

FINAL REPORT

9th Mini Children and Family Services Review

Northern Service Area

(January 17th-19th 2012)

Executive Summary

Children and Family Services Review

(Northern Service Area)

A mini CFSR was held in Norfolk on January 17th-19th, 2012. 14 cases were reviewed. The period under review was January 1st, 2011 through January 1st, 2012. 8 cases were foster care cases and 6 were in home cases. Eight cases were abuse/neglect and six were juvenile offender cases. There were 5 review teams that conducted this review. Second level review was completed by Quality Assurance worker Leslie Schlecht.

Background Information

The mini CFSR is modeled after the Federal CFSR reviews and assesses the service area's performance on 23 items relevant to seven outcomes.

With regards to outcomes, an overall rating of Strength or Area Needing Improvement (ANI) is assigned to each of the 23 items incorporated in the seven outcomes depending on the percentage of cases that receive a Strength rating in the onsite case review. An item is assigned an overall rating of Strength if 90 percent of the applicable cases reviewed are rated as Strength. Performance ratings for each of the seven outcomes are based on item ratings for each case. A service area may be rated as having "substantially achieved," "partially achieved," or "not achieved" the outcome. The determination of whether a service area is in substantial conformity with a particular outcome is based on the percentage of cases that were determined to have substantially achieved that outcome. In order for a service area to be in substantial conformity with a particular outcome, 95 percent of the cases reviewed must be rated as having substantially achieved the outcome. The standard for substantial conformity is based on the standard set for Federal CFSR. The standards are based on the belief that because child welfare agencies work with our country's most vulnerable children and families, only the highest standards of performance should be acceptable. The focus of the CFSR process is on continuous quality improvement; standards are set high to ensure ongoing attention to the goal of achieving positive outcomes for children and families with regard to safety, permanency, and well-being.

A service area that is not in substantial conformity with a particular outcome must work with their local CQI team to develop and implement a Program Improvement Plan (PIP) to address the areas of concern associated with that outcome.

Key CFSR Findings Regarding Outcomes

The service area did not achieve substantial conformity on any of the seven outcomes. The 9th Mini CFSR identified one area of high performance in Northern Service Area with regard to achieving desired outcomes for children. That outcome was Safety Outcome 2 (Children are safely maintained in their homes whenever possible and appropriate). That outcome was substantially achieved in 93% of the cases. The service area did achieve overall ratings of strength for the individual indicators pertaining to services to protect children in the home and prevent removal or re-entry into foster care (item 3), foster care re-entry (item 5), reunification, guardianship, or permanent placement with relatives (item 8), adoption (item 9), proximity of foster care placement (item 11), placement with siblings (item 12), and mental/behavioral health of the child (item 23).

The mini CFSR review identified key areas of concern with regard to achieving outcomes for children and families. Concerns were identified with regard to Permanency Outcome 1 (children have permanency and stability in their living situations), which was substantially achieved in only 38 percent of the cases reviewed. The lowest rating within this outcome was for item 7 (permanency goal for child), which was rated as a strength in 63 percent of the cases reviewed. Item 10 (other planned permanent living arrangement) was rated as a strength in 0 percent of the cases, but only one case was applicable to this item.

Concerns were also identified with regards to Well Being Outcome 1 (families have enhanced capacity to provide for their children's needs), which was substantially achieved in only 14 percent of the cases reviewed. Item 17 (needs and services of the child, parents, and foster parents) was rated as a strength in only 14 percent of the cases. Item 18 (child and family involvement in case planning) was rated as a strength in 21 percent of the cases. Item 20 (caseworker visits with parents) was rated as a strength in only 8 percent of the cases.

KEY FINDINGS RELATED TO OUTCOMES

I. SAFETY

Outcome S1: Children are, first and foremost, protected from abuse and neglect.

Status of Safety Outcome S1

	Total Number	Total Percentage
Substantially Achieved:	3	60.00%
Partially Achieved:	2	40.00%
Not Achieved or Addressed:	0	0%
Not Applicable:	9	64.29%

Item 1. Timeliness of initiating investigations of reports of child maltreatment

In assessing item 1, reviewers were to determine whether the response to a maltreatment report occurring during the period under review had been initiated in accordance with child welfare agency policy. A new intake tool was implemented in 2003 which is based upon a priority response model with Priority 1 calling for a response by the worker within 24 hours of the time that the report is received by DHHS. Priority 2 designated reports are to have face to face contact with the alleged victim by Protection and Safety within 0 to 5 days from the time the intake is received and Priority 3 has a response time of 0-10 days. Data is generated monthly to ensure compliance with the response times.

