FORWARD

This report is a compilation of information pertaining to child abuse and neglect (CAN) reports received during calendar years 2005 and 2006. All information presented in this report is by calendar year unless noted and should not be compared to other reports that may use a different time period. The Department of Health and Human Services, Protection and Safety Section published a Protection and Safety Annual Report in 2005 and 2006. The information presented in those reports included much of the same information that was included in previous Child Abuse and Neglect Annual Reports.

The Department continues to receive inquiries about information pertaining to tables that were presented in previous years' Child Abuse and Neglect Annual Reports. These tables and information were not readily available in the Protection and Safety Annual Report. To accommodate those inquiries it was decided to reestablish the Child Abuse and Neglect Annual Report.

This report includes CAN data for Calendar Years 2005 and 2006. The information for 2005 is as of November 2006. The information for 2006 is as of May 2007. This is highlighted only to inform researchers that when comparing the two years there is not a direct comparison since the information was obtained at different times of the year. All years prior to 2005 were extracted in May of the following year.

This report only includes information for 2003 through 2006 where trends are being presented. Previous years reports presented ten years of information. The justification for this change is that the Department has established many policy and procedure changes since 2003, which had a major impact on practices and the information that is being presented in this report. The department does not feel that it is viable to compare calendar years prior to 2003 to current years because of the impact these changes had on the numbers.

Information on Child Abuse or Neglect for Calendar Years 2005 and 2006

This report provides information from the Nebraska Department of Health and Human Services (DHHS) about child abuse or neglect in Nebraska for calendar years 2005 and 2006. It also provides statutory child protective service references; responsibilities of law enforcement, the courts, and DHHS; an overview of steps followed as cases go through the DHHS Protection and Safety System; and a glossary of terms.

Statutory Child Protective Service References

- ❖ All citizens are required by state law to report suspected child abuse or neglect by calling 1-800-652-1999 or contacting law enforcement.
- ❖ Nebraska Revised Statutes sections 28-710 through 28-727 define the terms “abuse” and “neglect” and outline reporting responsibilities. Responsibilities for law enforcement and DHHS are described.
- ❖ Nebraska Revised Statutes section 43-407 sets out the powers and duties of DHHS relating to the protection of children.

The Department of Health and Human Services (DHHS) is the state agency responsible for child welfare, child protection and Juvenile Offenders.

Services are provided to: children and families with issues involving abuse, neglect, and dependency; and youth that violate the law or have mental health issues.

The Department of Health and Human Services’ (DHHS), Law Enforcement, and the Courts’ Responsibilities in Child Abuse or Neglect Cases

DHHS develops policy and guidelines to conduct work relating to abuse or neglect. In reports of child abuse and neglect where DHHS becomes involved, DHHS employees assess for child safety and risk to the child and other children in the family, provide services to the child and family. If children are removed from their homes by law enforcement or the courts, DHHS is usually given custody and responds by finding an appropriate temporary placement for the children.

Different entities become involved at various times in child abuse cases. Only law enforcement or courts have the authority to remove children from their homes. County attorneys are responsible for filing charges against those who victimize children. Law enforcement may be involved in investigations in which DHHS does not become involved and vice versa depending on local protocols established between DHHS and law enforcement.

Context for the Data in This Report:

- ❖ *Data Source:* For trending purposes, this report includes information from 2003 – 2006. The data for this report was extracted at the time each year’s report was published. Information and data prior to 2003 can be found in previous years reports. Prior to 1998, state data was maintained on the Child Welfare Legacy Computer System, which is still maintained today when additional information is collected on those specific reports. All information since 1998 is from DHHS’ Nebraska Family On-Line Client User System (N-FOCUS), developed in part with Federal Statewide Automated Child Welfare Information System (SACWIS) funding. All states are required to submit data on child abuse or neglect cases, foster care, and adoption.
- ❖ *Time period for this report:* The data relates to reports received during calendar years 2005 and 2006. However, not all assessments may have been completed in the same year they were received.

Changes for the Data in This Report:

- ❖ *Change in data extraction formulas:* During data extraction for the 2003 Child Abuse and Neglect Annual Report, a problem was identified with previously used extraction formulas, which had resulted in some records being counted multiple times. The formulas were improved in 2004 to correct this, resulting in changes in the data previously reported for calendar years 1999 – 2003.
- ❖ *Changes for this year:* The following changes and additions have been added to this report based upon suggestions and inquiries received throughout the year:
 - Population numbers have been added to some of the tables. Comments from some readers of previous versions of this report indicated that they would like to see and make a determination of the data impact based upon the population.
 - Additional tables and analysis narrative added to the ‘Statewide’ section providing data on gender, race, and relationship of the victim (child) to the perpetrator. The ‘Service Area’ sections have remained the same as previous years.
 - The layout of the report has been adjusted in the ‘Statewide’ section. The tables have been grouped into four separate categories: Reports; Allegations and Abuse Types; Victims; and Perpetrators. This was done to help the reader better understand what is being presented.

Glossary of Terms

Allegation: A categorizing of reported actions into one of the six (6) child maltreatment types listed below. A report can contain more than one allegation and a child/victim or perpetrator could be involved in more than one allegation in the same or separate reports.

