The separate package must be clearly marked “PROPRIETARY” on the outside of the package or if submitting the proposal or response electronically, as a separate electronic file that is named “PROPRIETARY”. Vendor may not mark their entire Request for Information as proprietary. Failure of the vendor to follow the instructions for submitting proprietary and copyrighted information may result in the information being viewed by other vendors and the public. Proprietary information is defined as trade secrets, academic and scientific research work which is in progress and unpublished, and other information which if released would give advantage to business competitors and serve no public purpose (see Neb. Rev. Stat. § 84-712.05(3)). In accordance with Attorney General Opinions 92068 and 97033, vendors submitting information as proprietary may be required to prove specific, named competitor(s) who would be advantaged by release of the information and the specific advantage the competitor(s) would receive. Although every effort will be made to withhold information that is properly submitted as proprietary and meets the State’s definition of proprietary information, the State is under no obligation to maintain the confidentiality of proprietary information and accepts no liability for the release of such information. The State will determine, in its sole discretion, if the disclosure of the information designated by the Bidder as proprietary would 1) give advantage to business competitors and 2) serve no public purpose. The Bidder will be notified of the State’s decision. Absent a determination by the State that the information may be withheld pursuant to Neb. Rev. Stat. § 84-712.05, the State will consider all information a public record subject to disclosure.

H. REQUEST FOR INFORMATION OPENING
The sealed and electronic responses will be publicly opened and the responding entities announced on the date, time, and location shown in the Schedule of Events.
III. PROJECT DESCRIPTION AND SCOPE OF WORK

A. PURPOSE AND BACKGROUND
The State of Nebraska is issuing this Request for Information (RFI) to solicit information from vendors who can provide a commercial-off-the-shelf Contact Tracing Management system, which will be used to track and monitor data being submitted to and requested by contact tracers in response to the COVID-19 pandemic.

In carrying out its public health mission, the State of Nebraska is tracing the contacts of individuals who have been diagnosed with COVID-19. Contact tracing involves the monitoring of individuals with COVID-19 to better keep them safe, notifying others of potential exposure, and preventing additional transmission.

The system will provide a user-friendly technology solution that will contain and manage information from multiple sources on citizens who need to be communicated with via phone, email or text regarding contact investigation and/or tracing. The communication efforts will be executed and logged using industry standard call center methods such as scheduled call back times, varying the communication medium, and metrics-driven decisions. The system will allow DHHS and the local health departments access to review call center performance and generate robust reporting on case efforts.

B. CURRENT ENVIRONMENT
Contact tracers in the State of Nebraska currently use multiple systems: NEDSS, RedCap, and SharePoint.
1. NEDSS is the electronic reporting source for positive laboratory results, where reportable disease information is centrally stored for analysis purposes, and also for sharing disease data with CDC and local health department partners.
2. RedCap is used for collecting information on positive case investigations and contact calls. It provides the contact information, who made the contact, and the log of call attempts.
3. SharePoint is used for case workflow and assignment for both cases and contacts.

The limitations and drawbacks of the current systems are:
1. limited workflow automation,
2. duplicate data entry,
3. minor data integrity checks,
4. no automated call logging or scheduling,
5. no result reporting engine,
6. case and contact data being stored in multiple locations,
7. challenges sharing laboratory data electronically from NEDSS into the other systems, and
8. metrics on outcomes and contact tracing work production (including timeliness and data integrity) are not easily compiled for reporting purposes.

C. SYSTEM REQUIREMENTS
1. The vendor should describe how the System Security Plan of their solution ensures that the solution meets all applicable State and Federal requirements for the data.
2. DHHS prefers a NIST based Security Plan that meets the guidance provided by CMS for MARS-E systems including a third party assessment of their Security Plan.

D. EXISTING CONTRACTS AND PRICING
1. Vendors should indicate if they have:
   a. An existing contract with the Government Services Administration (GSA); or,
b. An existing contract that was competitively bid by another state or group of states, a group of states and any political subdivision of any other state, or a cooperative purchasing organization on behalf of a group of states.

2. Vendors should indicate if they are willing to provide their system to the State of Nebraska through one of the following third-party software providers:
   a. SHI International Corp.
   b. Insight Public Sector Inc.
   c. CDW Government Inc.

3. DHHS is seeking a system from a vendor who has provided this system to another state/organization of approximately the same size and project complexity. Vendor should describe the project and complexity.

4. Vendors should provide pricing, which should include the following items:
   a. Type of license (seat, user, enterprise, or subscription) and price per license
   b. Any additional fees such as implementation and storage
