- Welcome and Introductions
- About SHIP
- Health Equity Priority
 - Organizational Capacity Workgroup
 - Utilization of Data Workgroup
- Join us!

SHIP 2017-2021

Introductions

- 1) Name
- 2) Organization
- 3) How would you describe health equity? What comes to mind when you hear the words “health equity”?

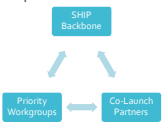

About SHIP

What is SHIP?
SHIP, in collaboration with statewide partners, promotes the health and well-being of Nebraskans as a whole— population health— using a statewide health assessment to establish priorities, plan for action, and empower collective impact.

Values

1. Advocate for the health and well-being of all Nebraskans—as a whole.
2. We identify health trends and focus on prevention.
3. We produce a statewide plan that acts as the blueprint for improving Nebraska’s public health system.

Structure

SHIP Structure

Specific strategies will be identified and carried out by work groups

	HEALTH PRIORITIES	KEY OBJECTIVES
1)	Nebraskans will experience health equity and decreased health disparities.	Support organizational capacity to address equity through systems, policy, and program efforts that are data informed and culturally competent.
2)	Nebraska will have a coordinated system of care to address depression and suicide .	Promote collaborative efforts between public health and behavioral health to support prevention, education, and integration strategies.
3)	Nebraskans will have decreased rates of obesity .	Promote equitable access to healthy lifestyles by empowering communities and promoting the effective use of local strategies and policies.
4)	Nebraskans will experience improved utilization and access to healthcare services.	Enhance culturally responsive healthcare with data-driven decision-making and increased coordination across preventive health services.
5)	Nebraska will have an integrated health system that values public health as an essential partner.	Encourage efforts to address the major determinants of population health among all collaborative health systems partners.

Health Equity Definition

Health Equity is when all people have full and equal access to opportunities that enable them to lead healthy lives. Achieving health equity involves an underlying commitment to reduce—and, ultimately, eliminate—disparities in health and in its determinants, including social determinants.

*Cited from RHEC and adopted by SHIP Health Equity Priority: Organizational Capacity Workgroup

2017-2021 SHIP: Health Equity Priority

Vision: Nebraskans will experience health equity and decreased health disparities

- **Organizational Capacity Workgroup**
Supporting the workforce and the capacity of organizations to meet national cultural standards, utilize common framework for addressing equity and ultimately provide more equitable services.

- **Data Workgroup**
Enhancing the capability of organizations to collect, analyze and utilize data to expand the understanding of need and opportunities to improve services and support system collaboration.

SHIP 2017-2021

Organizational Capacity Action Plan

Greg Donovan

IDEA → PLAN → ACTION

SHIP: Health Equity Priority – Organizational Capacity 2018-2019 Timeline

- Common Language & Framework Project

The project purpose is to promote learning about health equity and develop understanding about what encompasses health equity (the framework). The workgroup aims to develop:

- Health Equity Definition
- Health Equity Framework
- Pilot Common Language & Framework with Community Members

- Toolkit/Material
- Training/TA

SHIP 2017-2021

Data Action Plan

Betsy Dee

IDEA → PLAN → ACTION

SHIP: Health Equity Priority – Data

2018-2019 Timeline

- **Baseline Assessment**

The project purpose is to uncover baseline information on how organizations are currently utilizing their data in relation to health equity, measure their capacity on demographic data collection, and assess readiness for change. The Data workgroup will gather such information by utilizing:

- Data Inventory Form
- Local Health Department Survey
- Report & Recommendations
- Training/TA
