Summary Statistics for Patients with Parkinson’s Disease

Avg Age at Diagnosis*: 73.61 years
Male: 8,375 (53.4%)
Female: 7,252 (46.6%)
Deceased: 11,355 (72.7%)
Living: 4,272 (27.3%)
Nebraska Resident: 15,053 (96.0%)
Other Resident: 574 (4.0%)

TOTAL PATIENTS: 15,627

*High Age at Diagnosis is due to missing data

Diagnosis of PD based on physician office confirmation or death certificate

*The registry began collecting data in 1997.

**Decrease in cases reported due to registry downtime caused by lack of program funding.

***Data collection is on-going, therefore yearly totals are not final.
