. The provider must make revisions and resubmit to DHHS prior to providing DD waiver services to participants.

Detection of unauthorized or inappropriate use of restrictions may also occur through ongoing on-site certification review. During certification review, a random sample of participants served by the provider is chosen based on the total number of participants in the provider’s services, and delivery of service and agency systems are reviewed.

The frequency of on-site certification reviews is based on each provider’s current certification standing. Annual or biennial on-site certification reviews are scheduled in advance, but a focused review to address issues found through other oversight activities can occur at any time and may be unannounced. Walk-through activities are unannounced.

Service Coordination Monitoring

DHHS-DD SCs complete service monitoring for all participants at least quarterly which may detect unauthorized or inappropriate use of restrictions. Service monitoring is intended to review the implementation of each participant’s service plan through direct observation of participants during service provision and review of records kept by providers. Observations are documented on a checklist and entered into an electronic database. In addition, the SC makes monthly contacts with participants which may include unannounced visits to the participant’s residential or day service locations. If any concerns related to prohibited or inappropriate use of restrictions are identified during service monitoring or other contacts, the SC will consult with provider staff and review participant files to determine what action should be taken to resolve the issue.

Complaint Investigations

DHHS-PH completes investigations of complaints submitted, which could include complaints related to unauthorized or inappropriate use of restrictions. Complaint investigations and any on-site review required may be unannounced and take place whenever investigation is necessary and appropriate.

Quality Improvement Review

DHHS-DD completes quality improvement review of service provision through off-site records review and on-site observation. These reviews may detect unauthorized or inappropriate use of restrictions.

Off-site records review includes review of service plans, provider program documentation, and other records on a monthly basis for a randomly selected sample. When potential concerns are identified through off-site records review, concerns may be communicated to Central Office staff, the assigned SC, or designated DHHS staff for further action or investigation, or reported to DHHS-CFS if abuse, neglect, or exploitation is suspected.

On-site reviews are intended to review the implementation of a participant’s service plan through direct observation of participants during service provision and review of records kept by providers. If any concerns related to unauthorized or inappropriate use of restrictions are identified during service monitoring or other...
contacts, the reviewing staff will consult with provider staff and review participant documentation to determine what action should be taken to resolve the issue.

Data analysis
The frequency of the oversight activities varies by activity and is specified for each activity outlined in this section. Data from all oversight activities is gathered and analyzed to identify state-wide trends and patterns, and to develop and support quality improvement strategies.

A summary of certification activities completed by DHHS-PH is submitted to DHHS-DD, and is reviewed semi-annually by the Quality Improvement Committee (QIC). The certification summary is an aggregate report that includes the number of certifications conducted and the frequency of compliance issues cited by type. Comparison to previous certification reviews of each provider can be made to identify any trends or patterns specific to each provider.

A summary of complaint investigations completed by DHHS-PH is submitted to DHHS-DD, and is reviewed semi-annually by the QIC. The complaint investigation summary is an aggregate report that includes complaints received, investigations completed, and investigation outcomes.

On a quarterly basis, the DHHS-DD QIC reviews an aggregated report compiled from service monitoring completed by service coordination. This report includes information on concerns identified during service monitoring and how the concerns were addressed.

On a quarterly basis, the DHHS-DD QIC reviews aggregated reports compiled from various quality improvement reviews including off-site records review and on-site observations. These reports include any concerns identified during the quality improvement review.

Appendix G: Participant Safeguards

Appendix G-2: Safeguards Concerning Restraints and Restrictive Interventions (3 of 3)

c. Use of Seclusion. (Select one): (This section will be blank for waivers submitted before Appendix G-2-c was added to WMS in March 2014, and responses for seclusion will display in Appendix G-2-a combined with information on restraints.)

The state does not permit or prohibits the use of seclusion

Specify the state agency (or agencies) responsible for detecting the unauthorized use of seclusion and how this oversight is conducted and its frequency:

- Seclusion is defined as the involuntary confinement of a participant alone in a room or an area from which the participant is physically prevented from having contact with others or leaving. Seclusion is prohibited.

- Separation is permitted as emergency safety intervention, and any separation used must not meet the definition of seclusion.

- DHHS monitors for unauthorized use of seclusion. Monitoring is described in detail in section G-2-a-ii, as the processes for monitoring for unauthorized use of seclusion are the same as those used to monitor for unauthorized or inappropriate use of restraint.

The use of seclusion is permitted during the course of the delivery of waiver services. Complete Items G-2-c-i and G-2-c-ii.

i. Safeguards Concerning the Use of Seclusion. Specify the safeguards that the state has established concerning the use of each type of seclusion. State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).
ii. **State Oversight Responsibility.** Specify the state agency (or agencies) responsible for overseeing the use of seclusion and ensuring that state safeguards concerning their use are followed and how such oversight is conducted and its frequency:

---

**Appendix G: Participant Safeguards**

**Appendix G-3: Medication Management and Administration (1 of 2)**

*This Appendix must be completed when waiver services are furnished to participants who are served in licensed or unlicensed living arrangements where a provider has round-the-clock responsibility for the health and welfare of residents. The Appendix does not need to be completed when waiver participants are served exclusively in their own personal residences or in the home of a family member.*

**a. Applicability.** Select one:

- ☐ **No. This Appendix is not applicable** *(do not complete the remaining items)*
- ☑ **Yes. This Appendix applies** *(complete the remaining items)*

**b. Medication Management and Follow-Up**

i. **Responsibility.** Specify the entity (or entities) that have ongoing responsibility for monitoring participant medication regimens, the methods for conducting monitoring, and the frequency of monitoring.
DD provider agencies have ongoing responsibility to ensure medications administered by provider staff are provided in compliance with applicable state statutes and regulations, including the Medication Aide Act, Neb. Rev. Stat. §§71-6718 - 71-6743 and 172 NAC. These statutes and regulations do not govern self-administration of medication or administration of medication by a caregiver or service provider not employed by a certified DD provider agency. Participants choosing to self-direct DD waiver services by employing independent providers are responsible for all oversight of medication provision by the providers the participants employ.

Medications administered by certified DD provider agencies may be administered by a medical professional acting within his/her scope of practice, or by a certified medication aide as delegated by a licensed medical professional who is permitted to administer medication and delegate medication administration within his/her scope of practice.

Psychotropic medications may be used and administered by providers of DD waiver services in compliance with safeguards outlined in this section and in sections G-2-a and G-2-b of this waiver.

Medical professionals prescribing medication to participants are responsible for monitoring participant medication regimens. The medical professional prescribing medication determines the frequency of his/her monitoring, based on the circumstances, including the participant’s diagnoses and current condition, the type of medication, the length of time the medication is prescribed, other medications the participant is prescribed, monitoring for the intended effect of the medication, or other factors.

Monitoring the appropriateness of each medication individually and in relation to other prescribed medications is the responsibility of the medical professional who prescribes each medication and the pharmacist who fills the prescriptions.

DD agency providers must maintain a medication administration record (MAR) for all participants receiving medications administered by the provider. These records must be kept in the state mandated web-based case management system.

DD providers must monitor administration of medication through documenting and reporting relevant information whenever the participant is receiving medical attention or treatment with provider support, to the participant, and the medical professional delegating responsibility for medication administration to a licensed medication aide (if applicable). Relevant information includes:

- Inappropriate storage conditions for medications;
- Adverse reactions or side effects to medications experienced by the participant;
- Medication administration errors; and
- Observation of the symptoms the medication is prescribed to treat.

Licensed medical professionals (typically registered nurses) whose scope of practice allows delegation of medication administration are responsible for monitoring medication administration delegated to medication aides at a frequency determined by the delegating medical professional and the DD agency provider, based on the willingness and ability of the participant to be involved in management of his/her own care, the stability of the participant’s condition, the experience and competency of the medication aide, and the level of nursing judgment required for medication administration. The licensed medical professionals are employees of the DD provider agency or who have entered into a contract with the DD provider.

Delegating medical professional and DD provider agency monitoring may include observation of the administration of medication or treatment, review of records relating to medication provision or treatment, review of incident reports related to medication or treatment errors, retraining medication aides, and ongoing observation.

When the prescribed medication is a rights restriction as specified in section G-2-b of this waiver appendix, the agency provider rights review committee reviews use of the medication at least semi-annually. Data from behavior support plans and staff observation of any behavioral or mental health symptoms the medication is prescribed to treat are reported to the rights review committee to facilitate this review.

The DD agency providers must have policies and procedures for the provision of medications in compliance with
applicable state regulation. This includes policies and procedures for internal quality improvement that includes frequency of QI monitoring. The agency provider QI monitoring includes review of medication errors to identify inappropriate or concerning practices, and follow-up action to reduce or prevent medication administration errors, such as retraining medication aides, review of provider procedures or practices, or disciplinary action.

ii. Methods of State Oversight and Follow-Up. Describe: (a) the method(s) that the state uses to ensure that participant medications are managed appropriately, including: (a) the identification of potentially harmful practices (e.g., the concurrent use of contraindicated medications); (b) the method(s) for following up on potentially harmful practices; and, (c) the state agency (or agencies) that is responsible for follow-up and oversight.
DHHS is responsible for oversight of DD agency provider compliance with all state statutes and regulations applicable to medication administration. The administration of medication is a regulated activity as a method to ensure that participant medications are managed and administered appropriately. DHHS monitors the administration of medications through review of DD agency provider policies and procedures during the initial certification process and on-site certification review activities.

When DHHS staff finds policies and procedures that do not comply with regulatory requirements, such as an insufficient QI system, inadequate incident reporting and follow-up, etc., the prospective agency provider is contacted for additional information or correction of policies and procedures. The provider must make revisions and resubmit.

During on-site certification review, which may be unannounced or scheduled, service delivery and agency systems are reviewed. A random sample of participants served by the agency provider is chosen based on the total number of participants in the provider’s services. From this certification review, DHHS staff assess whether participants are receiving medication from medication aides in accordance with physician orders and applicable state statute and regulation. When this evaluation identifies any inappropriate or prohibited practices, DHHS cites deficient practice and the provider agency must submit a formal plan of improvement addressing citations. The plan of improvement must be approved by DHHS, and if the plan is insufficient, the provider must correct the plan and resubmit.

Medication aides must be certified through DHHS and recertified as required by Neb. Rev. Stat. §§71-6718 - 71-6743. Medication aides may participate in the physical act of medication provision and related documentation as delegated by a licensed medical professional. Unlicensed persons, including medication aides, may assist with monitoring therapeutic effects of medication, under some conditions.

DHHS Division of Public Health (DHHS-PH) oversees the regulatory requirements for certification of medication aides through maintenance of the Medication Aide Registry. The training requirements for certification of medication aides are outlined in 172 NAC and include DHHS-PH approved medication aide examinations and procedures. The competency exam must assess the competency standards identified in 172 NAC. These topics include:

1. Maintaining confidentiality;
2. Compliance with a participant’s right to refuse to take medication;
3. Maintaining hygiene and current accepted standards for infection control;
4. Documenting accurately and completely;
5. Providing medications according to the five “rights” (provides the right medication, to the right participant, at the right time, in the right dose, and by the right route);
6. Having the ability to understand and follow instructions;
7. Practicing safety in application of medication procedures;
8. Compliance with limitations and conditions under which a medication aide may provide medications;
9. Having knowledge of abuse and neglect reporting requirements; and
10. Compliance with every participant’s right to be free from physical and verbal abuse, neglect, and misappropriation or misuse of property.

