

**COSMETOLOGY AND ESTHETIC SALON
 REQUIREMENTS and INFORMATION**

REQUIREMENTS:

1. Separate entrance (the entrance for a commercial location may be from a public foyer or area).
2. At least 150 square feet for one licensee and 50 additional square feet for each additional licensee.
3. Restroom facilities within the salon that are for salon use only. If you are considering having a salon in your home, there must be a dedicated restroom in the salon and another restroom for family use. A commercial location may use public restrooms.
4. A home salon is allowed one connecting door for the licensee's use only for passage from the home to the salon.
5. If licensed cosmetologists provide nail services, they must follow the Nail Technology Sanitation and Safety Regulations in addition to Cosmetology salon sanitation regulations.

APPLICATION: Before a salon can operate, an application, self-inspection, sketch of the salon, proof of liability insurance, and fee of \$150 must be submitted, and the application approved by the Department.

SKETCH: Your sketch must show the **TOTAL** square footage and the **following**:

<ul style="list-style-type: none"> • All entrances and exits • restroom facilities 	<ul style="list-style-type: none"> • reception area • storage area 	<ul style="list-style-type: none"> • equipment (such as sinks/stations), and • dispensary or sanitizing area
--	--	--

If the information above is not shown on your sketch, it will be returned so it can be added. Also, please **do not** use the edge of the paper as the outside walls of the salon. The outside walls should be drawn according to the shape of the area and then the interior should be added. **ALL** areas and/or rooms must be labeled.

HOME SALONS: For a **home salon**, show the connecting door from the salon to the rest of the home. This will help us determine if the salon is separate from the living quarters and also be certain the entrance is for salon use only. Home salons must be permanently separated (by solid walls) from all living areas but may have the connecting door for the cosmetologist's use only. The entrance used by clients must lead directly from the outside into the home salon this entrance **cannot** also be used for entry into the living area.

BARBER AREA: A cosmetology salon and barber shop may occupy the same location but each area must be distinct and the barber area must be identified by a sign stating 'barber area or barber shop'. A person entering the establishment must be able to determine which area is cosmetology and which area is barbering, therefore, we request that signs be placed designating the areas as "Cosmetology" or "Barber". Even though the two areas are together, the cosmetology salon must meet the above requirements for licensure with the exception of the separate entrance. One entrance may be used for both the cosmetology salon and barber shop. The reception area, storage area, and dispensary may also be shared, but the actual "practice areas" must be separate and distinct (including separate shampoo bowls). When submitting the sketch of the salon, please be **very** detailed in showing each area, labeling them "cosmetology" or "barber", and the amount of square footage allowed for the cosmetology salon.

OTHER INFORMATION: If you are building or remodeling a home salon, you **may** submit a sketch for pre-evaluation **before** any construction begins. We suggest you check with the city offices to be certain there are no regulations preventing the operation of a salon at your location. Each salon must have the name displayed on or above the entrance providing it does not conflict with city ordinances.

NAIL TECHNOLOGY: A separate nail technology salon license is not required if nail services performed by nail technicians are part of the cosmetology salon and **is not** a separate business. However, all advertising must be done under the name of the cosmetology salon, and the nail area **cannot** use a different business name. If a nail technician wishes to have a separate nail business within a cosmetology salon using a different business name, a separate nail technology salon license is required.

ALCOHOL WITHIN A SALON: Effective July 19, 2018, salons can serve intoxicating beverages to clients if the salon desires to do so and if the salon **has a permit through the Nebraska Liquor Control Commission**. *This change does not apply to Barber shops, mobile salons, or schools and does not allow licensees or employees to use or consume intoxicating beverages upon the salon premises.* **NOTE: Before providing alcohol** to your clients, you must meet all requirements of the Nebraska Liquor Control Commission, obtain a permit through this commission, and meet any city ordinances if applicable. The Nebraska Liquor Control Commission web site is: <https://lcc.nebraska.gov> and phone number: 402-471-2735 or 402-471-4885 or 402-471-2896.

