Case Management

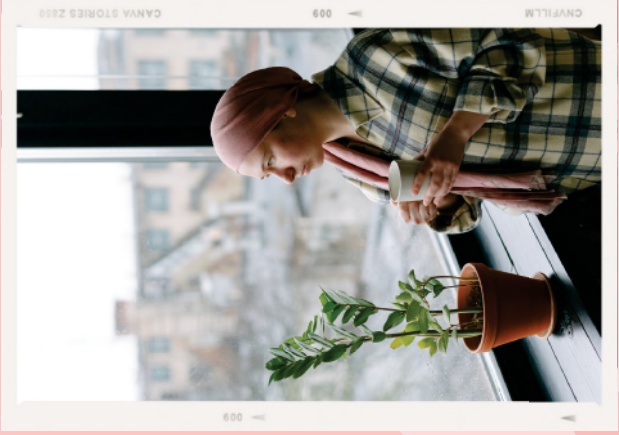

Case management involves everything from connecting with the client immediately after their appointment, helping to set follow-up appointments, to linking them with external resources to address social determinants of health.

This is where we would give the client her gas card to attend her mammogram appointment.

- 2014-2015: Served 14 clients
- 2016-2017: Served 34 clients
- 2017-2018: Served 107 clients
