Updated 07/2024

Medicaid Tobacco Cessation Benefits

The Nebraska Medicaid tobacco cessation program covers certain counseling and products to help patients voluntarily quit tobacco.

All seven FDA-approved nicotine replacement therapies are available to Medicaid patients when prescribed by their health care provider. Covered nicotine replacement therapies include:

- Nicotine Transdermal Patches
- Nicotine Gum
- Nicotine Lozenge
- Nicotine Inhaler
- Nicotine Nasal Spray
- Bupropion*
- Varenicline*

**For medication, see each Plan's information for criteria and limitations*

Summary of Tobacco Cessation Coverage

[\(Provider Bulletin 22-06\)](#)

- Effective December 26, 2021, clients are **no** longer required to enroll in the free Nebraska Tobacco Quitline to be able to receive tobacco cessation products; enrollment is still encouraged, but it is no longer required.
- Beneficiary must be 18 years or older
- Products must be FDA-approved and used according to FDA dosing and age guidelines
- Prescription is required
- A maximum of eight counseling sessions per calendar year is allowed
- Licensed pharmacists who are trained as department-approved tobacco cessation counselors in Nebraska may bill for Tobacco Cessation Counseling (Title 471 NAC 16 Nebraska Medicaid Program Services)