Upon successful completion of a medication aide training course, the applicant for certification must pass a competency test in order to be placed on the Medication Aide Registry. All medication aide certifications expire two years from the date of issue and the applicant must renew their registration to continue to be on the Medication Aide Registry.

DHHS staff are responsible for ongoing monitoring of the performance of medication aides employed by the certified agency providers. When a complaint involving the performance of a medication aide is received by the DHHS, the MAR information for medication administered by the medication aide is reviewed for compliance with the state statute and regulation. If DHHS discovers that a medication aide is not performing his/her duties in compliance with the state statute and regulation, the medication aide is removed from the Medication Aide Registry.

Appendix G: Participant Safeguards
c. Medication Administration by Waiver Providers

i. Provider Administration of Medications. Select one:

- Not applicable. (do not complete the remaining items)
- ☐ Waiver providers are responsible for the administration of medications to waiver participants who cannot self-administer and/or have responsibility to oversee participant self-administration of medications. (complete the remaining items)

ii. State Policy. Summarize the state policies that apply to the administration of medications by waiver providers or waiver provider responsibilities when participants self-administer medications, including (if applicable) policies concerning medication administration by non-medical waiver provider personnel. State laws, regulations, and policies referenced in the specification are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).
Certified DD agency providers are responsible for monitoring medication administered by provider employees and ensuring medication is administered in compliance with applicable state statutes and regulations, including the Medication Aide Act, Neb. Rev. Stat. §§71-6718 - 71-6743 and 172 NAC.

It is required that any certified DD agency provider staff administering medication to participants be licensed medical professionals or certified medication aides. Medication aides are certified to administer medication under the direction and monitoring of:

- A licensed medical professional whose scope of practice allows medication administration;
- A participant with capability and capacity to make informed decisions about medications (i.e. self-administration); or
- A caretaker of the participant. Caretaker means a parent, foster parent, family member, friend, or guardian who has current, first-hand knowledge of a participant’s health status and medications being administered, and has consistent and frequent interaction with the participant. A caretaker provides direction and monitoring and has capability and capacity to observe and take appropriate action regarding any desired effects, side effects, interactions, and contraindications associated with a dose of medication. This would not include a staff member of a facility, school, or other entity, or a guardian or family member of a participant who does not live in the same residence.

If a participant is able to self-administer his/her medication, the agency provider is not responsible for administration of or monitoring of these medications. The participant must meet the following criteria to be considered to be capable of self-administration of medication:

- Participant is 19 years of age or older;
- Participant is capable of completing the physical act of taking or applying a dose of a medication;
- Participant is capable of taking or applying the medication according to a prescription or recommended protocol;
- Participant has the capacity to observe and monitor for desired effects, side effects, interactions, and contraindications of the medication, and take appropriate action based on those observations;
- Participant receives no assistance in any way from another person for any activity related to medication administration.

The service plan team must evaluate a participant's ability to self-administer medication, and determine the level of assistance needed for medication administration.

For participants who do not have the capability and capacity to make informed decision about medications and for whom there is no caretaker, a licensed medical professional must accept responsibility for direction and monitoring of medication administration. The Nurse Practice Act, Neb. Rev. Stat. §§71-1132 - 71-1132 and 172 NAC outlines the medical professional’s responsibility and accountability for nursing actions which are delegated, directed, or assigned that may be performed by others, and all requirements for documentation and oversight.

DD state regulation specifies that direction and monitoring of medication administration by medication aides will be completed on an ongoing basis. The DD agency provider must have policies and procedures in place for monitoring medication administration by medication aides.

When the medication being administered is classified as a psychotropic medication, and it is being administered on a PRN (as needed) basis by certified agency provider staff, the following additional policies must be followed:

- PRN psychotropic medications must be prescribed by a licensed medical professional acting within his/her scope of practice.
- PRN psychotropic medication must not be used as discipline or for convenience, as use for these purposes is chemical restraint.
  - PRN psychotropic medication cannot be routinely prescribed in advance of or upon admission to a provider’s services.
  - PRN psychotropic medication must be prescribed based on clinical need, and not prescribed in advance of anticipated need.
- PRN psychotropic medication must only be used as last resort when other behavioral and medical interventions have been attempted and determined to be unsuccessful by the prescribing physician acting within his/her scope of practice.
- Use of medications classified as antipsychotics as PRN psychotropic medication must only be prescribed to treat acute symptoms of a diagnosed mental disorder, prescriptions must be time limited, and use should only
continue for the shortest amount of time necessary.

- The prescribing physician must specify:
  - Indications for use of the PRN psychotropic medication
  - If PRN psychotropic medication is prescribed with a dosage range or can be administered through more than one route, there must be comprehensive instruction for administration, including the order and frequency in which different doses or routes should be administered and specifying that the lowest possible dose must be given first.
  - Whether use of PRN psychotropic medication added to any other prescribed medication may constitute a high dose outside of standard clinical recommendations.
- Each use of PRN psychotropic medication must be reviewed by the ISP team. If PRN psychotropic medication is used more than weekly, the ISP team must review the first use in the most recent 7 days and at least every 7 days thereafter while medication continues to be used more often than weekly. This review must be documented.
- The participant or legal guardian must give specific informed consent for psychotropic medication to be administered on a PRN basis.
- The medication administration record (MAR) must contain the following information:
  - All instruction for administration given by the prescribing physician, including dose, indications, frequency.
  - Potential side effects of any PRN psychotropic medication must be documented in the MAR in non-technical terms to notify staff.
  - If prescribed PRN psychotropic medication can be administered via different routes (i.e. both intramuscularly and orally), the different routes must be documented separately in the MAR as maximum dosage for each route is different.
  - All PRN psychotropic medication administered must be documented in the MAR.
- MAR information for the last 30 days must be provided to any physician treating the patient.
- When PRN psychotropic medication is administered, the participant must be monitored by a licensed nurse or other medical professional for response to treatment, including adverse reactions, side effects, and physical health.
- Each use of PRN psychotropic medication must be reported as a critical incident by the provider.

iii. Medication Error Reporting. Select one of the following:

- Providers that are responsible for medication administration are required to both record and report medication errors to a state agency (or agencies).
  Complete the following three items:
  
  (a) Specify state agency (or agencies) to which errors are reported:

  (b) Specify the types of medication errors that providers are required to record:

  (c) Specify the types of medication errors that providers must report to the state:

- Providers responsible for medication administration are required to record medication errors but make information about medication errors available only when requested by the state.

Specify the types of medication errors that providers are required to record:

09/20/2019
Medication errors are any errors in the five “rights” of medication provision, or inaccurate or incomplete documentation of medication name, dose, route, and/or time administered.

Medication errors must be reported to the person responsible for directing and monitoring administration of medication.

Medication errors which result in injury, serious illness, hospitalization, or death must be reported as critical incidents to DHHS-DD and are monitored and reviewed through the required incident reporting process described in section G-1 of this appendix.

Medication errors suspected to be abuse or neglect must be reported to DHHS-CFS and/or law enforcement.

**iv. State Oversight Responsibility.** Specify the state agency (or agencies) responsible for monitoring the performance of waiver providers in the administration of medications to waiver participants and how monitoring is performed and its frequency.
DHHS is responsible for oversight of DD agency provider compliance with all state statutes and regulations pertaining to medication administration. The administration of medication is a regulated activity as a method to ensure that participant medications are managed and administered appropriately. DHHS monitors the administration of medications through review of DD provider policies and procedures during the initial certification process and on-site certification review activities.

When DHHS staff finds policies and procedures that do not comply with regulatory requirements, such as an insufficient QI system, inadequate incident reporting and follow-up, etc., the prospective provider is contacted for additional information or correction of policies and procedures. The provider must make revisions and resubmit.

During on-site certification reviews, which may be unannounced or scheduled, service delivery and agency systems are reviewed. A random sample of participants served by the provider is chosen based on the total number of participants in the provider’s services. From this certification review, DHHS staff assess whether participants are receiving medication from medication aides in accordance with physician orders and applicable state statute and regulation. When this evaluation identifies any inappropriate or prohibited practices, DHHS cites deficient practice and the agency provider must submit a formal plan of improvement addressing citations. The plan of improvement must be approved by DHHS, and if the plan is insufficient, the provider must correct the plan and resubmit.

DHHS-PH oversees the regulatory requirements for certification of medication aides through maintenance of the Medication Aide Registry. The training requirements for certification of medication aides are outlined in 172 NAC and include DHHS-PH approved medication aide examinations and procedures. The competency exam must assess the competency standards identified in 172 NAC.

Upon successful completion of a medication aide training course, the applicant for certification must pass a competency test in order to be placed on the Medication Aide Registry. All medication aide certifications expire two years from the date of issue and the applicant must renew their registration to continue to be on the Medication Aide Registry.

DHHS staff are responsible for ongoing monitoring the performance of medication aides employed by the certified agency providers. When a complaint involving the performance of a medication aide is received by the DHHS, the MAR information for medication administered by the medication aide is reviewed for compliance with the state statute and regulation. If DHHS discovers that a medication aide is not performing his/her duties in compliance with the state statute and regulation, the medication aide is removed from the Medication Aide Registry.

DHHS-DD monitors medication errors resulting in injury, serious illness, or hospitalization and use of PRN psychotropic medication through the critical incident monitoring process outlined in section G-1.

Data from monitoring completed by DHHS through certification review and complaint investigation and monitoring completed by DHHS-DD through critical incident reporting is reviewed by the DHHS-DD QIC at least semi-annually. Data is used to identify trends or patterns and to make recommendations of improvement strategies.

Appendix G: Participant Safeguards

Quality Improvement: Health and Welfare

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

The state demonstrates it has designed and implemented an effective system for assuring waiver participant health and welfare. (For waiver actions submitted before June 1, 2014, this assurance read "The State, on an ongoing basis, identifies, addresses, and seeks to prevent the occurrence of abuse, neglect and exploitation.")

i. Sub-Assurances:
a. Sub-assurance: The state demonstrates on an ongoing basis that it identifies, addresses and seeks to prevent instances of abuse, neglect, exploitation and unexplained death. (Performance measures in this sub-assurance include all Appendix G performance measures for waiver actions submitted before June 1, 2014.)

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:
A1 % of participants reviewed who received information/education about how to identify & report abuse, neglect exploitation & other critical incidents as specified in the approved waiver. N: # of participants reviewed who received info/education about how to id & report abuse, neglect exploitation & other critical incidents as specified in the approved waiver; D: # of participants reviewed.

d. Sub-assurance: The state establishes overall health care standards and monitors those standards based on the responsibility of the service provider as stated in the approved waiver.

