The Contractor and the Service Area Contract Liaison or designee shall jointly consult regarding obtaining an HIV antibody test on any ward when, despite having taken universal precautions, some exposure to HIV was possible. When informed consent is requested for such Contractor staff exposure, the Service Area Contract Liaison or designee shall request the Contractor's written OSHA policies (that comply with state law when appropriate) describing the need for informed consent from the ward's guardian, the process by which the testing and the results of testing are kept confidential and not placed in the youth's record, and the fact that the Protection and Safety Worker or designee shall be notified of the results of such confidential testing.