Central Register: A list of individuals identified as having been responsible for child abuse or neglect following an investigation and assessment either by law enforcement, the Department, or both.

Central Registry: Data pertaining to child abuse or neglect.

Child Maltreatment: Maltreatment occurs when a child age birth through 17 years is physically, emotionally, or sexually harmed. The six maltreatment types fall within one of the two categories:

Abuse:

- ❖ **Physical:** Indicated by the existence of an injury that is unexplained, not consistent with the explanation given, or is non-accidental. The information may also only indicate a substantial risk of bodily injury.
- ❖ **Emotional:** Indicated by a psychopathological or disturbed behavior in a child, which is documented by a psychiatrist, psychologist, or licensed mental health practitioner to be the result of continual scapegoat, rejection, or exposure to violence by the child's parent/caretaker.
- ❖ **Sexual:** Any sexually oriented act, practice, contact, or interaction in which the child is or has been used for the sexual stimulation of a parent, the child, or other person.

Neglect:

- ❖ **Emotional Neglect:** When a child is suffering or has suffered severe negative effects due to a parent's failure to provide opportunities for normal experience which produce feelings of being loved, wanted, secure, and worthy. Lack of such opportunities may impair the child's ability to form healthy relationships with others.
- ❖ **Physical Neglect:** The failure of the parent to provide for the basic needs, or provide a safe and sanitary living environment for the child.
- ❖ **Medical Neglect of Handicapped Infant:** The withholding of medically indicated treatment (appropriate nutrition, hydration, and medication) from disabled infants with life-threatening conditions. Exceptions include those situations in which the infant is chronically and irreversibly comatose; the provision of this treatment would merely prolong dying or not be effective in ameliorating or correcting all of the infant's life-threatening conditions, and the provisions of the treatment itself under these conditions would be inhumane.

Child Welfare: Provides a broad spectrum of services that starts with taking child abuse and neglect reports, assessing safety and risk to the child, and providing needed intervention when indicated in the assessment. It includes services that help to preserve families and enhance family strengths and functioning by actively engaging families in decision making, assessing their needs, and linking with resources. It also includes services that children require when placed outside of the home in foster care and other levels of group home or therapeutic living arrangements. Finally, when children aren't able to return home safely, children are assisted to permanent living arrangements through services and supports such as adoption, guardianship, or other long-term arrangements.

Family Assessment: An in-depth assessment of critical issues that relate to the safety and risk of the child. This assessment lays the foundation for a family-centered, child-focused approach to case planning and service delivery.

Findings: There are five categories of findings: Court substantiated; Court Pending; Inconclusive; Unable to Locate; and Unfounded.

- ❖ **Court Substantiated:** A District Court, County Court, or separate Juvenile Court has entered a judgment of guilty on a criminal complaint, indictment, or information, or an adjudication of jurisdiction on a juvenile petition under Section 43-247 (3)(a), and the judgment or adjudication relates or pertains to the same matter as the report of abuse or neglect.
- ❖ **Court Pending:** A criminal complaint, indictment, or information, or a juvenile petition under Section 247(3)(a), has been filed in District Court, County Court, or separate Juvenile Court, and the allegations of the complaint, indictment, information, or juvenile petition relate or pertain to the same subject matter as the report of abuse or neglect. This was previously referred to as a “Petition to be Filed”
- ❖ **Inconclusive:** The evidence indicates it is more likely than not (preponderance of evidence standard) that child abuse or neglect occurred, and court adjudication did not occur.
- ❖ **Unable to Locate:** Subjects of the maltreatment report have not been located after a good-faith effort on the part of the Department.
- ❖ **Unfounded:** All reports not classified as “Court Substantiated,” “Court Pending,” “Inconclusive,” or “Unable to Locate” will be classified as “Unfounded.”

Intake: The process of documenting all reports of child abuse and neglect. Intake includes the activities associated with receiving and screening the referral, determining the appropriateness of accepting the referral for assessment, and if accepted, determining the correct priority for department response. Intake also may refer the reporter to other community agencies if the situation is not appropriate for DHHS intervention.

Initial Assessment: The gathering and analyzing of information in response to reports of suspected child abuse or neglect, to determine which families need further intervention. During this phase the Protection and Safety Worker is primarily concerned with child safety. The worker determines if child maltreatment did occur, determines the level of risk, and arranges services as necessary to protect the child.

Perpetrator: The person who was found to have committed an offense, as in abuse or neglect of a child.

Report: The record of an official account received from an individual that provides facts about a possible act of child abuse. Each report is assigned its own identification number. There may be multiple reports for an incident. A report may contain multiple allegations and multiple victims and/or perpetrators.

State Ward: When a court of competent jurisdiction gives custody of a child under the age of 18 to the Department that child becomes a state ward. The State acts as the child’s parent.

Victim: For the purpose of child welfare and child abuse and neglect, a victim is always a child. A child involved in an allegation as being abused is identified as a victim. For the purpose of this report, victim refers to a child who was abused and the action has been substantiated with a finding of “Court Substantiated,” “Court Pending,” or “Inconclusive.”

