NEBRASKA PARTNERSHIP for MENTAL HEALTHCARE ACCESS in PEDIATRICS

A Good State of Mind

http://dhhs.ne.gov/NEPMAP

NEBRASKA
Good Life. Great Mission.

DEPT. OF HEALTH AND HUMAN SERVICES
The Nebraska Partnership for Mental Health Care Access in Pediatrics (NEP-MAP) is a statewide project made possible by the Health Resources and Services Administration (HRSA) Pediatric Mental Health Care Access Program, Grant No. U4CM32322, with Nebraska Department of Health and Human Services serving as lead agency. The contents of the document are the responsibility of the members of the project team and do not necessarily represent the official views or endorsement of HRSA or the Nebraska Department of Health and Human Services.

**NEP-MAP Project Director:**

Sara Morgan

**NEP-MAP Co-Project Managers:**

Kathy Karsting, RN, MPH and Jennifer Auman, BS

**Members of NEP-MAP Technical Workgroup #1:**

Jessica Andersen, RN, BSN, CPHQ

Jennifer Auman

Lynne Brehm, MS

Ricki Gregory, BS, RN, CPHQ

Sarah Hanify, LCSW, MPA

Bernie Hascall, Behavioral Health System of Care Administrator

Barbara Jackson, PhD

Susan R. Jeffrey, RN, MSN

Kathy Karsting, RN, MPH

Christian Klepper, PsyD

Gay McTate, LCSW, ILMHP

Krynn Pekny, MSW, LMHP

Sarah Swanson, MPH

Drissa Toure, MD, PhD, MPH

The Technical Workgroup acknowledges with appreciation the many partners and stakeholders participating in the quality improvement trials of the Screening and Referral Guide who contributed so much important and useful feedback.

The Nebraska Partnership for Mental Health Care Access in Pediatrics (NEP-MAP) promotes comprehensive screening of all children, youth, young adults, and their caregivers for mental and behavioral health issues at appropriate intervals using valid tools accurately and appropriately for age, language, and culture. Due to the significant relationship between parent/caregiver well-being and child well-being, parent/caregiver screening is recommended.

The Screening and Referral Guide was developed by the partners working as NEP-MAP Technical Workgroup #1 in 2019-2020. NEP-MAP gratefully acknowledges that this work builds on a strong foundation of collaborative work in Nebraska by many partners, seeking to improve early childhood and family outcomes for all families in the areas of mental and behavioral health. Information is up-to-date as of October 2019. The Technical Workgroup welcomes feedback on the Screening and Referral Guide at the following email address: DHHS.MCASHfeedback@nebraska.gov.

The Purposes of the Screening and Referral Guide are to:

- Provide a list of commonly-used, valid and reliable tools for screening readily available and suitable for use community and clinical settings. (The Screening Menu is not intended to be all inclusive of validated instruments).
- Present best practices in screening as involving an array of instruments, validated and normed for age and culture, and a lifecourse approach;
- Provide an accessible framework for community and behavioral health referral resources statewide;
- Provide a structure to assess current and future levels of screening in community and clinical settings.
SCREENING MENU

ALL AGES — 0–21 YEARS

*Interpersonal Violence and Trauma*
- Survey of Well-being of the Young Child (SWYC) (ages 2-60 months)
- STaT: Three question screener for IPV
- Antenatal Risk Questionnaire (ANRQ)

*Social Needs Screening*
- American Academy of Family Physicians Social Needs Screening Tool – the Everyone Project
- National Association of Community Health Centers PRAPARE (Protocol for Responding to and Assessing Patients’ Assets, Risks, and Experiences)
- Centers for Medicare and Medicaid Services The Accountable Health Communities Health-Related Social Needs Screening Tool

EARLY CHILDHOOD — 0–5 YEARS

*Social and Emotional Development of the Young Child*
- Survey of Well-being of the Young Child (SWYC) (ages 2 – 60 months)
- Ages and Stages – Social Emotional (ASQ-SE2)
- Modified Checklist for Autism in Toddlers (MCHAT)

