Table 24b: If the Probable Postfertilization Age was Determined to be Twenty or
more Weeks and there was a Determination that the Pregnant Woman had a
Condition which so Complicated her Medical Condition as to Necessitate
the Abortion of her Pregnancy to Avert her Death or to Avert Serious Risk
of Substantial and Irreversible Physical Impairment of a Major Bodily
Function, what was the Basis of that Determination?14
Table 25a: If the Probable Postfertilization Age was determined to be Twenty or
more Weeks, was there was a Determination that the Abortion was
Necessary to Preserve the Life of an Unborn Child?
Table 25b: If the Probable Postfertilization Age was determined to be Twenty or
more Weeks and there was a Determination that the Abortion was
Necessary to Preserve the Life of an Unborn Child, what was the Basis
of that Determination?15
Table 26: If any Abortion was performed when the Probable Postfertilization Age
was determined to be Twenty or more Weeks, was the Method of Abortion
used one that, in Reasonable Medical Judgement, Provided the Best
Opportunity for an Unborn Child to Survive?
Table 27a: If such a Method was not used, was there a determination that Termination
of the Pregnancy in that manner would pose a Greater Risk either of the
Death of the Pregnant Woman or of the Substantial and Irreversible
Physical Impairment of a Major Bodily Function of the Woman than would
other Available Methods?16
Table 27b: If such a Method was not used and there was a determination that Termination
of the Pregnancy in that manner would pose a Greater Risk either of the
Death of the Pregnant Woman or of the Substantial and Irreversible
Physical Impairment of a Major Bodily Function of the Woman than would
other Available Methods?16

NEBRASKA ABORTIONS, 2020 Summary

This report presents tabulations of statistical information reported on records of induced abortions performed in Nebraska during calendar year 2020. These data are in compliance with specifications set forth in Nebraska Statute §28-343 through §28-345, §28-3,107 and §71-6909.

A total of 2,378 abortions were reported to the Nebraska Department of Health and Human Services for 2020, an increase of 15.0% when compared to the 2019 total of 2,068. The following chart shows the number of abortions performed; the percentage of abortions in different age groups; the mean and modal age of the patient; and the number of abortions per 1,000 live births since 2000.

		19 and Under	20-29	30 and Over	Mean	Modal	
Year	<u>Total</u>	Percent	Percent	Percent	Age	Age	Ratio*
2000	4,178	21.3	54.2	24.5	25.1	21	167.4
2001	3,982	20.8	55.3	23.9	25.1	21	158.6
2002	3,775	18.8	56.2	24.9	25.3	21	148.0
2003	3,990	18.0	57.3	24.7	25.4	22	153.0

2020	2,378	10.7	58.1	31.2	26.8	22	96.5

Chart I:

*Abortions per 1,000 live births.

Mean Age = Average Age

Modal Age = The age of the patient at which abortions occurred most frequently.