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:
D.1. Percent of service plans reviewed that document the service provider is mitigating the high risk(s) identified in the annual needs assessments. Numerator: Number of service plans reviewed that document the service provider is mitigating the high risk(s) identified in the annual needs assessments. Denominator: Number of service plans reviewed.

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

Strategies employed by DHHS to discover and identify problems or issues within the waiver program including agencies responsible and timelines are summarized in sections G-1-b, G-1-d, G-1-e, G-2-a-ii, G-2-b-ii, G-3-b-ii, G-3-c-iii, and G-3-c-iv.

• The sample size for this review is determined by the calculation tool provided by Raosoft, Inc. (http://www.raosoft.com/samplesize.html) assuming a 95% confidence level, a 5% margin of error, and a response distribution of 50%.

b. Methods for Remediation/Fixing Individual Problems
   i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.
DHHS-DD has processes in place to address specific problems upon discovery.

DHHS-DD staff review a sample of service plans and supporting documentation to ensure the service plan reflects the participant's needs, supports, preferences, and personal and career goals. Staff ensure that the service plan is based on assessments of the participant’s needs and abilities, and that health and safety issues are addressed. When potential issues are discovered, the SC and his/her SCS are notified and take action to correct the service plan. If issues are discovered that may affect the waiver status of the participant, the SC is notified and may be given a timeframe to address the issue.

DHHS-DD service coordination monitors the implementation of the service plan to ensure the timely and effective delivery of all services specified in the service plan for the participant. Service monitoring is completed at least quarterly. Service provision is also monitored on an ongoing basis, through the SCs routine contacts with the participant and in response to concerns expressed by the participant, his/her guardian, or others.

When issues or problems are identified during service monitoring, the SC documents the issue and a plan to address the issues identified. The plan to address issues may include a team meeting, the facilitation of sharing information between the participant, manager of services, and/or providers, etc. A timeline to address the issues and/or a service plan team meeting date is noted on the monitoring form as well as whether the issues were resolved within the timeline.

Reviews of the service plan and results of service monitoring are documented and entered into a database. This allows DHHS-DD to track issues that aren’t resolved and to use data in an aggregate form to review performance, and identify trends and patterns.

Data is summarized and reviewed by the DHHS-DD QIC quarterly. The summarized data from service plan reviews is shared with service coordination staff. The implementation data summary is shared with service coordination, providers and DDD Central Office staff.

Providers are required by state statute to report any suspected or alleged abuse, neglect, or exploitation of participants to DHHS-CFS and/or law enforcement. Reports of alleged or suspected abuse, neglect, or exploitation of participants made to DHHS-CFS which do not meet statutory definitions of abuse, neglect or exploitation are shared with DHHS within 24 hours of receipt. DHHS staff review the information and determine what action should be taken.

The critical incidents are reported through the state mandated web-based case management system, which allows DHHS-DD to review and aggregate data related to reported critical incidents. Quarterly, providers submit a report to DHHS-DD summarizing critical incidents for the quarter and actions taken both on a participant and provider-wide level to address the issue and to decrease the likelihood of future incidents. A summary of all reported critical incidents and actions taken are compiled into a report reviewed quarterly by the DHHS-DD QIC. The DHHS-DD QIC determines the need for systemic follow-up and additional areas requiring investigation and/or DHHS-DD administrative intervention.

### ii. Remediation Data Aggregation

| Remediation-related Data Aggregation and Analysis (including trend identification) |
|-----------------------------------------|-----------------------------------------|

09/20/2019
c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Health and Welfare that are currently non-operational.

☐ No

☐ Yes

Please provide a detailed strategy for assuring Health and Welfare, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix H: Quality Improvement Strategy (1 of 3)

Under §1915(c) of the Social Security Act and 42 CFR §441.302, the approval of an HCBS waiver requires that CMS determine that the state has made satisfactory assurances concerning the protection of participant health and welfare, financial accountability and other elements of waiver operations. Renewal of an existing waiver is contingent upon review by CMS and a finding by CMS that the assurances have been met. By completing the HCBS waiver application, the state specifies how it has designed the waiver’s critical processes, structures and operational features in order to meet these assurances.

- Quality Improvement is a critical operational feature that an organization employs to continually determine whether it operates in accordance with the approved design of its program, meets statutory and regulatory assurances and requirements, achieves desired outcomes, and identifies opportunities for improvement.

CMS recognizes that a state’s waiver Quality Improvement Strategy may vary depending on the nature of the waiver target population, the services offered, and the waiver’s relationship to other public programs, and will extend beyond regulatory requirements. However, for the purpose of this application, the state is expected to have, at the minimum, systems in place to measure and improve its own performance in meeting six specific waiver assurances and requirements.

It may be more efficient and effective for a Quality Improvement Strategy to span multiple waivers and other long-term care services. CMS recognizes the value of this approach and will ask the state to identify other waiver programs and long-term care services that are addressed in the Quality Improvement Strategy.

Quality Improvement Strategy: Minimum Components

The Quality Improvement Strategy that will be in effect during the period of the approved waiver is described throughout the waiver in the appendices corresponding to the statutory assurances and sub-assurances. Other documents cited must be available to CMS upon request through the Medicaid agency or the operating agency (if appropriate).

In the QIS discovery and remediation sections throughout the application (located in Appendices A, B, C, D, G, and I) , a state spells out:

- The evidence based discovery activities that will be conducted for each of the six major waiver assurances; and
The remediation activities followed to correct individual problems identified in the implementation of each of the assurances.

In Appendix H of the application, a state describes (1) the system improvement activities followed in response to aggregated, analyzed discovery and remediation information collected on each of the assurances; (2) the correspondent roles/responsibilities of those conducting assessing and prioritizing improving system corrections and improvements; and (3) the processes the state will follow to continuously assess the effectiveness of the OIS and revise it as necessary and appropriate.

If the state's Quality Improvement Strategy is not fully developed at the time the waiver application is submitted, the state may provide a work plan to fully develop its Quality Improvement Strategy, including the specific tasks the state plans to undertake during the period the waiver is in effect, the major milestones associated with these tasks, and the entity (or entities) responsible for the completion of these tasks.

When the Quality Improvement Strategy spans more than one waiver and/or other types of long-term care services under the Medicaid state plan, specify the control numbers for the other waiver programs and/or identify the other long-term services that are addressed in the Quality Improvement Strategy. In instances when the QIS spans more than one waiver, the state must be able to stratify information that is related to each approved waiver program. Unless the state has requested and received approval from CMS for the consolidation of multiple waivers for the purpose of reporting, then the state must stratify information that is related to each approved waiver program, i.e., employ a representative sample for each waiver.

Appendix H: Quality Improvement Strategy (2 of 3)

H-1: Systems Improvement

a. System Improvements

   i. Describe the process(es) for trending, prioritizing, and implementing system improvements (i.e., design changes) prompted as a result of an analysis of discovery and remediation information.
The stated purpose of the Medicaid Home and Community Based Services (HCBS) Waivers quality improvement strategy (QIS) is to ensure the health and safety of participants through continuous participant-focused monitoring and improvement by implementing and sustaining a system of quality management and improvement strategies.

The Medicaid HCBS Waiver Framework provides guidance as to the DHHS-DD process for monitoring the safeguards and standards under the waiver. A set of key principles guide the QIS and are contained in the DHHS-DD Medicaid HCBS QIS document. The DHHS-DD QIS uses an evidence-based tiered approach which includes a number of activities and processes at both the local and state levels. This system has been developed to discover whether the federal waiver assurances are being met, to remediate identified problems, and to carry out quality improvement.

The DHHS-DD quality improvement (QI) efforts for DHHS-DD waiver services are coordinated through the DHHS-DD Quality Improvement Committee (QIC) comprised of representatives from DHHS-DD Central Office, DHHS Medicaid (DHHS-MLTC), and DHHS-DD service coordination. The QIC meets quarterly and reviews data and reports including, but not limited to, statewide monitoring, critical incidents, complaints and investigations, Medicaid HCBS waiver assurances, service utilization, post-payment claims, and certification surveys to identify trends and consider statewide changes that will support service improvement.

The continuing efforts are to oversee and refine the formal design and implementation of QI systems that allow for systematic oversight of services across the state by the QIC, while ensuring utility of the information at the local level. A regular reporting schedule has been developed to ensure regular review of the results of the various QI functions. The minutes of QIC quarterly meetings document review of reports and data, identification of areas of concern, and recommendations and assignment of tasks for remediation, both to address issues that have been identified and to proactively decrease the likelihood of similar problems occurring in the future. A continuous evaluation component is built into the system for evaluation of utility, information received, and effectiveness of strategies.

The QIC receives reports and information and provides/shares feedback and support to the DHHS-DD service districts. The DHHS-MLTC representative verbally reports activities of the QIC to his/her administrator and/or the Medicaid Director and makes all meeting minutes and reports available for his review.

DHHS-DD Central Office staff design and monitor services, including specific performance related to service and remediation. Discovery methods under DHHS-DD Central Office are: expenditure and utilization monitoring; technical assistance; professional research, observation and insight; and analysis of data sources.

The DHHS-DD QI staff provides systemic review of program outcomes and standards compliance to establish continuous improvement. Discovery methods under QI include reviewing electronic participant data, conducting file reviews; National Core Indicators (NCI) participant surveys; and oversight of field office supervisory efforts. For reviews completed using a representative sample, sample size is determined by using the calculation tool provided by Raosoft, Inc. (http://www.raosoft.com/samplesize.html) assuming a 95% confidence level, a 5% margin of error, and a response distribution of 50%, or by using a risk-based quality control sampling plan based on MIL-STD-1916 or ANSI/ASQ Z1.4.

Both DHHS-DD Central Office and QI staff are involved in discovery related to mortality review, complaints, incident reports, and data collection and analysis. QI reports include: mortality review data, appeals data, supervisory file review data, central office file review data, incident data, state-mandated web-based case management system reports, post-payment claims, and service authorization data. These reports, the following are compiled by DHHS-DD staff and analyzed by the DHHS-DD administration and the QIC at least annually and as needed. If a provider is cited during certification review or complaint investigation it is determined that a plan of improvement is required, DHHS staff monitor the plan of improvement to assure completion.

In order to assure protections, services, and supports on a systems level, DHHS has established a formal certification and review process in accordance with state regulations, and Medicaid HCBS waiver requirements for provider agencies offering DD waiver services. This certification process includes certification and service reviews of certified agency providers and programs by DHHS surveyor in accordance with the provisional, 1-year, or 2-year certifications issued by DHHS. The purpose of the reviews is to identify gaps and weaknesses, as well as strengths, in services provided on a statewide level. In order to ensure continued certification as an agency...
provider of DD waiver services, when providers are cited during certification review or complaint investigations, a formal plan of improvement may be required to ensure remediation circumstances leading to citation that must be addressed. On an ongoing basis, critical incidents and complaints associated with certified providers which have been reported to DHHS-DD are reviewed and appropriate levels of follow-up are conducted.