*Autism*
- Survey of Well-being of the Young Child (SWYC) (ages 2 – 60 months)
- Ages and Stages (ASQ3) (ages 1-66 months)
- Modified Checklist for Autism in Toddlers (MCHAT)

*Lead Exposure*
- CDC screening for lead exposure risk

LATER CHILDHOOD AND ADOLESCENCE

*Adolescent Depression*
- PHQ-9 modified for adolescents
- Suicide Behavior Questionnaire-Revised (SBQ-R)

*Substance Use*
- UNCOPE – Screen for risk of abuse and dependence on alcohol or other substances

MOTHERS AND CAREGIVERS

*Maternal/Caregiver Depression*
- Survey of Well-being of the Young Child (SWYC) (ages 2 – 60 months)
- Center for Epidemiological Studies for Depression Scale – Revised (CES-D)
- Antenatal Risk Questionnaire (ANRQ)
- Edinburgh Postnatal Depression Scale (EPDS)

*Maternal/Caregiver Substance Use*
- Survey of Well-being of the Young Child (SWYC) (ages 2 – 60 months)
- UNCOPE – Screen for risk of abuse and dependence on alcohol or other substances

The following conversation tips are shared by NEP-MAP partners, including family members, providers, and advocates. Constructive conversations between service providers and families about children’s development and behavior can be tricky, for all concerned. There must be respectful, two-way dialogue in order to act in a child’s best interests.

- Begin with building rapport and trust. Engage in eye contact and demonstrate respectful listening behavior.

- Recognize that parents and caregiving family members are decision-makers and the experts about their children. Providers are trying to find the best solutions. Screening and referral services are intended to benefit children and their families.

- Let families know that screening is an important part of healthy development. To screen does not mean something is “wrong”. Routine screening is best practice in healthy development. Providers can and should say, “I ask everyone these questions.”

- Screening does not mean diagnosis, or confirmation of a disorder.

- If concerns arise, families need time to process the information they are given. The prospect of a mental health diagnosis can seem overwhelming at first. Culture and language may influence how a family responds, the time they need, and the barriers they face.

**Provider:** “Do you have concerns about your child’s behavior and development?”

**Parent:** “I have concerns about my child.”

- How is your child’s sleep?
- How is your child’s energy level?
- Any recent changes?
- How does your child spend unstructured time?
- What concerns do you hear from school or child care?
- What worries or stresses you about your child?

**Provider:** “Families make important decisions about a child’s health and behavior.”

**Parent:** “I need support and information to make the best decisions I can for my child and family.”

- How have you responded to behavior concerns so far?
- What are your thoughts about screening and possible treatment?
- Do you think we should take a closer look?
- Are you wondering about any specific condition, such as autism? If so, why?
- What concerns or questions do you have for me?
- If a situation gets worse or a crisis were to occur, what are some options to know about?
- What supports are available to help?
Behavioral Health Resources For Primary Care Providers – Statewide

Nebraska Family Helpline

*Raising kids is hard. It’s okay to ask for advice.*

The Nebraska Family Helpline makes it easier for families, schools, advocates and others working with children and youth to obtain assistance by providing a single contact point 24 hours a day, seven days a week. Trained Helpline operators screen calls to:

- Assess immediate safety needs,
- Identify the potential level of a behavioral health crisis,
- Make recommendations or referrals to appropriate resources, and
- Help callers connect to emergency resources or providers.

Any Problem. Any Time.

1-888-866-8660

The Helpline is available statewide and supervised by licensed mental health professionals.

**Family Navigator Program:** Available within 24 to 72 hours after a Helpline referral, the Navigator Program assists families in identifying family strengths, setting goals and identifying existing community-based services. The Family Navigator program provides families with support and an understanding ear.

