Minority Health Conference:
Uniting Practice and Partnerships to Achieve Health Equity

Melissa L. Lewis, Director of Health Equity, ASTHO
April 17, 2019
Three Pillars of Population Health Improvement

How do we move the needle?
2019 ASTHO President’s Challenge:
Building Healthy and Resilient Communities
Life Expectancy vs. Healthcare Spending (1970-2014)
The Case for Investing at the Community Level

1. **Provide tools** that equip health officials to mobilize community-led, place-based models that are ready for investment.

2. **Connect public health officials by reaching across sectors to** business leaders and policymakers who want to invest in community and advance economic development.
We can MOVE from “talk” to ACTION by working together to achieve the goals of the President’s Challenge:

- By shifting investments to support ready-made opportunities at the community level.
- By engaging diverse partners to call for community development that does not cause community displacement.
Key Strategies Continued

3. Promote Positive Social Connections: so communities can combat issues such as substance use disorders, emotional suffering, and social isolation.

4. Reframe Community Resilience: so communities can resist, respond to, and recover from adversity and “bounce forward” to better conditions, like fewer adverse childhood experiences and eliminating HIV or Hep C.

“The opposite of addiction isn’t only sobriety. It’s connectedness.”
- Jonathan Goyer
Expert Advisor to the RI Governor’s Overdose Prevention and Intervention Task Force
Case Example

- Nine local collaboratives that represent the diverse strengths of the community.
- Use a collective impact framework.
- Innovative, community-led, place-based approach to building the infrastructure needed for sustained systems and policy change.

RIDOH Health Equity Zones
Rhode Island Department of Health (RIDOH) Health Equity Zones

- **Organize** a collaborative of diverse partners from the community’s self-defined zone, ranging in size from a neighborhood to a county.
- Conduct a baseline **assessment** of socioeconomic and environmental factors that drive health outcomes.
- Create a Plan of Action targeting **measurable** objectives based on valid strategies shown to be successful.
- Implement and **evaluate** the Plan of Action.
HEZs are Helping Communities Build the Infrastructure they Need to Drive Lasting Change at the Local Level in RI

Pawtucket and Central Falls HEZ

Olneyville HEZ
Key Projects

- Promoting Place-Based Approaches ECHO
- Building Healthy & Resilient Communities Incubator

Building Healthy and Resilient Communities
This clickable map provides descriptions of place-based initiatives. Information is available for each state that is colored in blue. Additional information will be included as it becomes available.

NOTE: For the best user experience, we recommend that you use the latest version of Chrome.
- Expand and leverage resources and funding flexibilities
- Use existing regulatory mechanisms to enhance sustainability
- Develop state-based mechanisms to support community capacity building
- Foster policy change and development
- Facilitate cross-sector partnerships and investments
- Build up community infrastructure for sustained systems and policy change
- Scale up efforts (initiatives, local policy) to the state level
- Impact: population health-level improvements

Benefit of State Health Agency Support
Group Activity: Partnership Discussion
Group Activity: Community Engagement

Guidelines
- Break up into 4 small groups
- One person writes ideas
- One person is the designated recorder
