

Mead Johnson and Abbott Formula Changes – 2011

The following changes will occur on WIC checks effective August 1, 2011:

1. Gentlease 12 oz. powder can size changes to 12.4 oz. During the transition months the WIC check will include both sizes.

			DOLLARS	CENTS
			\$	
			NOT PAYABLE WITHOUT VENDOR ID STAMP	
			AUTHORIZED SIGNATURE (MUST BE SIGNED AT RETAIL COUNTER)	
MUST DEPOSIT WITHIN 90 DAYS FROM FIRST DATE TO USE				

5 CAN Gentlease Powder 12 oz or 12.4 oz

2. EleCare (for infants) is only available now with DHA/ARA. The word “infant” has been added to the label. Can size and formulation remain the same. The descriptor on the check is changed to:

4 CAN EleCare Infant DHA/ARA Pwd 14.1 oz

3. EleCare Vanilla (30 cal) is now called EleCare Jr and comes in vanilla and unflavored powder. The can size and formulation are the same. The check descriptor is changed to:

4 CAN EleCare Jr Van or Unflav Pwd 14.1 oz

4. Vital Jr is now called PediaSure Peptide 1.0 and is still packaged in an 8 oz. bottle; 24 bottles to a case. The check descriptor is changed to:

24 BOT PediaSure Peptide 1.0 Cal 8 oz

5. Enfagrow Premium Toddler, Enfagrow Gentlease Toddler and Enfagrow Soy Toddler (24 oz powder) now have “Milk Drink” added to the label. This formula is no longer receiving a formula rebate but we are keeping it in our formulary for now. It has been approved as a medical formula and a child must have a diagnosis to be issued this formula, as any child receiving special formula must. Enfagrow Premium Toddler now has prebiotics, taste improvement, and reconstitutes to 147 oz. The food package will contain one more can. The check descriptor will remain the same but clients receiving this formula should be advised that “milk drink” is on the label.
