Have You Heard “*Conversations for a Healthy Life*” Radio Talk Show?

Conversations for a Healthy Life is a weekly radio show that is featured on KCRO 660 AM here in Nebraska. The purpose of this project is to provide community based education utilizing radio and podcast technology.

Education is centered on messages for both **men and women** related to screening and education opportunities encompassed within the three screening programs of the Office of Women’s and Men’s Health, along with their community partners.

We encourage you as well as your clients to check out the show to hear the great educational information that is being offered. It’s an upbeat and thought provoking time.