Quality improvement for the purpose of statewide systemic program enhancement occurs through a variety of activities, including:

- Training and staff development may be offered or required for DHHS-DD staff, to remediate identified issues, inform and educate staff on changing regulations, policies, procedures, etc., and provide opportunities for continued staff growth and education.
- Development of policy and operational guidelines to revise or clarify existing program expectations, or communicate new program expectations as needed for continuous program improvement.
- Development of informational materials, including written guidance for DHHS-DD staff and providers and reference materials for current or prospective participants and the public.
- Researching national trends and best practices in the field of developmental disabilities and applying information gathered to continuous quality improvement activities or recommendations.
- Remediation of specific issues by DHHS-DD staff. DHHS-DD staff involved in remediation activities may vary, depending on the nature and scope of the identified issue.
- The DHHS-DD Quality Improvement Strategy (QIS) outlines a structured process for continuous assessment, monitoring, measuring, and evaluating operational and person-centered outcomes of DD waiver service delivery. The QIS also outlines DHHS-DD collaboration with other DHHS divisions and the Governor’s Advisory Committee on Developmental Disabilities for continuous quality improvement.

### b. System Design Changes

i. Describe the process for monitoring and analyzing the effectiveness of system design changes. Include a description of the various roles and responsibilities involved in the processes for monitoring & assessing system design changes. If applicable, include the state's targeted standards for systems improvement.
DHHS-DD, in partnership with DHHS-MLTC, is responsible for monitoring and assessing system design changes, collecting and analyzing information, determining whether the waiver requirements and assurances are met, ensuring remediation, and planning system improvement activities. The DHHS-DD Director and DHHS-DD staff, is responsible for coordinating the development, implementation and monitoring of any system design changes. The DHHS-DD Director works closely with the DHHS-DD QIC to assure the appropriate identified priority system issues are developed, implemented and monitored to assure system change occurs. Annual data is aggregated and compared to the previous baseline evidence to determine if the identified system change is effective.

As described in section H-a-i of this waiver, DHHS-DD has in place a quality improvement system that includes monitoring for issues and remediation of identified concerns. In turn, this process leads to system improvement. This is an ongoing, circular system with components of design, discovery, remediation, and operational improvement. DHHS-DD QI staff, in consultation with the DHHS-DD Director, review the quality improvement strategies on an ongoing basis, but no less frequently than quarterly, to adjust program outcomes, determine the need to modify data sources and to develop other methods to evaluate progress and services.

DHHS-DD QI staff fulfill the lead role in guiding this improvement along with input from DHHS-DD services coordination, DHHS-DD Central Office staff, and other divisions of DHHS. Specific activities are as follows:

1. Process of Aggregating Data and Monitoring Data Trends
The majority of waiver Performance Measure data is aggregated through queries from state mandated web-based case management systems and electronic records where data are entered directly by the worker or reporter.

For data that is not entered directly into a system, data is derived from individual source documents such as audits of files or certification reports and manually tabulated as necessary.

In addition to Medicaid HCBS DD waiver performance measure data, the following data points are monitored on a quarterly basis:
- Service coordination timelines;
- Wait list management and timelines;
- Service authorizations; and
- Prevention of incidents.

2. Report Formats
Quality reports include: mortality review data, appeals data, supervisory file review data, Central Office file review data, critical incident data, electronic participant data system reports, post-payment claims data, and service authorization data. These reports reflect information via graphs, tables, and narratives. QIC minutes display meeting topics and discussion, as well as action plans or follow-up categorized by performance measures.

3. Communicating Results
Aggregate data is shared through the QIC with DHHS-DD administration, service coordination, and other stakeholders. Data reports are submitted as requested to CMS representatives. Quality data is presented at stakeholder meetings (e.g., Nebraska Association of Service Providers, DD Council, DD Advisory Committee, and DHHS HCBS stakeholder meetings).

4. Using Data for Implementing Improvement
Data is reviewed on at least a quarterly basis through the QIC. Appropriate recommendations, action plans and follow-up are documented in the QIC minutes.

5. Assessment of the Effectiveness of the QI Process
Evaluations of the effectiveness of the QI process are done by analyzing remediation activities, determining if timelines and outcomes are being met and the success level in addressing the original concern. In addition, effectiveness is also measured through the relevancy that collected data has in providing useful information on the timeliness and quality of services provided through waiver services; data is not collected for its own sake but rather to measure areas that require maintenance of effort or improvement in service operations and delivery.

The DHHS-DD administration is responsible for coordination of monitoring and analysis of system design
changes. The administration works in conjunction with the QIC and the DHHS-DD staff to develop methods of evaluation when implementing system design changes. The goal is to clearly define the outcome desired as a function of the system change and to allow the gathering of data and other information related to the state of affairs prior to the system change.

In cases where this is not practicable, efforts are made to develop alternate strategies to capture information post hoc that will allow a determination of whether the outcome was met. In those cases, it is more difficult to attribute the outcome measurement directly to the systems changes than when adequate baseline measures can be compared to measures taken following the system change.

An example of the development and monitoring of systems changes strategies was the decision to utilize a contracted vendor web-based case management system used for budgeting, case management, and reporting incidents. The use of the web-based application and electronic records has improved the methods of data collection and aggregation.

ii. Describe the process to periodically evaluate, as appropriate, the Quality Improvement Strategy.

Quality improvement staff, program management staff, and administrative staff DHHS-MLTC and DHHS-DD evaluate the effectiveness of the waiver quality improvement system on an ongoing basis. Quality improvement strategies stratify information for each respective waiver for all services funded by DHHS-DD, including the services offered under the Medicaid HCBS DD waivers 0394 and 4154, as well as services funded by state general funds only. DHHS-MLTC oversees the implementation of the Medicaid State Plan so all identified State Plan system issues are relayed to MLTC staff responsible for services under the Medicaid State Plan.

The evaluation of DHHS-DD’s quality improvement strategy involves assessing the effectiveness of the system in improving the quality of services as well as comparing the system to best practices. If efforts to improve the quality of services are not effective, additional analyses are conducted to identify weaknesses in the current quality improvement strategy. These analyses aid in identifying potential changes to improve the efficacy of the overall system. In addition, the QIC provides an additional review of the effectiveness of the quality improvement strategy and makes recommendations for improvement.

The quality improvement strategy is evaluated on various levels in a systematic basis. Information reviewed by the QI committee is reviewed to assess the reliability and thus, validity of the information being presented each time a committee meeting is held.

There is also a self-correcting nature based on strategies used to effect systems change. As the quality improvement strategy has become more mature, the development of remediation strategies becomes influenced by the history of prior efforts. The historical access to and cooperation with various levels of personnel and resources as well as the efficacy of historical strategies all influence the development of new remediation strategies. The QI strategies are evaluated at a minimum once during the waiver period and prior to renewal.

Just as the assumption is that services can always be improved, the same concept also holds with the quality improvement strategy. Efforts are continually made to identify areas of improvement. These include modifying data collection systems to reduce error and increase the validity of the information gathered, developing additional monitoring systems to ensure the maintenance of system improvements and eliciting additional feedback from agencies and providers regarding quality improvement issues. New technology also leads to system changes and improvements in quality improvement strategies. As new and updated web applications become available, data and processes for gathering and analyzing data are reviewed and may lead to new strategies.

Appendix H: Quality Improvement Strategy (3 of 3)

H-2: Use of a Patient Experience of Care/Quality of Life Survey

a. Specify whether the state has deployed a patient experience of care or quality of life survey for its HCBS population in the last 12 months (Select one):

○ No
Yes (Complete item H.2b)

b. Specify the type of survey tool the state uses:

- [ ] HCBS CAHPS Survey :
- [ ] NCI Survey :
- [ ] NCI AD Survey :
- [ ] Other (Please provide a description of the survey tool used):

Appendix I: Financial Accountability

I-1: Financial Integrity and Accountability

Financial Integrity. Describe the methods that are employed to ensure the integrity of payments that have been made for waiver services, including: (a) requirements concerning the independent audit of provider agencies; (b) the financial audit program that the state conducts to ensure the integrity of provider billings for Medicaid payment of waiver services, including the methods, scope and frequency of audits; and, (c) the agency (or agencies) responsible for conducting the financial audit program. State laws, regulations, and policies referenced in the description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).
Financial accountability and integrity are joint responsibilities of the Department of Health and Human Services (DHHS) Division of Developmental Disabilities (DHHS-DD) with assistance from, Medicaid and Long-Term Care (DHHS-MLTC), and the DHHS Financial Services unit.

DHHS-DD is responsible to ensure the integrity of the service authorization and claims processes. DHHS-DD staff authorizes services using a state mandated web-based case management system which edits individual claims, suspends inaccurate claims, and tracks the participant’s utilization of waiver services.

The DHHS-DD Program Accuracy Specialists are responsible for conducting the post payment reviews. Reviews are conducted quarterly using the random sampling noted below.

The sampling plan developed is based on MIL-STD-1916. The sampling plan used for these PMs is as follows.

1) A file is produced with all paid claims with dates of service in the prior quarter allowing three months for providers to bill (i.e. a file for dates of service between 1/1/2019 – 3/31/2019 is produced in early July 2019).
2) The claims are stratified and a sample size is determined based on the number of claims processed in the quarter. The claim populations are considered monthly so that an adequate number of claims are inspected to meet the number needed for a 95/5/50 sample. This results in approximately 6,000 paid claims in population, 96 sampled and inspected.
3) Annually, this results in approximately 24,000 paid claims in population, 384 inspected.

The Raosoft sample size calculator indicates a sample size of 384 would be required to achieve the 95/5/50 sample for a population of 144,000. For 24,000, it indicates a sample size of 379 for a 95/5/50 sample. The numbers sampled and inspected are adequate to meet this level for both waivers.

The advantages of using MIL-STD-1916 to stratify the sample across providers where the state is spending a substantial amount of its HCBS funding include:

• Ensuring that each of these providers is looked at each quarter allows for earlier identification if there is an issue specific to a provider,
• Allows us to tighten the sampling plan for a provider where issues are identified to inspect a greater proportion of its claims. This provides for an approach to sampling that is risk-based depending on whether or not the provider is meeting the requirements.

For the post-payment reviews, all paid claims are included in the population from which the random sample is drawn. Claims can become part of the sample 90 days after the date of service. Claims for all services are audited in the same manner. Onsite reviews are not conducted for claims reviewed with this process.

If overpayments are discovered, the provider is contacted and provided the opportunity to provide additional information to substantiate their claim. The additional information is reviewed and the provider is notified of findings which can include the requirement to initiate repayment of funds.

The state mandated web-based case management system identifies inaccurate authorizations, claims and trending data, and DHHS-DD supervisory and management staff utilize this data to determine follow up with service coordination staff to correct errors in service authorizations or conduct monitoring activities to determine if authorizations are sufficiently linked to service delivery. This data may also lead DHHS-DD staff to conduct financial reviews of provider claims when concern is raised through monitoring, certification activities by DHHS DD Surveyors, or complaint investigations.

The DHHS Financial Services unit tracks audit reports, operates the cost allocation plan, prepares and monitors budget projections for the DHHS-MLTC and DHHS-DD, prepares federal and state reports as required, and prepares the CMS-64 reports.

(a) Describe the requirements concerning the independent audit of provider agencies.