*“Helping People Live Better Lives”*
## Statewide Resource and Referral Centers

*Five one-stop suggestions for help finding resources by zip code, town, or region.*

</thead>
<tbody>
<tr>
<td><strong>Nebraska Family Helpline</strong></td>
<td>The Nebraska Family Helpline at (888) 866-8660 makes it easier for families to obtain assistance by providing a single contact point 24 hours a day, seven days a week. Trained Helpline operators screen calls to assess immediate safety needs, identify the potential level of a behavioral health crisis, make recommendations or referrals to appropriate resources, and help callers connect to emergency resources or providers. The Helpline is supervised by licensed mental health professionals. Family Helpline operators also can connect eligible families to the Family Navigator Service. This service helps families move through Nebraska’s child- and family-care system more efficiently to get the assistance they need.</td>
</tr>
<tr>
<td><strong>Nebraska Resource and Referral System</strong></td>
<td>The NRRS is a statewide database created with input from Nebraska families, service providers and organizations. The NRRS provides 1-800 numbers as well as web sites and email contacts to help you connect faster to the services you are seeking. This database provides individuals the opportunity to have a real choice in the diverse selection of service providers by allowing users to more easily locate and compare services of local and state agencies. Search among thousands of community agencies and organizations for the services and resources you need. Refine your search by name, keyword, age-group and/or location.</td>
</tr>
<tr>
<td><strong>United Way 211</strong></td>
<td>211 is a free, community resources hotline that is available to the public with multilingual access. By dialing, or texting 211, you will be connected with a trained operator to help assess your needs, provide information and offer referrals to human services for your everyday needs and times of crisis.</td>
</tr>
<tr>
<td><strong>Behavioral Health Network of Care</strong></td>
<td>This searchable site allows users to find behavioral health service providers by zip code, county, and/or behavioral health region in Nebraska.</td>
</tr>
<tr>
<td><strong>Nebraska Mental Health.com</strong></td>
<td>The goal of NebraskaMentalHealth.com is to expand knowledge about mental health terminology and to help connect those in need with the mental health information, treatment, and services. NebraskaMentalHealth.com provides centralized access to local (Omaha) and regional mental health information in a single location.</td>
</tr>
</tbody>
</table>
**Note to users:** These are organizations with state-wide or regional reach in specific areas of interest. This is not intended to be an all-inclusive list of local resources, nor does the list represent endorsement by NEP-MAP. Providers are encouraged to build their own local resource directories — see the template in the next section.

**Care Coordination/Navigation Assistance**

Nebraska’s Managed Care Organizations (Heritage Health) offer care management services for enrolled members. This can be very helpful for children and families with complex needs.

- **Nebraska Total Care:** Contact Provider Services at 1-844-385-2192
- **Well Care:** Behavioral Health Toolkit for Primary Care Providers
  - https://www.wellcare.com/Nebraska/Providers/Medicaid/Behavioral-Health/Behavioral-Health-Toolkit
- United Health Care:
  - https://www.uhccommunityplan.com/ne/medicaid/heritage-health

Care managers will:
- Work with you and family members and friends on a plan of care.
- Explain medical terms in plain language.
- Coordinate your doctor appointments.
- Provide your care team with your medical records.
- Make a referral to community social service programs.
- Offer rewards like a gift card for chronic care checkups or well care visits.

The **American Academy of Pediatrics** recommends routine periodic preventive screening of infants, children, youth, and maternal caregivers including: Developmental Screening; Autism Spectrum Disorder Screening; Developmental Surveillance; Psychosocial/Behavioral Assessment; Tobacco, Alcohol, or Drug Use Assessment; Depression Screening; Maternal Depression Screening; and Lead.

The **American Congress of Obstetricians and Gynecologists** recommends that all obstetrician–gynecologists and other obstetric care providers complete a full assessment of mood and emotional well-being (including screening for postpartum depression and anxiety with a validated instrument) during the comprehensive postpartum visit for each patient. If a patient is screened for depression and anxiety during pregnancy, additional screening should then occur during the comprehensive postpartum visit. There is evidence that screening alone can have clinical benefits, although initiation of treatment or referral to mental health care providers offers maximum benefit.

https://www.acog.org/Clinical-Guidance-and-Publications/Committee-Opinions/Committee-on-Obstetric-Practice/Screening-for-Perinatal-Depression

