Basic Definition	<p>Outpatient family substance use disorder therapy describes the professionally directed evaluation, treatment and recovery services for individuals and their families who are experiencing a substance related disorder that causes moderate and/or acute disruptions in the individual’s life. Outpatient family substance use disorder therapy is a therapeutic encounter between the licensed professional, the individual, and the nuclear and/or the extended family as defined by the individual. The goal is to use the family’s strengths and resources to help find or develop ways to live without maladaptive use of substances</p>
<p>Service Expectations</p> <p>(This service is referenced in Regulations Title 471 Chapter 20)</p>	<ul style="list-style-type: none"> • Substance use disorder (SUD) assessment: by a licensed clinician, operating within their scope of practice, must be completed prior to the beginning of treatment and meet the requirements as noted in the SUD Assessment Medicaid Service Definition <ul style="list-style-type: none"> ○ If a substance use disorder assessment was conducted within the previous 12 months prior to admission to the service, and is determined to be clinically relevant, it can serve as the service admission assessment. If there is new information available, an update to the SUD assessment must be documented in the form of a SUD addendum. The SUD addendum must reflect the individual’s current status ○ If a substance use disorder assessment was not conducted within the previous 12 months prior to admission to the service, or the prior SUD assessment is not relevant and does not contain the necessary information, then a substance use disorder assessment must be performed

	<ul style="list-style-type: none"> • An initial treatment, recovery, and rehabilitation plan must be developed within 24 hours to guide the first 30 days of treatment • Develop an Individualized Treatment, Rehabilitation, and Recovery Plan, including discharge plan and relapse prevention, with the individual (consider community, family and other supports) within 30 days of admission • Review and update the Individualized Treatment, Rehabilitation, and Recovery Plan every 90 days or more often as clinically indicated. Review must be completed under a licensed clinician with the individual and must include family, guardians, other supports as authorized by the individual • Provide access to Medication Assisted Treatment (MAT) as medically appropriate • This therapy is to be provided with the appropriate family members and the individual. While the services follow clinical protocols and best practices, they must be tailored to each individual’s level of clinical severity and be designed to help the individual achieve changes in their alcohol or other substance using behaviors • Focus on the level of family functioning and health as a whole. Family therapy must address issues related to the entire family system. • Interventions target major lifestyle, attitude and behavior issues that may undermine treatment goals or impair the individual’s ability to function in at least one life area • Consultation, referral, or both for medical, psychological, and psychopharmacology needs • Discharge planning is an ongoing process that occurs through the duration of service. A Discharge summary must be completed prior to discharge • Initial and full Individualized Treatment, Rehabilitation, and Recovery Plans, Discharge Planning and Discharge Summaries must be completed in accordance with the requirements outlined in the document titled <i>Medicaid Requirements for Behavioral Health Services</i> • All services must be provided with cultural competence • Crisis assistance must be available 24 hours a day, 7 days a week
