RE: Incorrect Expiration Date: FluMist lot #FJ2073

VFC clinics may have received FluMist lot #FJ2073 that was imported into NESIIS with an incorrect expiration date of 12/30/2016. The correct expiration date for this FluMist lot #FJ2073 is listed on the box and is 12/30/2015.

Please check your NESIIS inventory to see if you received FluMist lot #FJ2073 with the incorrect expiration date. If applicable, click on the FluMist name, edit the expiration date to 12/30/15 then click save.

We apologize for any inconvenience this may have caused, but we want to ensure that no patient ever receives expired vaccine. Always check the expiration date on the label prior to administering vaccine.

Should you have any questions please contact the NESIIS Help Desk at 1-888-433-2510.