Review Findings:

*Five of the 14 cases reviewed were applicable to this item.

*4 (80%) cases were rated as strengths

*1 (20%) case was rated as area needing improvement

*9 cases were not applicable

*Four cases that were rated as strengths for this item were out of home cases. The one case rated as area needing improvement for this item was an in home case.

Strengths: In all the cases timeframes of initiating the investigation within the designated time frame were met. Two intakes were priority 1, one intake was opened as a dependent child and had no priority, two intakes were priority 2, and the last intake was a priority 3.

Area needing improvement: In this case no initial assessment was located in the case file, so reviewers were unable to determine if face to face contact with the victim was made in a timely manner.

Item 2. Repeat maltreatment

In assessing this item, reviewers were to determine whether there had been at least one substantiated/inconclusive/petition to be filed maltreatment report during the period under review, and if so, whether another substantiated/inconclusive/petition to be filed report occurred within a 6 month period before or after the report identified. Cases were

considered not applicable for assessment if the child or family had never had a maltreatment report.

Review Findings:

*Two of the 14 cases reviewed were applicable to this item

*1 (50%) case was rated as a strength

*1 (50%) case was rated as area needing improvement

*12 cases were not applicable

*One case that was rated as a strength on this item was an in home case. The one case rated as area needing improvement on this item was an out of home case.

Strengths: There was only 1 intake that was received on the family during the period under review and during the life of the case.

Area Needing Improvement: There were two intakes during the period under review (priority 1 and priority 2). There has not been findings entered on either assessment and they are still open with a court pending finding.

S1. Outcome Reviewer Comments: On the case that was found to be substantially achieved for this outcome, the intakes received by the Department were investigated within the set time frames and face to face contact with the alleged victim was made within the timeframes. The one case needing improvement for this item was because findings have yet to be entered on the intakes.

Outcome S2: Children are safely maintained in their homes whenever possible and appropriate.

Status of Safety Outcome S2

	Total Number	Total Percentage
Substantially Achieved:	13	92.86%
Partially Achieved:	0	0%
Not Achieved or Addressed:	1	7.14%
Not Applicable:	0	0%

Item 3. Services to family to protect child (ren) in home and prevent removal

For this item, reviewers were to assess whether in responding to a substantiated/inconclusive/petition to be filed maltreatment report or risk of harm, the agency made diligent efforts to provide services to families to prevent removal of children from their homes while at the same time ensuring their safety.

Review Findings:

- *Six of the 14 cases reviewed were applicable to this item.**
- *6 (100%) cases were rated as strengths**
- *0 cases were rated as area needing improvement**
- *8 cases were not applicable**

***Three of the cases rated as strengths for this item were out of home cases and the other three were in home cases.**

Strengths: In three cases, it was noted that there were numerous services in place to prevent removal/re-entry into foster care. Those services ranged from intensive outpatient treatment to family support in the home. Other services were tracker, family therapy, transportation assistance, and intensive family preservation. In three cases, the child had to be removed from the home due to safety concerns that were unable to be controlled within the home.

There were no cases found to be needing improvement on this item.

Item 4. Risk of harm to child

The assessment of Item 4 required reviewers to determine whether DHHS had made, or was making, diligent efforts to reduce the risk of harm to the children involved in each case. Reviewers rated this item as a Strength if the agency terminated the child's parent's rights as a means of decreasing risk of harm for the child (for example, a termination of parental rights would prevent a child from being returned to a home in which the child would be at risk) and has taken action to minimize other risks to the child (for example, preventing contact with individuals who pose a risk to the child's safety). If a case is/was open for services for a reason other than a court substantiated, inconclusive, petition to be filed or unfounded report of abuse or neglect, or apparent risk of harm to the child(ren) (for example, a juvenile justice case), reviewers were to document this information and rate the item as not applicable. Note, however, that for a child (ren) noted as a "child in need of supervision" or "delinquent", reviewers were to explore and determine whether there was a risk of harm to the child, in addition to the other reasons the case may have been opened, prior to rating it as not applicable. Cases were not applicable for assessment of this item if there was no current or prior risk of harm to the children in the family.

Review Findings:

- *All of the 14 cases reviewed were applicable to this item.**
- *13 (93%) cases were rated as strengths**
- *1 (7%) case was rated as area needing improvement**
- *0 cases were not applicable**

***Seven cases rated as strengths for this item were out of home cases; the other six were in home. The one case that was rated as area needing improvement for this item was an out of home case.**

Strengths: In the thirteen cases substantially achieved, there were either no safety concerns found on the target child or services were implemented to address safety concerns found through initial/ongoing assessments. In these cases, informal assessments were occurring on an ongoing basis through family team meetings. Safety plans, using the safety model, were updated and found in the case file.

