

## Isbeddellada Gaadiidka ee La Ansixiyey iyo kuwa Aan La Ansixin

Waxyaabaha soo socda **ma aha** liis dhamaystiran ee ku saabsan waxyaabaha lagu daray ama laga reebay. Xafiiska Dhexe ee DDD wuxuu dib u eegi karaa nooc kasta oo kale oo isbeddel gaadiid ah.

| Isbeddellada La Ansixiyey                                                                                                                                                                    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Kor-u-qaade Kursi                                                                                                                                                                            |
| Kor-u-qaadayaasha Curbsider ama Joey ee kuraasta curyaamiinta                                                                                                                                |
| Dib-u-habaynta buuxda waxaa ka mid ah sagxad hoose la dhigay/jaranjaro fudud oo dhulka ku jirta, shaqo gaadhiga hoos loo dhigo, saqaf la koryeley, iyo jaranjaro fudud (koronto ama gacanta) |
| Xakamaynta Gacanta                                                                                                                                                                           |
| Kor-u-qaade ama Qaade Harmar                                                                                                                                                                 |
| Furitaanka albaabka oo hoos loo dhigay                                                                                                                                                       |
| Nidaamka cusub ama beddelka ah ee lagu xiro kursiga curyaamiinta                                                                                                                             |
| Dayactir lagu sameeyo isbeddelka gaadhiga ee hadda jira (gudaha 5 sano gudahood)                                                                                                             |
| Gacan-wareejiyaha isteerinka                                                                                                                                                                 |
| Saxan ama barkin wareega                                                                                                                                                                     |
| Kuraasta Turny Evo                                                                                                                                                                           |
| Nidaamka Xajinta Kursiga Curyaamiinta                                                                                                                                                        |
| Kuraasta Rarida Kursiga Curyaamiinta                                                                                                                                                         |
| Qaade kursi curyaamiinta ama skuutar oo lagu rakibo saqafka ama dhabarka gaariga                                                                                                             |
| Kor-u-qaade/wiish kursi curyaamiinta ama skuutar                                                                                                                                             |

| Wax ka badalid aan la ansixin                                                                            |
|----------------------------------------------------------------------------------------------------------|
| Qalabka alarmiga ama amniga                                                                              |
| Qalabka ama isbeddellada hore loo iibsaday ama la dhammeeyey                                             |
| Adeegga gurmada waddada                                                                                  |
| LoJack (qalab raadraac gaadiid ah)                                                                       |
| Isbeddel aan la xiriirin helitaan fudud ama baahiyaha la xiriira naafonimada                             |
| libsashada gaari sida baabuur ama van (ka faaiidaystuhu waa inuu keenaa gaadhiga u baahan isbeddellada). |
| Dayactir joogto ah iyo hagaajin la xiriirta gaariga laftiisa                                             |
| Aalada amniga                                                                                            |
| Adeegyada rukumaynta (qorshaha dayactirka joogtada ah, OnStar, adeegyada raadiyaha satellite-ka, iwm)    |
