476-000-200 Instructions for Computing Heating Payment Amounts: The worker shall determine heating payment amounts for eligible households according to countable income of the household, household size, household living arrangement, and fuel type.

To compute the heating payment -

1. Locate the column indicating household size;
2. Within this column locate the annual income for the household. If the household's income falls between two income levels on the chart, go to the higher of the two levels;
3. Using this income level, move to the right to determine the payment amount according to the type of fuel and living arrangement.