Areas needing improvement: In the one case rated as needing improvement it was noted that there were concerns regarding the safety of the identified youth's siblings while visitations were occurring in the family home. The identified youth is a sexual offender and there were no safety plans found in the file to indicate siblings were being protected by the parents while identified youth was at the family home for visits.

S2. Outcome Reviewer Comments: On the cases that were rated as being substantially achieved reviewers had a variety of comments. They ranged from the child's placements being appropriate to meet the child's needs, ongoing assessments being completed through family team meetings, and there being no safety concerns or issues in the facility or home. On the case that was found not achieved this was due to the reviewers not being able to locate a safety plan in the case file that addressed the identified youth having visits with siblings. There was concern about this because the identified youth had a history of sexual perpetration.

II. PERMANENCY

Outcome P1: Children have permanency and stability in their living situations.

Status of Permanency Outcome P1

O

	Total Number	Total Percentage
Substantially Achieved:	3	37.00%
Partially Achieved:	5	63.00%
Not Achieved or Addressed:	0	0%
Not Applicable:	6	42.86%

Item 5. Foster care re-entries

Reviewers rated this assessment Strength if during the period under review a child did not have an entry into care within a 12-month period from being discharged from another entry into foster care. Reviewers also rated this item as a Strength if a re-entry was an isolated incident during which the agency did what was reasonable to manage the risk following reunification but the child re-entered care for another reason (for example, the death of a parent). Reviewers rated this item as an Area Needing Improvement if re-entries occurring within a 12-month period were due to the same general reasons or same perpetrators. Reviewers rated this item as Not Applicable if : (1) the child entered foster care before, and remained in foster care during, the period under review; or (2) the child entered foster care before, and exited foster care during, the period under review and there was not another entry into foster care during the period under review.

Review Findings:

- *Three of the 14 cases reviewed were applicable to this item**
- *3 (100%) cases were rated as strengths**
- *0 cases were rated as area needing improvement**
- *11 cases were not applicable**

Strengths: In all three cases the child entered and remained in the same foster home throughout the period under review.

There were no files rated as needing improvement for this item.

Item 6. Stability of foster care placement

In assessing this item, reviewers were to determine whether the child experienced multiple placement changes during the period under review, and if so, whether the changes in placement settings were necessary to achieve the child's permanency goal or meet the child's service needs.

Review Findings:

***Eight of the 14 cases reviewed were applicable to this item**

***6 (75%) cases were rated as strengths**

***2 (25%) cases were rated as area needing improvement**

***6 cases were not applicable**

Strengths: In three cases, the target child had only one placement during the period under review. In the other three cases the child was placed in a treatment level of care, and was stable based upon the needs of the children.

Area Needing Improvement: In one case, the child had been placed in a guardianship home, but the foster parents have recently declined to complete the guardianship based upon the child's mental/emotional needs. In the other case, the identified child went from Boys Town to shelter, and is currently in respite care due to his behavioral needs.

Item 7. Permanency goal for child

In assessing this item, reviewers were to determine whether DHHS had established an appropriate permanency goal for the child in a timely manner, including filing for termination of parental rights when relevant. Reviewers examined the appropriateness of a goal that ultimately rules out adoption, guardianship, or return to family. Reviewers assessed whether the child's best interests were thoroughly considered by DHHS in setting a goal of other planned living arrangement, and that such a decision is /was continually reviewed for ongoing appropriateness. Cases were assigned a rating of Strength for this item when reviewers determined that DHHS had established an appropriate permanency goal in a timely manner. Cases were assigned a rating of Area Needing Improvement when goals of reunification were not changed in a timely manner when it was apparent that reunification was unlikely to happen, termination of parental rights was not filed when the child had been foster care for 15 of the past 22 months and no compelling reasons were noted in the file, or the goal established for the child was not appropriate. Cases were identified as Not Applicable if the child was not in foster care.

Review Findings:

***Eight of the 14 cases reviewed were applicable to this item**

***5 (63%) cases were rated as strengths**

***3 (37%) cases were rated as area needing improvement**

***6 cases were not applicable**

Strengths: In all five cases reviewed that were rated as strengths for this item, the permanency goals were established within the 60 day timeframe.

Areas needing improvement: In the three cases needing improvement on this item, it was noted that while the permanency goal established was appropriate, it was not established within the 60 day timeframe. In one case, it was noted that there was no case plan/court report found in the file. Therefore, there were no dates found to establish when permanency was established.

