

# Sample AED Competency Policy

## PURPOSE:

To provide quality health care to the cardiac patient it is necessary for the EMT to be proficient in Cardiopulmonary Resuscitation (CPR) and Automatic External Defibrillator (AED). In order to maintain this proficiency the EMT will need to practice both CPR and AED skills.

## POLICY:

The (Name of Service) will provide CPR/AED training during the (Month) meeting/training. The competency skills will meet the requirements for AED proficiency as established by the Physician Medical Director.

A list of names of those EMTs who have successfully demonstrated their competency skills in the use of the AED will be given to the PMD within (30) days following the competency testing and a copy of that list will be placed in the EMT service files.