THIS INSPECTION REPORT MUST BE POSTED FOR PUBLIC VIEWING

Column A: (Indicate "N/A" for Areas not applicable) Yes/No

Column B: (Indicate "N/A" for Areas not applicable) Yes/No

EQUIPEMENT AND MATERIALS			IMMERSION DISINFECTION		
1. Nail dusters or hand dusters are NOT used			21. Foreign matter removed.		
2. Nail buffers are properly disinfected between clients.			22. Hands washed with liquid soap and water or instant hand sanitizer.		
3. Manicure brushes made of plastic or nylon, are disinfected after each use.			23. Implements washed with hot water and soap.		
4. Client hand supports have plastic or vinyl coverings.			24. Implements rinsed after washing.		
5. Disinfection containers are deep enough to fully immerse implements and tools and are available for disinfecting implements and tools.			25. Implement placed in a disinfectant.		
6. If providing nail technology services, a trash container is located at each station			26. Disinfectant solution is deep enough to completely cover implements.		
7. Dry use implements made of materials that melt when wet, such as wood or cardboard and nail drill disposable bands are discarded in a closed waste receptacle immediately after use.			27. Implements stay in the disinfectant solution for the full contact time as listed on the manufacturer's label.		
8. When providing cosmetology or esthetic services, disinfected brushes, such as plastic, nylon, sable, or natural hair when used, are sanitized between clients in accordance with the manufacturer's instructions.			28. Disinfectants are disposed of at the end of the day and fresh disinfectant made at the beginning of each work day. If the disinfectant becomes contaminated or cloudy, it is changed immediately.		
9. When providing cosmetology services, neck strips or a clean towel are used under a cape in order to prevent the cape. A sanitized or disposable cape, 1 per client, may be used in lieu of neck strips or towels.			29. Before removing the disinfected implements, hands are washed with liquid soap and water or instant hand sanitizer.		
10. Supplies and implements which come in direct contact with a client and cannot be disinfected, such as cotton pads, cotton balls, paper neck strips, orangewood sticks, pads, "Q-tips", sponges, and other similar items, are disposed of in a covered waste receptacle, with a plastic liner, immediately after use.			30. Air-dried on a sanitary surface for at least 10 minutes, dried with a clean towel, or with an electric air sanitizer.		
11. A first aid kit is available.			31. Stored in a clean enclosed cabinet or covered container reserved for clean implements.		
DISINFECTANT MIXING, DISPOSAL, AND LABELING			SPRAY DISINFECTION		
12. All disinfectants are mixed as directed on the manufacturer's label.			32. Foreign matter is removed.		
13. If disinfectant becomes contaminated or cloudy, it is discarded immediately.			33. Hands are washed with liquid soap and water or instant hand sanitizer.		
14. Disinfectant containers are covered at all times and large enough to completely cover all implements and tools, including the handle, that are placed in the container.			34. Implements are sprayed and totally saturated with a disinfectant.		
15. A manufacturer's label for all disinfectant concentrate is available at all times. If a concentrate bottle is emptied, it is available until a new bottle is obtained.			35. The disinfectant remains in full contact with the implement as listed on the manufacturer's label.		
16. When mixed disinfectant concentrate is placed in a secondary container such as a spray bottle, tub or jar, that container is labeled to indicate what chemical is in the container.			DISINFECTANT WIPES		
17. Disinfectants are disposed of in accordance with all local, state and federal standards.			36. Steps 21-24 and 30-31 for Immersion are followed		
BLOOD SPILL PROCEDURE			37. Surfaces wiped and remain visibly moist for the contact time listed on the label. When using a wipe to clean and a second wipe to disinfect, steps 23 and 24 are not required.		
18. Client injury procedure followed.			METAL IMPLEMENTS		
19. Licensee/Student injury procedure followed.			38. All metal implements are immersed in a disinfectant following IMMERSION procedures except that nail tip cutters may be sprayed with a disinfectant.		
20. No Styptic pencils used.			AUTOCLAVE		
			39. If using an autoclave, follows manufacturer's instructions. Autoclaves are cleaned and serviced at the frequency recommended by the manufacturer.		
			ELECTRICAL APPLIANCES		
			40. Electrical appliances such as drills, electric files, airbrush machines, polish dryers, gel lights, footbaths, foot spas, paraffin wax warmers, clippers, blow dryers, thermal curling irons, microdermabrasion machines, facial machines, and similar portable electric powered appliances are clean. Disinfection process included: (A) Removing all foreign matter. (B) Spraying with a disinfectant or use a disinfectant wipe. (C) Wiping dry with a clean towel.		

Column A: (Indicate "N/A" for Areas not applicable) Yes/No

46. Floors clean & free of unsafe objects/uneven surfaces.		
47. Doors, stairways, passageways, aisles, or other means of exit are safe and provide adequate access.		
48. Electrical appliances clean and safe/no bare wires (blow dryer, curling iron, clippers, wax machines, etc).		
49. Water or product spills on the floor are removed immediately and the floor dried.		
RESTROOM FACILITIES		
50. Toilets and sinks are clean and operational.		
51. Suitable holders for toilet paper are in restroom.		
52. There is an adequate supply of toilet paper.		
53. There is a clean waste receptacle.		
54. There is a Sink with hot and cold running water.		
55. There is Liquid soap.		
56. There is a Single-use disposable towels/appropriate clean holder or electric hand dryer.		
TABLES AND CHAIRS		
57. Tabletops are disinfected immediately following each client.		
58. Nail stations & client chairs are disinfected @ end of day		
LAUNDRY FACILITIES (If have laundry facility)		
59. Is Clean, including washer and dryer.		
60. There is a Receptacle to store soiled towels.		
CHEMICAL STORAGE		
61. Flammable and combustible chemicals are stored away from potential sources of ignition (open flame/electrical).		
62. Stored in closed bottles/containers and labeled.		
STORAGE UNITS		
63. Cabinets, drawers, containers used for storage of implements and towels are clean.		
SUPPLIES AND IMPLEMENTS		
64. Unused supplies are stored in a clean, closed container or drawer.		
65. Used or soiled disposable supplies are discarded immediately in a clean, closed waste receptacle with a plastic liner.		
66. Implements used on a client or soiled are placed in a properly labeled covered receptacle until disinfected		
67. Disinfected implements are stored in a clean closed container or drawer until used.		