**American Congress of Obstetricians and Gynecologists (ACOG)**, in line with the **U.S. United States Department of Health and Human Services (HHS) and Institute of Medicine (IOM)**, recommends that Interpersonal violence (IPV) screening and counseling should be a core part of women’s preventive health visits and at periodic intervals, including obstetric care (at first prenatal visit, at least once per trimester, and at the postpartum checkup, as disclosure may not occur at the first attempt). Providers should also offer ongoing support, and review available prevention and referral options.

https://www.ahrq.gov/ncepcr/tools/healthier-pregnancy/fact-sheets/partner-violence.html#practices

The **Centers for Disease Control and Prevention** recommend the following screening criteria should be incorporated in all state plans (https://www.cdc.gov/mmwr/preview/mmwrhtml/rr5809a1.htm). A Medicaid-eligible child who meets any one of the following criteria should receive a blood lead screening test:

- Child is suspected by a parent or a health-care provider to be at risk for lead exposure.
- Child has a sibling or frequent playmate with EBLL.
- Child is a recent immigrant, refugee, or foreign adoptee (27–29).
- Child’s parent or principal caregiver works professionally or recreationally with lead (22,33).
- Child has a household member who uses traditional, folk, or ethnic remedies or cosmetics or who routinely eats food imported informally (e.g., by a family member) from abroad (22).
- Child’s family has been designated at increased risk for lead exposure by the health department because the family has local risk factors for lead exposure (e.g., residence in a designated high-risk zip code or near a known point source).

The national evidence-based **Maternal Infant Early Childhood Home Visiting program (MIECHV)** requires screening of all families using the ASQ, ASQ-SE, the UNCOPE, the three question STaT screening for interpersonal violence, and the CES-D. Social determinants of health screening is woven into family assessment. Maternal Depression screening is performed using an adapted Edinburgh.

The **National Institute on Alcohol Abuse and Alcoholism**, in collaboration with the **American Academy of Pediatrics**, recommends all practitioners serving youth ages 9-18 years screen for alcohol and substance use. See the **ALCOHOL SCREENING AND BRIEF INTERVENTION FOR YOUTH: A PRACTITIONER’S GUIDE** at https://www.niaaa.nih.gov/sites/default/files/publications/YouthGuide.pdf
The National Child Traumatic Stress Network recommends trauma-informed screening and assessment practices to help providers identify children’s and families’ needs early in the process and to tailor services to meet those needs. Trauma Screening refers to a tool or process that is a brief, focused inquiry to determine whether an individual has experienced one or more traumatic events, has reactions to such events, has specific mental or behavioral health needs, and/or needs a referral for a comprehensive trauma-informed mental health assessment. Screening is a “wide-net” process. Trauma-Informed Mental Health Assessment refers to a process that includes a clinical interview, standardized measures, and/or behavioral observations designed to gather an in-depth understanding of the nature, timing, and severity of the traumatic events, the effects of those events, current trauma-related symptoms, and functional impairment. Clinicians use the assessment to understand a child’s trauma history and symptom profile; to determine whether a child is developmentally on target in the social, emotional, and behavioral domains; to inform case conceptualization and drive treatment planning; and to monitor progress over time.

The Nebraska Pregnancy Risk Assessment Monitoring System (PRAMS) recommended in 2018 screening women in the prenatal period for depression, domestic violence, and substance use. In the instance of substance use, recommended screenings are the AUDIT-C and the DAST-10.

http://dhhs.ne.gov/PRAMS%20Documents/PRAMS%20Screening%20Resource%202018.pdf#search=Prenatal%20Visits%20are%20Critical%20Opportunities

The Suicide Prevention Resource Center recommends suicide screening of all patients using validated and standardized instruments, and provides a toolkit for Primary Care Practices on suicide prevention. See the toolkit, including information on planning for referrals for mental health treatment, here:

http://www.sprc.org/sites/default/files/Final%20National%20Suicide%20Prevention%20Toolkit%202.15.18%20FINAL.pdf
