#### Introduction

This report card focuses on Nebraska's Limited English Proficient (LEP) population. According to the U.S. Department of Health and Human Services, LEP individuals are those who "do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English." The LEP population in Nebraska is continuously growing. From 2000 to 2018, the LEP population grew by almost 80% for foreign-born in Nebraska.

The U.S. Census Bureau, through the annual American Community Survey (and via the decennial Census from 1890 to 2000), asks survey recipients if they speak a language other than English at home. If the answer is "Yes," they were then asked about the language used, and "How well does this person speak English?" Any answer other than "Very well" defines the respondent as Limited English Proficient. The data presented in this report card were obtained mainly from the Census's American Community Survey 2018 5-Year estimates and Nebraska Department of Education.

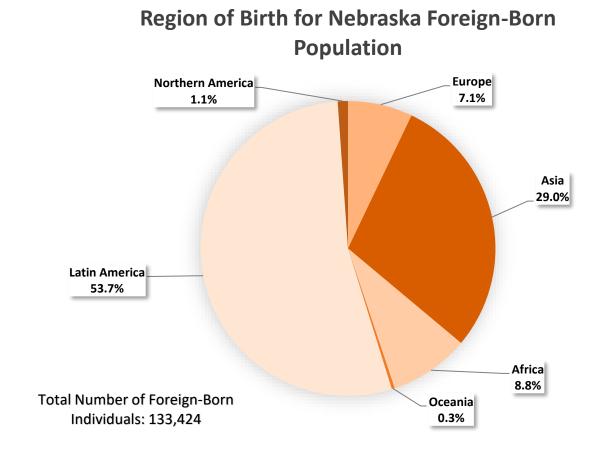

In Nebraska, English language knowledge is often essential in navigating the health care system. Research has shown that those with limited English proficiency are more likely to have difficulty understanding medical situations, more likely to have trouble understanding labels, and more likely to have adverse reactions to medications. The purpose of this report card is to highlight the disparities faced by LEP individuals to identify better ways to serve the population.

#### **Nebraska Foreign-Born Population**

Based on the U.S. Census Bureau's 5-Year estimate in 2018, there were 15,674 native-born and 133,424 foreign-born residents in Nebraska. The native-born population includes anyone who is a U.S. citizen at birth, whereas the foreign-born population includes anyone who is not a U.S. citizen at birth, including those who become U.S. citizens through naturalization.<sup>2</sup> Foreign-born individuals represented 7% of Nebraska's overall population.

The top three regions of birth for the foreign-born population in Nebraska were Latin America, Asia, and Africa. Latin America accounted for over 50% of all foreign-born Nebraskans, whereas almost 30% of foreign-born Nebraskans were born in Asia.

#### Languages Spoken in Nebraska by Ability to Speak English

Data for this table were derived from the U.S. Census Bureau's 2018 American Community Survey (ACS) 5-year estimates. The data includes Nebraskans (age 5 years and over) who can speak a language. Respondents were instructed to print the name of the non-English language spoken at home and self-report their ability to speak English. If the person spoke more than one language, the person was to report the language spoken more often.

The percentages for this table were kept at 2 decimal places to ensure every smaller proportion of LEP population was counted.

# Language Spoken at Home by Ability to Speak English and Age Group

The Census asks questions about language use at home to locate groups of people who speak a language other than English. Their isolation or integration into a primarily English-speaking community can be determined by their ability to speak English proficiently. The estimate and percentage of Nebraskans who speak a language other than English at home were listed below by age group.

Among the individuals aged 5-17 who reside in Nebraska, 35,114 individuals or about 2.0% speak Spanish at home. Referring to this estimate, almost a quarter of these individuals speak English less than "very well." Although only 0.3% of Nebraskans in this age group reported speaking Asian and Pacific Islander languages at home, almost 50% speak English less than "very well".

Approximately 5% of individuals ages 18-64 from Nebraska reported speaking Spanish at home. Over half of this population was considered as an LEP individual. Similarly, over 50% those who speak any Asian or other Pacific Islander languages reported speaking English less than "very well." About 0.6% of Nebraskans in this age group speak other languages at home, but almost 44.8% of this population were LEP individuals.

#### **Limited English Proficient Population by County**

The following table, based on data from ACS 2018 5-Year Estimates, shows the estimates and percentages of Nebraskans who self-report their ability to speak English "less than very well" by county. County-level data on English proficiency is crucial to better understand and address demographic diversity in a specific area.

To determine those who speak English "less than very well", survey recipients were asked if they speak a language other than English at home. If the answer is "Yes," they were then asked about the language used, and "How well does this person speak English?" Any answer other than "Very well" defines the respondent as a Limited English Proficient individual.

#### **Conclusion**

Nebraska is home to a population of diverse individuals who speak a variety of languages. While most non-native English speakers do speak English very well or with near-native fluency, there is still a proportion of the population considered Limited English Proficient (LEP). Based on this report card, a handful of different languages were seen to be spoken every day among Nebraskans, and a significant percentage of those who could not speak English well were identified in each age group and county.

The information about the proportion of LEP individuals from these different areas was essential to better target the individuals in need, especially the elderly and those who reside in smaller counties. As seen in this report card, about 77% of Nebraskans ages 65 and older who speak any Asian or Pacific Islander language at home reported speaking English less than "very well" or were considered LEP individuals.

In Nebraska, English language knowledge is often essential in navigating the health care system. Research has shown that those with limited English proficiency are more likely to have difficulty understanding medical situations and medication labels, which can lead to these individuals having an adverse reaction to medications.<sup>3</sup>
