

Why Is This Important?

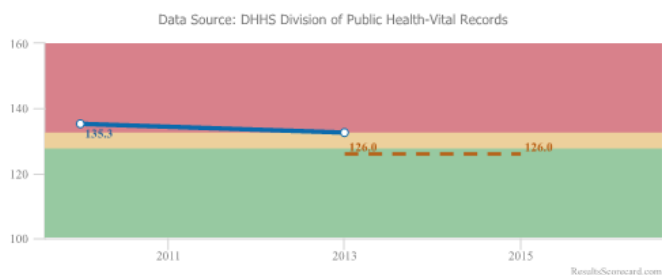

Nebraska Healthy People 2020: Respiratory Disease

Chronic respiratory disease include asthma and chronic obstructive pulmonary disease (chronic bronchitis and emphysema). Specific methods of detection, intervention and treatment exist and may reduce the public health burden resulting from asthma and chronic obstructive pulmonary disease (COPD). Daily preventive treatment can prevent and reduce the severity of symptoms and attacks resulting from asthma. COPD is also preventable and treatable. Proper treatment can lessen symptoms and improve the quality of life of those with COPD.

Indicators

Indicator	Time Period	Actual Value	Target Value	Current Trend	Baseline %Change
HP2020 Death rate due to chronic obstructive pulmonary disease (COPD) among adults aged 45 years and older per 100,000 population (age-adjusted).	2013	132.6	126.0	↓ 1	-2% ↓
	2010	135.3	—	→ 0	0% →

Story Behind the Curve

National Comparison 2013: 116.5

Nebraska Racial/Ethnic Comparison (2009-2013, combined):

- White NH: 139
- African American NH: 115
- Native American NH: 212.6
- Asian/Pacific NH: 51
- Hispanic: 36.3

NH = Non-Hispanic

HP2020 Hospitalizations for asthma age 4 years and under, per 10,000 persons (age-adjusted).	2013	6.1	5.5	↓ 1	-36% ↓
	2010	9.6	—	→ 0	0% →

HP2020 Hospitalizations for asthma age 5 to 64 years, per 10,000 (age-adjusted).	2013	4.5	4.1	↓ 1	-25% ↓
	2010	6.0	—	→ 0	0% →

HP2020 Hospitalizations for asthma age 65 and older, per 10,000 (age-adjusted).

2013 **11.5** **10.4** **↓ 1** **-11%** **↓**

2010 **12.9** **—** **→ 0** **0%** **→**

HP2020 Number of deaths due to asthma among children and adults under 35 years of age.

2013 **2.0** **0.0** **↓ 1** **-33%** **↓**

2010 **3.0** **—** **→ 0** **0%** **→**

Definition

This scorecard is created to track performance, therefore the demonstration of data within color markers identifies the boundaries of what we define as success. In some instances, a trend may be moving in the wrong direction, but still may be within our 'Target for Success' area. The use of Color Bands and Color Arrows help to define the Target for Success and Current Progress.

Green, Black and Red arrows are used to reflect our 'Current Progress' status.

- GREEN Arrow = We're getting better!
- BLACK Arrow = We're maintaining our position.
- RED Arrow = We're going in the wrong direction.

Green, Yellow or Red color bands are used to reflect our 'Target for Success' zones.

- GREEN Color Band = We've reached our Target for Success!
- YELLOW Color Band = We're making progress, but not quite there yet.
- RED Color Band = We're below our Target for Success.

Data is described with the Time Period, Actual Value, Target Value, Current Trend and Baseline Change %. These mean:

- Time Period - The most current time period for which the data were available.
- Actual Value - The actual level of achievement, the most current point for the indicator; also shown in a Color Band to reflect if that value is or is not within our Target for Success zone.
- Target Value - The desired level of achievement for the data indicator.
- Current Trend - The direction of progress is shown by a Color Arrow to reflect our Current Progress status, and also noting for how many data points the direction been occurring.
- Baseline Change % - The percentage of change between the baseline data point and the current data point (actual value); also shown with a Color Arrow to describe Current Progress status.

Actions

Name	Assigned To	Status	Due Date	Progress