SECTION I – CHILD ABUSE AND NEGLECT (CAN) REPORTS

A CAN report is impetus that starts the child abuse and neglect process. The Department of Health and Human Services first becomes aware of a possible incident of child abuse or neglect when they receive information that an alleged action of abuse or neglect has occurred. All of the information gathered is entered into a report.

A report can and usually does include:

- More than one incident defined as an allegation;
- More than one child (victim) which would cause multiple allegations;
- More than one abuser (perpetrator) which would cause multiple allegations; and,
- One child with different abuse types which would cause multiple allegations.

In this section a case or report is considered substantiated if at least one allegation was substantiated and counts of children are usually unique (each child is only counted once) unless otherwise specified.

REPORTS:

- ❖ **Assessments:** There were 12,629 cases assessed in 2006 compared to 13,897 in 2005. This is a decrease of 1,268 (9.1%). Compared to the 9,296 cases assessed in 2003, this is an increase of 3,333 (35.9%) reports of child abuse or neglect assessed by DHHS.
- ❖ **Substantiated Reports:** 3,065 reports were substantiated in 2006 compared to 3,324 reports that were substantiated in 2005. This is a decrease of 259 (7.8%). Compared to 2,423 reports substantiated in 2003, this is an increase of 642 (26.5%).
- ❖ **Number of Children Involved:** There were 4,335 children that were involved or identified as a victim in at least one of the substantiated reports in 2006. This is a decrease of 506 (10.5%) compared to the 4,841 children identified in 2005. This is a 725 (20.1%) increase when compared to the 3,610 children identified in 2003.

TABLE 1-1: STATEWIDE REPORTS OF CHILD ABUSE AND NEGLECT

STATEWIDE STATISTICS, CALENDAR YEARS 2003 – 2006				
CALENDAR YEAR	TOTAL REPORTS ASSESSED	NUMBER OF SUBSTANTIATED REPORTS	INVOLVED CHILDREN	18 AND UNDER POPULATION ESTIMATES
2003	9,296	2,423 (26.1%)	3,610	471,235
2004	13,291	3,336 (25.1%)	4,896	470,415
2005	13,897	3,324 (23.9%)	4,841	470,046
2006	12,629	3,065 (24.3%)	4,335	469,771

The information in Table 1-1 shows that the total number of reports assessed has been stabilizing over the last three years. The State hypothesized that the increase in numbers of assess reports in 2004 was based on the implementation of a new intake tool. The stabilization of the numbers over the last three years lend support the hypothesis that the State's Intake Workers are getting more familiar with the Intake Screening Tool introduced in 2003 and are more proficient in screening calls. Proficient screening of reports could also support the increase of the substantiation rate from 23.9% in 2005 to 24.3% in 2006.

There seems to be an indication that there may be a decrease of children involved in substantiated reports. There was a decrease of 506 unique children involved in substantiated reports from 2005 to 2006 compared to a decrease of only 259 substantiated reports. This is not a direct correlation but is a positive indicator. When the victim rate is calculated the decrease of unique children is not so positive. The number of substantiated victims in each report determines the victim rate. This means the child will be counted more than once (once for each report they are a victim). The victim rate for 2006 was 1.72. There was a count of 5,284 victims in the 3,065 substantiated reports. This is an increase of 0.07 when compared to the 1.65 victim rate for 2005, in which there were 5,500 victims in the 3,324 substantiated reports.

One factor that needs to be taken into consideration is the time period that 2005 data was extracted when compared to 2006 data. The data for 2006 was extracted in May 2007 and the 2005 data was extracted in November 2006. The extraction of the November data allowed for an additional six months time frame during which cases could have become substantiated. There were still 595 reports for calendar year 2006 that were in the process and awaiting final determination at the time the data was extracted.

Tables 1-2 and 1-3 show an increase of 349 total calls received between 2005 (28,009) and 2006 (28,358). Table 1-3 puts the State's profile and trends into perspective. When the percentages are added and compared across the years it is evident that a change in policy that occurred in 2003 had a major impact on the amount and percentages of Calls received and assessed and the substantiation rate.

The policy and procedure change implemented in 2004 resulted in a 48% increase in the number of reports that were assessed. This leveled off in the subsequent years. This is a reflection of the Intake Workers' proficiency in screening reports that do not require an assessment or provision of a different service.

TABLE 1-2: CHILD ABUSE AND NEGLECT REPORTS TRENDS BY CALENDAR YEAR

TABLE 1-3: CHILD ABUSE AND NEGLECT REPORTS PERCENTAGE AND COUNTS

Calendar Year	Total Reports Received	Reports Alleging Abuse or Neglect (CAN)		CAN Reports Assessed		CAN Reports Substantiated		CAN Reports Unfounded		CAN Reports Unable to Locate		CAN Reports In Process

SOURCE of REPORTS:

Table 1-5 presents the source of the reports that are captured when a Child Abuse and Neglect Report is received. This table lists the sources in alphabetical order and compares calendar years 2005 and 2006. The total number of reports and number of those reports that actually led to assessments are used to determine the percentage of reports assessed.

A review of the data shows that Law Enforcement continues to be the states primary source of reports that lead to an assessment. There are not many noticeable differences between years when comparing the percentages or rankings of reporting sources. The biggest change is the increase of friends and neighbors calling the hotline. The cause of this could be a result of several factors. The ‘Unknown’ category shows a decrease, which may mean that callers once reluctant in providing their name are now sharing and that neighbors and friends are becoming more vigilant and actively involved in keeping children safe.

