

Concussion Recognition & Management

TEXT

Home Page

This course is provided to Nebraska **licensed health care professionals** as a comprehensive overview and guide for best practices in concussion recognition and management to help ensure that **every child sustaining a concussion in Nebraska is managed according to current best practices.**

Why this Course Matters to You

Video

PEGGY REISHER, MSW, Brain Injury Association Executive Director

This course is going to be giving you information about concussion in general. You will certainly learn about the signs and symptoms of concussion for youth players but also for children who are hurt on the playground. We know that it is going to be a team effort between you as a licensed healthcare professional, coaches and parents, as well as players, and just kids in general. It's going to be very important for you to be the leader, to help educate them about what concussion is. However, we also are well aware that the knowledge about concussion is growing, and it changes. And so we will continue to keep this information updated on these modules. We just want to say thank you for taking the time to view this website. We know that what you learn from these modules will be very important in the health and safety of our children.

Mention of any specific health care facility or organization in the videos reflects an individual's specific experience and is not intended as an endorsement from this site.