DD agency providers are required to do an annual audit of their operations. The scope of these independent audits includes a review of the accounting systems of the agency in order to assess if the financial statements provide an accurate representation of its financial position and are free from material misstatement.

These independent audits are submitted to Financial Services and are reviewed by an analyst for any audit findings or exceptions that might affect State payments by or for the provider.

Independent providers and agency providers that have annual operating budgets of less than $200,000 are not required to provide an independent audit. However, these providers are required to retain financial and statistical records to support
and document all claims.

Services that are delivered by independent providers rather than agency providers do not require an independent audit. Independent providers are required to retain financial and statistical records to support and document all claims.

(b) Describe the financial audit program that the state conducts to ensure the integrity of provider billings for Medicaid payment of waiver services, including the methods, scope and frequency of audits.

Claims for all services are audited in the same manner.

Medicaid HCBS DD waiver providers submit billings through a state mandated web-based case management system. A pre-audit of all provider claims is completed to assure the accuracy of coding and billing. Supporting electronic documentation, including electronic recording of time-in and time-out, program data records, or other documentation as determined by DHHS-DD must be available to DHHS-DD staff upon request. The provider must maintain electronic or paper records and documentation in sufficient detail to allow DHHS-DD program accuracy staff to verify delivery of service to participants as certified on the electronic claim.

Audits of provider claims may be conducted in response to concerns raised by a review of electronic data, trending reports, complaints, or certification reviews. DHHS-DD central office staff will review documentation to support the claim for services. This documentation may include, but is not limited to, the provider claim, electronic recording of time-in and time-out, service authorizations, electronic service utilization data, and the service plan. When issues are found that may be considered fraudulent claims; those issues are referred to the DHHS Medicaid Surveillance and Utilization Review Unit, or the Medicaid Fraud Control Unit of the Nebraska Department of Justice Office of the Attorney General.

DHHS-DD also conducts internal quality assurance activities related to the use of funding. Billing and authorization data is queried monthly to track trends in costs and service use by area, provider and statewide.

Nebraska does not review all claims. For its quality assurance activities Nebraska reviews a statistically valid random sample:

- Post-audit activities associated with audits of provider claims occur as needed.
- Post-audit activities associated with quality assurance activities occur quarterly.
- Post-audit activities associated with the monthly queries to track trends occur as needed.
- Post-audit activities associated with Financial Services tracking occurs as needed.
- Post-audit activities associated with Auditor of Public Accounts audits occur annually.

Financial Services track the use of Medicaid funding and provide monthly updates on the use of Medicaid HCBS DD waiver funding relative to the budgeted amounts. This aids DHHS-DD in determining the efficacy of efforts to enhance our monitoring and oversight of the use of waiver funding.

(c) Describe the agency (or agencies) responsible for conducting the financial audit program.

The State Auditor and DHHS are responsible for conducting these financial audits. The Nebraska Auditor of Public Accounts (APA) is responsible for conducting the periodic independent audit of the waiver program under the provisions of the Single Audit Act. The State Auditor conducts the audits on an annual basis.

Appendix I: Financial Accountability

Quality Improvement: Financial Accountability

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Financial Accountability Assurance:

The State must demonstrate that it has designed and implemented an adequate system for ensuring financial accountability of the waiver program. (For waiver actions submitted before June 1, 2014, this assurance read "State financial oversight exists to assure that claims are coded and paid for in accordance with the reimbursement methodology specified in the approved waiver.")

i. Sub-Assurances:
a. Sub-assurance: The State provides evidence that claims are coded and paid for in accordance with the reimbursement methodology specified in the approved waiver and only for services rendered. (Performance measures in this sub-assurance include all Appendix I performance measures for waiver actions submitted before June 1, 2014.)

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

**Performance Measure:**
**A.1.** Percent of paid claims reviewed that were paid in accordance with the reimbursement methodology specified in the approved waiver. Numerator = Number of paid claims reviewed which were paid in accordance with the reimbursement methodology specified in the approved waiver. Denominator = Number of paid claims reviewed.

**Data Source** (Select one):
**Other**
If ‘Other’ is selected, specify:

**Record reviews: on and off site**

ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.
Quarterly off-site file reviews are conducted by DHHS-DD program accuracy staff (PAS). This review is conducted on a sample of files to ensure activities are being applied correctly, and that reviews and remediation activities are completed as assigned. The sample size for this review is determined by the calculation tool provided by Raosoft, Inc. (http://www.raosoft.com/samplesize.html) assuming a 95% confidence level, a 5% margin of error, and a response distribution of 50%. PAS are responsible for reporting all individual problems requiring remediation identified during discovery processes to supervisory staff. This information is summarized and reviewed by the DHHS-DD Quality Improvement Committee (QIC) quarterly.

An independent statewide single audit of DHHS is conducted by the State APA office on an annual basis following each state fiscal year (July 1 - June 30). This is an audit of the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Nebraska. The final report includes APA’s findings, DHHS management responses and corrective action plans, if applicable. Financial services staff respond to findings related to the State’s accounting systems. DHHS-DD staff responds to findings related to review of randomly selected participant waiver files.

The APA reviews the waiver files for compliance with the state’s regulations. The APA reviews the State’s electronic information systems for inclusion of the waiver consent form, service plan, and waiver evaluation or reevaluation worksheets. The APA office also reviews the electronic claim and service authorization that corresponds with the service dates being tested. The authorization and billing documents are checked for accuracy of service codes and service rates, as well as for agreement with the service plan documentation. Please see Appendix I-1, I-2-b, I-2-d, I-3, and I-5 for additional information on strategies employed by the state for checks and balances and discovery of systemic issues.

b. Methods for Remediation/Fixing Individual Problems

i. Describe the State’s method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

The participant’s DHHS-DD Service Coordinator (SC) has primary responsibility for discovery and remediation of individual problems. Discovery processes include: monitoring; conducting supervisory file reviews; reviewing incidents; and following up on complaints.

Participants are notified in writing or electronically of the authorized funding amount at the time of choosing a provider and in the development of the service plan. Checks and balances described in sections I-1, I-2, and I-3 are in place to assure accurate authorizations. The team determines the provider, amount, and type of services needed. The participant’s SC authorizes the services. When discrepancies are found, designated DHHS-DD staff take action to correct errors in the authorization, such as correcting the provider, service type, service amount, and/or dates of services. A pre-audit of all provider claims is completed to assure the accuracy of coding and claim.

The continuing efforts are to oversee and refine the formal design and implementation of quality improvement systems that allow for systematic oversight of services across the state by the QIC, while ensuring utility of the information at the local service coordination level. Quarterly reporting has been developed to ensure regular review of the results of the various QI functions. The report shows an empirical data review of results and recommendations for remediation, both to address issues that have been identified and to proactively decrease the likelihood of similar problems occurring in the future.

c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Financial Accountability that are currently non-operational.

- No
- Yes

Please provide a detailed strategy for assuring Financial Accountability, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix I: Financial Accountability

I-2: Rates, Billing and Claims (1 of 3)

a. Rate Determination Methods. In two pages or less, describe the methods that are employed to establish provider payment rates for waiver services and the entity or entities that are responsible for rate determination. Indicate any opportunity for public comment in the process. If different methods are employed for various types of services, the description may group services for which the same method is employed. State laws, regulations, and policies referenced in the description are available upon request to CMS through the Medicaid agency or the operating agency (if applicable).
Current rates for services on this waiver were last reviewed in 2017. CMS approved the renewal of this waiver in 2017 with the condition that the state complete a comprehensive rate methodology study. In December 2016, the Division of Developmental Disabilities (DDD) contracted with Optumas Consulting to develop a rate methodology process for fee-for-service rates for DDD’s HCBS waivers. DDD built the proposed rates by estimating the total costs incurred by providers to deliver developmental disabilities (DD) services. Each DD service has its own individual rate model. The models begin with an estimate of the cost of direct labor required to provide the specific service. The rate that accounts for the total cost of the service is determined by applying factors to this direct labor cost.

Rate factors were determined by a few mechanisms including the review of actual costs documented in the general ledgers (GL) of the accounting systems of 12 providers. The GL data reviewed included actual revenue and expense data for a representative sample of DD service providers for Nebraska state fiscal year 2016 (July 1, 2015 – June 30, 2016). DDD commenced the review in March 2017 and completed it in September 2017. All costs were categorized into the rate factors and care was taken to identify unallowable expenses, including room and board and fundraising expenses, and exclude these from consideration in the rate factors. Other activities used for determining rate factors were completed concurrently with the GL review and included:

- A staff training survey administered to members of the Provider Advisory Group (PAG, description below),
- A review of payroll data submitted by a representative sample of 12 providers, and
- A residential group home staffing survey.

These reviews were conducted for the purpose of studying and, if necessary, rebasing rates for providers. DDD intends to perform comparable reviews on an on-going, periodic basis for the purpose of determining the adequacy of rates. DDD intends to study rates and, if necessary, rebase rates every 5 years. The frequency of the reviews will be at least every 5 years for rate rebasing purposes but may be more frequent depending on availability of resources.

The methodology for estimating the direct labor cost and all of the factors in the rate model are explained below:

1) Direct Labor Cost:

The cost of direct labor for each service is based on the staffing requirements for the service and the classification of the employee. For each classification, an appropriate employment classification from the 2016 Bureau of Labor Statistics (BLS) was selected. Most of the services use the classification of Social and Human Service Assistants for direct care staff. Wages are inflated from the BLS data using the Consumer Price Index to account for inflation from the time when this data was collected to the anticipated implementation of this rate model.

2) Employee Related Expenses (ERE):

This includes costs associated with employees of DD service providers. These costs include FICA, retirement, unemployment compensation, health/dental/life insurance, and short and long term disability insurance. The ERE factor is based on actual costs in general ledger (GL) data submitted by providers.

3) Availability Factor:

This factor compensates providers for paid direct care staff time for non-billable activities including recordkeeping, reporting, training, and meetings. Additionally, it also compensates providers for paid time off for direct staff (holidays, sick, vacation) and overtime hours. The factor is based on payroll data submitted by a representative sample of DD service providers for Nebraska state fiscal year 2016 and a training survey administered to the PAG.

4) Mileage:

This factor compensates providers for mileage while transporting the individual as part of waiver services. The rate is based on the 2018 rate published by the Internal Revenue Service for reimbursement of employees for personal vehicle usage.

5) Program Support:

This factor is intended to cover the supports around direct care specific to the provision of services (as opposed to
general and administrative expenses). Examples include clinical supports, nursing costs, and rent/maintenance associated with a building used for the delivery of service. It does not include costs for staff who have direct contact with the waiver participant as these costs are accounted for in the direct labor cost component. This factor was estimated based on GL data submitted by providers.

Rent expense included in the rate model were categorized based on how they were recorded in the GL data. For buildings that housed both program activities and support staff, the expense was split into program support and administration.

6) Administration:

This factor is intended to cover general and administrative expenses for the providers. These include indirect costs such as rent/depreciation, salaries & benefits, & background checks for staff for functions such as human resources, finance and accounting, and quality improvement. This factor was estimated based on GL data submitted by providers.