Item 8. Reunification, Guardianship or Permanent Placement with Relatives

In assessing these cases reviewers determined whether DHHS had achieved children's goals of reunification, guardianship or placement with relatives in a timely manner. If the goals had not been achieved in a timely manner reviewers determined whether DHHS had made diligent efforts to achieve the goals.

Review Findings:

***Eight of the 14 cases reviewed were applicable to this item**

***8 (100%) cases were rated as strengths**

***0 cases were rated as area needing improvement**

***6 cases were not applicable**

Strengths: In all the cases rated as a strength for this item, it was noted that active and concerted efforts were being made to achieve the permanency goal of reunification. The case file documentation within the case plan and court report reflects these efforts are being made via family team meetings and monthly contacts.

There were no files rated as needing improvement for this item.

Item 9. Adoption

In assessing this item, reviewers were to determine whether appropriate and timely efforts (within 24 months of the most recent entry into foster care) had been or were being made to achieve finalized adoption.

Review Findings:

***Two of the 14 cases reviewed were applicable to this item**

***2 (100%) cases were rated as a strength**

***0 cases were rated as area needing improvement**

***12 cases were not applicable**

Strengths: In the two cases rated as a strength for this item it was noted in the case file that both of these children have mental and/or developmental needs and that active efforts were being made by the caseworker in trying to find an adoptive home.

There were no files rated as needing improvement for this item.

Item 10. Permanency goal of other planned permanent living arrangement

Reviewers determined whether the agency had made or was making diligent efforts to assist children in attaining their goals related to other planned permanent living arrangements (Independent Living, Self-Sufficiency or Family Preservation).

Review Findings:

- *One of the 14 cases reviewed were applicable to this item**
- *0 cases were rated as a strength**
- *1 (100%) case was rated as area needing improvement**
- *13 cases were not applicable**

There were no files rated as a strength for this item.

Areas needing improvement: In this case there was no indication found in the case file that the concurrent goal of independent living has been addressed for the identified youth. There was not an independent living plan, or any outcomes within the case plan identifying that this goal was being worked on.

P1. Outcome Reviewer Comments: Reviewers comments on the cases found to be substantially achieved were that permanency goals were established within the set time frames and services helped to support and maintain the stability of the placements in these cases. In two cases rated as partially achieved, it was noted that the permanency goal was not established within the 60 day requirement. In three cases, the reviewer noted that there was no evidence found in the case file that the concurrent permanency goals were being addressed by the worker.

Status of Permanency Outcome P2

	Total Number	Total Percentage
Substantially Achieved:	6	75.00%
Partially Achieved:	2	25.00%
Not Achieved or Addressed:	0	0%
Not Applicable:	6	42.86%

Item 11. Proximity of foster care placement

Reviewers were to determine whether the child’s foster care setting was in close proximity to the child’s parents or close relatives. Cases determined to be not applicable were those in which termination of parental rights had been completed prior to the period under review, or in which contact with parents was not considered to be in the child’s best interest.

Review Findings:

- *Six of the 14 cases reviewed were applicable to this item**
- *6 (100%) cases were rated as strengths**
- *0 cases were rated as area needing improvement**
- *8 cases were not applicable**

Strengths: In five of the cases, the family lives close enough to the child to facilitate visits at least a few times per month as well as attending the child’s family team meetings that are being held on a monthly basis. In one case, the child was placed outside the community only due to the child’s extenuating mental/behavioral needs.

There were no files rated as needing improvement for this item.

Item 12. Placement with siblings

Reviewers were to determine whether siblings were or had been placed together and if not, was separation necessary to meet the needs (service or safety needs) of one or more of the children.

Review Findings:

- *Two of the 14 cases reviewed were applicable to this item
- *2 (100%) cases were rated as a strength
- *0 cases were rated as area needing improvement
- *12 cases were not applicable

Strengths: In one case, all the children in the family were placed in the same relative foster home. In the other case, the identified youth required a placement at a treatment level of care. The younger siblings were placed in a foster home later in the case when the mother self reported her own mental health issues that made her unable to care for the rest of the children.

There were no files rated as needing improvement for this item.