The “Unknown” category represents callers that either did not provide their name or requested to remain anonymous. The “Other” category is callers that did provide their name but did not provide any information that would identify them as any of the sources listed as one of the predetermined selections.

TABLE 1-5: REPORT SOURCE COMPARING CALENDAR YEAR 2005 – 2006

ALLEGATIONS IN REPORTS:

A report could contain one to many allegations. An allegation is counted no matter how many times it is reported in one single report. The purpose of presenting the information this way is to provide a better indication of the impact of the allegation or how often a specific allegation is reported to DHHS.

EXAMPLE: A report involves a perpetrator and two (2) children. The perpetrator is alleged to have physically abused both children. Although there are two (2) physical abuse allegations the physical abuse allegation count will be one (1). If only one of those allegations are substantiated then the allegation type is considered substantiated.

An allegation is categorized in one of the six maltreatment types listed in the Glossary of Terms on page 5. Table 1-6 provides the counts by report where the allegation was entered and if any one of the allegations of that type in the report was substantiated. An allegation type is considered substantiated as long as one allegation of the same type in the report was substantiated. Allegations are presented independently and in more detail in Section II of this report.

Table 1-6 can be used in different ways to analyze the impact of certain types of allegations. To better clarify how this table is developed the following analysis was conducted for the statewide counts:

- ❖ In 2005, 24,397 (87.1%) reports of the 28,009 reports received contained one or more allegations. There was a slight decrease to 85.2% (24,173) of the 28,358 reports containing one or more allegations in 2006.
- ❖ Physical neglect continues to be the most reported maltreatment type with 45.6% of the reports in 2005 and 41.8% of the reports in 2006. Most of the percentages by maltreatment type remain the same or have changed little when the two years are compared.
- ❖ The substantiation rate decreased for every maltreatment type from 2005 to 2006 except for physical neglect and medical neglect of a handicapped infant. It is interesting to see that emotional abuse allegations tend to be substantiated more often than the other five maltreatment types.

TABLE 1-6: ALLEGATION TYPES IN REPORTS BY SERVICE AREA COMPARING CALENDAR YEAR 2005 – 2006

Calendar Year	Categories		Central		Eastern		Northern		Southeast		Western		Statewide		State Ranking

TABLE 1-7: REPORTS CONTAINING MORE THAN ONE ALLEGATION TYPE

State Service Area	2005			2006		
	Reports With Allegations	Reports With More Than One Allegation Type	%	Reports With Allegations	Reports With More Than One Allegation Type	%
Central	2,914	252	8.65%	2,823	188	6.66%
Eastern	9,239	841	9.10%	8,866	651	7.34%
Northern	2,731	275	10.07%	2,399	211	8.80%
Southeast	6,220	895	14.39%	6,749	1,041	15.42%
Western	3,293	364	11.05%	3,336	340	10.19%
Grand Total	24,397	2,627	10.77%	24,173	2,431	10.06%

- ❖ Table 1-7 demonstrates how reports may have more than one allegation. Ten (10%) percent of the reports that have allegations contain more than one type of maltreatment; meaning that around 90% of the reports contain only one allegation type.
- ❖ One interesting point is that the Southeast Service Area has a higher percentage of reports with multiple allegations than other service areas by 3 to 5 % respectively and it is the only service area that increases in percentage when 2006 is compared to 2005. This point may indicate a different practice.

SECTION II – ALLEGATIONS

This section provides information and tables based upon allegations. Section I – Reports included some measurements about allegation types at the report level. This section will present data and information about all allegations that were substantiated. An allegation type may be counted more than once if a child is an alleged victim in the same or another report for that allegation type.

A report can contain more than one allegation and a child/victim or perpetrator could be a involved in more than one allegation type in the same or separate report. The six types of allegations are as follows:

- ❖ **Physical Abuse:** Indicated by the existence of an injury that is unexplained, not consistent with the explanation given, or is non-accidental. The information may also only indicate a substantial risk of bodily injury.
- ❖ **Emotional Abuse:** Indicated by a psychopathological or disturbed behavior in a child, which is documented by a psychiatrist, psychologist, or licensed mental health practitioner to be the result of continual scapegoat, rejection, or exposure to violence by the child’s parent/caretaker.
- ❖ **Sexual Abuse:** Any sexually oriented act, practice, contact, or interaction in which the child is or has been used for the sexual stimulation of a parent, the child, or other person.
- ❖ **Emotional Neglect:** When a child is suffering or has suffered severe negative effects due to a parent’s failure to provide opportunities for normal experience which produce feelings of being loved, wanted, secure, and worthy. Lack of such opportunities may impair the child’s ability to form healthy relationships with others.
- ❖ **Physical Neglect:** The failure of the parent to provide for the basic needs, or provide a safe and sanitary living environment for the child.
- ❖ **Medical Neglect of Handicapped Infant:** The withholding of medically indicated treatment (appropriate nutrition, hydration, and medication) from disabled infants with life-threatening conditions. Exceptions include those situations in which the infant is chronically and irreversibly comatose; the provision of this treatment would merely prolong dying or not are effective in ameliorating or correcting all of the infant’s life-threatening conditions, and the provisions of the treatment itself under these conditions would be inhumane.

