

Occupational Health Profile, 2008–2012

Public Health Solutions

Fillmore, Gage, Jefferson, Saline, and Thayer Counties

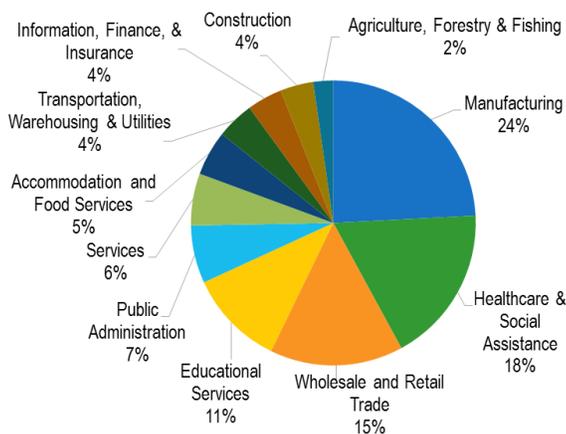

WORK AND PUBLIC HEALTH

- Work is one the most important determinants of a persons' health.
- A safe and healthy workforce benefits Nebraska's overall health and economy.
- The Nebraska Occupational Safety and Health Surveillance Program tracks work-related injuries, illnesses and hazards.
- Occupational health surveillance helps identify worker health trends, detect emerging hazards, and develop prevention strategies with the goal of reducing work-related injuries and illnesses.

WORKFORCE

- In 2012, there were 30,183 employed persons residing in the Public Health Solutions district. ¹
- The manufacturing industry employed 24% of workers and was the largest employing sector. ²

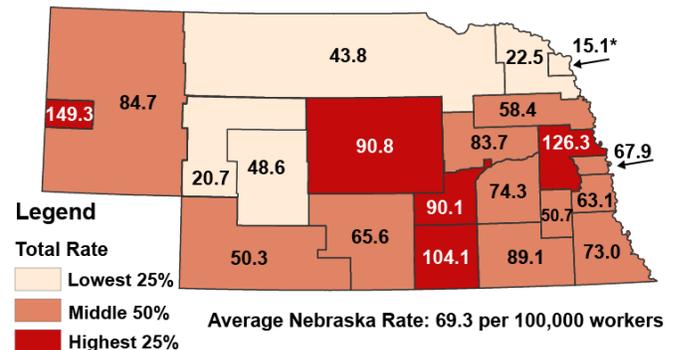

Distribution of LHD workforce by industry, 2012 ²

Average rate of work-related inpatient hospitalizations per 100,000 workers, LHD regions, 2008–2012 ³

* Rate does not reflect patients treated in out-of-state hospitals

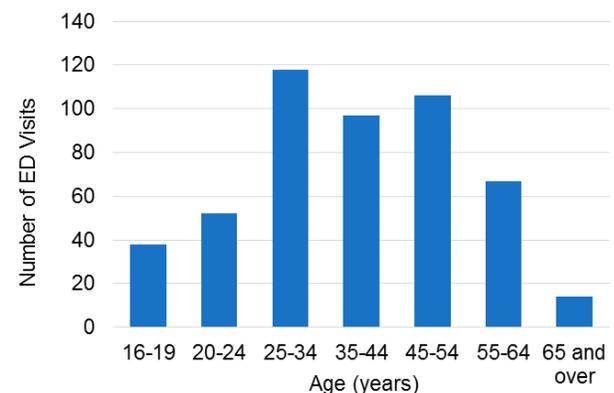

INPATIENT HOSPITALIZATIONS

- From 2008 to 2012, there were 132 inpatient hospitalizations due to work-related injury or illness. ³
- The work-related inpatient hospitalization rate was 89.1 per 100,000 workers and was higher than the overall Nebraska rate of 69.3. ³

EMERGENCY DEPARTMENT VISITS

- From 2008 to 2012, there were 492 emergency department visits due to work-related injury or illness. ⁴
- The average work-related emergency department (ED) visit rate was 332 cases per 100,000 workers and was lower than the overall Nebraska rate of 716.2. ⁴
- Workers aged 25-34 years old experienced the most work-related ED visits. ⁴

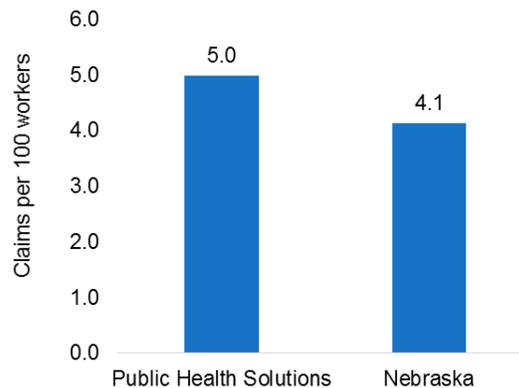

Work-related ED visits by age group, LHD, 2008–2012 ⁴

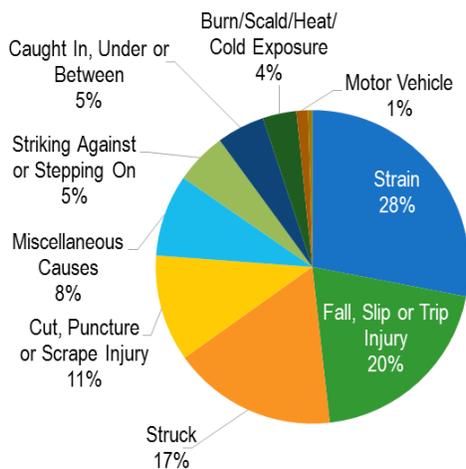

WORKERS' COMPENSATION CLAIMS

- From 2008 to 2012, there were 7,388 injuries and illnesses reported to workers' compensation. ⁵
- The workers' compensation claim rate was 5.0 claims per 100 workers, which was higher than the overall Nebraska rate of 4.1. ⁵
- Strains were the most common cause of injury, representing 28% workers' compensation claims. ⁵
- The most common types of injuries/illnesses reported were strain, contusion, and laceration. ⁵

Average workers' compensation claim rate, LHD and Nebraska, 2008–2012 ⁵

Percent of LHD workers' compensation claims by cause of injury, 2008–2012 ⁵

Top 10 types of injury among LHD workers' compensation claims, Nebraska, 2008–2012 ⁵

Type of Injury	Number	Percent
Strain	2,209	29.9
Contusion	1,089	14.7
Laceration	1,056	14.3
Sprain	535	7.2
Specific Injuries-not classifiable	498	6.7
Puncture	318	4.3
Fracture	281	3.8
Foreign Body	251	3.4
Multiple Physical Injuries Only	203	2.8
Burn	198	2.7