Item 13. Visiting with parents and siblings in foster care

In assessing this item reviewers determined whether DHHS had or was making diligent efforts to facilitate visitations between children in foster care and their parents and siblings. Reviewers also determined whether these visits typically occurred with sufficient frequency to meet the needs of the children and families. Non applicable cases were those where the child had no siblings in foster care, if the parents could not be located, and/or if visitation with the parents was considered not in the best interests of the child. Reviewers rated this item for the period under review based on the individual needs of the child and family, rather than on the DHHS policy regarding visitation. The DHHS visitation guidebook recommends a minimum of one visit every two weeks between child and parent unless it would not be in the child's best interest because the parent is the perpetrator of severe physical abuse or sexual abuse. DHHS Policy requires that siblings placed separately must have a minimum of one visit per month. Other forms of communication including phone calls and letters are strongly encouraged.

Review Findings:

- *Six of the 14 cases reviewed were applicable to this item
- *2 (33%) cases were rated as strengths
- *4 (67%) cases were rated as area needing improvement
- *8 cases were not applicable

Strengths: In one case, the mother, step-dad and siblings had visitation two times per month. The youth had contact with the biological dad via phone due to the father residing out of the state of Nebraska. In the other case, the adoptive mother and father were having visits at least monthly with the identified youth. There were no other siblings in this case.

Area needing improvement: In two cases rated as needing improvement on this item, regular contact was being made with the mother but there was no contact occurring between the youth

and the father. There was no evidence found in the case file that attempts were made by the worker to locate and/or involve the father in visitation. In one case, there was evidence that contact was occurring with the father but, there was no evidence found in the case file to indicate visits were occurring with the mother. In the last case, it was noted that while visits were occurring with both of the parents, the frequency and quality of these visits was not able to be determined because of the lack of detailed documentation found in the case file.

Item 14. Preserving connections

Reviewers determined whether DHHS had or was making diligent efforts to preserve the child's primary connection and characteristics while in foster care. Reviewers had to make a professional judgment about the child's primary connections and then explore whether those connections have been preserved through case planning and service delivery.

Review Findings:

***Eight of the 14 cases reviewed were applicable to this item**

***7 (88%) cases were rated as strengths**

***1 (12%) case was rated as area needing improvement**

***6 cases were not applicable**

Strengths: In all three of the cases, connections were maintained through extended family visits and/or holiday celebrations. ICWA was addressed in all of the cases.

Areas needing improvement: In the one case rated as area needing improvement there was no evidence found in the case file to show that ICWA was addressed with the family.

Item 15. Relative placement

Reviewers had to focus on the title IV-E provision that requires States to consider giving preference to placing the child with relatives, and determine whether the State considered such a placement and how (for example, seeking out and evaluating the child's relatives). Relatives include non-custodial parents, such as fathers not in the home, if applicable to the case. Reviewers had to determine the extent to which the agency identified relatives who had some reasonable degree of relationship with the child and with whom the child might reside. There did not need to be in the case record a formal evaluation of relatives with whom the child might reside, but for reviewers to have answered "yes" evidence must exist, through either the case documentation or the case interviews, that relatives were evaluated and considered. Reviewers rated this item as a Strength if (1) the agency assessed the child's needs and determined that he/she required special services *and* (2) the agency assessed potential relative placements and determined that the relative placements did not have the capacity to meet the child's needs. Reviewers rated this item as a strength unless no efforts were made to locate or identify relatives for placement, or placement with a family known to the child. Reviewers rated this item as not applicable if (1) the agency determined upon the child's initial entry into care that his/her needs required residential treatment services and a relative placement would be inappropriate, or (2) if relatives were unable to be identified despite the agency's diligent efforts to do so, or in situations such as abandonment in which the identity of the parents and relatives remains unknown despite efforts to identify them. Reviewers were to check not applicable if the child was placed with relatives.

Review Findings:

***Five of the 14 cases reviewed were applicable to this item**

***3 (60%) cases were rated as a strength**

***2 (40%) cases were rated as area needing improvement**

***9 cases were not applicable**

Strengths: In one case, the identified child was placed with a maternal relative, however there was no evidence found in the case file to indicate paternal relatives were sought. In two cases, evidence was found in the case file that both maternal and paternal relatives were sought out and assessed for placement. Neither maternal nor paternal relatives were deemed to be appropriate placements.

Areas needing improvement: In both cases, there was no documentation found to indicate that maternal or paternal placement was sought by the caseworker.

Item 16. Relationship of child in care with parents

In assessing this item, reviewers determined if there was evidence of a strong, emotionally supportive relationship between the child in foster care and the child's parents during the period under review. Reviewers assigned a rating of Strength for this item when there was evidence of regular visitation between parent and child. Reviewers assigned a rating of Area Needing Improvement when they determined the agency had not made diligent efforts to support the child's relationship with the father or mother. A case was considered not applicable if a relationship with the child's parents was contrary to the child's safety or best interest during the period under review.

