

BECOMING A SAFE INJECTION CHAMPION

WD2901

PROGRAM DESCRIPTION: Seminars are designed to increase knowledge and change competency of injection safety practices and strategies in Healthcare settings. Content is derived from research, best practice literature and documented outbreaks. After completion of the program, the participant is expected to educate and monitor other personnel at their Health care facility of these practices.

OBJECTIVES:

At the conclusion of the session, the participant will be able to:

1. Identify the correct equipment and its use for injection administration
2. Identify 3 areas where medications may be mishandled
3. Name 4 correct processes for maintaining a clean or sterile environment for medication preparation or administration
4. Identify 2 areas where oversight or perceptions of cost saving may put patients at risk for unsafe practice
5. Relate 2 best practices for blood glucose testing and medication pen administration
6. List 3 principles of outcomes research and quality assessment methods to the evaluation of pharmaceutical care
