ND—Rates based on less than 20 cases are statistically unreliable and are not displayed (ND).

Rates are per 100,000 population (excluding gender-specific sites, which are per 100,000 male or female population) and are age-adjusted to the 2000 US population.

[∇]regional rate is significantly lower than the state rate (95% confidence level). ▼regional rate is significantly lower than the state rate (99% confidence level). Δregional rate is significantly higher than the state rate (95% confidence level). ▲regional rate is significantly higher than the state rate (99% confidence level).
