

# Celebrating World TB Day - Local, Complex Case Reviews

## PRESENTED BY

**EDWARD A. HOROWITZ, MD, FACP**

Associate Professor

Department of Medicine and Medical Microbiology and Immunology  
Creighton University School of Medicine

## ACTIVITY DESCRIPTION

Because of the low incidence of TB in Nebraska, providers often lack experience in managing complex cases of TB due to the infrequency of encounters with this disease. This webinar will review some complex cases to help educate providers on the management of complex TB patients. Tuberculosis case management not only involves medical care, but partnerships between the local health department and infection control team to identify complete case management and public health duties.

## ACTIVITY OBJECTIVES

At the conclusion of this activity, the participant should be better able to:

- Identify Infection Control concerns when dealing with infectious pulmonary TB patients
- Define potential causes and care for patients with slow sputum smear conversions
- Describe the process of doing a large contact investigation

## TARGET AUDIENCE

This activity is intended for primary care physicians, physician assistants, nurse practitioners, nurses and other health care support professionals.

## CREDIT

The University of Nebraska Medical Center, Center for Continuing Education is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The University of Nebraska Medical Center, Center for Continuing Education designates this enduring material for a maximum of 1 *AMA PRA Category 1 Credit™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