DDD solicited feedback from stakeholders via the following three structured mechanisms:

1) Establishment of a Provider Advisory Group (PAG) consisting of agency providers of DD services

This group consisted of 12 Agency providers that volunteered to provide feedback to DDD during the rate development process. DDD solicited feedback from the PAG via recurring meetings and requests for feedback following major milestones in the rate development process (e.g. introduction of new service definitions, presentation of draft rate models, etc.). The feedback provided by the PAG helped to inform assumptions in the rate model including staffing ratios in group homes, training requirements for direct care staff, and “sloping” (i.e. adjusting the magnitude) of factors in the rate model for tiered services based on participant acuity level.

2) Independent Provider Meetings

Meetings were held with Independent Providers on March 27, 2018. Two sessions (afternoon and evening) were held to provide flexibility for attending these meetings. Independent providers could attend in-person in Lincoln, NE or via WebEx. DDD presented draft rate methodology and service definitions and solicited feedback from independent providers in these sessions.

3) Public Stakeholder Meeting

A two-hour public stakeholder meeting was held on June 19, 2018. Participants in this meeting included parents & guardians of waiver participants, service providers, and representatives from advocacy groups for individuals with developmental disabilities. The meeting provided an opportunity to present information about the rate development process to this audience and solicit feedback on the process.

DDD developed rates specific to independent providers based on stakeholder feedback and the goal of providing participants with additional options. DDD established independent provider rates to reflect additional habilitation opportunities for self-directed services and provider qualifications for habilitative services. The rate models for independent providers have different assumptions to compensate for differences compared to agency providers. The ERE, staff availability factor, mileage, administration and program support factors are all lower for independent providers. The ERE factor for independent providers is set lower to cover only FICA taxes. The staff availability factor includes allowances for only training, attending ISP/Planning meetings, and recordkeeping/reporting requirements. The mileage factor assumes lower transportation expenses incurred than agency providers. And the administration factor is intended to cover only basic requirements for billing of services and electronic case management such as an internet and phone connection.

Many of the services incorporate a tiered rate structure to compensate providers based on the acuity of the participant. The following services have tiered rates: Habilitative Workshop, Habilitative Community Inclusion, and Residential Habilitation. The reimbursement for these services are tiered based on participant’s level of service need as determined

09/20/2019
by the ICAP assessment. The five reimbursement tiers are:

- Basic-ICAP score 65+.
- Intermediate-ICAP score 37-64.
- High-ICAP score 12-36.
- Advanced-ICAP score 1-11.
- Behavioral Risk Tier – based on results of a behavioral risk screen assessment by DDD clinical staff.

Rate factors are adjusted for tiered services to account for different costs within the tiers. The assumed staffing ratios for direct labor are lowest for the basic tier and are increased to 1:1 for the behavioral risk tier, including overnight hours. Program support, administration, and the wage percentile of the BLS classification are also graduated to account for the different cost structures within the tiers.

Other services have rate structures to accommodate service delivery one-on-one or in a group setting. This structure provides waiver participants the flexibility to purchase the services in a group setting at a lower cost. Prevocational, Independent Living, and Supported Family Living services are structured with both individual and group rates. Rates for these services are adjusted by changing the assumed staffing ratio for direct labor based on the setting.

Rates established in accordance with this methodology may be adjusted at the direction of the Nebraska State Legislature.

The following services use an alternative rate methodology:

- Transitional Services, Environmental Modification Assessment, Home Modification, Assistive Technology, Personal Emergency Response System, and Vehicle Modification are provided at a market rate and approved on a per case basis. The service cap limits were established based on historical precedence in the state. The caps have been adequate over the past several years to enable waiver participants to receive the services at market prices.

Reimbursement for Transportation service is based on the Nebraska standard for mileage reimbursement, pursuant to Neb. Rev. Stat. 81-1176.

Information about payment rates is made available verbally and in writing to waiver participants and providers by state DHHS staff. The waivers and rate study are posted on the DHHS public website at http://dhhs.ne.gov/developmental_disabilities/Pages/RateRebasing.aspx.

To ensure rates remain consistent with the provisions of §1902(a)(30)(A), DDD monitors utilization of waiver services on a monthly basis via reporting. This reporting calculates many of the statistics required on the CMS 372 reports and provides assurance that the cost neutrality requirement of the waiver is being met. DDD intends to review rates paid to providers on an annual basis. The review will determine the number of providers, both independent and agency, providing services in the Metropolitan Statistical Areas within Nebraska and compare this figure to prior years to identify trends in provider availability. In addition, DDD will review on an annual basis the number of participants served on the waiver, including new participants, and the reserve capacity slots utilized for new entrants.

b. Flow of Billings. Describe the flow of billings for waiver services, specifying whether provider billings flow directly from providers to the state's claims payment system or whether billings are routed through other intermediary entities. If billings flow through other intermediary entities, specify the entities:
Billings flow from providers to the State’s claims translator and downloaded to the State’s electronic local web-based service system, which is a component of MMIS, and are not routed through intermediary entities. Services are prior authorized and sent electronically to the provider in a state mandated web-based case management system. Service data, including the time at which services begin and end and the service delivery location, is recorded in the attendance module and a claim is generated through the state mandated web-based case management system by providers and are electronically submitted for claims processing following the delivery of services.

During the validation process, individual claims that are approved for payment are linked to the specific waiver program under which the services are authorized. During nightly payments processing, a table is accessed for each claim under a waiver program. This table contains the current federal matching rate and the established accounts from which individual debits for the state and federal shares are to be drawn for each waiver program. This information is summarized on a voucher that is then sent to the state’s accounting system, the Nebraska Information System (NIS).

All claims are routed through the State’s electronic local web-based service system, a recognized component of MMIS, and are subsequently sent to the NIS, the accounting system for the State of Nebraska.

The program under which a claim is paid is stored on each individual service authorization and electronically transferred to the claim. For each program, a separate account is maintained from which to debit the federal and state shares based on the date of payment. Those account tables are maintained over time. When the payment is made, all claims for the same program are then summarized on a voucher and submitted to NIS. The state’s electronic local web-based service system stores the timestamp and user ID for all new or updated information related to this process.

Federal funds are drawn from the designated accounts at the time an approved claim is set to Paid status and sent to the NIS. Claims are processed on a daily basis.

Direct billing of waiver services is provided to the State. Claims made to Medicaid are documented on the CMS-64 on a quarterly basis.

Appendix I: Financial Accountability

I-2: Rates, Billing and Claims (2 of 3)

c. Certifying Public Expenditures (select one):

☒ No. state or local government agencies do not certify expenditures for waiver services.

☐ Yes. state or local government agencies directly expend funds for part or all of the cost of waiver services and certify their state government expenditures (CPE) in lieu of billing that amount to Medicaid.

Select at least one:

☐ Certified Public Expenditures (CPE) of State Public Agencies.

Specify: (a) the state government agency or agencies that certify public expenditures for waiver services; (b) how it is assured that the CPE is based on the total computable costs for waiver services; and, (c) how the state verifies that the certified public expenditures are eligible for Federal financial participation in accordance with 42 CFR §433.51(b). (Indicate source of revenue for CPEs in Item I-4-a.)

☐ Certified Public Expenditures (CPE) of Local Government Agencies.

Specify: (a) the local government agencies that incur certified public expenditures for waiver services; (b) how it is assured that the CPE is based on total computable costs for waiver services; and, (c) how the state verifies that the certified public expenditures are eligible for Federal financial participation in accordance with 42 CFR §433.51(b). (Indicate source of revenue for CPEs in Item I-4-b.)

09/20/2019
Appendix I: Financial Accountability

I-2: Rates, Billing and Claims (3 of 3)

d. Billing Validation Process. Describe the process for validating provider billings to produce the claim for federal financial participation, including the mechanism(s) to assure that all claims for payment are made only: (a) when the individual was eligible for Medicaid waiver payment on the date of service; (b) when the service was included in the participant’s approved service plan; and, (c) the services were provided:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>a)</td>
<td>Claims for payment are made only when the participant was eligible for a Medicaid waiver payment on the date of service. DD waiver services must be prior authorized before payment is made. Authorizations are based upon a determination by designated DHHS-DD staff that the participant meets waiver eligibility criteria, that the services are identified in the approved service plan, and that the services are not available for funding through programs funded under section 602 (16) or (17) of the Individuals with Disabilities Education Act (P.L. 94 - 142) or section 110 of the Rehabilitation Act of 1973.</td>
</tr>
<tr>
<td>b)</td>
<td>Claims for payment are made only when the service was included in the participant’s approved service plan. The authorization and payment process includes the following steps: 1. DD waiver eligibility of the participant is determined. 2. DD waiver services are identified in the service plan. 3. DD waiver service authorization, also known as the budget authorization, is completed, indicating approved waiver services, waiver provider(s), dates of service, and authorized units of service. 4. Authorization is entered into in a state mandated web-based case management system used for budget authorization, claims processing, and case management and then sent to the state’s electronic local web-based service system. 5. Upon verification through the state mandated web-based case management system, claims are electronically submitted to state’s electronic local web-based service system for processing. Edits in the state mandated web-based case management system verify participant and provider eligibility, dates of service, units of service, and rates. 6. Claims are generated based on service data entered by providers.</td>
</tr>
<tr>
<td>c)</td>
<td>Claims for payment are made only when the services were provided. DD waiver providers submit billings through a state mandated web-based case management system. A pre-audit of all provider claims is completed to assure the accuracy of coding and billing. Supporting electronic documentation, including electronic recording of time-in and time-out, program data records, or other documentation as determined by DHHS-DD must be available to DHHS-DD staff upon request. An electronic signature is acceptable. The billing validation process verifies that the participant was eligible for Medicaid waiver payment on the date of service. The state collects overpayments to Medicaid providers pursuant to 471 NAC § 3-002.08. The Medicaid Financial Responsibility (MFR) unit of DHHS Financial Services is responsible for processing and collecting overpayments for Medicaid provider claims. An overpayment is established when a claim is revised in state mandated web-based case management system to lower the number of billable units. This revision can be done by either the provider or the state. The claim revision generates an overpayment in the electronic local web-based service system which creates an Accounts/Receivables (A/R) account in the electronic local web-based service system to monitor the collection of the overpayment. A demand letter is sent to the provider to provide notification of the establishment of the A/R. The provider may remit payment via check or have the A/R satisfied via recoupment from future payments. Collections made via both check/cash remittance and recoupments are recorded to the general ledger and account for federal funds in claims for Federal Financial Participation (FFP).</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>e.</td>
<td>Billing and Claims Record Maintenance Requirement. Records documenting the audit trail of adjudicated claims (including supporting documentation) are maintained by the Medicaid agency, the operating agency (if applicable), and providers of waiver services for a minimum period of 3 years as required in 45 CFR §92.42.</td>
</tr>
</tbody>
</table>
Appendix I: Financial Accountability

I-3: Payment (1 of 7)

a. Method of payment -- MMIS (select one):

- Payments for all waiver services are made through an approved Medicaid Management Information System (MMIS).
- Payments for some, but not all, waiver services are made through an approved MMIS.