TABLE 2-1: SUBSTANTIATED ALLEGATION TYPES AND VICTIM COUNT

Calendar Year	Physical Abuse	Emotional Abuse	Physical Neglect	Emotional Neglect	Medical Neglect of a Handicapped Infant	Sexual Abuse	Total Allegation Counts	Children Involved in Substantiated Reports of Abuse
2003	829	363	3,712	221	6	363	5,494	3,610
2004	969	374	5,787	332	2	441	7,905	4,896
2005	809	481	5,892	231	4	540	7,957	4,840
2006	734	440	5,984	176	2	439	7,775	4,335

The count of allegation types reflects the number of allegations that were substantiated. Because a child may be a victim in more than one type of allegation and/or may be a victim of the same type of allegation in one or more reports the total number of allegations types will greater than the number of children involved in substantiated reports of abuse. The count of children reflects the unique count of victims for that year.

Table 2-1 indicates that the number of substantiated allegations from 2005 to 2006 has declined except for physical neglect. Sexual abuse substantiations peaked in 2005 at 540 but declined back to 439 in 2006 (two less than the count in 2004). The total number of substantiated allegations had a slight increase of 52 (0.66%) more in 2005 than 2004 with a total of 7,957. In 2006 this count decreased back to 7,775, a 2.3% decrease from 2005 and a 1.6% decrease from 2004 (in which there was a total count of 7,905).

TABLE 2-2: SUBSTANTIATED ALLEGATIONS TYPES AND VICTIM COUNT

Calendar Year	Allegation	Total Allegations	Gender		Children Involved
			Female	Male	
2005	Physical Abuse	809	295	356	651
	Emotional Abuse	481	154	160	314
	Sexual Abuse	540	352	114	466
	Emotional Neglect	231	82	83	165
	Physical Neglect	5,892	1,877	2,023	3,900
	Med Neg Hndcp Infant	4	2	2	4
	Total	7,957	2,762	2,738	5,500
2006	Physical Abuse	734	288	304	592
	Emotional Abuse	440	141	146	287
	Sexual Abuse	439	292	76	368
	Emotional Neglect	176	58	53	111
	Physical Neglect	5,984	1,919	2,005	3,924
	Med Neg Hndcp Infant	2		2	2
	Total	7,775	2,698	2,586	5,284

In this report the once single table used to display the counts of children in each allegation type is being presented in two separate tables (Table 2-2 and Table 2-3) to more accurately reflect the data.

Table 2-2 shows the total count of allegations and each victim by gender by abuse types.

- ❖ If a child is a victim of more than one perpetrator for the same allegation type in the same report then they are only counted once for that allegation type. This accounts for the total number of children involved being less than the total number of allegations.
- ❖ If a child is a victim for the same allegation type in a different report then the child is counted for each report where the child was a victim of that type of allegation. This accounts for the total number of children involved being higher than the number of children involved presented in Table 2-1.

- ❖ Table 2-3 was created for users that would prefer to study or track allegation types by gender and determine which gender specific types of allegations may impact the most.

TABLE 2-3: SUBSTANTIATED ALLEGATIONS TYPES BY GENDER

Calendar Year	Allegation	Gender		Total Allegations
		Female	Male	
2005	Physical Abuse	379	430	809
	Emotional Abuse	230	251	481
	Sexual Abuse	410	130	540
	Emotional Neglect	119	112	231
	Physical Neglect	2,786	3,106	5,892
	Med Neg Hndcp Infant	2	2	4
	Total	3,926	4,031	7,957
2006	Physical Abuse	343	391	734
	Emotional Abuse	216	224	440
	Sexual Abuse	346	93	439
	Emotional Neglect	95	81	176
	Physical Neglect	2,908	3,076	5,984
	Med Neg Hndcp Infant		2	2
	Total	3,908	3,867	7,775

- ❖ Both Tables 2-2 and 2-3 reflect that sexual abuse tends to involve females victims more than male victims whereas physical neglect seems to have a greater number of male victims than female victims.
- ❖ Table 2-3 indicates that more females were involved in allegations in 2006 where in 2005 the reverse was true. This is misleading; refer to Table 3-1 in Section III of this report. There were actually more female victims in both years with females surpassing males by 24 in 2005.

**TABLE 2-4: TYPES OF ABUSE OR NEGLECT IN SUBSTANTIATED CASES
BY SERVICE AREA – CY 2005 AND 2006**

Calendar Year	Service Area	Abuse	Neglect	Sexual Abuse	Children Involved in Substantiated Reports	Percentage of Children Involved
2005	Central	94	490	78	453	9.4%
	Eastern	316	1,831	189	1,607	33.2%
	Northern	126	632	63	569	11.8%
	Southeast	659	2,626	102	1,707	35.3%
	Western	95	548	108	504	10.4%
	Total		1,290	6,127	540	4,840
2006	Central	84	430	75	329	7.6%
	Eastern	303	1,891	146	1,551	35.8%
	Northern	73	426	37	353	8.1%
	Southeast	631	2,861	115	1,665	38.4%
	Western	83	554	66	437	10.1%
	Total		1,174	6,162	439	4,335

- ❖ Table 2-4 presents this information by service areas. Physical abuse and emotional abuse are rolled up into the category 'Abuse.' Physical and emotional neglect and medical neglect of a handicapped infant are consolidated into the 'Neglect' category. Sexual abuse remains to be reported out on its own.
- ❖ Eastern and Southeast Service Areas have a majority of the victims and allegations, as would be expected since the two largest cities in Nebraska reside in those areas.
- ❖ Tab C contains additional charts and tables for research references to include tables by county.