Review Findings:

***Seven of the 14 cases reviewed were applicable to this item**

***4 (57%) cases were rated as a strength**

***3 (43%) cases were rated as area needing improvement**

***7 cases were not applicable**

Strengths: Documented concerted efforts were found in the case file that the agency made efforts to support the child's relationship with the Mother and Father by including them in the child's educational/extra-curricular activities such as IEP's, sport events and after school activities.

Areas needing improvement: In two cases, it was noted that there was no documentation found in the case file to show that concerted efforts were made to locate, promote and otherwise maintain a positive and nurturing relationship between the child in foster care and his/her father. In one case, it was noted that there was no documentation found in the case file to show that concerted efforts were made to locate, promote and otherwise maintain a positive and nurturing relationship between the child in foster care and his/her mother.

P2. Outcome Reviewer Comments: In the cases where this outcome was determined to be substantially achieved, reviewers commented that visitation was occurring on a regular basis (at least monthly). It was also noted that ICWA was addressed in these cases. In the cases where this outcome was only partially achieved the reviewers commented that there were no documented efforts found to show that the DHHS worker made concerted efforts to locate/involve the fathers in four of those cases. It was also noted in one case that there was no information located in the file to indicate paternal relatives were sought as a possible placement option.

III. WELL-BEING

Outcome WB1: Families have enhanced capacity to provide for their children's needs.

Status of Well-Being Outcome WB1

	Total Number	Total Percentage
Substantially Achieved:	2	14.29%
Partially Achieved:	10	71.42%
Not Achieved or Addressed:	2	14.29%
Not Applicable:	0	0%

Item 17. Needs and services of child, parents, foster parents

In assessing item 17, reviewers were to determine whether DHHS adequately assessed the needs of children, parents and foster parents AND provided the services to meet those needs. Reviewers rated item 17 as a strength if (1) a needs assessment was conducted for the child(ren), parents, and foster parents, and (2) appropriate services were provided in relation to the identified needs of the target child in foster care cases, or for all children in in-home cases. Education and physical or mental health services to the target child were not rated for this item (these are rated in items 21, 22, and 23). Reviewers had to document whether these services were provided to parents.

Review Findings:

***All of the 14 cases reviewed were applicable to this item**

***2 (14%) cases were rated as strengths**

***12 (86%) cases were rated as area needing improvement**

***0 cases were not applicable**

***The two cases rated as strengths were out of home cases. Six of the cases rated as area needing improvement were in home cases and six were out of home cases.**

Strengths: Because 17 is broke down into parts A, B, and C. This item will be broken out into three pieces.

CHILDREN

17a. Strengths: All fourteen cases were rated as a strength on this item. The child's needs and services were both informally and formally assessed and addressed through initial assessments, ongoing assessments, case management and family team meetings. Some of the services provided to address the identified needs were behavioral assessments, Developmental Disabilities assessments, Electronic Monitoring, Family Support and tracker services. Services were appropriate to address the children's needs in these cases.

17a. Areas needing improvement: There were no files rated as needing improvement for this item.

PARENTS

17b. Strengths: There were no cases rated as a strength for this item.

17b. Areas needing improvement: In eight cases it was noted that the father's needs had not been assessed. In three cases, it was noted that there was no information found to indicate that the mother's needs were assessed. In one case it was noted that neither the mother nor father's needs were assessed. When the mother or fathers needs were assessed, they were done so informally through face to face meetings OR formally through psychological and mental health assessments. In the cases that the mother or fathers needs were assessed, appropriate services were offered. Some of the services offered to address the identified needs were transportation assistance, drug/alcohol treatment, family support services, parenting classes and therapy.

FOSTER PARENTS

17c. Strengths: In the cases reviewed rated as strengths, it was noted that the foster parent's needs were assessed by the worker discussing with the foster parent's their concerns/needs. Needs were also assessed through monthly family team meetings. Services provided were foster care payments, respite care and parenting assistance in dealing with children that have behavioral issues. Services offered were appropriate and met the needs of the foster parents.

17c. Areas needing improvement: There were no cases rated as needing improvement on this item.

Item 18. Child and family involvement in case planning

In assessing this item reviewers were to determine whether the agency actively involved the parent(s), guardian, child(ren) and other people identified by the family in the case planning activities relevant to the current case plan. A determination of involvement in case planning required that a parent (guardian) and the child (older than 8 and not incapacitated) had actively participated in identifying the services and goals for the case plan.