Specify: (a) the waiver services that are not paid through an approved MMIS; (b) the process for making such payments and the entity that processes payments; (c) and how an audit trail is maintained for all state and federal funds expended outside the MMIS; and, (d) the basis for the draw of federal funds and claiming of these expenditures on the CMS-64:

b. Direct payment. In addition to providing that the Medicaid agency makes payments directly to providers of waiver services, payments for waiver services are made utilizing one or more of the following arrangements (select at least one):

- The Medicaid agency makes payments directly and does not use a fiscal agent (comprehensive or limited) or a managed care entity or entities.
- The Medicaid agency pays providers through the same fiscal agent used for the rest of the Medicaid program.
- The Medicaid agency pays providers of some or all waiver services through the use of a limited fiscal agent.

Specify the limited fiscal agent, the waiver services for which the limited fiscal agent makes payment, the functions that the limited fiscal agent performs in paying waiver claims, and the methods by which the Medicaid agency oversees the operations of the limited fiscal agent:
Providers are paid by a managed care entity or entities for services that are included in the state’s contract with the entity. Specify how providers are paid for the services (if any) not included in the state’s contract with managed care entities.

Appendix I: Financial Accountability

I-3: Payment (3 of 7)

c. Supplemental or Enhanced Payments. Section 1902(a)(30) requires that payments for services be consistent with efficiency, economy, and quality of care. Section 1903(a)(1) provides for Federal financial participation to states for expenditures for services under an approved state plan/waiver. Specify whether supplemental or enhanced payments are made. Select one:

☑ No. The state does not make supplemental or enhanced payments for waiver services.

☐ Yes. The state makes supplemental or enhanced payments for waiver services.

Describe: (a) the nature of the supplemental or enhanced payments that are made and the waiver services for which these payments are made; (b) the types of providers to which such payments are made; (c) the source of the non-Federal share of the supplemental or enhanced payment; and, (d) whether providers eligible to receive the supplemental or enhanced payment retain 100% of the total computable expenditure claimed by the state to CMS. Upon request, the state will furnish CMS with detailed information about the total amount of supplemental or enhanced payments to each provider type in the waiver.

Appendix I: Financial Accountability

I-3: Payment (4 of 7)

d. Payments to state or Local Government Providers. Specify whether state or local government providers receive payment for the provision of waiver services.

☐ No. State or local government providers do not receive payment for waiver services. Do not complete Item I-3-e.

☑ Yes. State or local government providers receive payment for waiver services. Complete Item I-3-e.

Specify the types of state or local government providers that receive payment for waiver services and the services that the state or local government providers furnish:

Vocational Rehabilitation Services within the Department of Education is a state government agency. Vocational Rehabilitation Services is an independent Medicaid HCBS DD waiver provider of Assistive Technology, Home Modifications, Vehicle Modifications, and Environmental Modification Assessment, and receive the same rates as all providers for those services.

In Nebraska, some agency providers are public providers established by County Commissioners under interlocal agreements. Both private and public agency providers deliver the same DD waiver services, and the payment to these public providers does not differ from the amount paid to private providers.
Appendix I: Financial Accountability

I-3: Payment (5 of 7)

e. Amount of Payment to State or Local Government Providers.

Specify whether any state or local government provider receives payments (including regular and any supplemental payments) that in the aggregate exceed its reasonable costs of providing waiver services and, if so, whether and how the state recoups the excess and returns the Federal share of the excess to CMS on the quarterly expenditure report. Select one:

- The amount paid to state or local government providers is the same as the amount paid to private providers of the same service.
- The amount paid to state or local government providers differs from the amount paid to private providers of the same service. No public provider receives payments that in the aggregate exceed its reasonable costs of providing waiver services.
- The amount paid to state or local government providers differs from the amount paid to private providers of the same service. When a state or local government provider receives payments (including regular and any supplemental payments) that in the aggregate exceed the cost of waiver services, the state recoups the excess and returns the federal share of the excess to CMS on the quarterly expenditure report.

Describe the recoupment process:

Appendix I: Financial Accountability

I-3: Payment (6 of 7)

f. Provider Retention of Payments. Section 1903(a)(1) provides that Federal matching funds are only available for expenditures made by states for services under the approved waiver. Select one:

- Providers receive and retain 100 percent of the amount claimed to CMS for waiver services.
- Providers are paid by a managed care entity (or entities) that is paid a monthly capitated payment.

Specify whether the monthly capitated payment to managed care entities is reduced or returned in part to the state.

Appendix I: Financial Accountability

I-3: Payment (7 of 7)

g. Additional Payment Arrangements

i. Voluntary Reassignment of Payments to a Governmental Agency. Select one:

- No. The state does not provide that providers may voluntarily reassign their right to direct payments to a governmental agency.
- Yes. Providers may voluntarily reassign their right to direct payments to a governmental agency as provided in 42 CFR §447.10(e).
Specify the governmental agency (or agencies) to which reassignment may be made.

### ii. Organized Health Care Delivery System. Select one:

- **No.** The state does not employ Organized Health Care Delivery System (OHCDS) arrangements under the provisions of 42 CFR §447.10.
- **Yes.** The waiver provides for the use of Organized Health Care Delivery System arrangements under the provisions of 42 CFR §447.10.

Specify the following: (a) the entities that are designated as an OHCDS and how these entities qualify for designation as an OHCDS; (b) the procedures for direct provider enrollment when a provider does not voluntarily agree to contract with a designated OHCDS; (c) the method(s) for assuring that participants have free choice of qualified providers when an OHCDS arrangement is employed, including the selection of providers not affiliated with the OHCDS; (d) the method(s) for assuring that providers that furnish services under contract with an OHCDS meet applicable provider qualifications under the waiver; (e) how it is assured that OHCDS contracts with providers meet applicable requirements; and, (f) how financial accountability is assured when an OHCDS arrangement is used:

### iii. Contracts with MCOs, PIHPs or PAHPs.

- **The state does not contract with MCOs, PIHPs or PAHPs for the provision of waiver services.**
- **The state contracts with a Managed Care Organization(s) (MCOs) and/or prepaid inpatient health plan(s) (PIHP) or prepaid ambulatory health plan(s) (PAHP) under the provisions of §1915(a)(1) of the Act for the delivery of waiver and other services. Participants may voluntarily elect to receive waiver and other services through such MCOs or prepaid health plans. Contracts with these health plans are on file at the state Medicaid agency.**

Describe: (a) the MCOs and/or health plans that furnish services under the provisions of §1915(a)(1); (b) the geographic areas served by these plans; (c) the waiver and other services furnished by these plans; and, (d) how payments are made to the health plans.

- **This waiver is a part of a concurrent §1915(b)/§1915(c) waiver. Participants are required to obtain waiver and other services through a MCO and/or prepaid inpatient health plan (PIHP) or a prepaid ambulatory health plan (PAHP). The §1915(b) waiver specifies the types of health plans that are used and how payments to these plans are made.**
- **This waiver is a part of a concurrent ?1115/?1915(c) waiver. Participants are required to obtain waiver and other services through a MCO and/or prepaid inpatient health plan (PIHP) or a prepaid ambulatory health plan (PAHP). The ?1115 waiver specifies the types of health plans that are used and how payments to these plans are made.**

---

**Appendix I: Financial Accountability**

**I-4: Non-Federal Matching Funds (1 of 3)**
a. State Level Source(s) of the Non-Federal Share of Computable Waiver Costs. Specify the state source or sources of the non-federal share of computable waiver costs. Select at least one:

- Appropriation of State Tax Revenues to the State Medicaid agency
  - If the source of the non-federal share is appropriations to another state agency (or agencies), specify: (a) the state entity or agency receiving appropriated funds and (b) the mechanism that is used to transfer the funds to the Medicaid agency or Fiscal Agent, such as an Intergovernmental Transfer (IGT), including any matching arrangement, and/or, indicate if the funds are directly expended by state agencies as CPEs, as indicated in Item I-2-c:

- Appropriation of State Tax Revenues to a State Agency other than the Medicaid Agency.

- Other State Level Source(s) of Funds.
  - Specify: (a) the source and nature of funds; (b) the entity or agency that receives the funds; and, (c) the mechanism that is used to transfer the funds to the Medicaid agency or Fiscal Agent, such as an Intergovernmental Transfer (IGT), including any matching arrangement, and/or, indicate if the funds are directly expended by state agencies as CPEs, as indicated in Item I-2-c:

Appendix I: Financial Accountability

I-4: Non-Federal Matching Funds (2 of 3)

b. Local Government or Other Source(s) of the Non-Federal Share of Computable Waiver Costs. Specify the source or sources of the non-federal share of computable waiver costs that are not from state sources. Select One:

- Not Applicable. There are no local government level sources of funds utilized as the non-federal share.

- Applicable
  - Check each that applies:
    - Appropriation of Local Government Revenues.
      - Specify: (a) the local government entity or entities that have the authority to levy taxes or other revenues; (b) the source(s) of revenue; and, (c) the mechanism that is used to transfer the funds to the Medicaid agency or Fiscal Agent, such as an Intergovernmental Transfer (IGT), including any matching arrangement (indicate any intervening entities in the transfer process), and/or, indicate if funds are directly expended by local government agencies as CPEs, as specified in Item I-2-c:

- Other Local Government Level Source(s) of Funds.
  - Specify: (a) the source of funds; (b) the local government entity or agency receiving funds; and, (c) the mechanism that is used to transfer the funds to the state Medicaid agency or fiscal agent, such as an Intergovernmental Transfer (IGT), including any matching arrangement, and/or, indicate if funds are directly expended by local government agencies as CPEs, as specified in Item I-2-c:

09/20/2019
Appendix I: Financial Accountability

I-4: Non-Federal Matching Funds (3 of 3)

c. Information Concerning Certain Sources of Funds. Indicate whether any of the funds listed in Items I-4-a or I-4-b that make up the non-federal share of computable waiver costs come from the following sources: (a) health care-related taxes or fees; (b) provider-related donations; and/or, (c) federal funds. Select one:

- None of the specified sources of funds contribute to the non-federal share of computable waiver costs
- The following source(s) are used

  Check each that applies:
  - Health care-related taxes or fees
  - Provider-related donations
  - Federal funds

For each source of funds indicated above, describe the source of the funds in detail:

Appendix I: Financial Accountability

I-5: Exclusion of Medicaid Payment for Room and Board

a. Services Furnished in Residential Settings. Select one:

- No services under this waiver are furnished in residential settings other than the private residence of the individual.
- As specified in Appendix C, the state furnishes waiver services in residential settings other than the personal home of the individual.

b. Method for Excluding the Cost of Room and Board Furnished in Residential Settings. The following describes the methodology that the state uses to exclude Medicaid payment for room and board in residential settings:

The state establishes the rates for waiver services furnished in residential settings and those rates do not include any costs for room and board. The providers bill according to the established rates.

The service rates reflect the exclusion of Medicaid payment for room and board for services that are delivered in residential settings.

As noted in Appendix I-2-A, the state identified unallowable expenses, including room and board expenses, in the general ledger data furnished by providers for the purpose of rebasing rates. These expenses were categorized separately as unallowable and not considered for any of the factors described in the rate methodology.

