0 25 50 Miles

Data are provisional and subject to change.

A case is a child that is less than 6 years old with a confirmed or suspect blood lead level greater than or equal to 5 micrograms per deciliter in calendar year 2021.

Counts, where applicable, are shown after Local Health Department name and suppressed if there are less than 5 cases in a Local Health Department.

Data source: Nebraska Childhood Lead Poisoning Prevention Program, October 2022.