SECTION III – VICTIMS

Victims are defined as children 18 years of age and younger that were maltreated and that maltreatment was either substantiated by a court having jurisdiction over the case or by the Department of Health and Human Services through a fact-finding assessment process.

This section will provide information, demographics, and data pertaining to victims involved in reports received during calendar years 2005 and 2006. Some of the information presented in this section may have been included in previous sections but are repeated here to introduce and compare other charts and tables.

Information is presented only as facts or as points of interest and not to determine that one race or gender is more likely to be victimized than another.

TABLE 3-1: VICTIMS BY GENDER AND SERVICE AREA – CY 2005 AND 2006

Calendar Year	State Service Area	Gender		Total
		Female	Male	
2005	Central	229	224	453
	Eastern	836	771	1,607
	Northern	283	286	569
	Southeast	829	878	1,707
	Western	255	249	504
	Total	2,432	2,408	4,840
2006	Central	177	152	329
	Eastern	816	735	1,551
	Northern	181	172	353
	Southeast	823	842	1,665
	Western	240	197	437
	Total	2,237	2,098	4,335

Table 3-2 indicates that younger children are victimized more frequently than older children. In both 2005 and 2006 the highest percentage of victims are less than two years old; the percentage of victims in this age group increased by nearly 2% between the two years. Other age groups had very minor changes when the two years are compared.

According to Table 3-3 nearly 40% of the child victims are under the age of 4 and the percentage has a downward trend with the increase of the age group. Table 3-3 also includes the children's race. Additional information comparing population and victimization rates by race is presented later in this section.

Table 3-4 indicates the victim rate per 1,000. The U.S. Census report population estimates published in August 2007 was the source for the populations presented in this table. The rate per 1,000 was calculated by dividing the count of victims by race, divided by the race population for that year, and multiplied by 1,000.

The victim rate presented provides a different perspective than just looking at the raw count. The ranking nearly flip-flops, White children are the highest *counts* of victims but are fourth out of the six races when comparing the victim *rate*. The highest victim rate is the American Indian and Native Alaskan category.

The Native American Indian victim rate did show a major decline of 13% in 2006 from 2005. The population only increased slightly but the number of victims dropped by nearly 100. This may be a result of efforts implemented by the department in 2006.

TABLE 3-4: VICTIM RATE BY RACE – CY 2005 AND 2006

Race	Calendar Year 2005		Victim Rate Per 1,000	Calendar Year 2006		Victim Rate Per 1,000
	*Population (Pct)	Victims		*Population (Pct)	Victims	
American Indian and Alaskan Native	6,594 (1.4%)	305	46.25	6,621 (1.4%)	220	33.23
Asian	7,494 (1.6%)	24	3.20	7,577 (1.6%)	34	4.49
Black or African American	27,492 (5.8%)	602	21.90	27,769 (5.9%)	643	23.16
Multiple Races	11,137 (2.4%)	70	6.29	11,333 (2.4%)	54	4.76
Native Hawaiian and Other Pacific Islander	293 (0.1%)	3	10.24	290 (0.1%)	5	17.24
White	417,036 (88.7%)	3,040	7.29	416,181 (88.6%)	2,629	6.32
Grand Total	470,046	4,840	10.30	469,771	4,335	9.23

* Population Source: Estimates U.S. Census August 2007

Table 3-5 uses the same method to determine the victim rate by age and the results are quite different. Table 3-5 shows that younger children are victimized more often than older children. The ranking follows the same trend for victim rate as it does for the raw count

TABLE 3-5: VICTIM RATE BY AGE GROUP – CY 2005 AND 2006

Age	Calendar Year 2005		Victim Rate Per 1,000	Calendar Year 2006		Victim Rate Per 1,000
	*Population/(Pct)	Victims		*Population/(Pct)	Victims	
0 to 4	126,523 (26.9%)	1,845	14.58	127,665 (27.2%)	1,699	13.31
5 to 9	117,118 (24.9%)	1,406	12.00	117,832 (25.1%)	1,302	11.05

* Population Source: Estimates U.S. Census August 2007

RELATIONSHIP OF PERPETRATOR TO VICTIM:

Table 3-6 shows that non-relatives and others rank second and third and occur more often than stepparents or an unmarried partner of the parent. Biological parents were identified as the perpetrator for over 75% of victimized children in both 2005 and 2006. This percentage had a slight increase between the two years, although the count decreased by nearly 400.

