## Introduction

This report summarizes the results of the *2024 Synopses of State Dental Public Health Programs* (2024 Synopses); which represents the status of the state oral health program during the 2022-2023 fiscal year. Each January, the Association of State and Territorial Dental Directors (ASTDD) distributes the Synopses questionnaire to the 50 states and the District of Columbia. The purpose of the questionnaire is to obtain current information from each state on demographic, infrastructure, workforce, and administrative factors that impact the state's oral health program. In addition, each state is asked to provide detailed information on the services they provide to their constituents. State specific information from the 2024 Synopses is available in a comprehensive report posted on the member's only section of the ASTDD website ([www.astdd.org](http://www.astdd.org)). The 2024 Synopses questionnaire was returned by 48 states plus the District of Columbia. New York did not return the questionnaire and Wyoming did not have an oral health program during FY 2022-2023.

## Demographics

Each age and income group have unique oral health needs. To plan a comprehensive program that serves all population groups, oral health program staff must understand the demographics of their state. The following tables present information on the number of states by the percent of their overall population that is 65 years or older or 0-19 years of age.

### Seniors – Percentage of Population Aged 65 Years and Older (2022)

Percent of Population $\geq$ 65	Number of States	Percent of States
< 15.0%	4	7.8%
15.0 – 16.9%	9	17.6%
17.0 – 18.9%	24	47.1%
19.0 – 20.9%	8	15.7%
$\geq$ 21.0%	6	11.8%

Includes all states and the District of Columbia

### Children – 0 to 18 Years (2022)

Percent of Population 0-17	Number of States	Percent of States
< 20.0%	4	7.8%
20.0 – 21.9%	10	19.6%
22.0 – 23.9%	21	41.2%
24.0 – 25.9%	14	27.5%
$\geq$ 26.0%	2	3.9%

It is well documented that low-income individuals have more oral health problems compared to higher income individuals. The following tables present information by various measures of poverty. Title XIX Medicaid and the Children’s Health Insurance Program (CHIP) provide medical and dental coverage to low-income children.

### Title XIX Medicaid Children (Number ever enrolled, FFY 2021)

Number of Children	Number of States	Percent of States
< 100,000	6	11.8%
100,000 – 249,999	10	19.6%
250,000 – 499,999	9	17.6%
500,000 – 749,999	12	23.5%
750,000 – 999,999	4	7.8%

The National School Lunch Program is a federally assisted meal program operating in public and nonprofit private schools and residential childcare institutions. It provides nutritionally balanced, low-cost (reduced price) or free lunches to children each school day. The program was established in 1946 under the National School Lunch Act. To be eligible for free lunches a child's family must be at or below 130% of the Federal Poverty Level (FPL) while the upper income for reduced price lunches is 185% of FPL.

**Percentage of Children Receiving Free or Reduced-Price School Lunches (2022-2023)**

As previously mentioned, low-income individuals have more oral health problems compared to higher income individuals. The percent of children living in households at or below 125% and 200% of Federal Poverty Level (FPL) are common indicators used to describe the socioeconomic status of a state.

#### Children under 18 in families earning less than 125% of FPL (2022)

## State Infrastructure

When planning community programs, it is essential that oral health program staff know and understand their state's infrastructure. Especially important to oral health is community water fluoridation.

**Percentage of Population Served by Community Water Fluoridation (2020)**

Percentage of Population	Number of States	Percent of States

## Dental Workforce

Dentist-to-population and hygienist-to-population ratios are commonly used indicators of dental workforce and access to dental professionals. The following two tables provide information on the dentist and hygienist to population ratios. Please note that these ratios are based on the number of dental professionals living in the state rather than those licensed to practice in the state.

### Active Dentists to Population Ratio

Dentist to Population Ratio	Number of States	Percent of States
< 1,500	12	23.5%
1,500 – 1,999	25	49.0%
