Hours of Operation	24 hours per day, 7 days a week
Desired Individual Outcome	• The individual has substantially met the treatment, recovery, and rehabilitation plan goals and objectives • The precipitating condition and relapse potential is stabilized such that there is sustained improvement in health and psychosocial functioning • Individual's condition can be managed without the professional external supports and intervention at this level of care • Individual has alternative support systems secured to help maintain active recovery and stability in the community • The individual is connected to the next appropriate level of care necessary to treat the condition
Admission Guidelines	• The individual meets the diagnostic criteria for a Substance Use Disorder as defined in the Diagnostic and Statistical Manual (DSM), current edition, as well as American Society of Addiction Medicine (ASAM), current edition, dimensional criteria for admission to this service • Individuals in an ASAM Level 3.5 Dual Diagnosis Capable programs may have co-occurring mental disorders that meet the stability criteria for placement in a Dual Diagnosis Capable program; or difficulties with mood, behavior or cognition related to a substance use or mental disorder; or emotional, behavioral or cognitive symptoms that are troublesome but do not meet current edition DSM criteria for a severe and persistent mental disorder • The individual meets specifications in each of the six ASAM dimensions. • It is expected that the individual will be able to benefit from this treatment • This level of care is the least restrictive setting that will produce the desired results in accordance with the needs of the individual
Continued Stay Guidelines	It is appropriate to retain the individual at the present level of care if: • The individual is making progress but has not yet achieved the goals articulated in the individualized treatment, recovery, and rehabilitation plan. Continued treatment at this level of care is assessed as necessary to permit the individual to continue to work toward their treatment goals, or • The individual is not yet making progress, but has the capacity to resolve their problems. The individual is actively working toward the goals in the individualized treatment, recovery, and rehabilitation plan. Continued treatment at this level of care is assessed as necessary to permit the individual to continue to work toward their treatment goals, or • New problems have been identified that are appropriately treated at this level of care. This level of care is the least intensive level of care at which the individual's new problems can be addressed effectively • To document and communicate the individual's readiness for discharge or need for transfer to another level of care, each of the six dimensions of the ASAM criteria must be reviewed. If the criteria apply to the

	individual's existing or new problem(s), they should continue in treatment at the present level of care