TABLE 3-6: PERPETRATOR’S RELATIONSHIP TO VICTIM – CY 2005 AND 2006

Perpetrator’s Relationship to Victim	Calendar Year				Grand Total

SECTION IV – PERPETRATORS

Table 4-1 displays the gender demographics for perpetrators by Calendar Year. Both years indicate that women tend to be perpetrators more than men. There was a decline of 393 perpetrators between 2005 and 2006. This is a 10.65% decrease, which is in line with the 10.43% decrease in the count of victims, 9.1% decrease of reports assessed and the 7.8% decrease in the reports substantiated. The Victim to Perpetrator ratio in both 2005 and 2006 remained at 1.31: 1.

A perpetrator is any person that is involved with a substantiated allegation. Their name and pertinent information related to the offense is entered on the State’s Central Register.

TABLE 4-1: PERPETRATOR BY GENDER AND SERVICE AREA – CY 2005 AND 2006

Calendar Year	State Service Area	Gender		Grand Total
		Female	Male	
2005	Central	181	148	329
	Eastern	703	547	1,250
	Northern	245	174	419
	Southeast	697	581	1,278
	Western	206	208	414
	Total	2,032	1,658	3,690
2006	Central	129	121	250
	Eastern	664	511	1,175
	Northern	160	124	284
	Southeast	647	614	1,261
	Western	165	162	327
	Total	1,765	1,532	3,297

Table 4-2 is a race and age table that presents a cross tabulation of the race and Age Groups for perpetrators. The data shows that the highest percentage of all perpetrators is white and that the trend by age group peaks for the age group 20-29 and then trends downward when moving up the age group scale. The Under 20 Age Group consists of ages 18-20. This is the age grouping that is used in the Census when presenting populations by age group. A perpetrator can be under 18 but were not included in the perpetrator counts for the tables in this section.

TABLE 4-2: PERPETRATORS BY RACE AND AGE GROUP – CY 2005 AND 2006

MULTIPLE	8,745 (0.7%)	29	3.32	9,099 (0.7%)	34	3.74
Native Hawaiian or Other Pacific	882 (0.1%)	2	2.27	935 (0.1%)	2	2.14
Total	1,288,117	3,689	2.86	1,298,560	3,297	2.54

- ❖ Table 4-4 looks at the perpetrator rate by age. This table also provides a different perspective and conclusion than just looking at the raw numbers.
- ❖ Age Group 'Under 20' has the highest rate and from there the rate trends downward as the chart progresses up the age groupings. This is impacted by the fact that this is the smallest percentage group of the total population.

TABLE 4-4: PEREPTRATOR RATE BY AGE GROUP – CY 2005 AND 2006

Age Group	Calendar Year 2005		Perpetrator Rate Per 1000	Calendar Year 2006		Perpetrator Rate Per 1000
	Population (PCT)	Perpetrators		Population (PCT)	Perpetrators	
*Under 20	28,024 (2.2%)	206	7.35	27,708 (2.1%)	158	5.70

- ❖ Table 4-5 compares the race of the victim with the race of the perpetrator. This table supports other studies and reports that indicate that victimization is usually within the same race.
- ❖ The totals on these tables will not match totals on other tables. Identifying a unique perpetrator and victim relationships were used to develop the counts on this table. A child may have more than one perpetrator for the same report.

SERVICE AREAS

There are five (5) Service Areas designated for the state of Nebraska. They are designated as:

Central
Eastern
Northern

Southeast
Western

This section provides information particular about each of those service areas that are not presented in the main section of this report. The map below shows the boundaries for these service areas and what counties are included in these service areas.

Department of Health and Human Services

CENTRAL SERVICE AREA (CSA)

Central Service Area is made up of the following twenty-one (21) counties:

Adams	Howard
Blaine	Kearney
Buffalo	Loup
Clay	Merrick
Custer	Nuckolls
Franklin	Phelps
Garfield	Sherman
Greeley	Valley
Hall	Webster
Hamilton	Wheeler
Harlan	

The following are some highlights about this service area that are supported by the charts and tables on the next several page:

- ❖ There was a decrease of 143 (7.9%) CAN reports assessed between 2005 and 2006. The 1,652 CAN reports assessed in 2006 reflect 41 more reports than the 1,611 assessed in 2005.
- ❖ The 229 CAN reports substantiated in 2006 show a decrease of 75 (24.7%) from the 304 CAN reports substantiated in 2005.
- ❖ The decrease trend continues for children involved in substantiated reports. The count of 329 in 2006 was at its lowest of the last four years. This is a 27.4% decrease compared to the 453 victims in 2005.
- ❖ The top two sources of CAN reports for the CSA are educational persons or institutions and unknown persons.
- ❖ Central Service Area is in line with the rest of the state in that younger children are abused more than older children and physical neglect is the primary type of maltreatment.

EASTERN SERVICE AREA (ESA)

Eastern Service Area is made up of the following two counties:

Douglas
Sarpy

The following are some highlights about this service area that are reflected in the charts and tables on the next several page:

- ❖ There was a decrease of 764 (16.2%) CAN reports assessed between 2005 and 2006. The 3,939 CAN reports assessed in 2006 are 1,029 (35.4%) more than the 2,910 CAN reports assessed in 2003.
- ❖ The 1,069 CAN reports substantiated in 2006 is 89(7.7%) less than the 1,158 CAN reports substantiated in 2005.
- ❖ The 1,551 victims in 2006 are 56 (3.5%) less than the 1,607 victims in 2005. This is an increase of 430 (38.3%) victims compared to the 1,121 in 2003.
- ❖ The top source of CAN reports for the ESA is Law Enforcement. The Child Abuse and Neglect Hotline is located in the same building as one the Metropolitan's police departments.
- ❖ Eastern Service Area is in line with the rest of the state in that younger children are abused more than older children and physical neglect is the primary type of maltreatment.