Appendix I: Financial Accountability

I-6: Payment for Rent and Food Expenses of an Unrelated Live-In Caregiver

Reimbursement for the Rent and Food Expenses of an Unrelated Live-In Personal Caregiver. Select one:

- No. The state does not reimburse for the rent and food expenses of an unrelated live-in personal caregiver who resides in the same household as the participant.
Yes. Per 42 CFR §441.310(a)(2)(ii), the state will claim FFP for the additional costs of rent and food that can be reasonably attributed to an unrelated live-in personal caregiver who resides in the same household as the waiver participant. The state describes its coverage of live-in caregiver in Appendix C-3 and the costs attributable to rent and food for the live-in caregiver are reflected separately in the computation of factor D (cost of waiver services) in Appendix J. FFP for rent and food for a live-in caregiver will not be claimed when the participant lives in the caregiver's home or in a residence that is owned or leased by the provider of Medicaid services.

The following is an explanation of: (a) the method used to apportion the additional costs of rent and food attributable to the unrelated live-in personal caregiver that are incurred by the individual served on the waiver and (b) the method used to reimburse these costs:

Appendix I: Financial Accountability
I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (1 of 5)

a. Co-Payment Requirements. Specify whether the state imposes a co-payment or similar charge upon waiver participants for waiver services. These charges are calculated per service and have the effect of reducing the total computable claim for federal financial participation. Select one:

☉ No. The state does not impose a co-payment or similar charge upon participants for waiver services.
☉ Yes. The state imposes a co-payment or similar charge upon participants for one or more waiver services.

i. Co-Pay Arrangement.

Specify the types of co-pay arrangements that are imposed on waiver participants (check each that applies):

<table>
<thead>
<tr>
<th>Charges Associated with the Provision of Waiver Services (if any are checked, complete Items I-7-a-ii through I-7-a-iv):</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Nominal deductible</td>
</tr>
<tr>
<td>☐ Coinsurance</td>
</tr>
<tr>
<td>☐ Co-Payment</td>
</tr>
<tr>
<td>☐ Other charge</td>
</tr>
</tbody>
</table>

Specify:

Appendix I: Financial Accountability
I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (2 of 5)

a. Co-Payment Requirements.

ii. Participants Subject to Co-pay Charges for Waiver Services.

Answers provided in Appendix I-7-a indicate that you do not need to complete this section.

Appendix I: Financial Accountability
I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (3 of 5)
Appendix I: Financial Accountability

I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (4 of 5)

a. Co-Payment Requirements.

iii. Amount of Co-Pay Charges for Waiver Services.

Answers provided in Appendix I-7-a indicate that you do not need to complete this section.

Appendix I: Financial Accountability

I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (5 of 5)

b. Other State Requirement for Cost Sharing. Specify whether the state imposes a premium, enrollment fee or similar cost sharing on waiver participants. Select one:

- ☒ No. The state does not impose a premium, enrollment fee, or similar cost-sharing arrangement on waiver participants.
- ☐ Yes. The state imposes a premium, enrollment fee or similar cost-sharing arrangement.

Describe in detail the cost sharing arrangement, including: (a) the type of cost sharing (e.g., premium, enrollment fee); (b) the amount of charge and how the amount of the charge is related to total gross family income; (c) the groups of participants subject to cost-sharing and the groups who are excluded; and, (d) the mechanisms for the collection of cost-sharing and reporting the amount collected on the CMS 64:

Appendix J: Cost Neutrality Demonstration

J-1: Composite Overview and Demonstration of Cost-Neutrality Formula

Composite Overview. Complete the fields in Cols. 3, 5 and 6 in the following table for each waiver year. The fields in Cols. 4, 7 and 8 are auto-calculated based on entries in Cols 3, 5, and 6. The fields in Col. 2 are auto-calculated using the Factor D data from the J-2-d Estimate of Factor D tables. Col. 2 fields will be populated ONLY when the Estimate of Factor D tables in J-2-d have been completed.

Appendix J: Cost Neutrality Demonstration

b. Average Length of Stay. Describe the basis of the estimate of the average length of stay on the waiver by participants in item J-2-a.

Average length of stay on the waiver is based on calendar year 2015 for waiver years 1 and 2. The basis of ALOS for waiver years 3 – 5 was the ALOS for the period from 10/1/2016 to 9/30/2017. This was used to provide a more recent time period as a basis for the estimate for ALOS. It is believed that the ALOS used in waiver year 1 and 2 that is based on calendar year 2015 is a bit higher than will be observed going forward because during that period there were fewer people transitioning from the 0394 to the 4154 waiver than what is expected on average.

c. Derivation of Estimates for Each Factor. Provide a narrative description for the derivation of the estimates of the following factors.

i. Factor D Derivation. The estimates of Factor D for each waiver year are located in Item J-2-d. The basis and methodology for these estimates is as follows:
Waiver Years 1-2 Estimates:

Because these services are relatively new to this waiver, the services provided in the base year are not the same as those on this renewal. Therefore, the distribution of users by service type is estimated based on the estimated proportions of users in base year services that will elect new services (i.e. new services are "crosswalked" from base year services). For example, it is assumed that 40% of participants currently utilizing the Adult Day Habilitation will elect Habilitative Community Inclusion and the remaining 60% would elect Habilitative Workshop. Consumption levels are assumed constant (i.e. the participants would consume, on average, the same number of hours of comparable services in a given week). This estimate is based on feedback received from stakeholders (e.g. Participants, Providers) on the services likely to be selected. The total number of slots is assumed to be constant and is set at 1,055 per year based on historical data from state fiscal year 2014 through state fiscal year 2016 and taking into consideration the reserved capacities for the waiver.

Estimates for number of units are based on utilization in calendar year 2015. The utilization is estimated based on the estimated proportions of users in base year services that will elect these services (i.e. new services are "crosswalked" from base year services).

Cost per unit estimates of services are based on the rate setting methodology described in Appendix I. For legacy services, the cost per unit is based on calendar year 2015 actuals.

Waiver Years 3-5 Estimates:

Estimates for waiver years 3-5 are based on actual paid claims data with dates of service from 1/1/2018 to 12/31/2018. Actual paid claims data was used to estimate factor D instead of recent CMS 372 reports because of changes made to the service array in 2017. These changes were extensive and involved the creation of new services, new tier structures for some services, and the removal of other services. The most recent CMS 372 report submitted to CMS was a temporary extension for the period of 1/1/2017-2/28/2017 and would not have reflected these changes.

The following assumptions were used to estimate factor D:

1) Average estimated rates for tiered services is based on the proportion of participants in each tier in April 2019.
2) A 2% price increase is assumed in waiver year 5.

The 2% price increase represents an estimate for cost of living increases appropriated to the program by the Nebraska State Legislature. These have historically been set close to the overall change in the Consumer Price Index which has been trending around 2% per year.

This waiver does not cover the cost of prescribed drugs and therefore Factor D does not include any costs for prescription drugs. Prescription drugs are covered as a State Plan service.

ii. Factor D' Derivation. The estimates of Factor D' for each waiver year are included in Item J-1. The basis of these estimates is as follows:

Factor D' is based on actual acute care expenditures for individuals on the waiver in calendar year 2015. The data source is paid claims for fee for service expenditures and capitation payments made to managed care organizations for dates of service in calendar year 2015. The average cost for acute care for this year was $6,105. Price increases of 2.0% were included for each year. Note that the calculation was incorrect in waiver years 1 and 2 due to an error in the query of the data from the MMIS. This was corrected in waiver years 3 - 5.

The 2% price increase represents an estimate for cost of living increases appropriated to the program by the Nebraska State Legislature. These have historically been set close to the overall change in the Consumer Price Index which has been trending around 2% per year.

This waiver does not cover the cost of prescribed drugs and therefore Factor D' does not include any costs for prescription drugs. Prescription drugs are covered as a State Plan service.

iii. Factor G Derivation. The estimates of Factor G for each waiver year are included in Item J-1. The basis of these
estimates is as follows:

The average cost of institutional care per ICF-DD recipient was based on actual expenditures in calendar year 2015. The average cost for this year was $166,800. Price increases of 2% were included for each year.

The 2% price increase represents an estimate for cost of living increases appropriated to the program by the Nebraska State Legislature. These have been set close to the overall change in the Consumer Price Index which has been trending around 2% per year.

iv. Factor G’ Derivation. The estimates of Factor G’ for each waiver year are included in Item J-1. The basis of these estimates is as follows:

Factor G’ is based on actual acute care expenditures for individuals in an ICF-DD in calendar year 2015. The average cost for acute care for this waiver year was $5,116. Price increases of 2% were included for each year.

The 2% price increase represents an estimate for cost of living increases appropriated to the program by the Nebraska State Legislature. These have been set close to the overall change in the Consumer Price Index which has been trending around 2% per year.

Appendix J: Cost Neutrality Demonstration

J-2: Derivation of Estimates (4 of 9)

Component management for waiver services. If the service(s) below includes two or more discrete services that are reimbursed separately, or is a bundled service, each component of the service must be listed. Select “manage components” to add these components.
Appendix J: Cost Neutrality Demonstration

J-2: Derivation of Estimates (5 of 9)

d. Estimate of Factor D.

i. Non-Concurrent Waiver. Complete the following table for each waiver year. Enter data into the Unit, # Users, Avg. Units Per User, and Avg. Cost/Unit fields for all the Waiver Service/Component items. Select Save and Calculate to automatically calculate and populate the Component Costs and Total Costs fields. All fields in this table must be completed in order to populate the Factor D fields in the J-1 Composite Overview table.

**Appendix J: Cost Neutrality Demonstration**

**J-2: Derivation of Estimates (6 of 9)**

**d. Estimate of Factor D.**

**i. Non-Concurrent Waiver.** Complete the following table for each waiver year. Enter data into the Unit, # Users, Avg. Units Per User, and Avg. Cost/Unit fields for all the Waiver Service/Component items. Select Save and Calculate to automatically calculate and populate the Component Costs and Total Costs fields. All fields in this table must be completed in order to populate the Factor D fields in the J-1 Composite Overview table.

### Appendix J: Cost Neutrality Demonstration

#### J-2: Derivation of Estimates (7 of 9)

#### d. Estimate of Factor D.

#### i. Non-Concurrent Waiver. Complete the following table for each waiver year. Enter data into the Unit, # Users, Avg. Units Per User, and Avg. Cost/Unit fields for all the Waiver Service/Component items. Select Save and Calculate to automatically calculate and populate the Component Costs and Total Costs fields. All fields in this table must be completed in order to populate the Factor D fields in the J-1 Composite Overview table.

Appendix J: Cost Neutrality Demonstration

J-2: Derivation of Estimates (8 of 9)

d. Estimate of Factor D.

i. Non-Concurrent Waiver. Complete the following table for each waiver year. Enter data into the Unit, # Users, Avg. Units Per User, and Avg. Cost/Unit fields for all the Waiver Service/Component items. Select Save and Calculate to automatically calculate and populate the Component Costs and Total Costs fields. All fields in this table must be completed in order to populate the Factor D fields in the J-1 Composite Overview table.
