

Nebraska

Blood Pressure Control Program

Clinical Detection and Management of High Blood Pressure

**FREE
Training Series**

The Nebraska Chronic Disease Prevention and Control Programs and Medical Care Development Public Health professional Hypertension Control Master Trainers are offering a **FREE CME/CE TRAINING SERIES** for front line clinical staff, home health nurses, supervisors, physician/mid-level clinicians, community health workers, pharmacists and local public health department staff who are interested in improving hypertensive patient outcomes through accurate measurement, use of clinical guidelines and protocols, working as a team, and improving clinical processes.

8 CME/CE's will be available for participation in the full series and round trip mileage and lunch will be reimbursed.

To take full advantage of this FREE training series, please register for both (2) webinars and one (1) in-person training.

Pre-Training Webinar— August 31, 2015— 12:00-1:00 CST.

To register, go to: <http://www.mcdph.org/regdetail.asp?L=422>

The pre-training webinar will introduce the training series and provide a list of information to be covered in the single day trainings September 14th-17th, including some required pre-work and what participants can expect to take away from the trainings.

Clinical Detection and Management of High Blood Pressure Local Trainings

We are offering in-person trainings in 4 locations. Trainings will include a review of the types of high blood pressure, accurate BP measurement, common measurement errors and their impact on patients and the management of high BP. Quality Improvement strategies that can improve the management of high blood pressure, the importance and impact of team-based care and how you can get started in your clinical practice.

Please only register for 1 training location. Training content will be the same at each location. All trainings will be from 9AM- 4PM with a break for lunch. Detailed information on training locations will be sent via email.
