

Service Name	CONFERENCE WITH CLIENT
Setting	A professional outpatient office, clinic, home, or other environment appropriate to the provision of conferencing with an individual and/or number of people.
Facility License	As required by DHHS Division of Public Health
Basic Definition	A case conference is the sharing of clinical information about the individual with the parents, legal guardians or other involved parties. Case conference services are available to Medicaid eligible children with a DSM (current version) diagnosis.
Service Expectations basic expectations for more detail see Title 471 chapter 32	<ul style="list-style-type: none"> • The case conference is part of the individual's treatment plan. • Treatment interventions are based on needs identified in the initial diagnostic interview (IDI) or subsequent assessments. • Treatment is focused on specific treatment goals inclusive of the culture, expectations and needs as identified by the youth and parent/caregiver. • Case conferences are an active treatment intervention and not simply an exchange of information between the provider, caregiver(s) and other involved parties.
Length of Service	Length of conference is one session.
Staffing	Staff acting within their scope of practice may provide this service and may include any of the following: <ul style="list-style-type: none"> • Physician • Physician assistant • Advanced Practice Registered Nurse (APRN) • Licensed Psychologist • Provisionally Licensed Psychologist • Licensed Independent Mental Health Practitioner (LIMHP) • Licensed Mental Health Practitioner (LMHP) • Provisionally licensed Mental Health Practitioner (PLMHP)
Desired Individual Outcome	The outcome is expected to improve the individual's condition by facilitating further development of the treatment plan.
Admission Guidelines	<ul style="list-style-type: none"> • For psychological evaluations: the individual has a need for the results of psychological testing be reviewed with parents/caregivers, or other involved parties. • For all other purposes: the individual is to be receiving individual therapy and there is a need for planned treatment interventions to be implemented and reviewed with parents/caregivers, or other involved parties.
