

**477-000-039 – Life Expectancy Tables**

From Social Security’s Online Actuarial Publications “Period of Life Table.”

A period life table is based on the mortality experience of a population during a relatively short period of time. Here we present the 2013 period of life table for the Social Security area population. For this table the period life expectancy at a given age represents the average number of years of life remaining if a group of persons at that age were to experience the mortality rates for 2013 over the course of their remaining life.

**Period Life Table, 2013**

<sup>a</sup> Probability of dying within one year.

<sup>b</sup> Number of survivors out of 100,000 born alive.

Note: The period life expectancy at a given age for 2013 represents the average number of years of life remaining if a group of persons at that age were to experience the mortality rates for 2013 over the course of their remaining life.
