

Nebraska Medicare Part D Program

The **Nebraska Medicare Part D Program** is coordinated through UNMC in conjunction with the ADAP. Eligibility requirements must be met in order for the Program to assist clients with services. It is a requirement that all Medicare Part D eligible clients who are enrolled in ADAP be enrolled in Medicare Part D. Since Medicare is a Federal health benefits and entitlement program, the CARE Act payer-of-last-resort requirement applies. The Program is directed by the federal government and requires all Medicare-eligible ADAP clients to enroll in the prescription drug benefit.

Nebraska Ryan White Part B funds may be utilized for the payment of Medicare Part D Insurance Premiums and other services for ADAP enrolled clients who are eligible for Medicare Part D in accordance with Program requirements. Please contact the Program for more information and updated eligibility information.