Review Findings:

***All of the 14 cases reviewed were applicable to this item**

***3 (21%) cases were rated as strengths**

***11 (79%) cases were rated as area needing improvement**

***0 cases were not applicable**

***In the three cases rated as strengths, one was an in home case and two were out of home cases. In the eleven cases that were rated as area needing improvement five were in home cases and the other six were out of home cases.**

Strengths: In the three cases that were rated as strengths for this item, it was specifically noted that both parents and child (when old enough) participated in the case planning process through monthly family team meetings as well as through monthly face to face contact with the case worker.

Areas needing improvement: In eight cases rated as needing improvement for this item, it was noted that the mom was involved in the case planning, but there was no documentation found

in the case file to indicate that the father was involved in the case planning. In three cases while the Dad was involved in case planning, but the mother was not.

Item 19. Worker visits with child

Reviewers were to determine the typical pattern of visits between the worker and child and if these visits were sufficient to ensure adequate monitoring of the child's safety and well being. Reviewers were also to determine whether visits focused on issues pertinent to case planning, service delivery, and achievement of the goals.

Review Findings:

***All of the 14 cases reviewed were applicable to this item**

***12 (86%) cases were rated as strengths**

***2 (14%) cases were rated as area needing improvement**

***0 cases were not applicable**

***Four of the cases rated as a strength for this item were in home cases and eight were out of home. Both of the cases rated as area needing improvement were in home cases.**

Strengths: In all twelve cases rated as a strength for this item there was found to be at least private monthly contacts between the worker and the child occurring. The quality of those narratives addressed permanency, safety and well being issues.

Areas needing improvement: In one case there was no documentation to indicate the siblings in the home were seen by the worker. In the other case it was noted that both the quantity and quality (discussions around safety, permanency, and well being) of worker visits with child were hard to determine based upon case file examination.

Item 20. Worker visits with parents

Reviewers were to assess whether the caseworker had sufficient face to face contact with parents to encourage attainment of their children's permanency goal while ensuring safety and well being. Cases that were considered not applicable if there is no plan for further involvement between the parents and the agency or the parents and the child, and the child is not in a permanent home.

Review Findings:

***Thirteen of the 14 cases reviewed were applicable to this item**

***1 (8%) cases were rated as strengths**

***12 (92%) cases were rated as area needing improvement**

***1 case was not applicable**

***The one case that was rated as a strength for this item was an out of home case. Six of the cases rated as area needing improvement for this item were in home cases and six were out of home cases.**

Strengths: Visits between worker and parents (mother and father) were occurring at least monthly, in a location conducive to supporting quality interaction between the worker and parents. The quality of the contact narratives was noted to be very good and addressed the safety, permanency, and well being of the child.

Area needing improvement: In six cases, it was noted that there was little to no contact made with the father. In four cases, it was noted that there was no documentation found to indicate that the worker visited with the mother on a monthly basis. In two cases, it was noted that monthly contact was not being made with both parents (mother and father) in the case.

WB1. Outcome Reviewer Comments: Reviewers commented on the cases that were rated as being substantially achieved that extensive efforts were made by the Department to ensure the families had the capacity to provide for their children’s needs and were assessed formally and informally through ongoing assessments and mental health assessments. Families participated in family support, utilization of respite care when needed, communication during visits with caseworkers, and involvement in the case planning process. Families got involved in the case planning process through monthly contacts with the DHHS worker and through family team meetings.

In the cases where this outcome was found to be partially achieved reviewers commented that in eight cases the father’s needs were not assessed/addressed. In two cases where this outcome was found to be partially achieved reviewers commented that the mother’s needs were not assessed/addressed. In the two cases found to not be achieved, it was noted by reviewers it was due to lack of both parents being involved in the case. In the cases that the mother or fathers needs were assessed, appropriate services were offered. Some of the services offered to address the identified needs were transportation assistance, drug/alcohol treatment, family support services, parenting classes and therapy.

Status of Well-Being Outcome WB2

	Total Number	Total Percentage
Substantially Achieved:	11	84.62%
Partially Achieved:	1	07.69%
Not Achieved or Addressed:	1	07.69%
Not Applicable:	1	07.69%

Item 21. Educational needs of the child

When addressing educational issues for families receiving in-home services, reviewers considered whether the educational needs are/were relevant to the reason why the agency is/was involved with the family, and whether the need to address educational issues is/was a reasonable expectation given the circumstances of the agency’s involvement with the family. (If not, reviewers rated item 21 as not applicable.) Reviewers rated this item as a Strength if (1) the agency made extensive efforts to address the child’s educational needs and the school system was unresponsive, especially if the problems are with a local school or jurisdiction; (2) if the child(ren)’s educational needs were assessed and addressed, including cases where the educational records were missing and the reasons why; or (3) if the agency conducted an assessment of educational issues and determined that there were no problems in that area, nor any need for educational services.