Column B: (Indicate "N/A" for Areas not applicable) Yes/No

TOWELS AND LINENS		
70. Used or soiled cloth towels and linens are NOT used again until laundered and dried.		
71. Containers for used linens are covered and have vented sides to reduce the growth of pathogens. Containers used for soiled linens are disinfected weekly with disinfectant sprays or wipes.		
72. Clean cloth towels and linens are stored in a clean, covered container, drawer, or cabinet until used.		
73. Disposable towels are discarded in a covered waste receptacle immediately following each service.		
74. Towels used in towel warmers are washed and dried at end of the day and stored overnight in a clean, covered, closed container.		
75. If use hot steamed towels the following applies: (i) Towel warmers are disinfected daily with a disinfectant wipe or spray; (ii) Towels used in a warmer are washed with detergent and bleach and dried using a hot dryer setting. (iii) Licensees preparing towels for the warmers first wash their hands or wear gloves. (iv) Wet towels used in services are prepared fresh each day. At the end of the day, unused steamed towels are removed and laundered.		
76. If use towel warmers, they are left open overnight to allow unit to dry completely.		
PRODUCTS		
77. Artificial nails or nail enhancements are removed in accordance with manufacturer's directions.		
78. When only a portion of the product, except for nail polish, is used on a client, the product is removed from the container by a spatula, scoop, spoon, or dropper		
79. All liquids, cosmetics, creams, gels, pastes, powders, and other products are kept in clean, closed containers.		
80. Original product bottles and containers have an original manufacturer label.		
81. If a product is poured into another container, such as a shaker, dispenser pump container, or spray container, the container is labeled to identify the product. Dappen or acrylic liquid dishes do not need labeling.		
SAFTY DATA SHEETS (SDS)		
82. SDS for every product for cosmetology/esthetic client services, and for every disinfectant, are accessible at all times to all employees either by paper or electronically.		
PARAFFIN WAX (CLIENT HANDS AND FEET)		
83. When used on one client is NOT re-melted and used on another client.		
84. Is removed from the machine with a clean, single-use applicator.		
85. Paraffin wax machine is clean.		
86. Is portioned out for each client in a bag or other container, or dispensed in a manner that prevents contamination of the unused supply. All portions used on a client are disposed of immediately following use.		

Column A: (Indicate "N/A" for Areas not applicable) Yes/No

Column B: (Indicate "N/A" for Areas not applicable) Yes/No

			WAX (HAIR REMOVAL)	
68. Used product application brushes are cleaned and stored in a clean closed container after each client.			87. Wax used on one client is NOT re-melted and used on another client.	
69. Tools and implements are NOT placed in or on clothes, aprons, pockets, bags, or holsters, or worn by the licensee, and do NOT come into contact with surfaces that have not been disinfected.			88. Wax is removed from the machine with a clean single-use applicator.	
			89. The wax machine is clean.	

PIPED AND PIPELESS FOOTBATHS AND FOOT SPAS		
AFTER PEDICURES		
90. Water is drained from the basin.		
91. All debris is removed from the basin and components, and the top and bottom of the footplate, knobs and screen. Low-sudsing soap or detergent and a non-abrasive brush used. Removed all visible residue from the inside of the basin and all other components.		
92. For pipeless footbaths and foot spas, components, screen, surfaces and basin are cleaned with a disinfectant. Let stand for at least 10 minutes following the manufacturer's recommendations.		
93. For piped footbaths, foot spas, or portable circulating footbaths, the basin is filled with water and a disinfectant and circulated. The disinfection solution goes everywhere the water was and stay there for at least 10 minutes.		
94. The basin and components are rinsed again with clean water.		
95. The basin and all other components are thoroughly with a clean towel.		
AFTER PEDICURES USING A DISPOSABLE LINER		
96. Replaced the liner with a new liner for each client.		
97. Any time the base of the footbath or foot spa becomes contaminated, the liner is replaced immediately and the footbath or foot spa disinfected.		
AT THE END OF THE WORK DAY FOR PIPED FOOTBATHS AND FOOT SPAS