EASTERN SERVICE AREA (ESA)

NORTHERN SERVICE AREA (NSA)

Northern Service Area is made up of the following twenty-four (24) counties:

Antelope	Holt
Boone	Keya Paha
Boyd	Knox
Brown	Madison
Burt	Nance
Cedar	Pierce
Cherry	Platte
Colfax	Rock
Cuming	Stanton
Dakota	Thurston
Dixon	Washington
Dodge	Wayne

The following are some highlights about this service area that are reflected in the charts and tables on the next several page:

- ❖ There was a decrease of 301 (15.6 %) of CAN reports assessed between 2005 and 2006. The 1,624 CAN reports assessed in 2006 are 421 (34.9%) more than the 1,203 CAN reports assessed in 2003.
- ❖ The 238 substantiated CAN reports in 2006 are 113 (32.2%) less than the 351 CAN reports substantiated in 2005.
- ❖ The 353 victims in 2006 are 216 (37.9%) less than the 569 victims in 2005. This is a decrease of 141 (28.5%) victims compared to 494 in 2003.
- ❖ The top source of reports for NSA is educational personnel. It is interesting to see the big jump in the rankings for Friends and Neighbors. In 2005 the CAN reporting source of Friends and Neighbors ranked fourth and in 2006 it was second with a percentage increase of nearly 3%.
- ❖ Northern Service Area is in line with the rest of the state in that younger children are abused more than older children and physical neglect is the primary type of maltreatment .

SOUTHEAST SERVICE AREA (SESA)

Southeast Service Area is made up of the following seventeen (17) counties:

Butler	Pawnee
Cass	Polk
Fillmore	Richardson
Gage	Saline
Jefferson	Saunders
Johnson	Seward
Lancaster	Thayer
Nemaha	York
Otoe	

The following are some highlights about this service area that are reflected in the charts and tables on the next several page:

- ❖ There was a small increase of 13 (0.4%) CAN reports assessed between 2005 and 2006. This is the only service area that showed an increase in the number of CAN reports assessed. The 3,090 CAN reports assessed in 2006 are 973 (45.9%) more than the 2,117 CAN reports assessed in 2003.
- ❖ The 1,216 substantiated CAN reports in 2006 are 72 (6.3%) more than the 1,144 CAN reports substantiated in 2005. This is the only service area that had an increase in the number of CAN reports that were substantiated
- ❖ The 1,665 victims in 2006 are 42 (2.5%) less than the 1,707 victims in 2005. This is an increase of 420 (33.7%) victims compared to the 1,245 in 2003.
- ❖ The top source of reports for the SESA is Law Enforcement personnel. Nearly 40% of the reports received in this service area come from Law Enforcement personnel.
- ❖ Southeast Service Area is in line with the rest of the state in that younger children are abused more than older children and physical neglect is the primary type of maltreatment.

WESTERN SERVICE AREA (WSA)

Western Service Area is made up of the following twenty-nine (29) counties:

Arthur	Hitchcock
Banner	Hooker
Box Butte	Keith
Chase	Kimball
Cheyenne	Lincoln
Dawes	Logan
Dawson	McPherson
Deuel	Morrill
Dundy	Perkins
Frontier	Red Willow
Furnas	Scotts Bluff
Garden	Sheridan
Gosper	Sioux
Grant	Thomas
Hayes	

In previous years the Western Service Area was reported out as two separate Service Areas; Western and Southwest Service Areas. These service areas were combined to form one Service Area known as the Western Service Area in 2006.

The following are some highlights about this service area that are reflected in the charts and tables on the next several page:

- ❖ There was a small decrease of 73 (3.0%) CAN reports assessed between 2005 and 2006. The 2,324 CAN reports assessed in 2006 are 869 (59.7%) more than the 1,455 CAN reports assessed in 2003.
- ❖ The 313 substantiated CAN reports in 2006 are 54 (14.7%) less than the 367 CAN reports substantiated in 2005.
- ❖ The 437 victims in 2006 are 67 (18.3%) less than the 504 victims in 2005. This is an increase of 104 (31.2%) victims compared to the 333 in 2003.
- ❖ The top source of reports for the WSA is “Unknown”. The second highest source is Educational Personnel.
- ❖ Western Service Area is in line with the rest of the state in that younger children are abused more than older children and physical neglect is the primary type of maltreatment.

WESTERN SERVICE AREA (WSA)

Types of Abuse or Neglect in Substantiated Cases – CY 2005 and 2006

In a single case a child (or children) could have been involved with one or more substantiated types of abuse or neglect so the number of substantiated allegations is larger than the total number of involved children in these instances.

Calendar Year	Physical Abuse	Emotional Abuse	Physical Neglect	Emotional Neglect	Med Neg Hndcp Infant	Sexual Abuse	Children Involved in Substantiated Reports