Review Findings:

***Thirteen of the 14 cases reviewed were applicable to this item**

***11 (85%) cases were rated as strengths**

***2 (15%) case was rated as area needing improvement**

***1 case was not applicable**

*** Three of the cases rated as strengths for this item were in home cases and eight were out of home cases. The two cases rated as area needing improvement for this item was were in home cases.**

Strengths: Educational needs of the child were assessed and addressed by the case worker by providing educational testing and monitoring at the schools they attended. Services provided to address the needs ranged from IEP's to ESU referrals. Grade/report cards, current IEP's and ESU reports were found in the case files.

Areas needing improvement: In one case the reviewer noted that the identified child's grades were really poor, but there did not appear to be anything in the file to indicate that this was being assessed/addressed. In the other case the remaining children in the home did not have their educational needs assessed.

WB2. Outcome Reviewer Comments: Reviewers comments on the outcomes found to be substantially achieved were that the children received appropriate services to meet their educational needs. Grade reports were also found in the case files. In the one case found to be partially achieved, the reviewer commented that there was no information found in the file that the worker followed through with ensuring that the child's identified educational needs were met. This child had very low grades and reviewers could not find any information in the case file to show that this was being assessed. In the one case found to be not achieved, reviewers noted that it was because the other siblings in the home were not assessed for educational needs.

Outcome WB3: Children receive adequate services to meet their physical and mental health needs.

Status of Well-Being Outcome WB3:

	Total Number	Total Percentage
Substantially Achieved:	9	64.29%
Partially Achieved:	5	35.71%
Not Achieved or Addressed:	0	0%
Not Applicable:	0	0%

Item 22. Physical health of the child

When addressing health issues for families receiving in-home services, reviewers considered whether the physical health needs are/were relevant to the reason why the agency is/was involved with the family and whether the need to address physical health issues is/was a reasonable expectation given the circumstances of the agency's involvement with the family. (If not, reviewers rated this item as not applicable.) For example, if a child became known to the agency and was determined to be in need of in-home services at least partly as a result of physical abuse or sexual abuse, then it is reasonable to expect the agency to provide services to ensure that the child receives the appropriate physical health services. Reviewers rated this item as a strength if the agency conducted an assessment of physical health and determined that there were no problems in that area, nor any need for physical health services.

Review Findings:

***Thirteen of the 14 cases reviewed were applicable to this item**

***8 (62%) cases were rated as strengths**

***5 (38%) case was rated as area needing improvement**

***1 case was not applicable**

*** Six of the cases rated as a strength for this item were out of home cases. Two cases rated as a strength for this item were in home cases. Two cases rated as area needing improvement for this item were out of home cases. Three cases rated as area needing improvement for this item were in home cases.**

Strengths: Medical/dental needs were assessed, services were provided when needed and it was documented in the case file. Immunization records were located in the case file.

Areas needing improvement: In all five cases there was no indication found in the case file to indicate dental needs were assessed/addressed. There was no documentation found in the file that regular dental checkups were being provided.

Item 23. Mental health of the child

Reviewers were to determine whether during the period under review, the agency addressed the mental/behavioral health needs of the child (ren). Reviewers rated this item as a strength if the agency conducted an assessment of the child's mental health and determined that there were no problems in that area, nor any need for mental health services. If there was a need for services then they were offered.

Review Findings:

***Thirteen of the 14 cases reviewed were applicable to this item**

***13 (100%) cases were rated as strengths**

***0 cases were rated as area needing improvement**

***1 cases was not applicable**

*** In the thirteen cases rated as a strength for this item five were in home cases and eight were out of home cases.**

Strengths: Initial and ongoing formal/informal assessments were being conducted on the child ranging from the Youth Level of Service evaluation to the Comprehensive Family Assessment.

Informal assessments were completed by the DHHS worker through monthly family team meetings and face to face contacts with the youth. Mental health therapy was being provided to the youth when needed.

Areas Needing Improvement: There were no files rated as needing improvement for this item.

WB3. Outcome Reviewer Comments: Reviewers commented on the outcomes found to be substantially achieved that mental health needs were assessed and if there were needs identified that they were also addressed. There was also medical/dental/mental health documentation found in the case file. In the five cases found to be partially achieved there was no dental information found in the case file. In one case partially achieved it was also noted that there was no information found in the case file to show that the siblings in the home were assessed for medical/dental needs. When services were offered they were appropriate and directly related to the identified needs.
